DOCUMENT No. 1.

BOARD OF COUNCILMEN,

JANUARY 1, 1855.

The following ANNUAL MESSAGE of his Honor the Mayor, was received, read, directed to be entered at length on the minutes, and double the usual number of copies ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

To the Honorable the Common Council

of the city of New York:

GENTLEMEN—In assuming the duties of Chief Magistrate of this great city I am conscious of its responsibilities and requirements. I shall endeavor to supply my want of experience and knowledge by an entire devotion to the public interests, and hope, by a faithful discharge of my official trusts, to meet the approbation and receive the support of your Honorable Body and my fellow citizens.

The present is not an auspicious time to commence a new administration; it is beyond the ability of any man, exercising the duties of this office under the city charter, to give this people that government which appears to be so generally expected, and which is certainly so much required.

However we may differ as to the cause, there can be no doubt of a pervading dissatisfaction with the municipal affairs of this city; that this feeling exists, and that there are sufficient grounds for it, all must admit; whether it

arises from defects in the fundamental laws, or from improper local legislation, or from maladministration upon the part of those intrusted with the executive duties, are questions upon which there is diversity of opinion; in my judgment all of these are the causes.

The amended charter of 1830 was preferable to the present system. Admitting that it required modification, the subsequent amendments have but increased the difficulties.

The allegation that it was inadequate to the increased size and wants of the city, was, in my opinion, entirely without foundation.

The constitution of the United States is as applicable to the present greatness of the Republic as it was to the Federal Union at the time of its adoption. Had amendments been made to it at the instance of every party or statesman who deemed it insufficient, we should have fallen to the same condition as a nation that this city has as a corporation.

The mistake in disturbing the charter of 1830, was not only in the alterations effected, but also in the introduction of an uneasy spirit in the people, who, by the continual application to state legislation, have been taught to look to foreign remedies for domestic abuses.

Thus have we transferred to Albany much that could have been better cared for among ourselves; forgetting the old republican maxim, that no power should be delegated which can be exercised by the people themselves. — This principle should never be forgotten. It was faithfully adhered to by the framers of the national constitution. In all countries and in all ages, the utmost caution has been observed in granting to representatives the right of even ordinary legislation.

We should not present the first instance in which a people voluntarily surrenders the power to form the organic laws, yielding, that highest of all prerogatives, to men who owe us no responsibility, are not chosen by our suffrages, who are foreign to our interests, do not understand our wants, and who, consequently, are liable to become the tools of designing men, having selfish or corrupt objects of their own to obtain.

Amendments to the charter of 1830, have, one after another, been adopted at Albany, until now, we are administering the government by portions of six different charters, which create nine Executive Departments, having undefined, doubtful, and conflicting powers, with heads elected by the people, each assuming to be sovereign, and independent of the others, of the Mayor, or of any other authority; and beyond the reach of any, except that of impeachment by the Common Council, which never has been, and probably never will be exercised.

This irresponsibility has been productive of carelessness in expenditure, and negligence in the execution of the ordinances.

Thus, in the attempts to remedy defects by foreign aid, which could have been accomplished at home, we have fastened upon ourselves a complicated, many-headed, ill-shaped and uncontrollable monster, which has not, in my opinion, developed its worst characteristics.

So far as my duties are defined I feel some embarrassment. Even co-ordinate powers with the several executive departments are denied to me in some quarters; and the fact that my predecessors, under the new charters, have not attempted their exercise is relied upon as sustaining this position.

Without desiring to question the wisdom of those who

have preceded me in this office, I must be permitted to construe my powers and duties as I understand them. Restricted as the prerogatives of the Mayor have been by almost every legislative act appertaining to the government of this city, for several years, still there is sufficient left to instill more energy into the administration than now exists, and to hold at least a supervisory check over the whole city government.

It is true, that though ostensibly head of the Police Department, he is not so practically, in the essential elements of authority, that of controlling the retention or removal of his own subordinates. The Chief of Police holds his place independent of the Mayor, that officer having been appointed during "good behavior," by the late Mayor and Board of Commissioners, under the law of 1853, which they construed to give that authority. He cannot, *solus*, appoint or remove the humblest subordinate in the service, nor make the rules and regulations for its governance. Of these requisites of power, so necessary to make an efficient police corps, he is by law deprived. Discipline can only be obtained and maintained, by the firm hand of unrestricted power; besides, it is wrong in principle, to make any public officer responsible for the acts of subordinates, who are placed beyond his individual power to remove.

These are some of the evils arising from the frequent application to state legislation for this city. Instead of a simple form of government, easily understood, the power of its officers so well defined, that there could be no conflict or misunderstanding, we have one, full of the objections referred to.

It is not my purpose, at this time, to indicate a substitute, though I cannot omit to add my belief, that the most

perfect form of government, was that adopted by the framers of the Federal Constitution. Its clear and simple provisions are equally applicable to municipal corporations, or to a nation of a hundred millions. The Mayor should be to the city, what the President is to the general government. There should be corresponding executive departments, with heads selected by the Mayor, (subject to the confirmation of the Board of Aldermen,) who should have entire control, and be, himself, responsible to the people. The Mayor and Heads of Departments should meet in council, and have a general uniformity of action and co-operation with each other, in carrying out the laws and preserving the general interests of the city. Over the whole should govern the Chief Magistrate; he should have the one-man power, which history teaches is the least dangerous, and the most positive for good.

Certainly we have suffered more from legislative assumptions, or misconduct of subordinates in authority, than from the tyranny or corruption of a chief ruler.

Precedent shows there is safety in the latter, not only in the exercise of authority for the public weal, but as a barrier against the wrong doings of the former. The stronger the head the more healthy the body; but if strength is taken away by diverting it to a multitude of heads, the whole becomes enervated, and unable to discharge its functions.

Concentration, with ample power, ensures efficiency, because it creates one high responsible authority. Decentralization is subversive of all good executive government.

This want of concentration has been the prime cause of the immense load of taxation which we now bear. To compare the relative taxation per individual, under the charter of 1830, and that now existing, will prove this assertion.

In 1843 the amount raised by tax for the support of the city government, was one million seven hundred and forty-seven thousand five hundred and sixteen dollars and fifty-nine cents; whereas, in 1853, it was five millions sixty-seven thousand two hundred and seventy-five dollars and sixty-nine cents, and this year it is nearly six millions; a startling increase. Need you be told that this addition of two hundred and fifty per centum, is the result of either corruption or wasteful extravagance, the natural consequence of irresponsibility.

And here let me diverge to remark that to tolerate profligate outlays of the public money, whilst nearly one-tenth of our whole population are in want of the necessities of life, is as shocking to humanity as it is injustice to a large and valuable class of our suffering fellow-citizens.

Surely we are admonished, that if this rate of taxation be continued, more of it should be devoted to the relief of the poor, whose industry bear most of its burthens, and who are now ringing into our ears their cries of distress. Labor was never so depressed as now. Employment is almost entirely cut off, and if procured, its remuneration is totally inadequate, owing to the high price of articles of subsistence. The prices of labor and of food bear no relative equality.

In ordinary times of general prosperity capital possesses advantages over labor.

Capital can always protect itself, and it is only at periods of inflation, when capital is directed to speculation in the products of labor, that the operative is appreciated, and his industry rewarded by competent compensation.

But now, when capital either timidly retreats, through fear, to the bank-vaults, or is diverted to the oppression,

for gain, of those who employ labor, his condition is sad enough. Does it not behoove us not only individually, but in our corporate capacity, to throw ourselves boldly forward to his relief?

This is the time to remember the poor!

Do we not owe industry every thing? It is its products that has built up this great city.

Do not let us be ungrateful as well as inhuman. Do not let it be said that labor, which produces every thing, gets nothing, and dies of hunger in our midst, whilst capital, which produces nothing, gets every thing, and pampers in luxury and plenty.

It is our duty to take and administer this government under the charters and laws as we find them, until a change is effected for the better. Valuable improvements can now be made, notwithstanding these objections to the system. All the evils of which the people complain are not chargeable to wrong legislation. If the Common Council will be more cautious in the passage of ordinances, especially those involving disbursements of money, holding fast to the purse-strings as against the harpies, who for many years have hovered around its chambers, and if the executive bureaux will co-operate with me in the rigid enforcement of the laws, and particularly in restraining expense, and exacting a faithful performance of every contract, we may do much towards removing the present discontent.

Most assuredly the people pay enough for the better administration of their public affairs; and it has never appeared to me that they were unreasonable in their requirements.

They ask public order—the suppression of crime and vice—clean streets—the removal of nuisances and abolition of abuses—a restriction of taxation to the absolute wants of an economically administered government, and a prompt ex-

ecution of the laws and ordinances. Let us endeavor to meet their expectations.

For myself, I desire to announce here, upon the threshold, that, as I understand* and comprehend my duties and prerogatives, they leave me no alternative, without dishonor, but to assume a general control over the whole city government, so far as protecting its municipal interests may demand it. I shall not hesitate to exercise even doubtful powers, when the honor or the interest of the public is abused

The public good will be sufficient warrant to insure my action. Under this law I shall proceed, not doubting your concurrence and the support of the people for whom the responsibility is assumed.

I have purposely omitted, in this communication, the usual recommendations and references to the affairs of the city. There are many prominent topics to which I will allude in another communication, to be made as soon as your body is organized and ready for business. I shall then make recommendations, which, if carried out, will reform many abuses, reduce the expenditure, and increase the revenue, without increased taxation. In the mean time, the usual annual reports will be made from the several departments, to which I ask your special attention.

With a hearty desire, that in our separate spheres, we may conduct the affairs of the city, so as to merit a continuance of its greatness, and with confidence in the ability and devotion to the popular will which influences the several members of your honorable body, I commend its deliberations to the protection of that All-wise Providence, which will, no doubt, so conduct its councils, as to insure the prosperity and well-being of the whole community.

FERNANDO WOOD.

JANUARY 1st, 1855.

DOCUMENT No. 2.

BOARD OF COUNCILMEN,
JANUARY 1, 1855.

The following annual report of the City Inspector, for the year 1854, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

CITY INSPECTOR'S OFFICE,
NEW YORK, January, 1855.

To the Honorable the Common Council.

The provisions of "an ordinance organizing the Departments of the Municipal Government of the city of New York," section 398, render it incumbent on me to transmit to the Common Council the usual Annual Report of the affairs and transactions incident to this office, comprising a full statement of the extent of mortality during the past year, with the sexes, ages, colors, nativities, and diseases of the deceased, as obtained from the certificates of death; in pursuance thereof, I respectfully submit for your inspection the following tables, statements, comparative estimates and suggestions, constituting the Official Record for the year 1854,

The arrangement of the proceedings gathered for exhibition, both detailed and summary, is presented in the following view or index, embracing a larger representation of relevant statistics than heretofore has been prepared for official publicity.

First,—General Summary—A statement of the total number of deaths reported to this Department during the year.—*Still-born, Premature Births, Casualties*, and other *External* causes, viewed exceptionally, with the proportions of sexes, colors, &c.

Second—The returns of the year, arranged to show the number of deaths in each month, and also the proportion of males, females, adults, and children,

Third—A table showing the place of nativity of the deceased, with the sexes defined.

Fourth—A statement exhibiting the mortality in the several Public Institutions, as occurring in each month of the year, with Nativity, &c.

Fifth—A table of the deceased colored persons, with the monthly exhibit during the year.

Sixth—A comprehensive statement of the *External* causes of death, giving the numbers, sexes, nativities, and monthly divisions for the year.

Seventh—Tabular statements of the monthly mortality during the year, containing in detail the various causes, sexes, ages, nativities and colors.

Eighth—Annual recapitulation, showing the aggregate from every cause, with sexes, ages, nativities and colors.

Ninth—Annual recapitulation in monthly divisions of the numbers, with sexes, ages, nativities, and colors.

Tenth—Annual recapitulation by classification, relative to functional invasion, exhibiting the numbers, sexes, nativities, colors, public institutions, adults and children; with a summary, representing the various diseases, in classes and orders, both distinct and combined.

Eleventh—Recapitulation of the total monthly returns of deaths for the year, with sexes, ages, nativities and colors.

Twelfth—Table of the mortality in each ward during the year.

Thirteenth—Table of mortality in each public institution for the year, showing the numbers, sexes, nativities, and ages, with the reported *diseases* exhibited, printed on a large fold leaf.

Fourteenth—Table of the deceased male adults, with numbers, nativities, colors and *occupations*, as far as reported—showing that of 5,746 in this class, 3,773, or nearly two thirds have their business returned to this department for record; with a *Recapitulation*, diseases and occupations classified and condensed.

Fifteenth—Table of the births during the year, with the sexes and colors.

Sixteenth—Table of the marriages during the year, with the conditions, sexes, ages, and colors.

Seventeenth—Meteorological register for the year, with important additions.

Eighteenth—Remarks and comparative statement, forming a brief review of the present statistics.

GENERAL SUMMARY.

Total number of deaths reported for interment during 1854	28,568
Deduct the number of <i>Still-born</i>	1,615
“ “ of <i>Premature Births</i>	435
	<hr/> 2,050
“ “ of <i>Malformation (various)</i>	147
“ “ of <i>Old age</i>	180
	<hr/> 2,377
“ “ of <i>Other causes (sudden)</i>	123
	<hr/> 2,500
Leaves the number of deaths occurring from <i>disease</i> and <i>casualties</i>	26,068
Deduction made of the number of deaths from various <i>Casualties</i> , <i>Suicides</i> , &c., noted as <i>injuries</i> , as per table of “ <i>External causes</i> ,” amounting in all to	743
Leaves remainder to represent the total number of deaths from <i>Disease</i> alone, amounting to	25,325
The divisions of the total number, appear thus:	
The total number of <i>whites</i> reported	27,867
“ “ “ <i>blacks</i> “	701
	<hr/> 28,568
The number of <i>male adults</i> is	5,746
“ “ “ “ <i>children</i> is	9,519
Total <i>males</i>	<hr/> 15,265
The number of <i>female adults</i> is	4,936
“ “ “ “ <i>children</i> is	8,367
Total <i>females</i>	<hr/> 13,303
The total number of <i>adults</i> is	10,682
“ “ “ “ <i>children</i> is	17,886
GRAND TOTAL	<hr/> 28,568

GENERAL REMARKS AND COMPARISON OF THE WEATHER WITH FORMER YEARS.

THE subject matter of the preceding tables, with the exception of the hygrometric element, has now been published in this report for eight consecutive years; it was first prepared by City Inspector A. W. White, for the year 1847, at the suggestion of Dr. Drake, a meteorologist of this city. Those wishing to make inferences from comparisons of the weather and mortality of different months and seasons will no doubt be amply repaid for their trouble; a few general remarks may, however, make the subject more interesting; all have been suggested by a comparison of the tables except those referring to moisture, vegetation, electricity, and ozone, and for these the writer, in addition to his own experience, has consulted with some of the oldest and most enlightened observers of the weather in this city. The prevalence of epidemic cholera for fully four months, makes it more difficult to draw conclusions from the mean readings of these months; yet if the phenomena of the weather be closely studied for that time, they will be found the more valuable. The weight of the atmosphere as shown by the height of the mercury in the barometer for the year ranged slightly higher than usual, particularly so in the drier months. The different winds produced the same weather generally, as in former years, and prevailed in about the same direction as common to the various months. The winter months were not quite as cold as in some former years; in humidity about the same: December was the coldest month, January the driest, and February the most bracing, as can be seen from the general range of the barometer. There was less ice in the rivers and harbors of New York than usual, the lowest point of the thermometer was 8° upon the coldest day; and its mean temperature 12°. March, although the same in general character as in former years, did not have quite as many days of high wind. April had the same changes, and having more rains than usual compensated for the rather dry character of January and February; May was pleasanter than in former years, being in fact an English May, after the poets; vegetation rather late, but not as much blighted by frost as usual. The whole summer was hotter and much drier than ordinary; the highest point of the thermometer was 98°, and occurred in July; the mean temperature of the hottest day was 88°. August was the driest month, and embraced the driest day, the air upon that day only contained one quarter of the moisture which it was capable of holding in suspension. Autumn weather mostly as usual, although September and October were drier; the latter was the finest month of the year for out-door exercise. The total amount of rain for the year, 35 inches, was much less than usual; the electricity was mostly positive, there being less cloudy weather than usual, and less rain; the different kinds of electricity were not as generally diffused; ozone was more manifest in the winter and spring, than during the summer. In the healthiest period of the year the temperature ranged from 60° to 70°, and the mean amount of moisture contained in a cubic foot of out-door air in the shade, was 4½ grains.

REMARKS.

The Health Department, in its Annual Report for 1854, presents to the Common Council for their inspection, a much more than ordinary collection of its current statistics, embracing a variety of relevant matter not usually gathered for exhibition, but which appeared worthy of the labor required for its compilation, if it be the object of this official publication to be serviceable to them in their legislative capacity, or useful to the public.

For a knowledge of the extent of subjects contained in these annals, attention is directed to the index in the commencement, which will furnish whatever tabular view may be sought, to obtain either general or detailed information of the Yearly Registry. The Review that follows will glance at the tables in their regular order, giving a cursory examination of their contents, and, as occasion may require, allude to topics having a connected interest.

The statute and ordinance by whose authority I am directed to annually report to the Common Council the business of this office, do not require so thorough and varied an elaboration of its proceedings. Those enactments hardly had in view the great benefits to be derived from the collection of complete statistics. They aimed simply to the record of such general matters as pertained to the identification of deceased parties, and not to the progress of scientific research, the advancement and success of

which so much depend upon the faithful collection and publication of every item of information having a bearing upon useful knowledge, and contributing to the accumulation of important facts; the present utilitarian age demanding these evidences of nature's operations, for the better understanding of her laws and principles, the wiser culture of human knowledge, and the more successful application of practical measures. The statistics of so large a city as New York can scarcely be too highly valued, and when properly collected and carefully collated, must be of importance wherever they are known and understood. The preservation of a single year's proceedings, as large and diversified as those of the one just past through, affords a ground-work for an extensive study and elucidation by those whose talents and acquirements are destined to benefit mankind; and as proof alone, not imagination, is now more generally sought for, in the progressive movements of knowledge, it cannot be otherwise than a work of paramount importance to gather up all relative matters in making out the volume of current incidents. The present Report, however imperfect it may be deemed, claims to be a faithful record, nothing more, and as such, I trust it will not be without its use wherever its contents may reach. I cannot close these brief prefatory remarks without acknowledging my indebtedness to the faculty in general—more particularly to the better class—for their improved certification of cases under their charge. A few neglect my oft-repeated desire to report thoroughly, but for the most part, a cheerful compliance is extended. And having in view a correct portraiture of the facts so numerous and certified during the past year, I trust the prolonged time occupied in placing them before the Common Council and

the public, will not be deemed to have been unnecessarily engaged, or idly spent.

The fullness of the tabular arrangement will preclude the necessity of a lengthened analysis, as previously given; the observations, therefore, will be few and brief, relying upon the various statements for whatever information may be the object of search or selection.

By referring to the index in the first pages of the Report, you will obtain a full description of the series of tables rendered to exhibit the registry for the past year in its various aspects.

GENERAL SUMMARY.

The statement thus entitled sets forth the whole mortality in this city during the year 1854, to be 28,568 persons; deducting the number of those produced by external causes, that is, aside from *disease* alone, in its more strict acceptation, to wit, 3,243, as shown in tabular form and fully explained, the remainder exhibits the reduced sum of 25,325 deaths occurring from the operation of legitimate diseases. The increase over the number reported during the previous year is 5,866, or nearly 26 per cent.—a very large advance; but owing, as will be readily remembered by the prevalence of *epidemic cholera*, which for four or five months existed in several parts of the city.

As a comparative estimation of this city's mortality for a few years back, may be useful, it is worthy of insertion:

In 1847, the records show the interment of 15,788 persons.

" 1848,	"	"	"	"	15,919	"
" 1849,	"	"	"	"	23,773	"

In 1850, the records show the interment of 16,978 persons.

" 1851,	"	"	"	"	22,024	"
" 1852,	"	"	"	"	21,601	"
" 1853,	"	"	"	"	22,702	"
" 1854,	"	"	"	"	28,568	"

The year 1854, therefore, shows the highest figure in the series; the mortality of 1849 the next highest period, being 4,975 less; and that of 1847, the lowest figure in the series, shows the much reduced number of 12,780 less than the heavy aggregate of the past unusually severe season.

The *epidemic* broke out among the recent emigrants, in parts of the city numerously inhabited by the most impoverished of this class of our population, and continued its course in nearly all sections where crowded tenements, bad ventilation, vicious habits, and extreme poverty found a congenial field for its action. In another part of this Report the number of deaths by *cholera*, which occurred in each ward, will be noticed.

Dividing the aggregate into the following periods, the averages stand thus:

Number of deaths each month.....	2,381
" " " week.....	549
" " " day.....	78

The comparisons with the divisions of 1853, are thus stated:

Number of deaths each month.....	1,891
" " " week.....	436
" " " day.....	62

The total number of *white persons* reported, is 27,867;

and of *colored persons*, 701, against 477 during the previous year; this is a large increase. The statistics of this race are more full than previous records exhibit, as will be seen by an examination of the tables throughout the Report.

TABLE OF DIVISION INTO MEN, WOMEN, BOYS, AND GIRLS.

This statement shows, that the number of deceased *males* was 15,265, against 12,230 of the previous year; an increase of 3,035. The number of deceased *females* was 13,303, against 10,472 of the previous year; an increase of 2,831. Unlike the comparison between 1852 and 1853, which showed a material *excess* of increase of *female* mortality; that between 1853 and 1854, shows an *excess* of the *male* increase.

The *males*, of *all ages*, 15,265, for 1854, exceed the *females*, 13,303, of *all ages*, by 1,962, against 1,758 in 1853.

The *male adults*, 5,746, exceed the *female adults* 4,936 by 810, against 822 in 1853.

The *male children*, 9,519, exceed the *female children*, 8,367, by 1,152, against 936 in 1853.

The *adults* of both sexes, 10,682; and the *children*, of both sexes, 17,886, show an excess of the latter of 7,204, against 6,454, in 1853. The proportion of disparity is, however, in favor of the *children* for the past year; for, in 1853, the excess of children over adults was seventy-nine and a half per cent.; and in 1854, but sixty-seven and a half per cent.

It will be noticed, that the line of distinction adopted (last year,) between infantile and adult years, is placed at the age of twenty years. It was deemed a better basis for scientific calculation and demonstration; as a rule,

perhaps it may not be unobjectionable, but it defines a suitable point of separation, and very conveniently accords with the programme of our tables.

Statisticians seldom fail to notice the correspondence existing in the sums of any regular series of events. In seeking to discover rules, any thing that has a constant relation has its import; every ratio may, upon investigation, lead to some desired explanation; hence the benefit to be derived from instituting comparisons; in this view, the little table subjoined may, to those interested, be of some service:

MORTALITY.	1847.	1848	1849.	1850	1851.	1852.	1853.	1854.
Excess of male.....	1262	767	1157	1338	2326	2117	1758	1962
“ of male adult...	604	370	117	317	331	485	822	810
“ of male children.	658	397	1040	1021	1995	1632	936	1152
“ of children.....	1472	1879	283	4156	6674	4291	6454	7204
Additions.....	3996	3413	2597	6832	11326	8525	9970	11128

The greater exposure of male *adults* is usually assigned ■ reason for *their* excess; but that of male *children* has not yet received a solution that is deemed fully satisfactory. A very essential element in the discovery and decision of these hidden causes is the accuracy of statistics; looseness in their collection has led to much error, and, until this becomes obviated, we shall not be much wiser upon many subjects.

The following statement, furnishing the reported deceased adults and children during the past eight years, will doubtless, be appreciated by those who are interested in comparing the past year with several preceding years:

	Adults.	Children.
Deaths in 1847.....	7,158	8,630
“ “ 1848.....	7,020	8,899
“ “ 1849.....	11,745	12,028
“ “ 1850.....	6,411	10,567
“ “ 1851.....	7,675	14,349
“ “ 1852.....	8,655	12,946
“ “ 1853.....	8,124	14,578
“ “ 1854.....	10,682	17,886
	<hr/>	<hr/>
Additions.....	67,470	99,883

Thus, is it seen, in an aggregate mortality, during the past eight years, of 167,353, that of the children exceeds the adults 32,413, or about forty-eight per cent.

The annual average of adults, for the past eight years, is 8,434, being 2,248 less than the adults of 1854. The annual average of children, for the same period, is 12,485, being 5,401 less than the children of 1854; a proportionate difference of material importance.

The table under immediate consideration will, perhaps, profitably bear further analyzing. The comparison of the monthly totals, and the computation of the differences, with the per centages, are sometimes of value. The mortality of 1854, divided into a monthly average, shows that to be, 2,380, (nearly;) but, by a sub-division of winter and summer, (arbitrarily,) and instituting the comparison, a different appearance is given to the average, thus: the aggregate of May, June, July, August, September, and October, is 16,886, averaging 2,814 per month; and the aggregate of November, December, January, February, March, and April, is 11,682, averaging 1,947, a large difference, and significantly pointing to the prevalence of the *epidemic*

as the cause of so unusual an increase of the *summer* mortality.

The month of August exhibits the highest report, as also in 1852 and 1853; it numbers 4,187, against 2,814 the previous year.

The month of November stands the lowest in the table; its number is 1,572, against 1,561, occurring in the month of May, 1853.

These several variations, from year to year, appear to be of sufficient import, to be thrown together in a tabular statement; the following is a comparative estimate, with the monthly statistics of 1853:

In the order of precedence in numbers.

1853.					1854.				
MONTHS.	Mortality	Per centage.	Quarterly sum.	Per cent'e	MONTHS.	Mortality	Per centage.	Quarterly sum.	Per cent'e
August.....	2814	12½	7101	32	August.....	4187	14½	11097	39
July.....	2333	10½			July.....	4124	14½		
September...	1954	8½			September...	2786	9½		
December...	1944	8½	5729	25	January.....	2122	7½	6318	22
June.....	1906	8¼			March.....	2117	7½		
October.....	1879	8¼			October.....	2079	7¼		
March.....	1816	8	5137	22	February....	2043	7¼	5922	21
January.....	1690	7½			April.....	1948	6¾		
February....	1631	7¼			June.....	1931	6¾		
November...	1592	7	4735	21	December....	1880	6½	5231	18
April.....	1582	7			May.....	1779	6¼		
May.....	1561	6¾			November...	1572	5½		

The most fatally visited months of the past year were precisely the same as in 1852 and 1853, to wit, August, July and September; but of course their difference is very wide—an increase in 1854, during the highest quarter, of 3,996.

The second quarter in the series, January, March and October, exhibits the much reduced number of 589 over the same quarter in 1853.

The months of February, April and June, forming the third quarter, exceed that of 1853 by 785.

The fourth quarter, comprising December, May and November, shows the least excess during the year, numbering only 496 over that of 1853.

Thus stated:

The three highest months of 1854 exceed those of		
1853.....	3,996	
“ next in order exceed those of 1853.....	589	
“ “ “ “	785	
“ “ “ “	496	

Total differences..... \$5,866

Forming the excess of the year 1854, as previously stated.

Having thus examined the monthly and quarterly mortality in *numerical* order, a glance at the *calendar* arrangement will become equally interesting and worthy of attention:

MONTHS.	1853.	Quarters.	1854.	Quarters.	Differ'ce
January.....	1,690	5,137	2,122	6,282	1,145
February.....	1,631		2,043		
March.....	1,816		2,117		
April.....	1,582	5,049	1,948	5,658	609
May.....	1,561		1,779		
June.....	1,906		1,931		
July.....	2,333	7,101	4,124	11,097	3,996
August.....	2,814		4,187		
September.....	1,954		2,786		
October.....	1,879	5,415	2,079	5,531	186
November.....	1,592		1,572		
December.....	1,944		1,880		
Totals.....	22,702		28,568		5,866

The increase of mortality in 1854 is thus parcelled out to the comprehension of all. Setting aside the devastation of the *epidemic* in congenial parts of the city, occurring mostly in July, August, and September, as distinctly shown above—the uniform health of the community was fully sustained.

The per centage of the quarterly periods for the three past years, in a comparative view, is here attached, for a plain and ready reference, showing at a look the proportion that may be inquired after:

			1852.		1853.		1854.
First Quarter's proportion to the Annual...			26 per cent..		23 per cent..		22 per ct.
Second	"	"	22	"	22	"	20
Third	"	"	31	"	31	"	39
Fourth	"	"	21	"	24	"	19

It is hardly requisite to remind the reader that the fatality of the several seasons of the year has an important bearing upon the inquiry into the philosophy of disease—its periodicity has a close relation to this view of the subject. Meteorological phenomena have a direct connection; and in the analysis of the causes and character of the various "ills that flesh is heir to," we shall seek in vain a comprehensive knowledge of them, if we heedlessly pass by the statistical memoranda that are so plentifully furnished for our use and observation in large and populous cities. It is too true, however, that, comparatively speaking, but little care and attention are given to the subject. Some few noble and philanthropic minds bend their energies to the laborious, but not unpleasant task, and a portion of the world becomes benefitted by their learned researches.

The present Report, humbly submitted, contains a magazine of figures, accompanied by their relative facts, and put together with no little labor in the intervals of an active daily business; but will the Common Council and the public take time to examine its numerous details and study its phases, for even a passing knowledge of the necrology of New York? It may well be doubted. And the thought has often occurred, whence its utility? The Records, however, are embodied in the history of our times, and if the too busy and "progressive" *present* places little or no value on carefully collected statistics, a wiser and less hasty *futurity* may possibly pick them up for some useful purpose.

THE TABLE OF NATIVITIES.

The mortality of our *foreign population* is here presented in monthly statements; the utility of giving it thus in detail becomes very apparent when examined in connection with the mortality of seasons, and the spread of epidemic influences.

The total number of *foreigners* who died in 1854, was 9,948—males, 5,299; females, 4,649; against 7,104 in 1853; or about 35 per cent. of the whole mortality, against 31 per cent. the previous year. A marked increase will be noticed here in the ratio.

An examination into the quarterly figures may be instructive:

In January, February and March, there were 1,009 males, and 894 females; in all 1,903, or 19 per cent.

In April, May and June, there were 1,047 males, and 896 females; in all 1,943, or 19 per cent.

In July, August and September, there were 2,213 males, and 1,932 females; in all 4,145, or 42 per cent.

In October, November and December, there were 1,030 males, and 927 females; in all 1,957, or 20 per cent.

Thus stated in comparison with the quarterly estimates of the *natives*, of 1853 and 1854:

1853.		1854.	
Natives.	Foreigners.	Natives	Foreigners.
First Quarter.....23 per cent.	21 per cent.	22 per cent.	19 per cent.
Second Quarter.....23 “	22 “	20 “	19 “
Third Quarter.....31 “	31 “	39 “	42 “
Fourth Quarter.....23 “	26 “	19 “	20 “

These several comparative estimates are certainly of importance in calculating the relative mortality of this city regarding native and foreign population.

It cannot fail to be noticed by the careful observer, that while in the third quarter of 1853 the native and foreign population, to their aggregate, are identical; in 1854 the per centage of the latter is notably higher.

About thirty different countries have contributed to the Record of the past year. The principal ones exhibiting the following enumeration, compared with 1853 for convenience of reference:

	1853.	1854.
Ireland.....	4,247	5,674
Germany.....	1,576	2,706
England.....	588	675
Scotland.....	274	283
France.....	94	176
British America.....	69	79
Sums.....	6,848	9,593

Excess in principal countries, 2,745 in 1854; leaving, to be divided among the remaining places, 355; making the total of foreign nativity, 9,948.

There were also reported during the year, and distinctly classed as such:

Of unknown nativity.....	209
“ “ at sea.....	55

Of the *unknown*, there were 155 males to 54 females. This will appear very natural, when noticed that the most of this class are reported through Coroners' inquests, the males of course preponderating:

Leaving the whole native mortality to be.....	18,356
against 15,409 of the previous year.	
Making up the total annual of.....	28,568

To facilitate the curiosity or labors of those who desire a retrospect of a few years, the following is furnished:

In 1847, the foreign deceased were.....	5,224
“ 1848, “ “	4,490
“ 1849, “ “	8,381
“ 1850, “ “	5,060
“ 1851, “ “	6,351
“ 1852, “ “	6,492
“ 1853, “ “	7,104
“ 1854, “ “	9,948

While upon this theme, it appears appropriate to allude to the immigration for the two past years; the information given is obtained from the Commissioners of Emigration, and therefore is authentic and official:

	Increase.	Decrease.	1853.	1854.
Belgium.....	364	34	398
Canada	2	2
China.....	33	53	20
Denmark	8	94	102
England.....	3,452	27,126	30,578
France.....	516	7,470	7,986
Germany.....	57,342	119,644	176,986
Greece.....	6	1	7
Holland.....	381	1,085	1,466
Ireland	30,862	113,164	82,302
Italy.....	232	553	785
Mexico.....	17	51	34
Norway.....	296	377	81
Nova Scotia....	122	6	128
Poland.....	17	186	169
Portugal.....	32	237	205
Russia.....	16	39	55
Sardinia	76	72	148
Scotland.....	1,547	6,456	4,909

Spain..	13	659	646
Sweden.....	229	1,630	1,859
Switzerland.....	4,279	4,604	8,883
Turkey.....	4	10	6
Wales.....	106	1,182	1,288
West Indies.....	11	11
Total immigration			284,945	319,223

Total increase 67,163

“ decrease 32,885

Leaves a nett increase of 34,278 or 12·03 per cent.

The decrease in 1853 from 1852, was 16,046, or 5·33 per cent. It will thus be seen what a large accession to our,

numbers, added, at least to our temporary population during the past year. As it is pertinent here, and useful data, we publish the whole immigration since the establishment of the Emigration Commission, May 5th, 1847:

In 1847.....	129,062
" 1848.....	189,176
" 1849.....	220,603
" 1850.....	212,796
" 1851.....	289,601
" 1852.....	300,991
" 1854.....	284,945
" 1855.....	319,223
Total.....	1,946,397

Nearly two millions.

From Belgium, England, France, Germany, Holland, Nova Scotia, Sardinia, Sweden, and Switzerland, the immigration has increased to an important extent; while from China, Ireland, Norway, Scotland, and South America, the decrease is very notably exhibited.

It will be observed, that the Report of this year possesses a new and much desired feature, in furnishing the *diseases* of which the foreign population of the city died. These are given throughout every general table in the work.

Usually, when upon the subject of Immigration in the annual reports of this department, something is said in reference to the population of this city. The census for every five years gives what purports to be its true extent, and whatever reliance may be placed upon its general correctness, it is doubtless, rather under than over the

true number of inhabitants; it is, however, by common consent deemed sufficiently right for all practical purposes; hence for those periods, we are supplied with the data required for making the calculations dependent on its official authority; but in the intervening time we are under the necessity of resorting to speculative computation, in order to arrive at our supposed numbers, and however easy this may be effected in places or countries different from the city of New York, and where the same steadfast routine, domestic and political, exists through generations, there does not appear to be any satisfactory rule or principle that can be properly applied here, the same argument, of course, applies to all cities of a similar character, for their rapid progress, and their use as ports of transit for nations, and asylums for the accommodation of invalid strangers, preclude the possibility of laying down any thing more than a tolerable guide to lead to a correct estimate of our population.

In our report of last year, we worked out to the best of our abilities, that we numbered about 700,000, which sum met the approbation of all whose intelligence enabled them to judge of its accuracy; by many, this estimate was deemed too small, they supposed it full as high as 800,000, but for our purposes, we used the former figures, deeming them sufficiently near the mark upon which to base our ratio of deaths to the population, and insert it in our statements.

While this document has been going through the press, the census of 1855 has been taken, and although not officially announced, sufficient has been ascertained to lead us to the belief that it will amount to a less aggregate than was supposed, it is said that it will not reach over 625,000;

we will, therefore, for the present, use this sum for the basis of our computation; it seems to be universally deemed too little, but whether right or wrong, we must be governed by the legally established canvass.

The following statement is appropriate in this place, to keep the subject fresh in our memories:

In 1805,	the census numbered	75,770	ratio of deaths to population	1 to	32.98
" 1810,	"	96,373	"	"	46.49
" 1815,	"	100,619	"	"	41.83
" 1820,	"	123,706	"	"	37.19
" 1825,	"	166,086	"	"	34.78
" 1830,	"	202,589	"	"	38.97
" 1835,	"	270,089	"	"	40.87
" 1840,	"	312,710	"	"	39.74
" 1845,	"	371,223	"	"	37.75
" 1850,	"	515,394	"	"	33.52

The Report for this year, 1855, when it shall appear next year, will furnish the figures to follow the series properly.

The increase of population between the several census periods, it may be of use to insert, in order to notice more particularly the variations, and trace the causes.

From 1805 to 1810	the increase was.....	20,603
" 1810 to 1815	"	4,246
" 1815 to 1820	"	23,087
" 1820 to 1825	"	43,380
" 1825 to 1830	"	36,503
" 1830 to 1835	"	67,500
" 1835 to 1840	"	42,621
" 1840 to 1845	"	58,513
" 1845 to 1850	"	144,117

Taking the number said to be ascertained by the present canvass, that is, 625,000 as the full census for 1855, the increase from 1850 is about 109,600, a considerable declension from that between 1845 and 1850.

To understand fully, regarding the variations in the ratio of deaths to the population, it becomes requisite to explain, that up to 1843, the department did not obtain returns of all the mortality that occurred, burials out of the city were made without being reported, the laws not requiring interment permits, as is the case now; hence, the annual Reports were not exactly full accounts of the city mortality; the data, therefore, not being correct, the estimated proportions must be erroneous, as guides of the health of New York, from term to term.

Before proceeding to work out the ratio for 1854, it is well to observe, that, in accordance with the plan adopted a half a century since, there must be deducted, the number of *Malformations*, *Premature Births*, and *Still-born*, from the annual aggregate, these not being deemed deaths in the proper acceptation—only those from disease and accidents were included in the calculations; however improper this may seem, we have to follow the same rule, otherwise we cannot avoid an imperfect comparison. Thus stated:

Whole mortality of 1854.....	28,568
Deduct Malformations, (various).....	147
Premature birth.....	435
Still-born.....	1,615
	<hr/> 2,197
We have left, for a remainder, the sum of..	26,371

as the total mortality from disease and accidents, making the ratio as 1 to 23·70. This would seem to indicate, allowing liberally for the extent of the epidemic, that the true census of this city amounts to a higher sum than is said to have been obtained by the late canvass, such, or a similar view, has already been announced by good statistical authority.

TABLE SHOWING THE MORTALITY OF THE PUBLIC INSTITUTIONS.

This statement exhibits the monthly report of each, together with the aggregate, divided into native and foreign. A very large table of the Public Institution mortality will be found in another part of the report, containing much additional information, and which will engage attention when reached in order.

During the year 1854, the total mortality therein is reported to be 4,352, or 15 per cent. of the whole; this is inclusive of those who died in the two temporary hospitals established for cholera patients, numbering 449, to wit:

In Franklin street..... 298

In Mott street..... 151

In 1853 there were reported to be 2,735, or 12 per cent. of the whole.

Increase in 1854, 1,617, or 59 per cent.

In comparison of the years 1853 and 1854, the mortality is thus shown:

At the Alms-house, B. I.; Lunatic Asylum, B. I.; Penitentiary Hospital, B. I.; Small-pox Hospital, B. I.; and the Work-house Hospital, B. I.; constituting the several

medical establishments on Blackwell's Island, there occurred, in 1853, 388 deaths. The returns for 1854 show the increased number of 555.

Bellevue Hospital, in 1853, numbered 572; and in 1854, 624.

The Colored Home Hospital and Colored Orphan Asylum numbered in 1853, respectively, 112 and 8; and in 1854, respectively, 171 and 23. The latter institution is a partial beneficiary of the Alms-house Department.

The City and Police Prisons, also attached to the Alms-house Department, numbered, in 1853, 32; and in 1854, 26. A diminution.

Randall's Island Hospital, known as the nursery of the Alms-house Department, numbered, in 1853, 66; and in 1854, 200.

The aggregate of the whole department, in 1853, was 1,146; and in 1854, 1,599.

The deaths occurring in the New York City Hospital during 1853, were 415; and in 1854, 396. A diminution.

In the House of Refuge, the report of 1853 was 3; and in 1854, 3.

In the Bloomingdale Asylum, (Lunatic,) during 1853, there were reported 10; and in 1854, 22. Owing to the certificates from this institution not stating distinctly the place of decease, it is probable that the reported numbers are of doubtful accuracy. Physicians reporting persons deceased in Public Institutions, should have it so stated in the certificates, not only to avoid errors in computation, but to enable the record to contain all the essential facts required, and thus saving some trouble in searches.

Ward's Island Emigrant Hospital reported, in 1853, 1,152; and in 1854, 1,730.

The several minor institutions, (numerically considered,) may be thus grouped, by way of reference:

	In 1853.	In 1854.
Deaf and Dumb Institution.....	—	2
Home of the Friendless.....	—	9
Institution for the Blind.....	—	2
Leake & Watt's Orphan Asylum.....	—	6
Lying-in-Asylum.....	9	4
New York Juvenile Asylum.....	—	2
Old Ladies' Asylum.....	—	5
Roman Catholic Orphan Asylum.....	—	9
St. Vincent's Hospital.....	—	114

Some of these are new institutions; and in relation to others, the above remarks respecting reporting deaths, where they occurred, are applicable. There has evidently been more care exhibited during the past year than previously.

The following is a statement of the deaths reported in the several Public Institutions for eight years past:

In 1847, there were reported.....	3,195
" 1848, " "	2,326
" 1849, " "	4,010
" 1850, " "	2,358
" 1851, " "	3,369
" 1852, " "	3,137
" 1853, " "	2,735
" 1854, " "	4,352
Total.....	25,482

The average number, per annum, being 3,185, and the proportion of this mortality to the average of the total mortality of the city for the same period, to wit: 20,919, amounts to about 15 per cent., being identical with the proportion for 1854.

The larger numbers contained in the above statement represent the Epidemic years; the prevalence was, as is generally known, among the recent emigrants, the great disparities are hence readily accounted for.

The proportion of the deaths in the Public Institutions to the total number reported during 1854, as above shown, is about 15 per cent.; thus shown, the comparison is not alarming.

Average annual mortality during the time stated	3,185
Number reported in 1854.....	4,352
Difference against the past year.....	167

or about 5 per cent. more than the annual average number.

TABLE OF DECEASED WHITE AND COLORED PERSONS.

By this statement, we are informed that during the year 1854, the *colored* race furnished to the general aggregate the sum of 701 persons—330 males and 371 females—against 477 the previous year—a large advance; but their mortality during 1853, to wit—477 persons, was a diminished number.

Leaving the number of *whites* 27,867.

The highest monthly number occurred in August, amounting to 98—and the lowest in December, 33.

The quarterly statements are as follows—contrasted with 1853:

	1853.	1854.
First quarter.....	131.....	171
Second "	117.....	171
Third "	128.....	233
Fourth "	101.....	126
Totals.....	477	701

The last quarter in both years, it will thus be seen is less inimical to the existence of this *race* than the other portions.

As the mortality of *colored* persons has a somewhat interesting bearing upon a leading question of the present day, the continuation or extinction of this class of our population, it may be of some use to inquiring minds to have the mortuary statistics of a few previous years—they are, therefore, introduced for reference:

In 1847, the number reported was.....	866
" 1848, " "	782
" 1849, " "	626
" 1850, " "	449
" 1851, " "	443
" 1852, " "	585
" 1853, " "	477
" 1854, " "	701
Total for eight years.....	4,929

Averaging 616 per annum—the report of the past year is therefore 85, or about 14 per cent. over the octennial average—a far different estimate from that of 1853.

Proportion of *colored* in 1853 to the whole number, 2.10 per cent.

Proportion of *colored* in 1854 to the whole number, 2·45 per cent.

As with the *foreigners* among us, it will be seen that our general tables give the diseases of the colored persons also, thus furnishing an additional fund for the use of the ethnologist and physiologist.

The following will show the relative figures of the three classes of our population, with the ratio:

Natives, (white)	17,919..	ratio of mortality, as 1 to	1·59
Foreigners	“ 9,948..	“ “	1 to 2·87
Colored persons.	701..	“ “	1 to 40·76

TABLE OF DEATHS BY EXTERNAL CAUSES.

The annual statement respecting this class of mortality, always possessing a prominent interest, has induced the department to extend its usefulness, by entering more particularly in detail—the sexes, nativities, colors, and ages given—thus forming a full exhibition of all the data provided for the Record.

The whole number from extraneous causes is 3,243, against 3,227 in 1853—deducting *asphyxia*, *cyanosis*, and other *malformations*; *old age*, *premature birth*, and *still-born*, together with those produced suddenly by the *sun's* influence—amounting in the aggregate to 2,500 instances—there remains the sum of 743 by the various *casualties*, &c.—that is, by injury—

The retrospect, for several years is as follows:

In 1847, the casualties numbered.....	360
" 1848, " "	446
" 1849, " "	527
" 1850, " "	624
" 1851, " "	698
" 1852, " "	602
" 1853, " "	1,001
" 1854, " "	743
Total casualties.....	5,001

In comparing 1854 with 1853, it should be remarked that, included in the latter year's figures are the numerous *sun-stroke* cases (260), which should properly have been omitted, as well as an average of 18 per year added in the series. Although to avoid misapprehension, a concise explanation was made at the time; but in order to set the matter exactly right, so that in future a correct starting point may be had, we amend the memoranda as follows:

In 1847, the casualties numbered.....	352
" 1848, " "	428
" 1849, " "	509
" 1850, " "	606
" 1851, " "	680
" 1852, " "	584
" 1853, " "	741
" 1854, " "	743
Total casualties.....	4,644

This enumeration may be looked upon, as correct as can be gathered from the former Reports. The figures are selected from the *Recapitulatory* of each annual Report, and

not from the *general summary* as therein published—thus placing the tables in an amended form.

The average of the eight years as above, numbers 580½; the years 1853 and 1854, are nearly alike—the per centage however, of course, varies considerably—in proportion to the mortality the former takes the lead.

Of the whole number by *external causation*, including *injuries*, 3,243—1,991 were males and 1,252 were females; 418 were male foreigners and 135 female foreigners; 78 males and 13 females of unknown nativity; and 34 males and 34 females were colored persons. Of the whole number by *injuries*, 743—598 were males and 145 were females; 341 were foreign males and 66 were foreign females; 71 were males and 7 were females of unknown birth; and 5 were males and 3 were females of color.

The tabular statements following those just examined in brief review, exhibit the mortality of this city in another and more detailed appearance.

The first to which attention is called is the Yearly Exhibit, giving, in monthly instalments, the diseases, the general total, the males and females, the nativity, the colors and the ages, comprising a very full enumeration and detail of the year's mortal record.

Total number,.....	28,568
“ “ males,.....	15,265
“ “ females,.....	13,303
	<hr/> 28,568

The per centage as to ages, always an entertaining theme, is thus worked out:

AGES.	Total.	Male.	Female.	Per cent.
1 year and under,...	9,166	5,033	4,133	32·08
1 to 2.....	3,697	1,887	1,810	12·94
2 to 5.....	2,810	1,439	1,371	9·83
5 to 10.....	1,079	596	483	3·78
10 to 15.....	441	250	191	1·54
15 to 20.....	693	314	379	2·43
20 to 25.....	1,345	673	672	4·71
25 to 30.....	1,645	842	803	5·75
30 to 40.....	2,806	1,515	1,291	9·82
40 to 50.....	1,884	1,145	739	6·59
50 to 60.....	1,261	731	530	4·41
60 to 70.....	863	451	412	3·02
70 to 80.....	500	235	265	1·75
80 to 90.....	211	72	139	·74
90 to 100.....	45	15	30	·16
100 and upwards,....	11	4	7	·039
Unknown,.....	111	63	48	·39
Totals.....	28,568	15,265	13,303	

1854.

1853.

Proportion of males,.....53·43.....53·17

Proportion of females,46·17.....46·83

Showing male excess (of proportion) in 1854 over previous year.

Another way of presenting the shades of difference between year and year, and perhaps more explicit to some minds, is to show the ratio of deaths to the total mortality in each period of life, as thus stated:

One year and under,....	rate as 1 to	3·12
1 to 2.....	" 1 to	7·73
2 to 5.....	" 1 to	10·17
5 to 10.....	" 1 to	26·38
10 to 15.....	" 1 to	64·78
15 to 20.....	" 1 to	41·22

20 to 25.....	rate as 1 to	21.24
25 to 30.....	" 1 to	17.37
30 to 40.....	" 1 to	10.18
40 to 50.....	" 1 to	15.16
50 to 60.....	" 1 to	22.65
60 to 70.....	" 1 to	33.10
70 to 80.....	" 1 to	57.14
80 to 90.....	" 1 to	135.89
90 to 100.	" 1 to	634.84
100 and upwards,.....	" 1 to	2,597.09
Unknown,.....	" 1 to	257.87

This annual detail, occupying a large part of the report is succeeded by a *recapitulation*, giving the various aggregates of the items, so that at a glance, the information sought under each head can be readily ascertained. The *monthly* is thrown into the *yearly*, and thus the whole is stated.

With the view of exhibiting the uniformity and difference in comparative proportions, it is well to direct attention to a series of years, the following table embracing the figures for a few years is prepared for that purpose:

RATIO OF DEATHS TO THE TOTAL MORTALITY IN EACH DECADE
OF LIFE, SINCE THE YEAR 1847, INCLUSIVE.

AGES.	1847.	1848.	1849.	1850.	1851.	1852.	1853.	1854.
Birth to 10	1 to 1.60	1 to 1.45	1 to 1.57	1 to 1.55	1 to 1.67	1 to 1.86	1 to 1.65	1 to 1.71
10 " 20	" 24.43	" 24.54	" 22.04	" 27.00	" 25.50	" 26.93	" 26.58	" 25.19
20 " 30	" 8.10	" 8.16	" 8.16	" 9.59	" 8.70	" 9.89	" 9.30	" 9.55
30 " 40	" 8.61	" 8.60	" 7.79	" 10.61	" 10.50	" 10.78	" 11.14	" 10.18
40 " 50	" 12.34	" 12.00	" 10.96	" 15.43	" 16.54	" 15.79	" 16.07	" 15.16
50 " 60	" 21.16	" 19.32	" 19.15	" 22.64	" 23.70	" 24.54	" 25.62	" 22.65
60 " 70	" 26.72	" 25.20	" 25.89	" 31.41	" 35.00	" 34.34	" 33.83	" 33.10
70 " 80	" 45.23	" 37.12	" 48.02	" 56.59	" 60.00	" 55.38	" 51.71	" 57.14
80 " 90	" 103.18	" 74.65	" 105.19	" 94.30	" 123.25	" 120.05	" 162.16	" 135.59
90 " 100								
and upw'd	" 451.00	" 469.00	" 552.86	" 943.00	" 710.00	" 600.00	" 667.71	" 510.14
Unknown.	" 74.16	" 111.25	" 74.00	" 99.26	" 203.76	" 175.61	" 445.13	" 267.37

Those dying from birth to ten years, in this statement, rate, it appears, as 1 to about $1\frac{1}{2}$, taking the average of the series. And, as regards the minor divisions, not included in the above calculations, the figures run as follows, compared, however, only with the two or three past years:

AGES.	1852.	1853.	1854.
1 and und.	rate as 1 to 4.09..	as 1 to 2.94..	as 1 to 3.12
1 to 2...	rate as 1 to 7.49..	as 1 to 7.72..	as 1 to 7.73
2 to 5...	rate as 1 to 8.69..	as 1 to 9.88..	as 1 to 10.17
5 to 10...	rate as 1 to 22.75..	as 1 to 29.44..	as 1 to 26.38

The variations are of importance in tracing the effects of *epidemics* upon infant and adult life relatively.

Of *centenary* death, the report shows, in 1854, an unusual number, eleven instances, 4 males and 7 females; some of these were considerably beyond 100 years. An instance occurs in the month of November, of a lady who had reached her 118th year; another came to this country when 100 years old and lived 4 years afterward.*

The number of deaths reported, exceeding a *century*' during the past eight years, may be worth an insertion.

In 1847 there were.....	3
" 1848 " "	1
" 1849 " "	7
" 1850 " "	6
" 1851 " "	2
" 1852 " "	3
" 1853 " "	2
" 1854 " "	11
Total.....	35

In the Ninth Ward.

An average of four and three-eighths per year. The past year is nearly three times as many.

Let us examine how those from 90 to 100 years compare with the above series.

In 1847 there were.....	35
“ 1848 “ “	30
“ 1849 “ “	43
“ 1850 “ “	18
“ 1851 “ “	31
“ 1852 “ “	36
“ 1853 “ “	34
“ 1854 “ “	45
Total.....	272

Showing an average of thirty-four per year, and plainly making the past year an unusual one for death from advanced ages.

Dividing the life-time, as exhibited in the Report, into periods of twenty years, and comparing it with the previous year, the view is brought down to a narrower compass, and more readily examined.

AGES.					1853.		1854.	
From birth to 20 years there were..					14,588	64·26 per cent.	17,886	62·61 per cent.
“ 20 to 40 “ “ “ ..					4,478	19·74 “	5,796	20·29 “
“ 40 to 60 “ “ “ ..					2,299	10·13 “	3,145	11·01 “
“ 60 to 80 “ “ “ ..					1,110	4·89 “	1,363	4·77 “
“ 80 to 100 “ “ “ ..					174	·77 “	256	·90 “
“ 100 and upward, “ “ ..					2	·0088 “	11	·039 “

Following, a table is prepared, pointing out all the details as heretofore, but given in the form of a MONTHLY RECAPITULATION, and forming a general view of the aggregate mortality for each month, omitting only the ages;

this statement has a special utility, in enabling the discovery, at a glance, of the monthly prevalence of the various diseases, thereby saving some labor and time to the interested statistician.

Needing no particular observations in this place, we pass on to notice a small table, designated as a GENERAL RECAPITULATION, occupying but two pages; of course its contents can so readily be looked over that no explanatory remarks of this also are necessary to comprehend all it pretends to exhibit. Should any casual inquirer, however, desire to know, without much trouble, the total number of deceased, by months, during the year 1854, their sexes, countries, colors, and ages, that information can be easily possessed, by overlooking for a moment this concise statement—for the diseases, and all other matters, however, he must resort to the numerous other sources contained within these sheets, to which his attention is respectfully solicited.

We reach now a very different description of tabular arrangements, and though perhaps they may, by some, be deemed unnecessary, yet as in my two previous reports they were given, I have not thought advisable to omit in the present publication, again entering upon the same representation. In Europe, and in some of our own large cities and long settled States the plan is pursued, and I believe, with the approval of the Medical Faculty and community in general. In this table no claim is made for absence of errors in its several *divisions*; a careful examination has accompanied the labor, and whatever it may prove to be, it is submitted to all interested, to afford whatever utility may be gathered from its compilation.

ANNUAL RECAPITULATION, BY CLASSIFICATION, COMPRISING THE STATISTICS ALREADY GIVEN, THE PUBLIC INSTITUTIONS, AND THE PERIODS OF LIFE, DIVIDED INTO CLASSES, ADULTS AND CHILDREN.

In the division of the various causes of death, the classification is thus represented:

1st Class.—Zymotic, (fermenting,) contagious, endemic and epidemic, 10,099, being 35·35 per cent.

2d Class.—Sporadic, (not infectious, &c.,) 18,469, being 64·65 per cent.

That is,—in the ratio of 1 to 2·82 for the *former*; in the year previous it was 1 to 3·86—and as 1 to 1·55 for the *latter*; which in the year previous, was 1 to 1·35.

In 1853 the Zymotic, &c., causes,	5,886,	being	25·93	per cent.
“ Sporadic, &c., “	16,816	“	74·07	“

The varied per centage and ratio shown in the above computation are plain evidence of the *Epidemic* influences that prevailed during the summer of the past year.

The arrangement of the Diseases is in the following manner, in order to extend a comparison. The two *classes*, with their several *orders*, are combined, for the years 1853 and 1854, and their sums and proportions placed in parallel position.

DISEASES. (Both Classes)	1853.	Propor. per cent.	1854.	Propor. per cent.
Bones, Joints, &c.....	123	·54	163	·57
Brain and Nerves.....	4,874	21·47	5,326	18·64
Generative Organs.....	268	1·18	322	1·13
Heart and Blood-vessels.....	433	1·91	560	1·96
Lungs, Throat, &c.....	5,912	26·04	6,464	22·62
Old Age.....	175	·77	180	·63
Premature Birth.....	355	1·56	435	1·52
Skin and Eruptive Fevers.....	1,436	6·32	1,685	5·90
Still-born.....	1,575	6·94	1,615	5·65
Stomach, Bowels & other Digest. Organs	5,112	22·51	9,629	33·71
Uncertain Seat, and General Fevers.....	2,216	9·76	1,976	6·92
Unknown to the Jury, and not stated...	119	·52	55	·19
Urinary Organs.....	104	·46	158	·55
Totals.....	22,702	28,568	

With the exception of Bones, Joints, &c.—Heart and Blood-vessels—Stomach, Bowels, &c.—and Urinary Organ—four of the *orders*, the proportion, per centage, in 1853 was greater than in 1854.

As the diseases are so plainly set forth throughout the whole report, it will not be necessary to enter into any elaborate analysis of them for the purpose of calling attention to their increase and decrease, or their comparative bearing. The Medical Fraternity, to whom this part of our annual issue is most interesting, are probably supplied with the previous Reports, and can doubtless bestow more time and attention upon the subject, and satisfy themselves better than we can pretend to do. We therefore leave the theme to their learned investigation.

Still, as it may be useful to know the sections of the city that were particularly visited by the *Epidemic* that prevailed, the following statement of its mortality in the Wards is probably worthy of the space it occupies.

In the 1st Ward there occurred.....	76
“ 2d “ “ “	11
“ 3d “ “ “	14
“ 4th “ “ “	71
“ 5th “ includes City Hospital and Frank- lin street <i>temporary</i> Hospital, in which 320 occurred.....	373
“ 6th “ includes City Prison, in which 1 oc- curred	157
“ 7th “ there occurred.	73
“ 8th “ “ “	94
“ 9th “ “ “	51
“ 10th “ “ “	27
“ 11th “ “ “	108
“ 12th “ includes Randall's & Ward's Island Hospitals, in which 215 occurred..	240
“ 13th “ there occurred.....	69
“ 14th “ includes Mott street <i>temporary</i> Hos- pital, in which 149 occurred, and Roman Catholic Orphan Asylum, in which 1 occurred.....	220
“ 15th “ there occurred.....	27
“ 16th “ “ “	97
“ 17th “ includes St. Vincent's Hospital, in which 2 occurred.....	89
“ 18th “ there occurred.....	74
“ 19th “ includes Blackwell's Island and Col- ored Home Hospitals, in which 113 occurred.....	203
“ 20th “ there occurred.....	145
“ 21st “ includes Bellevue Hospital, in which 47 occurred.....	104
“ 22d “ there occurred.....	186
Total.....	2,509

of which 848 occurred in the various Public Institutions, leaving 1,661 cases in private practice in other parts of the city. The Wards are all represented, but their numbers are very variable.

Of the whole number, 2,509—1,352 were males, and 1,157 were females; 1,903 were of foreign nativity, of which 986 were males, and 917 were females; 10 males and 10 females of unknown nativity; and 14 males and 23 females, colored persons.

TABLE OF THE PUBLIC INSTITUTIONS, (*additional*) CONTAINING THE DISEASES, &c., IN EACH.

This statement is presented on a large sheet, and is intended to show that portion of the numerous catalogue of diseases met with in hospital practice; the *nativity* is also given, which will be found to have an important relation to many facts therein exhibited.

On a former page attention was directed to a table of a similar character, and occupying a small space in the first part of the Report, *this*, however, furnishes what has seemed to be much required, a full account of the *diseases*, to accompany the usual statistical detail heretofore annually rendered—in that part of the Report will be found an analysis of this branch of our subject, to which the inquirer is referred, rendering it unnecessary to further review the statistics presented.

TABLE OF DISEASES AND OCCUPATIONS, WITH A CONDENSED AND CLASSIFIED RECAPITULATORY.

The Department has been enabled, during the past year to collect a sufficient number of certified *occupations* to

make it an object worthy of publication, this is a first attempt in issuing this feature of the Record; hitherto few certificates were returned giving this information, and hence it was of little or no utility to afford it a place in the Annual Report; the various pursuits of the deceased are published verbatim, and although many are very indefinite, there are enough remaining, we conceive, to form statistics of some value relative to their bearing upon health and life. The statement shows, that of 5,746 instances of adult death, 3,773 are given with the occupations named, forming nearly two-thirds of the number reported.

The nativity and color are also included in the tabular arrangement.

In the *recapitulation* the matter is brought within a brief compass. Some of the *orders* of the diseases, it will be noticed, are lengthened out a little for the purpose of representing a few of the more prominent causes of mortality, but the deviation, while it will add to its interest and utility, will not much effect its harmony and conciseness, as the classification is not disturbed.

The grouping of the various branches of business, amounting to several hundred, is here attempted to be done with whatever knowledge we could bring to bear upon their nature; they are reduced to forty-three classes; of course the arrangement is more or less arbitrary—and doubtless open to objections—but, if in its miniature appearance, it will suffice to convey what is intended, its object will be fulfilled.

TABLE OF MORTALITY IN THE WARDS.

In continuation of last year's (1853) official notice of the *Ward* mortality, then, however, only presenting the numbers for its last six months, the annual returns for the present report form a tabular statement of considerable importance; true, the size thereof, and character of the population are much varied, and none but those who have a good knowledge of the topography of this city, can properly estimate the value of these figures; more especially since we have not, at this moment, any precise census of each Ward; yet, as comparative *data* in future reports, and as a partial guide to the sanitary condition of the city, sectionally understood to many of our citizens, these returns of each Ward's mortality can not be otherwise than of the utmost importance to the indefatigable observer of health, habitation, character, and population in their bearing upon our crowded city.

In the Report of 1853, we gave something of an idea of the local position and character of the several Wards; the extent of surface is about equaled by the number of population, and to the uninitiated, a reference to that document may serve to give some knowledge of what is required to have a general notion of the several districts enumerated, and attempted to be described; but the Report furnishes nearly as exactly as possible, the deaths in each Ward, apportioned in this office, with much care, and no little labor, and hence the accuracy of the figures may be confidently relied on, its utility may not be denied, but in our present document, we are not enabled, for the want of correct correlative data, to interpret it as intelligibly as it should be.

WARDS.	DEATHS.
First,.....	927
Second,.....	117
Third,.....	241
Fourth,.....	1,143
Fifth includes City Hospital, Franklin street Cholera Hospital numbering 694.....	1,488
Sixth, includes City Prison numbering 26.....	1,538
Seventh.....	1,264
Eighth.....	1,155
Ninth.....	1,111
Tenth.....	843
Eleventh.....	1,859
Twelfth, includes House of Refuge, Leake & Watt's Orphan Asylum, Lunatic Asylum, Bloomingdale, Randall's, and Ward's Is- land Hospitals, numbering 1,961.....	2,355
Thirteenth.....	1,178
Fourteenth, includes Mott street Cholera Hospi- tal, Lying-in Asylum, Roman Catholic Orphan Asylum, numbering 164.....	1,128
Fifteenth.....	527
Sixteenth.....	1,495
Seventeenth, includes St. Vincent's Hospital, num- bering 114.....	2,480
Eighteenth, includes Old Ladies' Asylum, num- bering 5.....	1,601
Nineteenth, includes Alms-house, B. I., Colored Home Hospital, Colored Orphan Asylum, Deaf and Dumb Institution, Juvenile Asy- lum, Lunatic Asylum, B. I., Penitentiary	
Carried forward.....	

WARDS.	DEATHS.
Hospital, B. I., Small Pox Hospital, B. I., Work-House Hospital, B. I., numbering 753.....	1,397
Twentieth, includes Institution for the Blind, numbering 2.....	2,085
Twenty-first, includes Bellevue Hospital, Home of the Friendless, numbering 633.....	1,407
Twenty-second	1,229
Total.....	<u>28,568</u>

Thus, is distributed, the whole mortality of the city, during 1854, giving the total of each Ward—and for the purpose of separating that portion belonging to the Public Institutions from the city proper, their localities are pointed out, and the number of the deceased rendered.

TABLE OF BIRTHS.

In the Report of last year, (1853,) the *birth* table contained only those occurring during the latter six months; the new law relating to this registry not going into operation until the 1st of July.

The Department is enabled, this year, (1854,) to give the returns for every month, as received; but a glance at the numbers is sufficient to convince the most casual observer, that they are even more imperfect than those made for the portion of the previous year as published.

The whole number reported in 1854 is, 17,979, of which 9,295 are males, and 8,684 are females, the males having an excess of over 7 per cent.

The excess of males in 1853, was over 9 per cent.

Exhibiting the table in *numercial precedence*, the monthly statements appear thus—in 1854.

January	1,705
July.....	1,696
March.....	1,617
August.....	1,568
May.....	1,568
February.....	1,549
September	1,436
November.....	1,428
December.....	1,426
October	1,361
April.....	1,338
June	1,287
Total.....	<u>17,979</u>

In 1853, the monthly statements were as follows:

August.....	1,846
October.....	1,778
November.....	1,698
September.....	1,640
December.....	1,604
July	1,591
Total	<u>10,157</u>

The same months in 1854, furnish only..... 8,915

Showing a falling off of..... 1,242

or about 12 per cent. As it is scarcely possible that there should be any diminution in the last six months of the past year, it is unquestionably owing to neglect in making the correct returns to this office.

Among the births registered, it will be seen that 206 were *colored*, 113 males and 93 females. During the six months in 1853, there were 114 *colored* births, of which 55 were males and 59 were females.

From these *data*, it is almost useless to enter into any disquisition upon the very interesting subject of a comparison of the natal and mortal statistics furnished; for, while the former are evidently erroneous and imperfect, and hence of very little utility in this view, the latter are perhaps the truest obtained anywhere. I do not hesitate to say that the mortal Record of this city is about as perfect as it is possible to have it. The situation of this city, upon an island, stringent laws in relation to burials, and large pecuniary penalties for any infraction, combine to render the Mortuary Statistics of the city of New York the most reliable, or nearly so, of any in the world. It is scarcely necessary to reiterate to the *Profession* the important benefit of the law of "Registration of Births." The public, are perhaps, not aware of it, but frequently, for the *legal* settlement of natal rights to bequests, this Department is called upon for the evidence of its Records.

Although it is not deemed of very essential moment, considering the defection in our *Birth Returns*, that any calculations should be entered into to elucidate statistical faithfulness, as, of course, but little reliance can attach to the rendered figures, yet, in pursuance of our previous rule and practice, a simple glance thereat may be, at least, of momentary consequence.

Proportion of colored to white mortality..2·45 per cent.

Proportion of colored to white births.....1·15 "

Or, in other words, the former rate as 1 to 47

the latter rate as 1 to 87

RETURNS OF MARRIAGES.

The amended laws in relation to the registration of marriages in this city, have now, that is to the 1st day of January, 1855, been in operation a period of one and a half years. For the first six months ending December 31st, 1853, and published in the report of that year, the number amounted to 3,203, a much less number than there would have been returned, if the statute had been properly fulfilled, and it was naturally supposed that when it became more widely known that it was the duty of all clergymen, magistrates, &c., to report their marriages regularly every month, the Department would be enabled to furnish a pretty ample statement of the city of New York returns in this interesting branch of vital statistics; but, as will be shown, the supposition was erroneous, and we are obliged to issue our annual publication with but a partial statement of our marriages, as rendered to us.

The whole number reported for the past twelve months is 5,595, being an average of, say 466 a month—the average in 1853 being, say 534. In the precedence of numbers they occurred as follows—the *calendar* statement will be found in the table:

January.....	516
February	389
March.....	404
April.....	459
May.....	578
June.....	548
July.....	486
August.....	410
September	468

October.....	465
November.....	405
December.....	467
Total.....	5,595

Of this number, 100 males and 85 females were *colored*. This sexual difference is noted in the Record as follows:

		Colored.		Whites.
In the month of June.....	10 males and 6 females,			4
“ July.....	10	“ 6	“	4
“ August.....	8	“ 6	“	2
“ September..	9	“ 7	“	2
“ October....	12	“ 11	“	1
“ November..	6	“ 5	“	1
“ December...	6	“ 5	“	1
Totals....	61	“ 46	“	15

Showing an amalgamation of 15 colored males to 15 white females—in 1853, that is, for six months of that year, there were 2 colored males united to 2 white females. As the Marriage Record of 1854 is considerably more deficient than that of 1853, it is not very unreasonable to suppose that these somewhat anomalous unions are on the increase.

The conditions are thus put down:—4,939 single males, and 5,072 single females, being 135 more single females than single males; 544 were widowers, and 410 were widows; 4 males, and 4 females were divorced, and 108 males, and 109 females were of unknown condition; thus set forth:

	1854.		1853.
Marriage of the single.....	89.46	per cent.	89.54 per cent.
“ Widowed..	8.52	“	..10.46 “
“ Unknown. 1.93		“	..
“ Divorced..	.09	“	..

Another view is thus presented:

JOINT COMPARISON OF CONDITIONS AND SEXES.

	Highest.		Lowest.
Females single.....	5,072	Males single.....	4,939
Males widowed.....	544	Females widowed.	410
Total.....	5,616	Total.....	5,349

Throwing out the *unknown* and *divorced*, as well in the statement as in the computation, the difference becomes 267—making the excess of the first division 2.44 per cent. against 3.88 per cent. in 1853; thus indicating, that among single females and widowed males, there prevails greater tendencies to connubial union than among the single males and widowed females; and whatever the analysis of other marriage tables may demonstrate, such is the position of those of New York city, and doubtless may be considered a rule, not a coincidence.

In a legal point of view, it is a marvel that persons do not see the importance of a faithful marriage registry. The Records are frequently resorted to, both by residents and strangers, for the evidence of some marriage or other performed in this city. The Courts have required it time and again; but from this Department it cannot, in many instances, be obtained, owing to neglect of rendering returns. It seems, if the complaints be true, and none appear to doubt them, that many marriages have occurred in

this city, the evidence of which does not stand on the books of the churches—hence, it is unworthy a moment's argument to show the necessity for a faithful Record of all marriages in this office, as directed by the laws of the State, and fully announced.

THE METEOROLOGICAL REGISTER.

In pursuance of the usual custom of late years, and deeming it a valuable accompaniment to the Mortuary Statistics, this appropriate table worthily occupies the concluding portion of this Report. Observations taken several times daily, of the character of the weather, are always important memoranda, pertinent to the subject. Vital derangements, whatever may be their extent, and whether they are caused by the prevalence of endemic or epidemic influences, or whatever else may be their origin, have a close relation to atmospheric conditions, and hence, the propriety of publishing a correct and regular series of weather observations in connection with the annual mortality, will scarcely be denied. Hitherto this Department has been indebted to the New York (City) Hospital for their yearly Register; but being desirous of presenting a fuller representation of these matters, I availed myself of the indefatigable labors of Dr. J. P. Loines, of this city, who, from much practice, and the possession of all the necessary instruments and implements of the professional Meteorologist, has acquired a proficiency, enabling him to furnish observations, upon which it is deservedly conceded the strictest reliance may be placed. Among the important additions exhibited, will be found the *temperature of evaporation*, and the *weight of vapor*, so essential to a practical use of weather statistics. Without entering into

any synopsis of his various tabular statements, the summary, affording all that is required for a general view of the annual phenomena, the inquirer is referred to the document itself, which will be found replete with all relevant information.

Thus, is presented a brief review of last year's Mortal Record. The publication of this Report has been delayed beyond the time I anticipated, owing to several causes, but mainly to the large increase of deaths in 1854, the compiling of whose statistics in the ordinary way, would necessarily have deferred the completion of the work; but the present Annual Document has otherwise required much additional labor and industry—the extension of the tables—their variety of elaboration—the introduction of new features—and the careful revision of all the tabular proofs, have contributed to prolong its appearance.

In the *Sanitary* branch of this Department, a large amount of business has been transacted. During the early part of the year, by the authority and direction of the Board of Health, the streets, belonging to another executive section of the Municipal Government, were thoroughly cleaned under my immediate supervision, occupying more than a month in the performance—and throughout the whole season, in consequence of the prevailing epidemic, every portion of the city required unceasing vigilance in order to keep it in a wholesome condition; thus considerably adding to the ordinary duties of each official post. It is, however, not essential in this Report, to embody in detail the business of this *Bureau*; it so frequently becomes my duty to address the Common Council upon the subject of the protection and preserva-

tion of the common health; and the communications thus transmitted, forming a portion of the volume of Proceedings, they are already in possession of the various statements and suggestions relative to the daily transactions of my especial charge. I therefore omit in this place any further allusion to the matter, and solicit that attentive notice of the Report required to afford whatever information I am enabled to bestow.

Respectfully submitted,

THOMAS K. DOWNING,
City Inspector.

DOCUMENT No. 3.

BOARD OF COUNCILMEN.

JANUARY 5, 1855.

The Special Committee presented the following Rules and Orders, which were laid on the table and directed to be printed.

C. T. McCLENACHAN, *Clerk.*

I. Upon the appearance of thirty-one members, the Board shall be called to order by the President, or if he be absent, by the Clerk, and a President *pro tem.* appointed by the Board, for that meeting, or until the President appear.

II. After reading and approving the minutes, the order of business, which shall not be departed from, except by the consent of forty members, shall be as follows:

1. Presentation of petitions;
2. Motions and Resolutions, for which the Wards shall be called in numerical order, beginning at alternate meetings with the First Ward and the Twenty-second Ward;

3. Reports of Committees;
4. Communications and Reports from the Departments;
5. Third reading of acts, resolutions and ordinances;
6. Special orders of the day;
7. General orders;
8. Messages from the Mayor and the Board of Aldermen may be received at any time.
9. Unfinished business may be resumed at any time under the same order upon which it was taken up.

III. Every petition, remonstrance, and other paper presented to the Board, shall be presented by a member in his place; and before presenting the same, the person presenting, shall indorse thereon the substance thereof, and sign his name thereto.

IV. No motion or resolution shall be debated or put unless it be seconded, nor until it be stated by the President; and every such motion shall be reduced to writing, if any member desire it.

V. When the Board shall be equally divided, including the vote of the President, the question shall be lost.

VI. A motion or resolution may be withdrawn at any time before action had on it.

VII. Resolutions giving rise to debate, upon the request of five members, shall lie over one day; after which they may be called up, of course, under that order of business.

VIII. All questions, relating to the priority of business, shall be decided by the President, without debate.

IX. The President shall preserve order and decorum, and decide all questions of order, subject to an appeal to the Board.

X. Whenever the President shall wish to leave the chair, he may substitute a member in his place; but such substitution shall not continue beyond the day on which it is made.

XI. The President may call special meetings of the Board whenever, in his judgment, the interests of the city may require it.

XII. Every act, resolution, or ordinance, appropriating money, or involving an expenditure of money, or relating to any lease, or sale, or other disposition or appropriation of any public property, privilege or franchise, shall be referred to the Committee of the Whole, unless otherwise ordered by forty members. Every act, resolution, or ordinance, which may have been referred to the Committee of the Whole, shall receive three several readings previous to its being passed, and the third reading shall not be on the same day on which it is acted on in committee, unless by consent of forty members.

XIII. In forming a Committee of the Whole, the President shall leave the chair and appoint a chairman to preside. The rules of the Board shall be observed in such Committee, except the rules respecting the ayes and noes, the times of speaking, and the previous question.

XIV. On motion in Committee to rise and report, the question shall be decided without debate.

XV. After the report of the Committee, such amendments only shall be in order, as were offered and acted on in Committee.

XVI. When the question in debate contains several distinct propositions, any member may have the same divided.

XVII. All questions shall be put in the order they are moved, except those of privilege. When blanks are to be filled, the longest time and smallest sum shall be put first.

XVIII. When a question is under debate, no motion shall be entertained, unless

1. To adjourn.
2. To lay on the table.
3. For the previous question.
4. To postpone to a day certain.
5. To refer.
6. To postpone indefinitely.
7. To amend.

Which motions shall have precedence in the order in which they stand. A call of the Board may be ordered at any time.

XIX. When a resolution shall be offered, or a motion be made to refer any subject, and different Committees shall be proposed, the question shall be taken in the following order:

1. A Standing Committee.
2. A Select Committee.
3. The Committee of the Whole.

XX. A motion to refer, or lay on the table, until it is decided, shall preclude all amendment and debate of the main question.

A motion to postpone, until it is decided, shall preclude all amendment of the main question.

A motion to adjourn shall always be in order; and that, and a motion for a call of the Board, shall be decided without debate.

XXI. No act, resolution, or ordinance, sent from the Board of Aldermen, shall be called up for final passage on the same day it is presented to this Board, unless by consent of forty members; nor shall it be acted upon on the same day it shall have passed the other Board, unless by unanimous consent; except in case of invasion, insurrection or pestilence.

XXII. It shall be the duty of the Clerk to publish all ordinances and amendments of ordinances which shall be passed; and also, the proceedings in the newspapers employed by the Corporation, except such parts as may require secrecy; and whenever a vote shall be taken upon the passage of a resolution or ordinance, which shall contemplate any specific improvement, or involve the sale, disposition or appropriation of public property, or the expenditure of public money, or the income therefrom, or lay any tax or assessment, he shall, before the same is sent to the other Board, and immediately after the adjournment, cause the same to be published, with the ayes and noes, with the names of the persons voting for and against the same in at least two newspapers, as a part of the proceedings and shall thereafter certify and send to the other Board every act, resolution, and ordinance, which has originated in and passed this Board, and which require a concurrent vote of the Board of Aldermen, and shall deliver to the Mayor, certified in like manner, all such acts, ordinances and resolutions, which shall have been received from the Board of Aldermen, and concurred in by this

Board, and which are required to be submitted to him for his approval; and shall certify to the other Board the proceedings of this Board, in reference to all acts or business originating with the other Board.

XXIII. It shall also be the duty of the Clerk to make and keep a list of all messages, acts, resolutions, ordinances and reports, not finally or specially disposed of, in order of priority, which list shall be the "General Orders;" also, a like list or "Calendar of matters ordered to the Committee of the Whole;" also, a like list or "Calendar of matters ordered to a Third Reading."

XXIV. Every member who shall be present when a question is put, shall vote thereon, unless the Board shall excuse him. or unless he be immediately interested in the question, in which case he shall not vote. But no member, on a taking of the ayes and noes, shall be permitted to vote, unless present when his name is called in regular order, except by consent of a majority of the members present.

XXV. Any member who shall have voted with the majority, may move for a re-consideration, provided he do so at the same or the next meeting, and whilst the act, resolution or ordinance is in the possession of the Board; such motion having been once put and lost, shall not be renewed, except by the consent of forty members.

XXVI. Every member, previous to speaking, shall rise in his place and address the President.

XXVII. When two or more members rise at the same time, the President shall name the member who is first to speak.

XXVIII. No person shall speak more than twice to the same question, without leave of the Board, nor more than once, until every member choosing to speak shall have spoken.

XXIX. A member called to order shall immediately sit down, unless permitted to explain; and the Board, if appealed to, shall at once decide on the case, without debate. If there be no appeal, the decision of the chair shall be submitted to.

XXX. The previous question shall be admitted only when demanded by a majority of the members present, and until decided, shall preclude all amendment or debate, and must be put in this form: "Shall the main question be now put?"

XXXI. When the previous question shall have been ordered, and there shall be pending amendments adopted in Committee of the Whole, but not acted on in the Board, the question shall first be taken upon such amendments in their order, and then upon the main question, without further debate or amendment.

XXXII. On taking a vote by ayes and noes, in the cases required by law, as well as when required by five members, the names of those who vote for and those who vote against the question shall be so entered in the minutes; and when so taken, on the call of a member, the name of such member, and the fact, shall also be entered in the minutes.

XXXIII. All appointments of officers shall be by ballot.

XXXIV. All Committees shall be appointed by the President, unless otherwise ordered by the Board.

XXXV. The Standing Committees shall be as follows:

1. Alms House Department.
2. Arts and Sciences.
3. Assessments.
4. Cleaning Streets.
5. Croton Aqueduct.
6. Ferries.
7. Finance.
8. Fire Department.
9. Lamps and Gas.
10. Lands and Places.
11. Law Department.
12. Markets.
13. Ordinances.
14. Police.
15. Public Health.
16. Public Buildings on Blackwell's Island, Ward's Island, Randall's Island, and Bellevue Establishment.
17. Railroads.
18. Repairs and Supplies.
19. Roads.
20. Salaries and Offices.
21. Sewers.
22. Streets.
23. Wharves, Piers and Slips.
24. Joint Committee on Accounts.

Each of which shall consist of five members, except the Joint Committee on Accounts, which shall consist of three members only.

XXXVI. The President shall be, *ex-officio*, a member of all Committees; but a majority of the other members shall be sufficient to agree upon a report.

XXXVII. Committees shall inquire into the matters referred to them, and report, in writing, the facts in relation thereto, with their opinions thereon, and attach to such report all resolutions, petitions, remonstrances, and other papers relating to the matters referred; but no report shall be made without consent first had, unless signed by a majority of the Committee; nor shall any matter reported on, be taken up for final action the same day on which it is reported, unless by the consent of forty members. No report shall be printed, unless by the express direction of the Board; specifying the number of copies to be printed.

XXXVIII. No member shall absent himself without permission of the President; nor, on adjournment, leave his place, until the President leaves the chair.

XXXIX. Whenever the doors are directed to be closed, all persons, excepting the members and the clerk, shall retire.

XL. No person shall be permitted on the floor of the Council, unless in the discharge of official duty, or by special invitation of a member, except the Mayor, Aldermen, Heads of Departments, or officers of the state government, and reporters for the press. The privilege of admission, under any invitation, shall not extend beyond the day for which it is given.

XLI. The regular sessions of the Board shall commence on the first Monday of each month, at five o'clock P. M.,

and shall continue on each Monday, Wednesday and Friday at the same hour, until the business of the monthly session is concluded; provided that the Board may, by a vote of a majority of the members present, adjourn for a shorter time. And the first business in order on Friday evenings shall be the third reading of bills.

XLII. No standing rule or order of this Board shall be changed, or rescinded, without one day's previous notice being given of the motion therefor: But any rule or order may be suspended, for a special purpose, by a vote of forty members

DOCUMENT No. 4.

BOARD OF COUNCILMEN.

JANUARY 12, 1855.

The following communication from his Honor the Mayor, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

*To the Honorable the Common Council
of the city of New York:*

GENTLEMEN:—In my communication to your Honorable Body, on the first instant, I purposely omitted many recommendations, and subjects of interest, and promised that as soon as you were organized, and ready for business, they would be made.

It is the duty of the Mayor to communicate to the Common Council, at least once in each year, a statement of the affairs of the city. In pursuance of this duty, and of the promise made by me, I submit this communication.

The several annual reports from the executive departments have been several days before you, and no doubt, thoroughly examined. In taking a survey of the affairs of the city, the first object to present, is the condition of the finances. A statement with reference to it is herewith furnished.

Permanent city debt, redeemable from the Sinking Fund, January 1st, 1855:

5	per cent. Water Stock redeemable, 1858....	\$3,000,000
5	" " " " 1860....	2,500,000
5	" " " " 1870....	3,000,000
5	" " " " 1875....	255,600
5	" " " " 1880....	2,147,000
5 & 6	" Croton Water Stock, " 1890....	1,000,000
7	" Water Loan, " 1857....	990,488
5	" Public Building St'k, " 1856....	515,000
5	" Building Loan Stock	
	No. 3, " 1870....	75,000
5	" Do. " 4, " 1873....	75,000
5	" Fire Indemnity Stock, " 1868....	402,768
		<u>\$13,960,856</u>

Corporation stocks and bonds held by the Commissioners of the Sinking Fund, on account of redemption of the city debt...\$4,252,289

Additional assets (bonds and mortgages) held by the Commissioners

on said account..... 911,886

Balance in bank, Jan. 1, 1855..... 17,240 5,181,415

Actual amt. of permanent debt, Jan. 1, 1855, say \$8,779,441
which is a reduction, as compared with the
amount of debt, January 2, 1854, of \$460,246

Funded debt redeemable from taxation, and payable (with the exception of Public Education Stock,) in annual instalments of \$50,000, January 1st, 1855.

6	per cent. Building Loan Stock, No. 2, redeemable in 1855 and 1856.....	\$100,000
5	" Public Building Stock, No. 3, redeemable in 1857 and 1864....	400,000
5	" Stock for Docks and Slips, redeemable in 1867 and 1876.....	500,000
5	" Public Education Stock, redeemable in 1873.....	154,000

Total amt. of funded debt, Jan. 1, 1855.... \$1,154,000

which is an increase, as compared with the amount of debt, January 2, 1854, of \$204,000.

The revenues of the Sinking Fund, for the payment of interest on the city debt, are fully adequate for the payment of interest on the above stocks. The balance to this account, January 1, 1855, being \$60,000, invested temporarily in revenue bonds of the city Corporation, and cash in bank \$317,106 11, thus rendering it unnecessary to raise *any amount* for "interest on city debts" by taxation.

In connection with this statement another is presented, of the amounts which have been raised, by taxation, from 1844 to 1854, inclusive:

1844.....	\$1,988,818 56
1845.....	2,096,191 18.
1846.....	2,520,146 71
1847.....	2,581,776 30
1848.....	2,715,510 25
1849.....	3,005,762 52

1850.....	\$3,230,085 02
1851.....	2,924,455 94
1852.....	3,380,511 05
1853.....	5,067,275 69
1854.....	4,845,386 07
And to be raised in 1855.....	5,918,593 25

By this it will appear that the expenditures have gradually and steadily increased, though it is well known that the character of our government has deteriorated.

The people of this city cannot realize that the actual cost of conducting their municipal affairs amounts to the sum annually expended. They do not believe that all of the money appropriated is devoted to public wants. In my opinion, an examination of the subject, and close scrutiny of the various items composing the accounts of the disbursing officers, will show that it is the undue, unnecessary, extraordinary outlays, without sufficient equivalent, that have swollen our taxes to their present enormous amount.

It behooves us, as guardians of the public interests, to look to the subject. If it is longer permitted, we are *particeps criminis*, whether the money is spent under our own eyes or not. Besides greater caution in appropriations, we are called upon to exercise more vigilance over, and demand severer accountability from those who spend the money. The smallest items of expenditures should be guarded as sacredly as if amounting to hundreds of thousands. The principle which will permit a disbursing officer to divert the value of one dollar, in money or property to his own or his friend's purpose, will, in time, render him a defaulter or a peculator.

The treasury can be relieved in many ways; several

present sources of expenditure can be abolished entirely, and large sums be brought into the treasury, which now go to the pockets of individuals.

THE STREETS.

The street openings and subsequent heavy outlays for that purpose in regulating, grading, paving, sewerage, repairing, &c., are one of the heaviest burdens we bear. It is no answer to reply that much of it is returned to the treasury by assessments upon the property benefitted; it is of little importance to the party who pays, whether the money is procured from him, under pretext of adding to the value of his real estate, or whether under the plea of supporting the government.

We have no right to make distinction:—It is our duty to protect the private property of the people, as well as their public treasury. As now conducted the public business, appertaining to streets, is under the direction of six of the departments, besides several outside Commissioners, Inspectors, Surveyors, Appraisers and other temporary selected agents. The law officer superintends the selection of Commissioners of Estimates and Assessments to open, examines titles to property effected, and counsels the legal proceedings, necessary in opening, widening, and altering streets.

The Street Department advertises for proposals to open, makes contracts therefor, and through its bureaux makes and collects assessments; it also has charge of the opening, regulating and paving. The Croton Aqueduct Department attends to the sewerage, and laying Croton water pipes.

The Repairs and Supplies, has control of repairing, relaying pavements, curb and gutter, &c.

The Streets and Lamps, place lamp-posts, and superintends the lighting and cleaning.

The City Inspector's Department attends to the removing of nuisances, carrying off dead horses, and other animals, and has general charge of every thing relating to the streets, which effect their sanitary condition. Each has numerous subordinates with light duties, but large compensation. Commissioners are appointed for each job, even to "declare" a street opened, but for one block, and though it may remain closed for a quarter of a century afterwards. Many of these persons, really and in fact, in person perform no actual duties, and are compensated in proportion to the delays produced, and money expended. These places are often given as the reward for other than official service, which is not of much value to the city; some of this class may be called "professional street openers," whose time is devoted to the procurement of jobs of this kind, and by getting resolutions through the Common Council to "open" when there is no necessity for it; they are strong in partizan influence.

The law, which gives to a majority of the property holders to be effected by an improvement when unnecessary, the power to prevent, is inoperative before them; several instances have been recently brought to my attention, in which their influence over the Common Council has suppressed the voice of two-thirds of the parties in interest who had remonstrated against their further proceedings. If pressed, they obtain delay in the Common Council, until all they can make out of the job is procured, when they magnanimously withdraw their opposition, and the city must foot the bill and their "estimate and assess-

ments," amount to nothing. Some of these persons have several streets on hand at the same time, and make large sums of money. It is but proper to add, that sometimes there are commissioners who are not comprehended within this description of them as a class.

Another class more useless though not so expensive, is the inspectors appointed to superintend the grading, regulating and cleaning of streets, building of sewers, docks, piers, &c. Some of these people seldom see the work for which they are appointed inspector, and if they do, they know nothing of it, or do not wish to know, provided the contractor is a clever fellow, and does "what is right."

These departments frequently come in conflict with each other; it sometimes happens that they are nearly all engaged at the same time, upon some part of the same street. It often occurs, that soon after the paving is completed, it is taken up to lay down a sewer, Croton water or gas pipes. Each department being independent and sometimes inimical to the other no concert exist, but every one upon its own notions, proceeds to do what it deems best without thinking or caring of expense or public convenience.

It is no exaggeration to say, that sometimes twenty officials belonging to different departments, are engaged in doing at the same time, that which could be accomplished by one man, if acting for himself, in one-twentieth the time and at one-twentieth the cost.

Each department is its own master and acts upon its own volition, without consent or consultation, and not unfrequently strives to thwart the plans of each other, and

produce confusion. Every person having the control of private business or interest, can see, without further comment the reason why so large a sum is expended upon our streets.

The business-care, concentration, uniformity and regularity so essential to the success of any enterprise is entirely wanting.

A general cutting-up and distribution of authority, creating irresponsibility and negligence is productive of profligacy in expenditure and inefficiency in the performance of work. This abuse must be reformed. It has become too serious to be permitted longer.

The little time which has been left me for investigation consistent with other duties, has satisfied me, that the whole business should be entirely under the control of one department, and at least one of the existing departments, could be abolished entirely. There should be a Street Department having sole jurisdiction over the whole subject; some part of the duty could be advantageously given to other departments, without detriment or additional expense.

There should be a permanent Board of Commissioners, instead of three for each job as now, which should have the power to appoint permanent surveyors for the whole city, instead of one for each work as now. It should be made the duty of the law officer of the Corporation, to give his services without any additional compensation, directly or indirectly, and if receiving fees, the amount should be paid into the treasury.

There should be one or two permanent inspectors for the whole city, provided any is required, which I doubt,

instead of one for each job, as now. The duties now-performed by the Bureau of Assessments should be done by the present Board of Tax Commissioners, without additional compensation, who have not only sufficient leisure, but the surveys, maps, and the assessed values of every improved and unimproved lot in the city within their own office, by which to facilitate the duty. The collection of assessments should be made by the Receiver of Taxes.

That branch of the service coming under the head of repairs should be severely scrutinized, and every dollar accounted for under the most stringent rules of accountability, and nothing should be expended except upon previous appropriation, with specific reference to the object for which the money was intended. The inconvenience and delays which would attend previous appropriations upon detailed estimates for even small sums could be of little consideration as compared with the principle of unauthorized expenditures with the official profligacy which too often follows in its train.

TAXABLE PROPERTY.

Another matter of much importance is the feasibility of enlarging the basis upon which to levy tax. The Board of Tax Commissioners organized a few years since, has added much to the taxable basis of real and personal estate. There is yet room for increase.

Notwithstanding the vigilance of these officers and the assessors, a very large amount of personal property escapes, and an undue proportion is consequently put upon real estate. A distinction is thus created entirely unjust to real property, calculated not only to effect its value, but

to retard the growth of the city. There is no solid reason why distinction should be made in the kind of value, whether real or personal, upon which we levy tax. So long as the principle of taxation is upon *property*, *all* property should bear alike.

Besides the large amount of personal estate that escapes in consequence of the inability to discover it, there are immense amounts belonging to foreign manufacturers and traders, in the hands of agents resident here, who refuse to recognize our authority to collect. A very large sum thus gets clear.

This foreign property receives all the protection which the city government affords, in common with that of our own people, which pays the expense.

These foreign owners not only enjoy equal privileges with native citizens, but in not paying taxes upon their property, possess an exemption which enables them to compete with American labor, and affording them undue advantages.

People who pay taxes cannot sell merchandise as low as those who pay none. Means should be taken during the present session of the legislature to procure the passage of a law, making the property of foreign manufacturers and others liable to taxation.

ABOLITION OF FEES.

As a further means of revenue, I recommend an application to the legislature for a law which will bring into the treasury the large sums now received by the Register, County Clerk, Counsel to the Corporation, Corporation

Attorney, and other county officers, who receive fees as their own perquisites.

In some instances these sums are said to amount to from twenty to thirty thousand dollars per annum to one person. Whilst it is right that every public officer should be sufficiently compensated, yet there can be no good reason for permitting a few to amass large fortunes, whilst other officials, who perform more labor and more responsible duties, are paid one-fifth the sum, and the whole community is burdened with taxes. Give liberal salaries, but let all fees go to the treasury.

INTEREST TO BE CHARGED.

A further relief may be found in requiring interest on deposits with the City Treasurer, and collecting and disbursing officers generally. The equity, practicability and importance of this measure is so apparent, that it surprises me it has not sooner been adopted. A very large revenue could be thus derived. There was to the credit of the city in the hands of the Treasurer on the 28th of November, 1854, over one million of dollars; the 1st December, 1854, over one and a half millions, from which was drawn on these dates about a half million, leaving about two millions to the credit of the city. Additional large sums have since been drawn, leaving however on the first of January, inst., a balance, remaining to the credit of the city of one million two hundred and eighty-three thousand four hundred and seventy-four dollars, for which the city receives no allowance of interest whatever.

It is proper to add that it frequently occurs that the City Chamberlain is in advance to the city, and that dur-

ing the last year he advanced fifty to sixty thousand dollars, on claims on the treasury, for which warrants could not be given. Thus offering facilities to individuals, having claims, who otherwise would be obliged to wait the slow process of legislation, to be paid their just dues. Notwithstanding, however, this accommodating disposition upon the part of this officer, I can see no reason for conducting the financial affairs of the city upon any other principle than that which governs the commercial intercourse of individuals.

I am satisfied that the nearer we approximate the laws of trade, the better will public business be conducted, and the interests of the treasury protected.

The city is obliged to pay interest, when using the funds of individuals, and it should receive interest from individuals, who have the use of its money.

Last year the Comptroller borrowed upon Revenue Bonds, three millions six hundred and ninety-three thousand dollars, nearly the whole of which was borrowed at the rate of *seven* per centum, and for which we are still paying interest, notwithstanding the large amount now lying to the credit of the city in bank. How long could an individual or a banking institution retain its credit or its capital, that conducted its affairs upon so ruinous a principle? The state of New York discovered the value of its own revenues when laying in bank-vaults, as early as 1826. It then adopted the policy of requiring interest upon its canal funds, which has been followed since, without deviation. My last advices from the Capitol state, that two millions and a half of dollars, have been already received from that source, for interest exclusively, on the deposits of this fund with the banks. And it is well

known that some of the heads of the city collecting and disbursing bureaux, have been in the practice of receiving interest from various city banks, on the public money in their hands, which has gone into their own pockets as private perquisites.

In recommending a revenue from this source, I beg to be understood that no step should be taken in effecting it, which would in the least jeopard the security of the money. Security is the first consideration.

A prudent business man never hazards his principal in efforts to accumulate interest; but if safety and profit can be combined, and in my judgment it can be, we should be largely the gainers, and to that extent taxation lessened.

ESTIMATES AND APPROPRIATIONS.

Another object of importance, by which large sums now extracted from the treasury could be saved, is, the necessity of adopting some mode, by which all disbursing officers shall be prevented from the expenditure of money, or creation of obligations to pay, for which the city is liable, without previous appropriation, and a balance unexpended, to meet it.

Many abuses have grown up under the present loose manner of expending money.

It is useless to ask the departments for estimates upon which to base the appropriation, if they are disregarded afterward. So long as the Common Council pass resolutions incurring expense, and the departments execute them, frequently by using funds, appropriated for other purposes; so long will our taxes continue to increase, and the enormous annual deficiencies, now so common, continue to startle us at the end of the year.

Means should be taken to stop this altogether; the head of a department should not be allowed to exceed his own estimates, or the appropriation made; he and his bonds should be made responsible to the city, for any liability thus incurred.

Disbursing officers must be confined within the spirit, as well as the letter of the charter, which provides that *no money* shall be drawn from the city treasury, except the same shall have been previously appropriated to the purpose for which it is drawn.

An honest version of this provision makes it applicable to the creation of an obligation, to be liquidated out of subsequent appropriation, as it is to that directly referred to.

SUSPENDED SALES FOR TAXES AND ASSESSMENTS.

You should also take measures to collect about seven hundred and fifty thousand dollars from the suspended sales for taxes and assessments, which can be obtained upon the necessary legislative action empowering the Comptroller to proceed. The sum is sufficiently large to demand your immediate attention.

CONTRACTS.

The present mode of making contracts is defective. Notwithstanding the improvement of late years, in exacting more publicity, in opening bids, and in guarding against favoritism in granting contracts, yet it is supposed much wrong still exists. There is no doubt that frauds are still perpetrated in this branch of the public service. Bids are frequently put in in the name of fictitious per-

sons, ranging from a high to a low estimate—speculators standing ready to take advantage of any embarrassment to the department, owing to the non-appearance of the false bidder, and to get the contract at the highest possible limits. Again it is the practice to put in estimates, not with the expectation of making and performing a contract, but to be bought off by some more responsible party, who has been under-bid. Various other ways, the details of which are known only to the initiated are in vogue, by which to defraud the treasury. If the head of a department acts in collusion with these outsiders, it is next to impossible to prevent frauds under the present system.

One of the best safeguards may be found in more general publicity, in offering to receive proposals. The expense of advertising is of no importance, as compared with the benefit to be derived from it.

The object of offering public proposals to make contracts, is to invite competition and prevent the high prices, which monopoly produces; it is defeated if the advertisements are published in obscure papers, unknown to, and unread by the mass of the people.

Too much publicity cannot be given to the offering of contracts; the expense of general advertising will be more than made up by the increased bidding, and consequent reduced prices.

CITY RAILROADS AND OMNIBUSSES.

I also recommend the taxation of city railroad cars. It appears to me that these companies should pay at least one hundred dollars license upon each car, besides keeping the streets and avenues through which their tracks are laid in complete repair, and always clean.

The city government receives no equivalent for the privileges these roads possess, which are now very valuable. So far as rail-travel in this city can affect them, the present roads may be said to have a monopoly. A recent state law secures their grants, and in effect precludes opposition or annoyance; they occupy, to the exclusion of all other citizens, the centre of our best business avenues.

Exclusive privileges are always to be deprecated, but when granted, the city should in return receive an ample pecuniary equivalent. A revenue of forty thousand dollars could be procured from this source, besides the saving of the very heavy cost of repairing and cleaning the thoroughfares.

The omnibusses should also keep in repair and clean the streets through which they pass, or pay into the treasury a sufficient sum for that purpose.

These vehicles do more injury to the pavements than all the rest of the travel together, and the city in return, receives no pecuniary aid from them for that purpose whatever. The existing lines of omnibusses are well secured in their privilege, having, by the law of 1854, made it so difficult to procure licenses for competing lines, that they now enjoy almost a monopoly. How far the out-town railroad lines, entering the city, are subject to municipal regulations, I am not at this time enabled to advise; my opinion, however is, that there is nothing in their charters entitling them to exception from any tax, which you may deem a fair equivalent for the right of way they now possess.

If upon consultation with the Counsel of the Corpora-

tion, there be no legal obstacle, I make the same recommendation as to a car tax, and the cleaning and repairs of the avenues and streets through which they pass, as made with reference to the city railroads.

EMIGRANTS.

It is well known that for many years extortions and oppressions of the most inhuman character have been practised upon the emigrants coming to this port.

There appears to be a series of organized classes of persons, all connected, and acting from a common impulse of plunder, who take, and keep possession of their victims as long as a sixpence is left to rob them of. These vampires form a cordon, stretching from Sandy Hook to the lakes—and to the far West.

They act in concert, with a well formed understanding, and spend large sums to protect themselves from detection and punishment. Common humanity, as well as the honor and prosperity of this city and state, call for more stringent laws and regulations governing our whole emigrant system. I regret that this, already too lengthy communication, prevents more extended comments upon this branch of the subject, consistent with others demanding attention.

Much inconvenience to the shipping interest is caused by the present mode of landing emigrant passengers.

As now conducted it is a serious evil, not only to the passengers, but also to the vessels from which they land, and to other vessels, with which they materially interfere. This is also an evil calling for some action at your hands—as now conducted it is productive of great hardship to the emigrant and injury to others.

Now a ship arrives from sea with her decks crowded with hundreds of men, women, and children, and hauls outside and alongside another vessel at her berth, discharging or taking in cargo, which may be composed of fine goods in valuable packages.

As soon as the emigrant ship nears the wharf she is boarded by an army of runners, cartmen and others, having business with, and too often design upon her passengers, and the passengers are dragged over the vessel discharging, to the shore; her cargo, which may be on deck, or upon the dock, is not only materially injured, the packages soiled, broken, or stolen, but an embargo is laid upon all work for the time being. Thus a serious injury is inflicted. This evil has grown to be intolerable. The remedy is very simple. One or two piers should be set aside, away from the pressure of shipping, and exclusively devoted to the landing of emigrant passengers. They should be inclosed, and only persons properly clothed with authority, and of good character, be permitted within the inclosure. The police could be stationed there to protect and direct the emigrants, and, as the boarding-houses and forwarding offices would of course locate in the vicinity, the emigrant would be benefitted, as well as the present injury to other shipping entirely removed. These suggestions are worth attention, and, I hope, will be acted upon.

It has long been the practice of many governments on the continent of Europe, to get rid of convicts and paupers by sending them to this country, and most generally to this port. The increase of crime here can be traced to this cause rather than to defect in the criminal laws, or

their administration. An examination of the criminal and pauper records, shows conclusively, that it is but a small proportion of these unfortunates who are natives of this country. One of the very heaviest burdens we bear is the support of these people, even when considering the direct cost; but when estimating the evil influences upon society, and the contaminating effect upon all who come within the range of their depraved minds, it becomes a matter exceedingly serious, and demanding immediate and complete eradication. I know no subject of more importance; certainly we have the power to protect this city against the landing of so vile an addition to our population; the health, as well as the life and property of the people for whom you legislate, requires some action at your hands. I am confident the general government will listen to any representations from you, relating to it, and interpose its national authority in our behalf. On the 2d instant I made this grievance the subject of an official communication to the President of the United States, a copy of which is annexed, marked A.

The constantly increasing expenses of the Alms-house Department, and the want of control of the Corporation over them, should not escape your notice. I am satisfied, that whatever may be thought as to the exercise of proper economy upon the part of the Governors of the Alms-house, there can be no doubt that one cause for the present large outlay required is the maintenance of persons who should be a charge upon the fund, under the exclusive control of the Emigrant Commissioners. It is evident, that the object in creating this Board was to have full control over the whole subject, and to bear the entire costs of the support of these unfortunate people, at least, until they

have been five years in this country. In practice, this appears not to be its operation. At least a portion of the inmates of the institutions under the control of the Alms-house Governors, who are supported by the city, are properly chargeable to the Emigrant Commission. In my opinion the whole subject requires revision. An entire alteration of the present system is absolutely demanded. As it is now, the tax payers of this city have not only to support the poor of the city, and a portion of that belonging to the surrounding country, which find their way here; but also a very large portion of the paupers of every nation in Europe.

The absolute cost of supporting *our own* poor would be a trifle too small to be worthy of comment; but when required to perform the duty for so many other communities, its burden has become of too great a magnitude to be submitted to longer. The Board of Emigrant Commissioners was created in 1847, to protect and provide for the emigrants arriving at this port; a fund is provided for this purpose. It is a state institution, mostly under the control of officers appointed by the Governor and Senate, and, in all respects, independent of our municipal action. Its existence is a recognition of the position that the persons called emigrants should, in no respect, be a tax upon this county. As now conducted, it is a grievous tax. We support the emigrant criminal sentenced to Blackwell's Island, and other city penal institutions. A large number of policemen are detailed especially for their protection, for which our treasury pays. The Mayor's office, and no inconsiderable portion of his time are occupied in hearing and determining cases involving the rights and

property of emigrants, to say nothing of that branch of his duties relating to the proper licensing and regulating of emigrant boarding-houses and runners. In my opinion the city should be relieved altogether from these duties and expenses. So far as the state assumes to take charge of these people, she should carry out the work entire, we should be relieved from it.

POLICE.

This department of the city government is placed more directly under the personal supervision of the Mayor than others; and, in assuming its direction with the restricted power as to appointment and removal, which, after all, constitute the great elements of control, I feel much responsibility and concern; its present condition and discipline is susceptible of improvement.

There is an apparent want of energy and efficiency, which must arise from either defect in the system, or want of nerve and vigilance in those who direct it. It shall be my aim to remedy these omissions. I shall require the strictest accountability from the men and also from the several officers, who shall, in all cases, be made responsible for the conduct of the subordinates under their command.

It was thought, that making the police hold office during good behavior would remove it entirely from political influences. It may have had such an effect, to a degree; but whilst the power to appoint, suspend, and remove is political and elective, it will be expecting too much of human nature to suppose, that political influence can be excluded altogether.

A perfect police system must be founded upon freedom of all influences, except those produced by merit, arising from a faithful and efficient discharge of duty.

When the generals of an army are periodically subjected to change, and in some measure by the votes and influences of the army itself, it will be almost impossible to remove the partisan elements, which, *at every election*, are necessarily aroused into activity.

The whole Police Board was elected at the late election; two of the late board, (the Recorder and City Judge,) being candidates for re-election, and *policemen* would have been more or less than man, if they could have remained indifferent spectators of the result.

I am confident the judiciary is not the proper authority for determining police matters, nor are its members qualified, either by habits of life or train of reflection, to make good Commissioners. The bench and the service would each be benefited by a separation. My colleagues on the present Police Board fully concur in these opinions.

It shall be my aim to impress all connected with the police, that official merit, and not partisan influence, is what is expected of them, and so far as my power extends, it shall be exercised for the entire eradication of politics from the department.

On the first of January, instant, I issued new orders, a copy of which is annexed, [marked B,] and to which I call your attention; as developing the principles upon which I shall administer the department. In connection with this subject, it may be proper for me to add, that there has been opened

in the Mayor's office, under my direction, a book for recording complaints against the police, as well as for violations of the ordinances and laws, where charges will be entertained, and acted upon by me in person,

The police are required for several purposes other than the protection of the public interests of the city, for which it should not be obliged to pay.

There is one squad of the reserve corps detailed for the duty of boarding vessels from foreign ports, with emigrant passengers, and other service rendered, before referred to, which should be paid from the fund of the Emigrant Commissioners. Many other policemen are stationed at the several railroad depots and ferries, and at places of public amusement, by request of the proprietors, and for the protection of their private interests, and not for public purposes. This expense should be borne by the parties requiring their services. In London, where the police system is said to be better than our own, such is the practice; and the General Government has adopted the same course with reference to the salaries of its custom-house officers, when acting for private convenience or safety. About thirty thousand dollars would be thus saved.

The expense of the police force has attracted attention, and it has been properly suggested that it can be used for many public purposes, for which the city now pays heavily.

In considering the cost of the police, it should not be forgotten that it is almost entirely made up of salaries. This department disburses little money for any other purpose. It makes no contracts and procures no supplies; and is confined to the disbursement of such sums, for com-

pensation to the officers and men, as has been fixed by the Common Council. Be it more or less, no officer connected with it is in any way responsible. It is true, that much duty, now performed by subordinates under other departments, can be performed by the police, without impairing its efficiency. My direction has already been given to the patrolmen to act as street inspectors, and to report, through their officers, to me, every instance when the contractor fails to clean the streets within his district. They have also been required to report all excavations made under the side-walks or streets, by builders or others, the object of which is to supply information to the Commissioner of Streets, by which he can collect the legal claims of the city for appropriating to private use any portion of the streets.

If my recommendation of consolidating all business appertaining to streets into one department, is carried out, many collateral branches can be put under the Police Department, without any detriment to it whatever.

There is no question that the several duties of policemen are entirely too light, in view of the necessity of materially lessening the number of public officers.

It is for you to legislate upon this recommendation, and you will find me ready to enforce its practical operation.

SPRING CHARTER ELECTION.

I cannot omit expressing my conviction that much benefit could be derived to the city, by separating the election for charter officers from that for state or national officers.

As now conducted our local interests are almost entirely lost sight of in the conflict on state or national issues.

As the lesser is always absorbed by the greater, so is the apparently smaller affairs of our city government lost sight of in the contest on candidates for higher offices.

The magnitude of our municipal interests calls for the closest scrutiny into the qualifications of persons to take charge of them, no other considerations than those connected directly with local questions should be included in the canvass for city rulers. The evils of frequent elections are of little importance as compared with the danger of the selection of improper men. In the struggle for a governor or a president, persons entirely disqualified will sometimes slide unobserved into a local place of trust and power.

The election law, which places the candidates for county officers on the same ballot with candidates for state officers, increases the evil. At the late election there were twelve names on the same ballot; in the haste and excitement of election day, it is very difficult for even the most intelligent voter to select the names for whom he desires to vote when found upon the same ticket; but where the duty is imposed upon the illiterate or ignorant, it is seldom exercised, especially if there be a cunningly devised ballot, not permitting erasure or substitution.

CENTRAL PARK.

The commissioners appointed to open the Central Park, are progressing with the work—since the organization of the Board, it has collected and examined evidence of title to the lands to be taken for the park; in causing the necessary surveys, maps of blocks and profiles of grades to be

made; in personal view of the lands to be taken, and in procuring such information in regard thereto, as may serve to guide to a just valuation of the same; also in determining the area of assessment for special benefit, and procuring maps of the same, and in procuring evidence of the value of the improvements on the land to be taken, and are now engaged in the valuation of the lands themselves. It will be remembered that this park is to be bounded south by Fifty-ninth street, north by One hundred and sixth street, east by the Fifth avenue, and west by the Eighth avenue; and will comprehend an area of seven hundred and seventy-six acres, say.....776

From which deduct, State Arsenal.....	14	
Croton Reservoir.....	38	
Proposed "	112	
Streets and Avenues.....	190	
Belonging to the City... 34	388	
Leaving to be paid for—acres.....		388

Which, by estimating at sixteen lots per acre, makes six thousand two hundred and eight lots to be paid for by the city, and by assessments upon contiguous property. The important question of the valuation of these lots have not as yet been positively fixed by the commissioners. The subject is now before them, and I advise all who are interested to appear at their office. Another question of much public interest, in connection with this matter, is the territorial limit to which the commissioners shall extend their assessments upon property of individuals, and what proportion of the whole cost shall be made a tax upon the city.

These questions are entirely under the control of the commissioners. I am informed, unofficially, that the disposition of the Board is to extend the area of assessment three blocks east and west, and a greater distance north and south; and to make two thirds of the whole cost payable by the city. If this be the determination, it can be easily ascertained about what sum the park will cost. Estimating the average value of the land at five hundred dollars per lot—a liberal estimate—the whole cost would be three millions one hundred and four thousand dollars; deduct one third to be paid by individuals whose property is supposed to be benefited, it will leave two millions sixty-nine thousand dollars to be paid for by the city—a smaller sum than was anticipated at the time of passing the act. The commissioners expect to close their duties early in the ensuing summer. There can be no doubt as to the necessity of some such park conveniently located on this island. In my opinion, future generations, who are to pay this expense, would have good reasons for reflecting upon the present generation, if we permitted the entire island to be taken possession of by population, without some spot like this, devoted to rural beauty, healthful recreation, and pure atmosphere.

NEW PUBLIC BUILDINGS.

It is to be regretted that we are still without some definite action in this matter. It is a year since the old Almshouse buildings, which for several years were used for the purposes of a court-house, were destroyed by fire, and no conclusion has yet been arrived at with reference to the erection of a substitute. This should be one of the first measures to receive attention.

The present City Hall and its appendages are insufficient. The accumulation of public business of all kinds has rendered it imperative upon this city, regardless of expense, to make provision for it without delay. Many plans for a new City Hall have been proposed, none of which have been examined by me, and of which I am not competent to judge, had they been. I will suggest, however, that inasmuch as the day cannot be far distant when that portion of the city lying south of Grand street will be entirely occupied by wholesale business, to the exclusion of resident population, and that, as a City Hall, to contain the courts and offices for the transaction of municipal business should be in the vicinity of the numerical centre of population, whether it is politic to expend large sums of money in permanent improvements in the Park, as now located. We have no guarantee that the next generation may not demand their removal to a more convenient position. There can be no doubt that public offices, to which all classes, without distinction, are drawn, should be equally accessible to the whole population.

Nor can I recommend the adoption of a proposition recently made in the Common Council, by which the legislature is to appoint commissioners to superintend the erection of a new City Hall. The folly of transferring further legislation for this city to Albany, except to get a charter that will return to it a form of government commensurate to its wants, is so apparent, that I hope it will not be indulged in again. One legislative act after another has been adopted at Albany, until we are almost without any government whatever. There is now in preparation a proposition for the legislature to appoint six commissioners, with power to name every officer under

the city government, which, if it becomes a law, will give the extinguishing blow to what little power is left to the people of this city over their own municipal affairs.

PUBLIC SCHOOL EXPENSES.

Complaints are made of the largely increasing expense for public school education, and the want of power of the city government over the disbursements of the Board of Education.

My attention has been called to this subject, and though there is, no doubt, room for improvement as it regards the economy evinced in the erection and fitting up of school-houses, yet the benefits derived from the system are of too great a magnitude to be jeopardized by illiberality in defraying its cost.

I have no doubt that it is the general approval of our public schools, as now conducted, that induces the people to submit to the present onerous taxation. The great improvements in the mode of culture adopted, and the evident advantage of the public schools over the private schools of this city, have made them the general academies of tuition for the children of nearly the whole population. The cost to us in taxation is not one fifth the usual expense for an ordinary pay school education. Indeed there are few real estate owners, with families, who cannot get his whole tax returned by sending his children to the public schools, with the advantage of a better and more thorough education, and a discipline and moral training far more perfect than our fashionable "academies for young gentlemen" can pretend to.

Therefore, while discountenancing extravagance in any public department, yet having full confidence in the gentle-

men who have charge of the public education of this city, and deeply appreciating the system, I cannot recommend any step towards interfering with the management of it, so long as it continues to improve in efficiency and public benefit; and holds, as it does now, the position of our brightest ornament, with the prospect of being the fruitful source, from whence we are to derive yet higher honor, and more brilliant results.

REVISION OF THE ORDINANCES.

I cannot too earnestly impress upon you the necessity of a revision and a collecting of the ordinances into one or more volumes, and a codification of the laws applicable to this city. It would be almost incredible to a stranger to be told that there is no collection of the laws by which this city is governed.

A collection of ordinances has not been published since 1845, and of that but few copies remain; since 1845 material amendments have been made to the charter, and numerous resolutions and ordinances have been adopted, which are now to be found only by a voyage of discovery in the office of the Clerk of the Board of Aldermen, with the chance being very much against success, even with the guide of the accommodating officers who have charge of that office. The memory of persons who have for many years been connected with the Common Council is the only index in existence.

The mere statement of the fact, will, I am confident, procure action.

THE DOCKS.

The dock accommodations for the shipping of the city, is another subject which should receive notice. You need

not be informed that at present they are totally inadequate, both in extent and quality. There is no commercial city in the world, of the magnitude of New York, so deficient; substantial stone or iron docks and piers should be constructed, which would not only be durable, but in the result for more economical than those now in use.

A funded debt could be created for the payment of the cost, leaving to posterity, who are to be the recipients of the advantages derived from the construction, the liquidation of the obligation. The present, as well as the future accommodations for the shipping, which constitute so great an element in our prosperity, demand some action at your hands on this subject.

NON-PAYMENT OF CONTRACTORS AND OTHERS.

Much distress has recently been caused to persons having demands against the city, owing to the non-payment of salaries, and for supplies furnished, and contracts performed. Great injury has resulted to many individuals of small means from this cause. At any time, disappointments of this kind bear oppressively, but at a period of great monetary stringency, like the present, it is a hardship exceedingly onerous, and should not again occur. Besides the wrong done to the party having a just claim, in omitting to meet the demand, the injury to the treasury is not insignificant. We need not be told that a poor paymaster has to pay higher prices than he who meets his engagements promptly.

It is not unreasonable to expect that the city creditors will provide themselves against the loss arising from the difficulty in getting their dues, by charging sufficiently to cover the loss arising from these delays. Without recom-

mending any relaxation in adherence to the laws and ordinances governing the disbursement of money, I cannot omit to express the hope that you will take immediate means to prevent a recurrence of so great an evil to the creditors of the city, and preserve its faith and credit from dishonor.

RELIEF TO BROADWAY.

Another relief to the citizens could be found in the adoption of some mode to prevent the large collection of omnibuses in Broadway below the Park. In my opinion this evil should not be longer permitted.

If the stages now permitted to go to the South ferry were limited to one half the present number, the whole difficulty would be remedied. The many lines entering Broadway below the Park, not only obstruct the passage of each other, but frequently cut off, entirely, the passage of smaller vehicles. Foot passengers are excluded almost entirely from the cross-walks.

This evil is increasing, though the police, at an expense to the city, is kept on duty to prevent disorder, and to aid passengers in crossing.

The present laws deprive the Mayor of power over the omnibuses, so far as controlling their routes or their number, but I recommend that an ordinance be passed preventing any one line sending more than one stage in ten minutes, below the Park, in Broadway. The little inconvenience which this restriction would cause to persons having business below the Park would be of no consideration compared to the present difficulties.

I also recommend that the Russ pavement in Broadway be grooved. Though this beautiful and durable pavement is an ornament as well as advantage to the city, yet its smoothness renders it dangerous to horses. Its solidity retains moisture, which, when freezing, presents a surface of ice, rendering its use extremely dangerous.

CATTLE DRIVING.

The practice of driving cattle through the streets of the city is another evil calling for prompt action. It is an abuse which our citizens have submitted to too long. In my opinion this Common Council will deserve the severest censure, if like its predecessors, it timidly skulks from its duty in ridding us of this dangerous nuisance. Not only is the health of the whole population jeopardized by the unwholesome odors arising from the collection of these animals, but it not unfrequently occurs that life, limb and property are destroyed by it.

DIRTY STREETS.

In April, 1854, contracts were entered into for the cleaning of the streets and avenues of the city. The specifications of these contracts are stringent, and there would be no cause of complaint if the contractors performed them. They provide that every thoroughfare shall be thoroughly and properly cleaned and swept, and all the dirt, manure, ashes, garbage, rubbish and sweepings, of every kind, removed, twice a week; and in Broadway and the leading avenues three times a week. If these conditions were complied with, there could be no grounds of complaint. I regret to say they have not been complied with, and

though it is stated that in consequence of the low rates at which the contracts were taken, compliance is impossible without heavy loss; yet, in my opinion, there is no other resource than to demand a rigid fulfillment. If contracts are to be thrown up, or only half performed, at the will of contractors, because not profitable, the bargain is all on one side. Under this ruling, the city is to suffer in any event. So far as the law gives me power, I shall require strict compliance with the existing contracts to clean the streets; and that I may know which of the contractors are derelict, the police have been ordered to make the condition of the streets, in their several beats, the subject of observation, and to report, every day, the result.

I am not prepared to make any recommendations with reference to the Executive Departments not alluded to herein. I shall communicate to you, from time to time, such matters relating to them as call for your action.

FERNANDO WOOD.

(A)

MAYOR'S OFFICE, }
NEW YORK, January 2, 1855. }

HIS EXCELLENCY FRANKLIN PIERCE,
President of the United States.

DEAR SIR:—There can be no doubt, that for many years, this port has been made a sort of penal colony for felons and paupers, by the local authorities of several of the continental European nations. The desperate character of a portion of the people arriving here from those countries, together with the increase of crime and misery among that class of our population, with other facts before us, prove, conclusively, that such is the case.

It is unnecessary to refer to the gross wrong thus perpetrated upon this city. It requires from me no allusion to the jeopardy of our lives and property from this cause. Men who, by a long career of crime and destitution have learned to recognize no laws, either civil or natural, cannot fail to produce feelings of terror at their approach.

The inherent right of every community to protect itself from dangers arising from such emigration, cannot be questioned. New York has submitted to it long enough. The disease and pauperism arriving here, almost daily from abroad, is, of itself, a sufficient evil; but when to it is added crime, we must be permitted to remonstrate. We ask the interference of the general government; as it is its duty to protect us from foreign aggression, with ball

and cannon, so is it its duty to protect us against an enemy more insidious and destructive, though coming in another form.

I call your attention to this subject, hoping it will receive from you that action which its very great importance to the whole country demands.

I am very truly, yours, &c.,

FERNANDO WOOD, *Mayor*.

(B)

MAYOR'S OFFICE, }
New York, January 1, 1855. }

SIR:—I inclose to you, through the Chief of Police, certain instructions to the men under your command, to which I ask your attention.

You will see that every requirement is complied with, and that the results be reported every day to the Chief at his office, in your usual morning return. I will also take this occasion to ask of you the most rigid adherence to the rules and regulations governing the Department, and to express the hope that discipline will be observed, without relaxation, in your district. Discipline can only be maintained by a regard to the smallest requirements of the service: it requires compliance with *every order*, however trivial or apparently unimportant—it recognizes no right in a subordinate to judge the practicability or propriety of any direction issued by a superior officer. You must be responsible for every dereliction of duty by the force under your command, for it rarely occurs that an

efficient and faithful captain does not make efficient and faithful men. You will see that in your Station-house the apartments are always cleanly, that your books are correctly and regularly kept, and that no games are played for money, or profanity permitted; that religion and politics be entirely excluded from discussion; that loud talking and quarreling be prevented, and that order, decorum and attention to public duties be strictly required.

Very respectfully,

FERNANDO WOOD, *Mayor*.

To Capt.

of _____ District.

(O)

MAYOR'S OFFICE,
NEW YORK, JANUARY 1, 1855. {

SIR :—I have this day assumed the office of head of the Police Department of this city, and shall expect and require adherence to its rules and regulations. In your hands is placed the care of the property and lives, as well as the order, peace, and outward moral deportment of the whole community.

Though you cannot extirpate vice, you can do much to suppress it. Vigilance and an honest discharge of your duties, will not only enable the people to pay more for your protection by reducing the expense which crime produces, but add to the respectability of your positions and to the security of its continuance. There is now dissatisfaction in the public mind with the apparent in

efficiency of the police. There should be no cause for it! Let there be none! Your duties are light; the pay not illiberal; your social standing good; and the term, for which appointed, renders you independent of the contingencies to which the operative and other laboring classes are subjected. You hold positions of trust and honor to which the pride and ambition of any man need not be ashamed to aspire.

It is made my duty to see the laws faithfully executed; you are to be my aids in effecting this. I cannot look over the whole city to see that all is right; but you can for me. I rely upon you. You are to be the eyes through which the theatre of my duties is to be observed, and the messengers to convey to me, through your officers, faithful and truthful reports.

In addition to the rules and regulations now in force in the Department, and the several directions therein, you are requested to take note of and comply with the following :

It is hereby made your duty to report every day, when on duty, to your commanding officer, the following information; and an omission to do so, and to conform to every requirement of this circular, will be deemed disobedience, and punished as such.

To report every street uncleaned, in your patrol.

Every unlicensed public-house for the sale of liquor.

Every public-house kept open on the Sabbath.

Every house of prostitution.

Every gambling-house.

Every street not lighted at the proper hour.

Every street or side-walk encumbered, and the party or parties offending.

Every excavation made under the side-walks or streets, by builders, or others.

Every nuisance, and the party offending.

Every supposed dereliction by any officer of the Corporation.

Every violation of the city ordinances.

You are further directed to disperse all gatherings of men or boys at the corners of the streets or other public places, on the Sabbath day, where disorder is produced.

To enforce the closing of public houses on the Sabbath day.

To protect the stranger or emigrant from extortion or imposition.

To remove from the streets all beggars, and direct them to the several public and private institutions created for their relief.

To see that the ordinances for the removal of snow and ice from the side-walks and gutters be promptly complied with.

You are further directed to arrest for creating riot or breaches of the peace.

For being intoxicated and disorderly in the street.

For injuring private or public property.

For stopping the free passage of the cross-walks by cartmen, coachmen, or others.

For throwing offal, garbage, vegetables, and rubbish, in the streets.

For offences of any kind against the laws.

Your faithful compliance with these directions is requested. Let no consideration induce you to omit one of them.

You have now a determined chief officer, who will not be indifferent to a single dereliction of duty upon the part of those for whose conduct he is responsible to the community.

Very respectfully,

FERNANDO WOOD, *Mayor*.

DOCUMENT No. 5.

BOARD OF COUNCILMEN,

FEBRUARY 5, 1855.

The following report of the Committee on Finance, on the Petition of the Unemployed Workingmen for Relief, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Finance, to whom was referred the annexed petitions of the workingmen, beg leave respectfully to

REPORT :

That they have given them the consideration which their importance would seem to demand. Agitated as the public mind has been, and yet is, by the dolorous cry of "hard times," and with the oft repeated iterations of starvation and famine amongst the working classes of this vast city ; that a portion of this agitation is without foundation in fact, is a truism well known to all who have taken the trouble to investigate for themselves into the motives and objects that enter into the designs of its leading

promoters ; still your Committee will not attempt to deny or disguise the fact so obvious to all, that there are a large number of mechanics and workingmen out of employment, and consequently without present means to support themselves and families ; without proceeding to inquire into, and to investigate all the various causes that have combined to produce this disastrous result, your Committee will proceed to express their views upon the matters set forth by the petitioners, and the proposition contained in their memorial.

1st. The petitioners "demand" from the Common Council the "right" to be employed by that "Honorable body;" that they have a right to toil, by law, they admit; but not satisfied with that, they "demand" employment by law also; this "demand," in the opinion of your Committee, should not be acceded to, for two reasons : first, that special legislation of all kinds, in favor of one class or portion of the community, at the expense or to the disadvantage of another class or portion, is wrong in theory, highly injudicious in practice, and in violation of the fundamental principles upon which all good and just governments are founded. Legislative bodies are constituted for the purpose of enacting laws for the benefit of all, and experience has shown that upon all occasions, where the aid of special legislation has been evoked and granted to subserve particular and private ends, such action has operated injuriously to the legislative body, by destroying the confidence of the people in their law-makers, and thus stealthily undermining their attachment to representative and free institutions. As an illustration of this position your Committee need only refer to the Common Council of this city during the years 1852 and 1853. Second : the Common

Council does not possess the power, under the 12th section of the amended charter, to employ men upon a piece or job of work, the cost of which amounts to over two hundred and fifty dollars ; thus the petitioners must clearly perceive that the Common Council cannot grant them by law, that which they demand.

2d. The petitioners state as a reason for their inability to obtain employment, that the labor market is largely overstocked. That such is the fact, your Committee are well aware, and in their opinion herein lies the great and fundamental cause of the distress under which the petitioners are suffering. To obviate this great evil, all their energies should be directed. In this matter the Common Council is powerless. To the State legislature and to Congress their earnest appeals for relief should be addressed, demanding, in the name of right, justice, and of humanity to be relieved from the debasing and destroying competition of ship-load after ship-load of the pauper laborers of Europe, almost daily landing upon our wharves. Should this immense tide of emigration, which for years has been setting in upon our shores with such wondrous and increasing volume, not soon be stayed, the mechanical and laboring classes of this great country will soon be compelled to toil for the famine wages that are paid to the same classes in Europe.

A fierce and desperate struggle has for years been waged in this country between capital and labor ; every effort has been made by those who possess the former to cheapen the latter ; because that would enhance the value and make dearer the former. And it is a fact that cannot be controverted, that unless the great source of supply for laborers is cut off, but a short time will elapse ere labor will

be lying at the feet of capital, entirely and wholly at its mercy. Do the working classes of this city desire such a result? Are they willing still further to suffer for the benefit of the despotisms and aristocracies of the old world, who, to rid themselves of their discontented and down-trodden subjects, ship them by thousands to our shores, to compete with the petitioners in the work-shops and labor markets? Are they yet willing tamely to submit to a competition that reduces them and their families to "famine rations?" Are they willing to thus succumb and suffer, for the mere purpose of elucidating the abstract principle so much vaunted of making this land the asylum of the oppressed of all the world? If not, then your Committee would urge upon them and upon every patriot and lover of his race to direct their efforts and concentrate all their energies to the accomplishment of one great end—the prohibition or regulation of emigration, in such manner as would effectually protect the working classes against so ruinous a competition. And should your petitioners accomplish that one great point, your Committee feel well assured that there will be found private capital enough to furnish steady and remunerative employment to all, without invoking the aid of the city, state, or national treasury.

3d. In relation to the grievance so much complained of by your petitioners—the pre-payment of rent for tenements—your Committee must refer them to the state legislature, which alone has the power to amend the provisions of the law relating to landlord and tenant.

4th. Your Committee never come to the consideration of the extraordinary and unusual request contained in the memorial of the petitioners, "asking for the appropriation of

five hundred thousand dollars out of the city treasury, for the purpose of building tenant houses for the use and occupancy of the tenantry of the city;" that such an extraordinary demand should have been made of the Corporation, by any intelligent body of citizens, in good faith, your Committee at first could not believe possible; but they were convinced of their error, when, on a hearing granted the petitioners before your Committee, Messrs. Paris, Price, and others, reiterated the proposition, and gravely proposed to obtain from the State Legislature the suspension of the 12th section of the Amended Charter, for the purpose of enabling your Committee to report favorably as to the expediency and necessity of the measure; this your Committee declined, deeming it inexpedient and impolitic to establish a precedent of suspending the operations of fundamental laws, for special and partial purpose. There also lingered a doubt in the minds of your Committee as to the power of the State Legislature to do other than amend or repeal the whole or any portion of that hack-nied, much-abused, and very imperfect instrument, the charter of our city.

Your Committee are of the opinion that such an appropriation from the city treasury for the purposes named in the memorial of the petitioners, should it even be legal, would be inexpedient, unwise, and unjust. Inexpedient, because there are evidently now in this city tenements and houses enough to accommodate every citizen who wishes to reside within its limits; and if not, there is private capital enough lying in the vaults of the banks and other depositories, to erect all that may be required to supply the demand, however great. Unwise, because no large corporation, like the great and rich city of New

York, should ever enter into competition with any branch of business that does not belong to its legitimate corporate functions; such a precedent would be a dangerous one to establish. Should the Corporation build houses for the tenantry, might not that same tenantry with equal justice claim to be supplied with coal, flour, and other necessities of life from the same source? Such would, no doubt, be the inevitable result of such a wide departure from the old landmarks of our fathers; a result in the end disastrous alike to the governing and the governed. Unjust, because its operation would tend to repress and smother that active and indomitable spirit of enterprise, which so remarkably distinguishes a large portion of our citizens, especially those engaged in real estate operations; with the Corporation as a competitor in their business, they would cease the exercise of that spirit of emulation and improvement which has so vastly benefited all classes of our citizens, and adorned our great city with architectural grandeur and palatial splendor, encouraging the genius of our architects and mechanics, and surrounding all classes of citizens with comforts and luxuries unknown to our fathers.

The petitioners demand immediate relief, "not as charity," but "as a right." That relief your Committee believe cannot be granted upon that principle. The Common Council for the time being, acts as trustees to disburse the public funds, contributed to the treasury by all classes of our citizens, and that one class has the right to demand that any portion of said funds shall be expended for their especial use and benefit, cannot for one moment be allowed; such doctrines could only emanate from the minds of those

whose socialistic ideas preponderated over every consideration of right, justice, or benevolence.

Your Committee sympathize deeply and truly in the sufferings of the virtuous and industrious poor, and they are ever ready and willing to lend them a helping hand to alleviate their misfortunes, however they may have been caused or incurred, but they cannot step down from their position as the representatives of the most enlightened and free constituency in the world, into the arena of political agitations, and endeavour to calm their bubbling and surging waters, by catering to the visionary ideas of those whose wandering minds are ever grasping and catching up the various scheming isms of the French and German schools, and attempting to engraft them into the policy of our free and enlightened government; that all such attempts will be defeated, your Committee are confident, by the intelligence of those born and reared under the republican influences of our beautiful institutions; upon their acts must those institutions rely for perpetuity.

In conclusion, your Committee offer the following resolutions for adoption:

Resolved, That this Board deeply and feelingly sympathize with the suffering and distress of those industrious mechanics and working men now out of employment, and that it regrets its inability to meet the call upon it for permanent and enduring relief.

Resolved, That the Committee on Finance be, and they are hereby discharged from the further consideration of the petitions and memorial annexed, as the measures re-

quired to be adopted by them are unconstitutional, inexpedient, unwise and unjust.

DOCUMENT No. 6.

BOARD OF COUNCILMEN.

FEBRUARY 5, 1855.

The following communication from the Commissioner of Streets and Lamps, in relation to the contracts for cleaning the streets of this city, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

*To the Honorable the Common Council
of the city of New York:*

GENTLEMEN :—Upon assuming the duties of the office of Commissioner of Streets and Lamps, on the first day of January last, I found that the cleaning of the streets had been contracted out as follows :

DIST.	WARD.		PER YEAR.
First,.....	1st,.....	to John Stiles.....	\$11,800
Second,.....	2d,.....	to Patrick Coyle.....	6,000
Third,.....	3d,.....	to J. H. Valentine....	9,875
Fourth,.....	4th,.....	to Patrick Coyle.....	7,000
Fifth,.....	5th,.....	to J. H. Valentine....	8,550
Sixth,.....	6th,.....	to Patrick Coyle.....	9,000
Seventh, . . .	7th,.....	to C. Zeigler.....	7,125
Eighth,.....	8th,.....	to J. W. Bush.....	11,500

DIST.	WARD.	PER YEAR.
Ninth,.....	9th,.....to J. W. Bush.....	\$9,400
Tenth,....	10th,.....to J. H. Tucker.....	9,500
Eleventh,....	11th,.....to Peter Palm.....	7,225
Twelfth,....	13th,.....to C. Zeigler.....	5,750
Thirteenth,..	14th,.....to Moran & Canary...	7,300
Fourteenth,..	15th,.....to J. W. Bush.....	9,000
Fifteenth,....	16th,.....to J. H. Valentine....	9,420
Sixteenth,...	17th,.....to C. Zeigler.....	8,975
Seventeenth,..	18th,.....to John Slattery.....	8,000
Eighteenth,..	19th and 21st,..to T. Fitzgerald.....	8,000
Nineteenth,..	20th and 22d,..to John Kelly.....	8,800

The streets, in several of the above-named districts, being in a filthy condition, I proceeded at once to notify the contractors to clean their districts forthwith, in accordance with section 10, of specification for cleaning streets; which order, with the exception of the contractors for the first, second, fourth, sixth, seventh and nineteenth districts were complied with; and after having served several notices on Patrick Coyle, contractor for cleaning the streets of the second, fourth, and sixth districts, being the second, fourth, and sixth Wards, from the 13th of January to the 20th inst., I, on the 20th of January, served a notice upon him, a copy of which is annexed, (marked A,) declaring his contracts with this department, in accordance with section 11 of specification for cleaning streets, forfeited. In the afternoon of the same day, the 20th instant, I received a notice from said Patrick Coyle, purporting to be a declination of his contracts with this department, (a copy of which is annexed, marked B,) in consequence of not receiving the semi-monthly payments, pursuant to the 23d article of said contract, the bills for

which I had refused to sign, in consequence of his neglecting and refusing to comply with the requirements of the specification for cleaning streets.

In the first and seventh districts, I caused the requisite labor to be performed, and deducted the amount so expended from the bills of the contractors for the said districts; which bills were allowed and paid by said contractors.

The contractor for the nineteenth district, twentieth and twenty-second wards, John Kelly, having failed to perform the duties required of him, after repeated notifications, I, in accordance with section 10 of specifications for cleaning streets, caused the necessary labor to be performed in the district under contract to him, and refused to sign his bill for the two weeks ending January 13th. His bill for the two weeks ending January 27th, I signed, after deducting the amount of two hundred and forty-four dollars and ninety-two cents therefrom, that being the amount expended by me in cleaning the streets, and removing the dirt, &c., from the said district.

And on the 29th of January I received a notice from said contractor, John Kelly, a copy of which is annexed, (marked C,) wherein he declines continuing the work under his contract, alleging as a reason therefor, that this department failed to comply with the provisions of the contract entered into by him with the Corporation, &c., in withholding the semi-monthly payments, in pursuance of article 23d of contract.

I am at present cleaning the streets and removing the dirt, ashes, garbage, &c., from the aforesaid districts, in

accordance with section 11 of the specification for cleaning streets, and shall continue so to do until otherwise directed by your Honorable Body.

Respectfully submitted.

JOSEPH E. EBLING,
Commissioner of Streets and Lamps.

NEW YORK, Feb. 5th, 1855.

[A]

(DUPLICATE.)

NEW YORK, }
January 20, 1855. }

PATRICK COYLE, ESQ.,

SIR:—Having failed to perform the duties and requirements of the contracts entered into by you, with this department, for cleaning the streets of the Second, Fourth and Sixth contract districts, being and comprising the Second, Fourth and Sixth Wards, you are therefore, notified, that, in accordance with section eleven (11) of specification for cleaning streets, the said contracts made by you with this department, are hereby declared to be forfeited.

Respectfully, yours,

JOSEPH E. EBLING,
Commissioner of Streets and Lamps.

[B]

(DUPLICATE.)

To the Commissioner of Streets and Lamps.

SIR:—Inasmuch as the Mayor, Aldermen and Commonalty of the city of New York, refuse to pay to me the semi-

monthly, payment due to me on 15th of January, instant, pursuant to the twenty-third article of the contract between the city and myself for cleaning the Second, Fourth and Sixth Wards, I consider the said contract at an end and rescinded.

Yours, truly,

PATRICK COYLE.

[C]

(DUPLICATE)

NEW YORK, }
January 29, 1855. }

J. E. EBLING, ESQ.,

Commissioner of Streets and Lamps.

DEAR SIR:—Whereas, the Department of Streets and Lamps have failed to comply with the requirements of the contract entered into by me with said department on the 17th day of July, 1854, to clean the streets of the Nineteenth contract district, Twentieth and Twenty-second Wards, by refusing to pay my bills as per contract, in semi-monthly payments, I hereby give notice to you, that in consequence of such failure on your part, I consider the contract broken by you, and shall do no further work from this date, and shall take means to recover damages.

Very respectfully, yours,

JOHN KELLY,

Contractor of the 19th District.

DOCUMENT No. 7.

BOARD OF COUNCILMEN,

FEBRUARY 5, 1855.

The following communication from the Comptroller, in reply to resolution of inquiry relating to paving the Bowery, &c., was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, }
New York, January 29, 1855. }

To the Board of Councilmen:

The Comptroller, in answer to the following resolution, viz:

"*Resolved*, That the Comptroller be, and he is hereby requested to send to this Board, all papers and memoranda in his possession, or under his control, and report all information he may have, proper for this Board to possess, relative to the proposals for paving Park row, Chatham street, &c., with granite or trap blocks, the opening thereof, and the subsequent proceedings in relation thereto, and to the parties who proposed," respectfully

REPORTS

as follows: In compliance with ■ notice from the Commissioner of Repairs and Supplies, the Comptroller attended on the 4th of January, at the office of the Commissioner, when the sealed proposals were to be opened for paving Park row, Chatham street, the Bowery and the Fourth avenue. The propositions were opened and read by the Commissioner, and the Comptroller and the Clerk of the Commissioner took down the names of the bidders as they were called off, together with the sums bid per square yard, for each section. The bids were numerous, there being about seventy-five persons; and each one bidding on each of the six sections, equal to four hundred and fifty bids, distributed among the several sections.

In order to arrange the list, and to distribute the bids among the six sections, so as to show the relation in which they stood to each other, from the highest to the lowest, the meeting was adjourned from Thursday until Saturday.

During the interval, the Comptroller had the lists prepared from his original minutes, for the six sections, in the manner now presented, for the examination of the Board of Councilmen.

At the adjourned meeting, the first business was to compare the lists made by the Comptroller, and the one made by the Department of Repairs and Supplies; and where they did not agree, to correct them by the bid put in by the contractor.

On the first section, the name of Horace P. Russ stood first on the Comptroller's list, as the lowest bidder, at one

dollar and ninety cents per square yard. But on the list made out in the Department of Repairs and Supplies, this bid was not entered.

It is proper to state here, that when the bids were opened, two sets of bids appeared to have been put in by Mr. Russ, one in conformity to the notice published in the Corporation papers and the resolution of the Common Council; and the other made to conform to a specification in the pamphlet printed by the department. It was asked, what should be done in this case, and the Comptroller proposed to enter the bids; and when the time arrived for deciding the matter, Mr. Russ could be held to his lowest bid and the other discarded.

The Comptroller considers that Mr. Purdy, instead of deciding this question during the recess, and excluding the bid of Mr. Russ from the list, ought to have left the matter to have been decided at the adjourned meeting, after a full examination of all the bids, and in presence of the Comptroller and the bidders, who were interested in the question. On being questioned by the Comptroller, the Commissioner stated, that he had taken the advice of the Corporation Counsel, and then the Comptroller did not object to his declaring that Mr. McCormick was entitled to the contract. The meeting was adjourned for two days, and Mr. McCormick was notified to come forward with his sureties. A short time before the hour for the adjourned meeting, a paper was submitted to the Comptroller, signed by John Pettigrew, as the bail of McCormick. The responsibility of Mr. Pettigrew being unquestioned, the Comptroller replied, that as the Commissioner had excluded Mr. Russ from his list, on the

ground that his bid did not cover the specification for square blocks of granite, and "no stone to measure less than six, nor more than seven inches on the surface, and not less than eight inches in depth," he was bound to exact an obligation from the sureties of the person to whom the award was made, that this specification should be fully carried out, and an obligation of this kind was presented, for the consideration of the bail, and subsequently handed to the Commissioner. At twelve o'clock, when the name of Mr. McCormick was called, there was none to answer for him, and his bid was ruled out. It was then decided, to give notice to John H. Edwards, and the meeting adjourned for two days, to enable Mr. Edwards to come forward with his sureties. On the day appointed, Mr. Edwards appeared, but the Commissioner was absent, having, as was stated, gone to the office of the Superintendent of Buildings. Mr. Edwards was asked if his sureties were there; he replied, that both of them were not present, and that he had received no notice to bring them. His bid was examined, and his number was not given as required by the ordinance.

The person who had the notices to serve was called, and stated that Mr. Edwards had not been notified. As the Commissioner did not appear, and as his clerk considered it doubtful when he would return, the meeting was adjourned until twelve o'clock the next day, to enable Mr. Edwards to bring his sureties.

The bid of Mr. Edwards was two dollars and nine cents per square yard; and when it was ascertained that his sureties were not ready, some one called attention to the bid of Mr. Trowbridge, which stood at two dollars

and ten cents. This proposition was brought forward and examined, and the Comptroller asked Mr. Trowbridge whether the sureties signed their own names; a question which had previously been put to Mr. Edwards. Mr. Trowbridge replied that the sureties did not sign the obligation themselves. The Comptroller then said, "that is fatal to your bid." It was urged, however, that the Commissioner, in his printed specifications, page 4, had given the following directions to bidders, viz., "Estimators will *state in their proposals the names of two* responsible persons as security for the faithful performance of the work," &c. This, it is obvious, was well calculated to lead the bidders astray, if they were not thoroughly acquainted with the ordinances. The Commissioner had also, in the printed estimates which he furnished to bidders, in his specifications, and in his advertisement, omitted to state what the ordinance requires, that the sureties must be *householders or freeholders in the City of New York*.

It should be recollected that the opinion expressed in regard to Mr. Trowbridge's bid, was in the absence of the Commissioner, whose presence was necessary to decide the question. The opinion of the Comptroller was based on sec. 499, of the ordinances of 1849, which reads as follows:

Sec. 499. "Each estimate shall be accompanied *by the consent, in writing*, of two householders or freeholders in the city of New York, to the effect, that if the contract be awarded to the person making the estimate, they will, upon its being so awarded, become bound as his sureties for its faithful performance, and that if he shall omit or refuse to execute the same, they will pay to the Corporation

any difference between the sum to which he would be entitled upon its completion, and that which the Corporation may be obliged to pay to the next highest bidder to whom the contract may be awarded."

A rigid enforcement of this ordinance by the head of each department, would soon remedy the evil arising from sham bids, and the delay and loss of time to fair bidders, who are kept in suspense for weeks, and in some cases, for months, without knowing what is to be the result of their estimate.

At the adjourned meeting to receive the obligation of the sureties of Mr. Edwards, instead of appearing he sent a letter, dated January 13th, in which he said, "I find it impossible to get securities on my bid. The excuse they make is, that the price is too low; therefore, I am compelled to give up my bid."

The Commissioner then concluded to give notice to six bidders to come forward with their sureties in two days. This reached the name of J. G. Cornell, on my list of section No. 1, at two dollars and nineteen cents.

At the adjourned meeting no one of the six responded to the call except Mr. Cornell, and he was given time to bring forward his sureties.

In the mean time, the Commissioner had received a written opinion from the Counsel to the Corporation, to the effect that the notice and his proceedings in several particulars were informal and illegal, and that new notices more specific in their terms should be published. In this opinion of the Counsel, the Comptroller expressed to the

Commissioner his full concurrence. And it was concluded to defer action on the bid of Mr. Cornell, and the Commissioner decided to refer the whole subject to the Common Council.

If it is determined by the Common Council to re-advertise the contracts, and the Comptroller considers it important that this course should be adopted, it is desirable that arrangements should be made with the railroads, either to construct their portion of the pavement, or to pay a stipulated sum to the city for doing the whole.

There are four railroads using and occupying different portions of the avenues, covered by five sections of the work proposed to be put under contract, to wit: the New-Haven, Harlem and the Second and Third avenue railways. It is important to the public as well as to all these roads, that there should be as little interruption to their running as possible, in paving the streets. Now, before these great thoroughfares are put into the hands of contractors, the managers of the roads should be conferred with, and stipulations should be put in the contracts, to protect these important interests, which are as essential to the city and its inhabitants as to those interested in the roads. All the preliminary proceedings in giving the notices, and all the terms of the contract should be submitted and prepared by the Counsel to the Corporation.

Then, as to the old material, the Commissioner, in the specification, reserves this, but does not designate who is to take it up. This will lead to altercation between the contractor and the city, and extra allowances will more than swallow all the cobble-stones. The better way is to do what was done in the contract of Russ & Reid, take the

bids for the Deghue pavement, allowing the contractor to have the old material. It will cost the city all it is worth to take it up, and it will place the streets in the hands of two sets of men, which will materially add to the interruption of the streets for public travel, and the annoyance of the railroads.

There is a considerable quantity of square blocks which the railroad companies have procured and put down alongside of their rails. Who is to have these blocks? This should be made specific, in order that all the bidders may know precisely their position in regard to all the material. These blocks are not required by the city in repairing the cobble-stone pavement.

In regard to the amount of pavement to be put under contract, I respectfully submit, that the sum put in the appropriation and in the tax bill for 1855 will only cover the three first sections. If it is determined to pave the whole avenue to Seventeenth street in a single year, then the appropriation will be insufficient.

And, if the five sections should be included in the first year, the paving around Union Park might be deferred for another year; each year, we may confidently expect, from past experience, will bring its wants as well as its burdens.

The bid of Mr. Russ, which the Comptroller placed at the head of his list, on the first section, because it was the lowest, was made out as follows:

"The undersigned agrees to pave with square blocks similar to those now being used in Grand street, the entire width of the carriage-way from curb to curb, in conformity

with the resolution passed the Board of Councilmen, November 17th, 1854; passed the Board of Aldermen, November 20th, 1854, and signed by the Mayor, November 21st, 1854, and furnish all materials that may be required, and all labor to be done, at the full and entire cost of one dollar and ninety cents per superficial square yard, for Section No. 1, viz: from Spruce street to the northerly side of Bayard street, including Chatham square, and complete the same in one year." And he refers to the advertisement published in the Corporation papers, dated December 13th, as forming part of the estimate.

The Commissioner casts out this lowest bid, for the reason that it refers to the advertisement published by him in the papers, instead of referring to the "*estimate and specification*," which he had printed in pamphlet form and distributed from his office. This estimate and specification, in the first paragraph says: "Sealed proposals will be received at the office of the Commissioner of Repairs and Supplies, (as per advertisement in the public papers,) for paving with square blocks *similar to those now being used in Grand street*, the entire carriage-way of Park row Chatham street, &c."

The specification on the same page in regard to the exact size of each stone on the surface, and that every one should be eight inches long was not embraced in Mr. Russ' estimate. It is contended by Mr. Russ, that the stone required by this specification are not "similar to those now being used in Grand street;" and that his bid covers such a pavement as is called for by the resolution of the Common Council, the published notice of the Commissioner, and the first and second paragraphs of his specification.

In a second notice, if one is given, the terms should be more clearly defined, and made consistent with each other; and instead of referring to Grand street as a sample for the pavement, it is respectfully suggested, that a pavement be required similar in all respects to the Deghue or Belgian pavement in the Bowery, opposite the theatre, and in Broadway, between Franklin and Canal streets; this pavement has been tested much longer than any of that laid in Grand street.

On the day of the adjourned meeting, and a short time before 12 o'clock, the Clerk of the Commissioner called on the Comptroller, and informed him that Mr. Purdy had been suddenly called away, and as nothing would be done until the Common Council had acted on the matter, the meeting was not material.

In regard to the question between the bids of Mr. Russ, and those of Mr. Cornell, the Comptroller considers those of Mr. Russ decidedly the most advantageous to the interests of the city. Mr. Russ, is, in the language of the charter, "the lowest bidder, with adequate security;" and he proposes, in the language of the resolution of the Common Council, to pave Chatham street, the Bowery, &c., with the "Belgian pavement," and in the language of the specification, he agrees that the pavement shall be "square blocks, similar to those now being used in Grand street." And is it supposed or expected, that Mr. Cornell will furnish a more expensive pavement, under a specification to pave the avenue "with square blocks, similar to those now being used in Grand street." The saving to the city, by adopting the bids of Mr. Russ, instead of those of Mr. Cornell, will be over twenty thousand dollars:

The 12th section of the charter of 1853, provides that the proposals for all contracts shall be opened by the Heads of Departments, in presence of the Comptroller. In the Croton Aqueduct Department, the practice has been to open the bids, and make the award to the lowest bidder at the same meeting, in the presence of the Comptroller. Bids are opened in that department for three, four and five tenders at a sitting, the lowest bidder ascertained, and the whole number of awards made, and all the computations and decisions not occupying more than an hour.

In the other contracting departments, in almost every case the proposals are opened in the presence of the Comptroller, and the head of the department assumes to make the award without his presence, and neither the contractors or the Comptroller are permitted to know for weeks and sometimes months, to whom the award is made. The Common Council has full authority by sections 21 and 23 of the amended charter of 1849, to regulate this matter. The Comptroller has urged in all important cases, that the meetings for opening proposals, and deciding on the lowest bidder, should, if necessary, be adjourned from time to time, until the award was made. But this has been reluctantly yielded to by the contracting department, and generally frustrated before the final award could be reached.

If an ordinance was passed that all awards should be made in the presence, and with the concurrence of the Comptroller, and in case of disagreement between him and the head of the contracting department, the Mayor should be called in to act as umpire, a course might be

adopted to prevent the disreputable traffic, by means of sham bids, and the use of men of straw, and thus secure to honest and responsible contractors, an equal chance with the most accomplished tricksters.

All which is respectfully submitted,

A. C. FLAGG, *Comptroller.*

DOCUMENT No. 8.

BOARD OF COUNCILMEN.

FEBRUARY 5, 1855.

The following communication from the Comptroller, transmitting a list of all bills paid by the Auditor, from September 30th to December 31st, 1854, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, February 5th, 1855. }

A. C. FLAGG, Esq., *Comptroller:*

DEAR SIR:—In accordance with the amended charter of April 12th, 1853, and ordinance of the Common Council, March 27th, 1854, I hereby respectfully submit the annexed detailed account of all warrants issued, under their appropriate heads, from September 30th to December 31st, 1854.

JAMES TIMPSON,
Auditor.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, February 5th, 1855. }

Pursuant to the 13th section of the amended charter of 1853, I herewith respectfully submit the following detailed statement of all claims paid from the treasury, from September 30th to December 31st, 1854, as reported to me by the Auditor.

A. C. FLAGG,
Comptroller.

DOCUMENT No. 9.

BOARD OF COUNCILMEN.

FEBRUARY 7, 1855.

The following message from his Honor the Mayor, transmitting communication from Peter Cooper, Esq., proposing a cheap plan for constructing stone wharves, piers, &c., was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

MAYOR'S OFFICE, New York, Feb. 7, 1855.

To the Honorable the Board of Councilmen:

GENTLEMEN:—I inclose a communication from Peter Cooper, Esq., which contains suggestions worthy of consideration.

The high character of that gentleman, together with his eminently practical mind and philanthropic heart, entitles any views he may express upon public matters, to much respect and force.

Very respectfully,

FERNANDO WOOD,

Mayor.

*To the Honorable the Mayor and Common Council
of the city of New York:*

Your subscriber, in view of the general derangement of the business and monetary affairs of the city and country in general, and of the wide-spread misery and wretchedness growing out of the sudden and unavoidable contraction of all the various manufacturing and mercantile operations, begs leave to make the following communication :

The present and prospective suffering resulting from the entire inability of thousands to find employment at the various callings on which they have depended for support, claims from every benevolent mind an effort to ascertain the cause of their suffering, and the proper remedy to be applied.

The most prominent cause of the present derangement of trade, and the general want of employment, is the natural and inevitable result of our ever expanding and contracting measure of value.

Our sad experience, I trust, will finally teach us, as a nation, that the declaration of Washington was true, when he said that in "exact proportion as you pour paper money into the volume of circulating medium, just in that proportion will every thing in a country rise," thus tempting the world to come here and sell us every thing, and at the same time making every thing with us too dear to sell in return. He said that such a course will not benefit the farmer or the mechanic ; it will only benefit the debtor, as it will enable him to pay his debts with a shadow instead of a substance.

Various efforts have been made by our general government to remedy these evils, by the enactment and repeated alterations of tariffs, all of which have been rendered ineffectual by the constant expansion and contraction of a paper currency, with which we have been measuring, and vainly attempting to regulate, the value of all property and labor.

Swedenborg never declared a more important truth than the one he communicated to the Diet of Sweden, when he said that a nation that could legislate a permanent value into a paper currency, would be a nation without a parallel in the world, and he advised his government to return to a specie currency, as the only remedy that could save their nation from ruin.

It will always be found that a measure of value calculated to secure the reward of labor to the hand that earns it, must have in it an inherent and certain value, the evidence of labor actually done. Every other device, as a measure of value, has always given opportunity to the artful and designing to take advantage of the weak and the unsuspecting, and has tended to fertilize the rich man's field by the sweat of the poor man's brow.

If we desire to lessen the amount of poverty and crime we must remove the causes that produce them. It will be necessary, in order to render it possible for the unfortunate and industrious poor to raise themselves by useful labor to competence, comfort, and independence, to secure them an opportunity to labor, and all the facilities for applying their work to the best possible advantage. This will require that they be provided with shelter, and board of the cheapest possible kind that is conducive to health.

Your subscriber, being impressed with the difficulty of prescribing a remedy for a disease so deeply seated in the body politic, will venture to recommend a course that will furnish immediate and continued employment to thousands, on a work that will save millions to the future inhabitants of our city.

The work that he proposes may be carried on upon or near our own island, by the purchase of the marble quarries near Kingsbridge, where I believe the marble was obtained for our present city hall. This marble, or some other in the vicinity, I propose shall be got out and cut roughly into square blocks, to form the bulkheads of our wharves and piers. This work will furnish a great amount and variety of useful labor, that will continue and grow with the future growth of our city.

It should be remembered that worms eat up our present wooden wharves about every ten years, and that up to this time, when the docks have fallen in, we have been able to extend new piers into the river, making new bulkheads, and to fill up the slip. This course cannot be continued beyond the water line. The time must soon come when the city will incur an enormous expense to clear the foundations for the renewal of the wharves and piers. This expense may be averted and prevented and substantial stone wharves secured, at a cost not greatly exceeding the wooden wharves now being built.

To do this, and at the same time effect other objects of great importance to the welfare of our city, your subscriber recommends, that the Corporation should provide suitable quarries in the neighborhood of our city, where stone can

be most easily got out, to form the outer line of the wharves and piers of our city docks.

By using marble blocks for the erection of wharves and piers, all the rough stone and pieces that come out in quarrying may be used in the following manner :—A part of these pieces may be burned into lime, while the balance, with all the fine chips may be put into boxes of a size to match with the solid stone blocks prepared to form the outer line or face of the wharves and piers. The blocks made by putting rough stone and small pieces into a box, as before described, and cementing the whole together by means of the lime and sand poured upon them, will be as valuable, for all but the outer facing of the wharves or piers, as though they had been formed out of solid stone.

All the blocks required below the water line, where vessels would strike them, may be formed cheaply out of any rough stone and small pieces cemented together, with holes left in them ready to bolt or anchor the whole together in their proper places.

A canal has been made directly into the marble quarry on the outer end of this island. By means of this canal the stone, when prepared, can be taken in the cheapest manner to their places in the wharves. I would most respectfully propose to secure this field of labor to a class of our fellow citizens, who are the most in need of our sympathy and encouragement. I would recommend to offer it, on terms that would enable the poorest man in the community, who is able to work, to earn his bread and something more, by honest labor. To do this I would recommend that stone be quarried and cut by the cubic foot, the small

ones to be put into boxes and cemented together by the foot; and that the lime be burned by the bushel, in order that each department of the work may be done to the best advantage, so that the poorest man, who is willing to labor, may find a place where it is possible for him to earn something more than a bare subsistence. A place of this kind should be provided with suitable buildings, in which he could live on the cheapest fare conducive to health. I would, in this place, furnish all the conveniences to facilitate their work.

I would recommend that an accurate account be kept with each person, and that they be allowed for their labor an amount equal to at least two thirds of what the same work would cost in open market; and after their expenses and cost of living had been deducted, the balance should be placed to their credit, subject to be drawn out at any time, when they desired to send it for the support of their families, or to go to distant friends, or could find better employment.

To improve the condition of the poor, by enabling them in some way to minister to their own wants, is a duty we owe them, as desirable as it is difficult to accomplish.

The causes that have produced the poverty and misery we deplore, are so numerous, and have become so familiar, that we fail to realize the danger and the enormity of their effects.

It is extremely difficult for us to approach this subject with a full sense of its importance, and the responsibility that we are under to provide for others, as we would that others, in similar circumstances, should provide for us.

It is extremely difficult for us to realize the almost omnipotent power that the circumstances of birth, education and country have exerted in the formation of the characters and various conditions of mankind.

If the causes that have brought so many thousands to the verge of starvation are allowed to continue, it needs but little penetration to see how soon the time must come when our children, by the uncertainties of trade, may be involved in the same dire calamities.

In a country where the land is ready to yield every thing necessary to supply the wants of man, there is no good reason why regular street begging should be tolerated or allowed.

This evil, of regular street begging, bad as it is, cannot be prevented, until a place is provided where those who are destitute can be directed to find shelter and employment, where, by hard work and cheap living they may raise themselves to a position of honor and usefulness in the community.

All of which is most respectfully submitted,

PETER COOPER.

DOCUMENT No. 10.

BOARD OF COUNCILMEN.

FEBRUARY 9, 1855.

The following communication from the Comptroller, in reply to resolution, in relation to flagging, &c., Eighty-third street was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, February 8, 1855. }

To the Board of Councilmen:

The Comptroller, in answer to the following resolution, viz:

"Whereas, an alleged attempt at fraud, on the part of the contractor for setting curb and gutter in Eighty-third street, from Third avenue to Avenue A, has been discovered; and whereas some eighteen thousand dollars has been paid to said contractor, when only about three thousand six hundred dollars should have been paid; therefore,

"Resolved, That the Comptroller be, and he is hereby requested to furnish this Board with all the information in his possession, in relation to the above subject."

Respectfully reports, that all proposals for regulating, grading and paving streets, where the expense is paid

from assessments, and all contracts based on such proposals, are received and made by the Street Commissioner, and filed and kept in his department. The Comptroller is notified to be present at the opening of all bids for doing the work; but as soon as the bids are opened and read by the Street Commissioner, the meeting, contemplated by the 12th section of the charter, is considered, by the Street Commissioner, as ended, and the award of the contract is made at his leisure, by the Street Commissioner, and the Comptroller has no recollection of ever having been notified by that department to attend a meeting to award a contract; nor has that department given to the Comptroller the name of the successful bidder, or a copy of the contract, or any abstract of its conditions, until the time arrived for making a requisition for payment, except in individual cases and on special application.

The ordinance of 1849, section 501, having been made before the Comptroller was associated in the opening of bids, and when the head of the department had the exclusive charge of the whole matter, favors, in its terms, the course pursued by the Street Commissioner. The words of the ordinance are as follows:

“ At the time and place appointed for that purpose in the proposals, as presented by section 496, the head of the department issuing the proposals, shall publicly open and read all estimates which he may have received for the contract mentioned in such proposals, and shall reject all estimates which are not furnished in conformity with sections 497, 498 and 499, and shall thereupon award the contract to the lowest bidder.”

The section of the charter of 1853, merely declares that

"all such bids or proposals shall be opened by the Heads of Departments advertising for them, in the presence of the Comptroller, and such of the parties making them, as may desire to be present."

It is obvious from this state of facts, that the official minutes and information sought for by the resolution, are in the Street Department, and that the information in the possession of the Comptroller has recently come into his hands from the office of the Street Commissioner, in order to establish the claim of the contractor, to the payment of seventy per cent., under an ordinance recently adopted.

The sum of eighteen thousand dollars referred to in the preamble to the resolution, was paid on a certificate of the Street Commissioner, that the sum of twenty-seven thousand one hundred and twenty-one dollars and thirty-eight cents, was due the contractor.

The following is a copy of the certificate:

"STREET DEPARTMENT, }
"New York, January 22, 1855. }

"Contract to curb and gutter, and flag Eighty-third street, Third avenue to Avenue A.

"This is to certify, that the contract for the above work was awarded to James B. Brady, and that the same *has been completed to the SATISFACTION of this department*, and that there is now due, on account thereof, to the said James B. Brady, or to his assigns, the sum of twenty-seven thousand one hundred and twenty-one dollars and thirty-eight cents.

	\$27,121 38
Less 30 per cent.	8,136 11
	<hr/> \$18,985 27

JAMES FUREY, *Street Commissioner.*

In regard to the history of the grading of Eighty-third street, between the Third avenue and Avenue A, I have learned, on inquiry, that a contract was made with John Pettigrew on the 5th of June 1851, by which he engage "to furnish all the materials and labor, to regulate and grade Eighty-third street, between Third avenue and Avenue A, the entire width of the street, to be excavated and filled sixty feet on the top."

The City Surveyor under this contract was Amerman, who reported to the Street Commissioner, that Mr. Pettigrew had excavated two thousand seven hundred and twenty-three cubic yards of rock, which at sixty cents per yard, amounted to the sum one thousand six hundred and thirty-three dollars and eighty cents. The other expenditures made the total sum which was assessed on the property holders under this contract, equal to three thousand three hundred and forty-three dollars and seventy-two cents, in 1851,-'2.

In May 1854, the Board of Councilmen passed a resolution which received the sanction of the Mayor, on the 8th of June, as follows;

"*Resolved*, That curb and gutter stones be set, and flagging four feet inside, be laid on both sides of Eighty-third street, between Third avenue and Avenue A, and the old curb and gutter reset, and the old flagging relaid where necessary under direction of the Street Commissioner, and the accompanying ordinance adopted."

On the 27th of July, 1854, notices were issued for proposals, "for setting curb and gutter stones, and flagging ■ space four feet wide through the side-walks of Eighty-third street, from the Third avenue to Avenue A.

In the instructions to estimators, after enumerating the work above specified it was added that they should state, 'the price per cubic yard for removing rock, *if any should be found.*' Immediately below this, and in a separate paragraph, the notice for proposals says:

"The following is the estimate of work and materials *by which the bids will be tested*, viz: three thousand eight hundred and forty running feet of curb and gutter stone and fifteen thousand square feet of flagging."

The amount of security was fixed at one thousand five hundred dollars.

On the 7th of August the bids were opened and were as follows, viz:

	Excavating earth, per cubic yard.	Filling earth per cubic yard.	Excavating & removing rock, per cubic yd.	Flagging per sq. foot 15,600.	Curb and gutter, per running ft. 3,840 feet.	Circular corners.	AMOUNT.
J. B. Brady.....			\$25	11	45	\$20	\$3,444 00
B. McCabe.....	50	50	5	12	50		3,792 00
J. Hodgins.....				11½	47		3,559 80
J. Slattery.....				15	50		4,260 00

It is thus seen that when tested by the three thousand eight hundred and forty feet of curb and gutter stone, and fifteen thousand six hundred square feet of flagging, *excluding any allowance for rock*, the bid of Brady, appears to be the lowest, but when tested by the return of the surveyor, is shown to be some twenty to twenty-seven thousand dollars, except beyond the other propositions.

It appears from the return of Peter H. Dryer, City Surveyor, that the following quantities of rock were excavated under Brady's contract, viz:

Calculation of rock excavated in Eighty-third street, between Third avenue and Avenue A.

Between Second and Third avenues...	726	cubic yards.
" First and Second avenues....	214	" "
" First avenue and Avenue A..	3	" "
		<hr/> 943 cubic yards.

PETER H. DRYER, *City Surveyor*.

Before obligating the city or the property holders to pay twenty-five dollars per cubic yard for excavating rock, the Street Commissioner ought to have sent a competent surveyor to ascertain whether there was one hundred or one thousand yards of rock? If there were five yards of rock to be excavated then the bid of Hodgkins was lower than that of Brady.

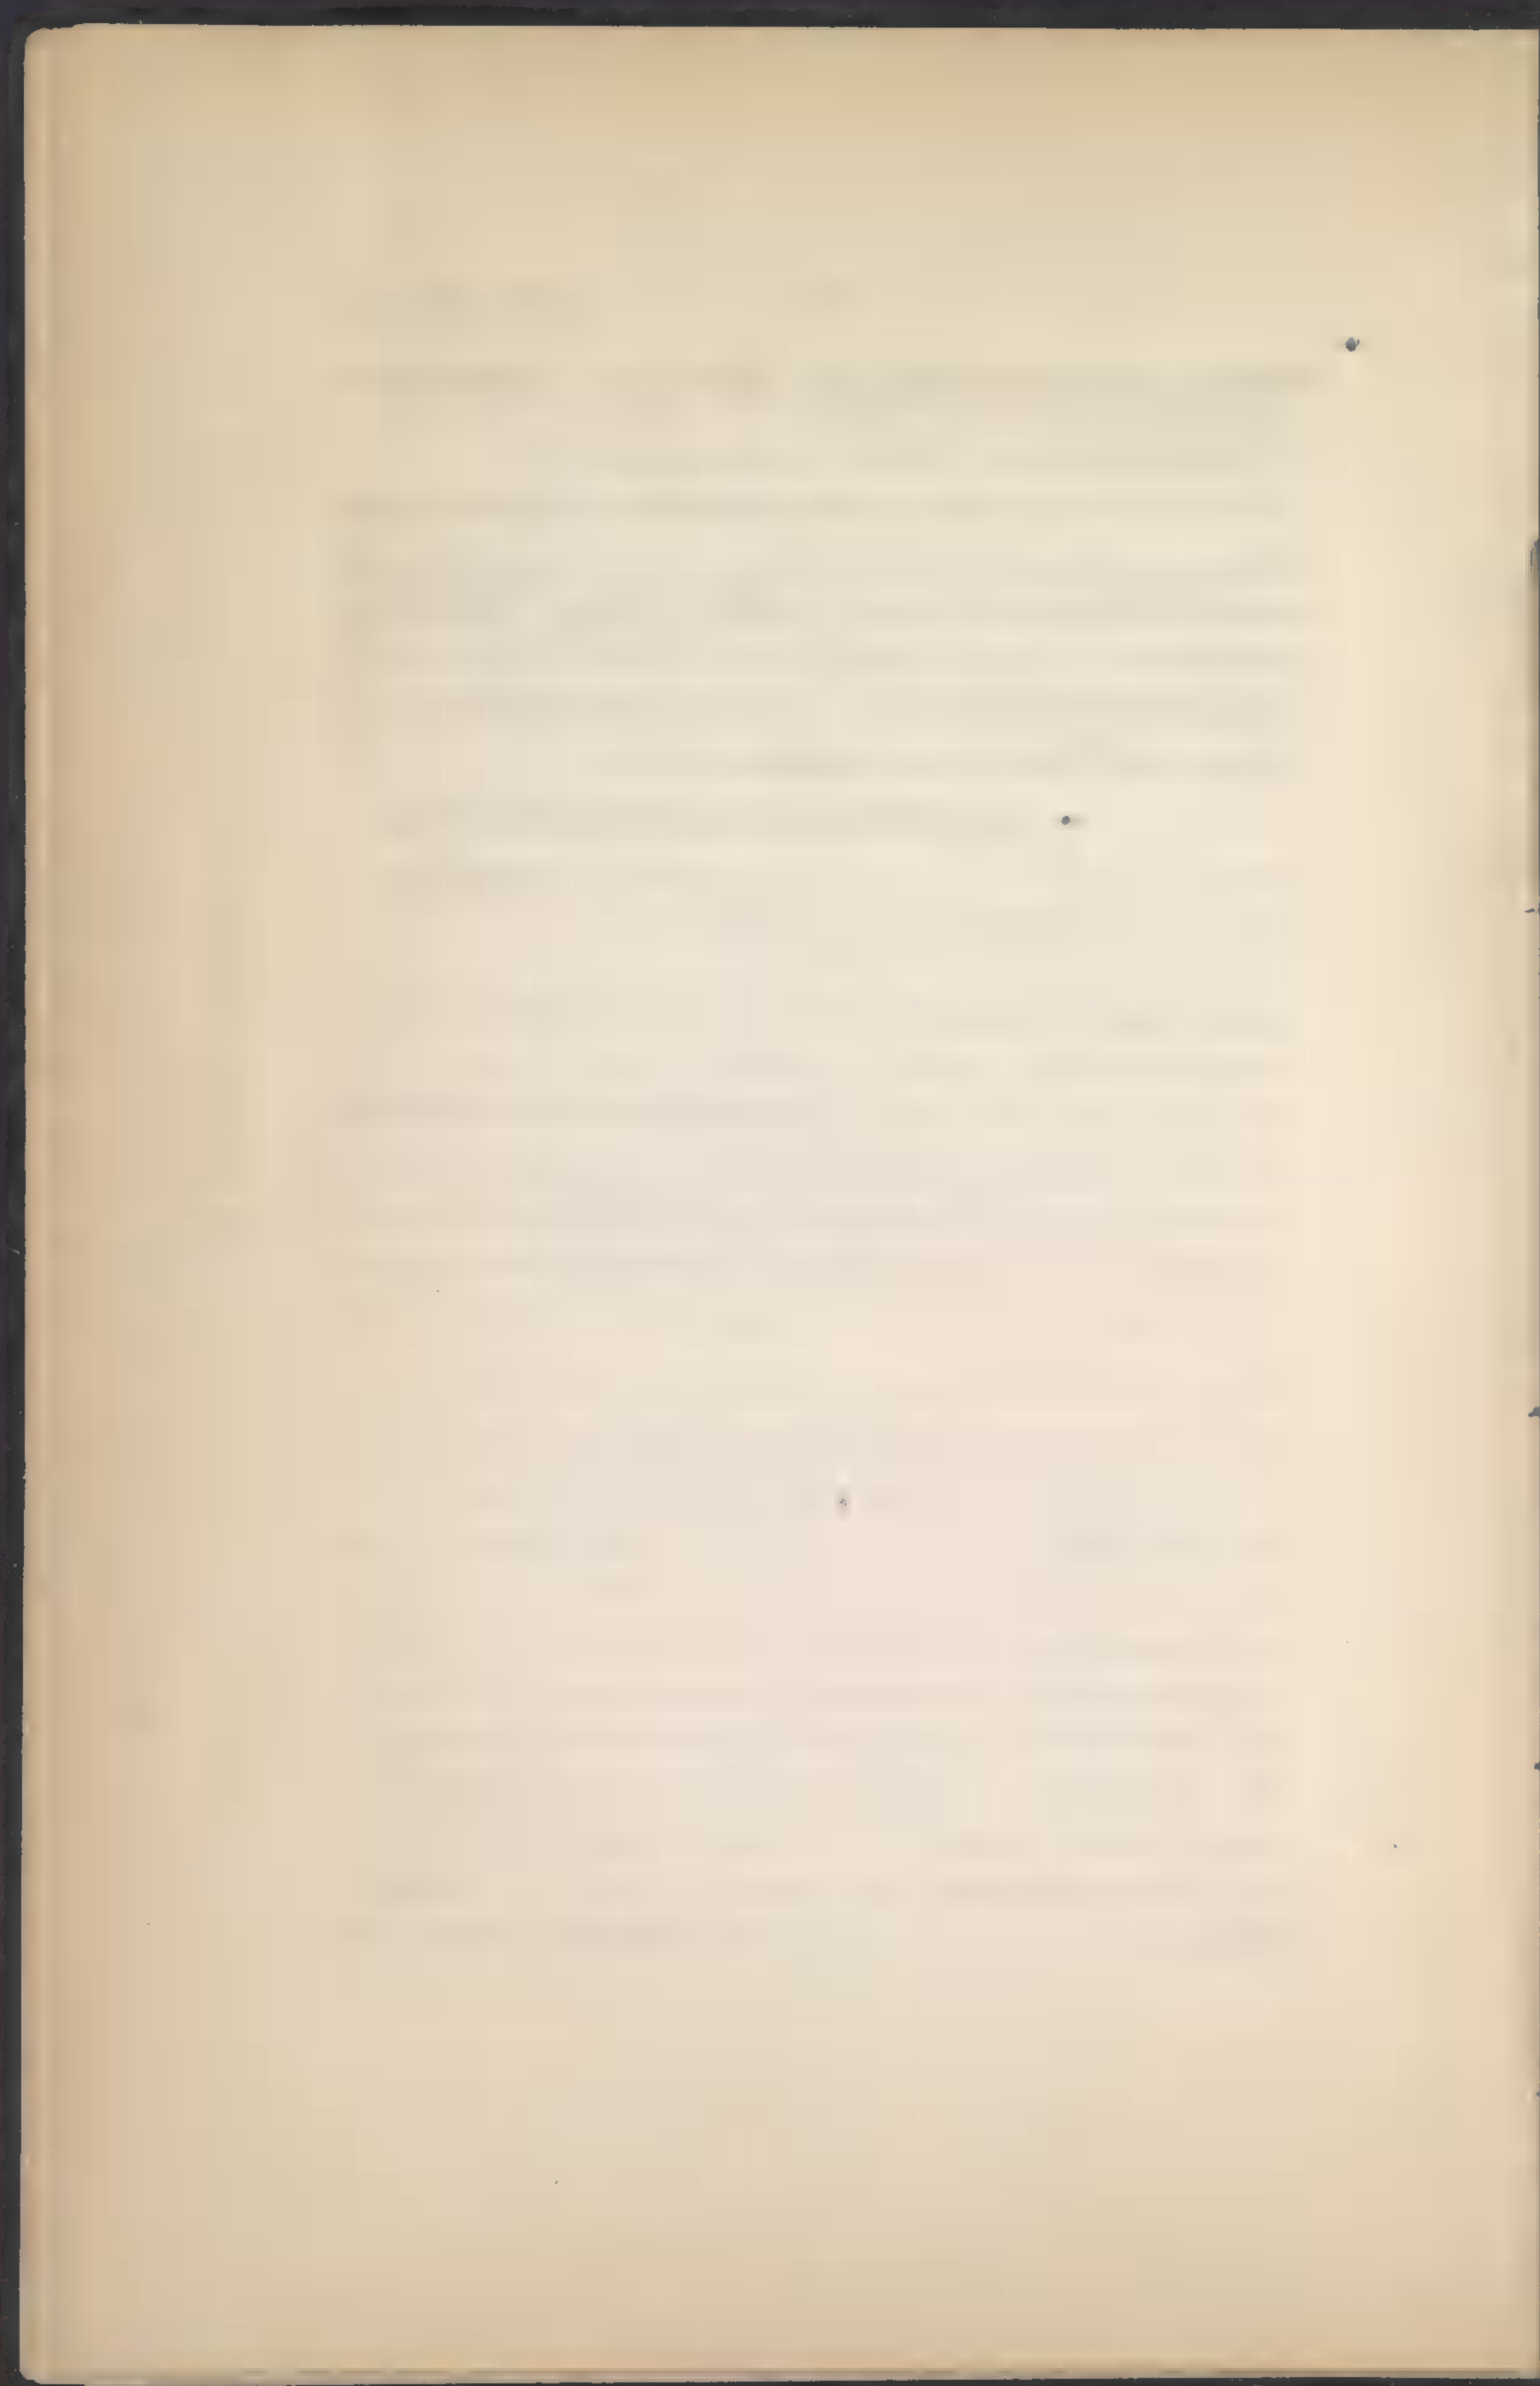

The loose manner in which the rock was introduced into the specification, without using any fixed quantity in deciding between the bidders, is highly objectionable, and wholly indefensible. The bid of Brady at twenty-five dollars per cubic yard, in connexion with the fact that this twenty-five dollars per cubic yard was not used to prevent his getting the contract as the lowest bidder, is a most significant fact. Then the obligation entered into the contract to pay him twenty-five dollars per yard for rock, without having any report from the surveyor who measured the flagging and the length of curb and gutter stone, to ascertain whether there was one or one thousand yards,

exhibits an unpardonable carelessness in the agents of the city.

The property holders have a right to complain of an outrageous fraud on their rights. In the two contracts they are taxed some thirty thousand dollars, on line of street, where, if all the public agents of the city had honestly and faithfully done their duty, not over six thousand dollars would have been charged to them.

- All of which is respectfully submitted.

A. C. FLAGG, *Comptroller*.

DOCUMENT No. 11.

BOARD OF COUNCILMEN.

FEBRUARY 21, 1855.

The following report of the Committee on Law Department, with the proposed amendments to the city charter, was received, laid on the table and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on the Law Department, to whom was referred the subject of amendments to the city charter; also, so much of the Mayor's communication of January 12, as relates to a change of the charter election to the spring of the year, respectfully

REPORT:

That the matters so referred are in every respect of vast importance, and as such, have received the careful and considerate attention of your Committee.

The effect and influence of proper organic laws, upon the interests and well-being of the community, are not to be denied; though with intelligent, experienced and honest officials, constitutional and charter restraints are seldom brought into requisition, yet every enlightened peo.

ple, with the least semblance of popular governments, have found it necessary to protect themselves against possible encroachments upon their rights and interests by those whom they should place in offices of power.

Your Committee are impressed with the belief, that the general disposition, (if a change shall be made,) is for a repeal of all the amendments since 1830, inclusive, and to embrace in one act all changes thought desirable.

Your Committee have, therefore, compiled such an act for amending the charter as they would recommend for adoption.

From the genius and spirit of our institutions, as well as analogy to our general and state governments, they have retained the feature in the charter of 1853, making this Board more numerous than the Board of Aldermen, and committing to this Board exclusively, the power to originate measures appropriating or involving the expenditure of money.

To abolish this Board, and go back to a Board composed of one member from each ward, is to take from the people the right of equal representation, (which less than two years since they demanded by a vote of eleven to one,) and restore a kind of rotten burrough system, most repugnant to your Committee, and in their judgment, subversive of those republican principles which we profess.

If it were deemed practicable at present, your Committee would recommend that the system of representation by wards in the Board of Aldermen be abolished, and a plan substituted to conform to the principles of equal representation. They hope and believe it will, at no distant day, be accomplished.

By some sinister influence (which need not here be traced to its origin,) this, the only popular branch of the Common Council, has been systematically and pertinaciously misrepresented and villified. This attempt to bring it into disrepute, was commenced immediately upon its organization, and was countenanced by some who had been elected at the same time to another branch of the city government with full knowledge that they had been shorn of some powers possessed by their predecessors. Of such, it seems proper to remark, that it would have been more to their credit had they declined election, or ran as candidates for this Board, rather, than when elected and sworn to support the charter, to manifest such dislike of its restraints.

That, however, is a matter between them and their constituents.

Whether this branch of the Common Council shall continue to be constituted upon republican principles of representation, with a partial custody of the pecuniary interests of their constituents, is not a matter of particular concern to members of this Board *as such*, but is one of great importance to the people whom they represent.

They have once, and that recently, asserted their rights in this respect, and your Committee desire to preserve those rights until, in some lawful manner, the people manifest a change of sentiment.

Among other matters of misrepresentation, it has been industriously circulated that this Board is "unweildy," "disorderly," and "not adapted to the proper dispatch of business," and on the 29th of December last, it was stated in the Board of Aldermen, by one of its members, in substance

that the reason why that Board had, during the year, dispatched a limited amount of business, was because, of the manner in which it was fettered by the new charter, in not being allowed to originate papers for the appropriation of public moneys.

The statement as to what that Board did, is undisputably true, but the reasons assigned for not doing more, are not well founded.

That Board at all times during the past year, had a large number of matters in their charge, which had been acted on by this Board. And at the very time of the aforesaid statement, they had several hundreds of such, many of which were never even referred or otherwise noticed, and that too, notwithstanding all the time and labor of maturing the same, were done here. In this connection, your Committee would refer to Document No. 39, of the late Board of Councilmen, as showing how business had progressed in each Board, to May 21, 1854, and venture to say, that the records will fully justify all that is herein stated.

Your Committee unqualifiedly deny that this Board is or ever has been "unweildy" or "disorderly." When it was organized in January, 1854, it had not a member of experience in municipal legislation; yet in every respect, it might at all times, safely challenge comparison with any popular legislative body of like numbers.

Again, the fact, that Aldermen are also magistrates, supervisors and county canvassers, deriving compensation therefrom, it would seem they had enough to do, if properly attentive, without urging any change imposing on them *additional financial duties*.

As a matter of propriety and economy, there can scarcely be a doubt as to the wisdom of confining the power of originating financial measures to one of the two Boards, or that such Board should be the one nearest and most frequently accountable to the people for their stewardship.

In regard to spring charter elections, your Committee have little to add to the cogent reasons urged by the Mayor in his communication, (see Document No. 4, pp. 24, 5) and in his letter dated February 13, addressed to Hon. R. M. Blatchford.

It appears a self-evident proposition, that local interests, when so vast as in this city, should be allowed their full and undisturbed influence at the election for municipal officers, that the fitness of all candidates should be fairly presented to the public without the aid or influence of a state or any other than a city ticket.

When that is done, and not before, will this city be able to express its views in municipal matters, through the ballot box.

Some have objected to the change on the ground of expense. The few thousand dollars additional expenses should not have the least weight in a question of this kind; a question of emancipation to the vast population of this city, in their municipal capacity, from influences foreign, if not adverse to their interests in that respect. Such a change would beget a more general and a deeper interest in municipal affairs, and secure the election of officials who are the choice of the people, and thus effect a much greater saving, or if it did not, our fellow-citizens would be left without excuse.

Your Committee regard such change as of great importance, and but an act of justice to those whom this Board represent.

The annexed draft of "An act to amend the Charter of the city of New York," embraces the principles herein noticed, and is recommended to the approval of this Board.

The adoption of the following resolution is also recommended:

Resolved, That a Committee of be appointed by the President, to prepare a proper memorial to the legislature of this state, now in session, to accompany the annexed proposed amendments to the charter of this city, and that said Committee proceed to Albany and cause such memorial and amendments to be presented to the legislature, and request the senators and assemblymen from this city to urge the speedy enactment of such amendments.

F. E. MATHER,	}	<i>Committee on Law Department.</i>
OTIS D. SWAN,		
HENRY P. SEE,		
JOHN WEBBER,		

AN ACT

TO AMEND THE CHARTER OF THE CITY OF NEW YORK.

SEC. 1. The Corporation, or body corporate, now existing and known by the name of "the Mayor, Aldermen and Commonalty of the city of New York, shall remain and continue to be a body politic and corporate, in fact and in name, by the name of "the Mayor, Aldermen and Commonalty of the city of New York," and by that name shall have perpetual succession, and be able to sue and be sued, to plead and to be impleaded, to answer and to be answered, to defend and to be defended, in all courts and places, in all manner of actions, suits, complaints, pleas, causes, matters and demands whatever, and of what nature and kind whatever, in as full and ample manner and form as any citizen; and shall be capable to take, purchase, hold, receive and enjoy, and to sell, demise, mortgage, assign, dispose of, and convey in fee, for life or lives, or for years, or in any other manner any property, real or personal, of what nature, kind or quality whatsoever; and may and shall have and use a common seal, and may alter or change the same at their pleasure; and shall have, and continue to exercise and enjoy, all the rights, immunities, powers, privileges and franchises heretofore and hitherto belonging to it; and shall have power to make all needful laws, by-laws and regulations, for the municipal government of said city

SEC. 2. The executive power of said Corporation shall be vested in the Mayor, members of executive council, and such other executive officers as shall be, from time to time, created by law; and neither the Common Council or any

member or committee thereof shall perform any executive business, except such as is, or shall be, specially imposed on them by the laws of the state. The legislative power of the Corporation of the city of New York shall be vested in a Board of Aldermen, and a Board of Assistant Aldermen, who, together, shall form the Common Council of the city. The Board of Aldermen shall consist of one Alderman from each ward, who shall be elected by the people of the respective wards, for two years. The Aldermen and Councilmen, now in office, shall continue to discharge the duties of their said offices, as follows, viz: The Aldermen from wards having an even numerical designation until the first Monday of May, in 1856, which wards shall elect Aldermen at the charter election in that year, and every two years thereafter. The Aldermen from wards having an odd numerical designation, until the first Monday of May in 1857, which wards shall elect Aldermen at the charter election in that year, and every two years thereafter; and the Councilmen until the first Monday of May in 1856, and the several districts shall elect Assistant Aldermen, at the charter election in that year, and annually thereafter.

SEC. 3. The Board of Assistant Aldermen shall consist of sixty members, to be elected from as many districts of contiguous territory and as near as may be of equal population. The districts as now defined for the election of Councilmen by ordinance, approved by the Mayor, August 24, 1853, shall be and continue the districts for the election of Assistant Aldermen, until said city shall be re-districted as hereinafter directed. It shall be the duty of the Common Council, within one year after the state and

national census shall have been completed, to redistrict said city in manner aforesaid.

SEC. 4. The Mayor shall hold his office for two years, and the first election for Mayor, under this act, shall be held at the charter election in 1856.

SEC. 5. The election for charter officers shall be held on the first Tuesday of April in 1856, and on the same day annually thereafter; when all charter officers to be elected by the people, shall be chosen, and the officers, who shall be elected shall be sworn into office on the first Monday of May thereafter; and the laws of the state regulating elections shall apply to elections of charter officers; but the Common Council may, by law, extend the time for the canvass of the votes.

SEC. 6. The Board of Aldermen shall have power to direct a special election to be held, to supply the place of any Alderman whose seat shall become vacant by death, removal from the city, resignation or otherwise; and the Board of Assistants shall also have power to direct a special election to supply any vacancy that may occur in the Board of Assistants; and in both cases, the persons elected to supply the vacancy, shall hold his seat only for the residue of the term of office of his immediate predecessor. Provided however, that such special election shall not be ordered unless at least two months of the term in which such vacancy occurs shall remain unexpired.

SEC. 7. The two Boards shall meet in separate chambers, and a majority of each shall be a quorum to do business. They shall appoint no joint committees except on accounts. Each Board shall appoint a President from its

own body, and shall also choose its clerk and other officers, determine the rules of its own proceedings, and be the judge of the election, returns and qualifications of its own members. Each Board shall keep a journal of its proceedings, and the doors of each shall be kept open, except when the public welfare shall require secrecy; and all resolutions and reports of committees which shall recommend any specific improvement involving the appropriation of public moneys, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the Board, under the authority of the Common Council, in all the newspapers employed by the Corporation; and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.

SEC. 8. Each Board shall have the authority to compel the attendance of absent members; to punish its members for disorderly behavior, and to expel a member, with the concurrence of two-thirds of the members elected to the Board; and the members so expelled shall, by such expulsion, forfeit all his rights and powers as an Alderman or Assistant Alderman.

SEC. 9. The stated and occasional meetings of each Board of the Common Council shall be regulated by its own ordinances; and both Boards may meet on the same or on different days, as they may severally judge expedient.

SEC. 10. Every act, resolution or ordinance appropriating money, or involving the expenditure of money, not rendered imperative under the provision of any state law, shall originate in the Board of Assistant Aldermen, but the Board of Aldermen may reject, amend or concur as in other cases. But no law, ordinance or resolution requiring

the concurrence of both Boards shall pass either Board, except by a majority of the members elected.

SEC. 11. Neither the Mayor, or the Recorder of the city of New York shall be a member of the Common Council.

SEC. 12. It shall be the duty of the Mayor, on the first Monday of May, 1856, and thereafter, immediately after being sworn into office, to nominate to the Board of Aldermen for confirmation, an Executive Council, consisting of a Comptroller; a Corporation Counsel; a Chief of Police; an Engineer of the Croton Aqueduct; a Street Commissioner; a City Inspector, and a Commissioner of Repairs and Supplies, to assist him in the discharge of the executive duties of the city, which duties shall be clearly defined by ordinance of the Common Council, and in like manner to appoint whenever any vacancy shall occur in any of said offices. If his nominations be rejected, he shall, within five days thereafter, nominate other and different persons for said Executive Council. Each member of the Executive Council, and the head of each Executive Department, shall appoint so many and such subordinates and clerks as shall be authorized by the Common Council. No nomination shall be valid unless confirmed by the Board of Aldermen. It shall also be the duty of the Mayor,

To communicate to the Common Council, at least once a year, and oftener if he shall deem it expedient, a general statement of the situation and condition of the city, in relation to its government, finances and improvements.

To recommend to the adoption of the Common Council all such measures, connected with the police, secu-

rity, health, cleanliness and ornament of the city, and the improvement of its government and finances, as he shall deem expedient.

To be vigilant and active in causing the laws and ordinances of the government of the city to be duly executed and enforced.

To exercise a constant supervision and control over the conduct and acts of all subordinate officers, and to receive and examine into all such complaints as may be preferred against any of them for violation or neglect of duty, and generally to perform all such duties as may be prescribed to him by the charter and city ordinances, and the laws of this state and the United States.

SEC. 13. Whenever there shall be a vacancy in the office of Mayor, and whenever the Mayor shall be absent from the city, or be prevented by sickness, or any other cause from attending to the duties of his office, the President of the Board of Aldermen shall act as Mayor, and shall possess all the rights and powers of the Mayor, during the continuance of such vacancy, absence or disability.

SEC. 14. Annual and occasional appropriations shall be made by proper ordinances of the Common Council, for every branch and object of city expenditure. All annual appropriations shall be based upon specific and detailed statements, in writing, of the several heads of departments, through the Comptroller. All ordinary appropriations made for the support or use of the Alms-house Department, or the Board of Education, shall, before the same are finally made, be submitted by such Department or Board, through the Comptroller, to the Executive Council.

If said Council approve of the appropriations, they shall immediately report the same to the Board of Supervisors; if they shall disapprove of the same, they shall return them, with their objections, to the Department or Board whence received, for reconsideration; and in case the Governors or Commissioners, as the case may be, upon a reconsideration, shall adhere, by a vote of two-thirds of all then in office, to the original proposition, they shall return them to the Council, whose duty it shall be to report to the Board of Supervisors. No money shall be drawn from the city treasury, unless the same shall have been previously appropriated to the purpose for which it is drawn; nor shall any expense or liability be incurred by any department or officer thereof, unless an appropriation shall have been previously made therefor.

SEC. 15. The Common Council shall not have authority to borrow any sums of money, whatever, on the credit of the Corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorized by a special act of the legislature, on application of the Mayor, Aldermen and Commonalty of the city of New York.

SEC. 16. It shall be the duty of the Common Council to publish, two months before the annual election of charter officers, in each year, for the general information of the citizens of New York, a full and detailed statement of the receipts and expenditures of the Corporation, during the year, ending on the first day of the month in which such publication is made; and in every such statement the different sources of city revenue, and the amount received from each; the several appropriations made by the Common

Council, the objects for which the same were made, and the amount of moneys expended under each; the moneys borrowed on the credit of the Corporation; the authority under which each loan was made, and the terms on which the same was obtained, shall be clearly and particularly specified.

SEC. 17. The Common Council shall have power to create such departments and offices by ordinance, in addition to those herein specified, as may be necessary to transact the public business of the Corporation, and to define their duties, and to fix the salaries of all officers paid from the city treasury. All salaries of officers shall be fixed before the appointment is made, and all officers except as herein otherwise provided, shall be appointed by the Common Council. All officers of the city government, executive, administrative or judicial, and all judges and clerks in the several courts of the city, shall receive a stated salary, or a per diem allowance for their services, which shall be fixed by the Common Council, and shall not, after the first day of January, 1856, receive to their own use any fee or compensation for the same; and all fees or charges paid to them according to law, for the performance of any duties appertaining to their offices, shall be paid by them monthly, into the city treasury.

SEC. 18. It shall be the duty of the Common Council to provide for the accountability of all officers and other persons to whom the receipt or expenditure of the funds of the city shall be intrusted, by requiring from them sufficient security for the performance of their duties or trust.

SEC. 19. The Clerk of the Board of Aldermen shall, by

virtue of his office, be Clerk of the Common Council, and shall perform all the duties heretofore performed by the Clerk of the Common Council, except such as shall be assigned to the Clerk of the Board of Assistant Aldermen; and it shall be his duty to keep open for inspection, at all reasonable times, the records and minutes of the proceedings of the Common Council, except such as shall be specially ordered otherwise.

SEC. 20. It shall be the duty of the clerks of the respective Boards, to publish all ordinances and amendments of ordinances which shall be passed, and also the proceedings, in the newspapers employed by the Corporation, except such parts as may require secrecy, and whenever a vote shall be taken in either Board, upon the passage of a resolution or ordinance, which shall contemplate any specific improvement, or involve the sale, disposition or appropriation of public property, or the expenditure of public moneys or income therefrom, or lay any tax or assessment, such resolution or ordinance shall, before the same shall be sent to the other Board, and immediately after the adjournment of the Board at which the same shall have been passed, be published, with the ayes and noes, with the names of the persons voting for and against the same in the newspapers employed by the Corporation as part of the proceedings; and no act, resolution or ordinance which shall have passed one Board, shall be acted upon by the other Board on the same day, unless by unanimous consent, except in case of invasion, insurrection or pestilence.

SEC. 21. The Board of Assistant Aldermen shall have the sole power of impeachment of all city officers, not otherwise provided for; and pending such impeachment, and

until the final disposition thereof, the party impeached shall not exercise any of the functions of his office. The Board of Aldermen shall have the sole power to try all impeachments; when sitting for that purpose, they shall be on oath or affirmation, truly and impartially to try the impeachment, according to evidence, and no person shall be convicted without the concurrence of two-thirds of all the members elected to said Board. Judgment in case of impeachment shall not extend farther than removal from office, and disqualification to hold any office under the city charter; but the party convicted shall be liable to indictment, trial, judgment and punishment according to law.

SEC. 22. Any officer of the city government, except the Mayor, and members of the Common Council, may be removed from office by concurrent resolution of both Boards of the Common Council. Any member of the Executive Council, may be removed by the Mayor, and any member of the said council, may remove any clerk in his department.

SEC. 23. The several executive departments, and the officers and clerks thereof, shall be subject to the legislative regulation and direction of the Common Council, so far as the same shall not be inconsistent with this act; and the duties thereof shall be performed in accordance with the charter and laws and ordinances of the city. The Mayor and each Board of the Common Council, may at any time require the opinion in writing of the head of any department, upon any subject relating to his department, or any information possessed by him in relation thereto. And every head of department shall report in writing to the Common Council, on the first Monday of February in

each year, the state of his department, with such suggestions in relation to the improvement thereof, and to the public business connected therewith, as he may deem advisable.

SEC. 24. All work to be done, and all supplies to be furnished for the Corporation, involving an expenditure of more than two hundred and fifty dollars, shall, unless by a vote of three-fourths of the members elected to each Board of the Common Council, it be otherwise ordered; be by contract, under such regulations as established by ordinance of the Common Council, and founded on sealed bids or proposals, made in compliance with public notice, advertised for the full period of ten days; and all such contracts, when given, shall be given to the lowest bidder, who gives such security as shall be prescribed by ordinance. All such bids or proposals shall be opened by the Comptroller and the officer advertising for them, in the presence of such of the parties making them as may desire to be present, and such other persons as the Common Council shall, by ordinance, designate.

SEC. 25. Every person elected or appointed to any office under the city government shall take and subscribe an oath or affirmation before the Mayor, faithfully to perform the duties of his office, which oath or affirmation shall be filed in the Mayor's office.

SEC. 26. All officers of the city government, who shall be in office when this act shall take effect, shall hold their offices and execute the duties thereof, until their successors shall be duly qualified.

SEC. 27. No member of either Board shall, during the pe-

riod for which he was elected, be appointed to, or be competent to hold any office of which the emoluments are paid from the city treasury, or by fees directed to be paid by any ordinance or act of the Common Council, nor shall any such member, or member of the Executive Council, head of department, subordinate, clerk, or other officer of the Corporation, be directly or indirectly interested in any contract, work or business, or the sale of any article, or property, the expense, price, or consideration of which is paid, or to be paid, from the city treasury, or by any assessment levied, or to be levied, by any act or ordinance of the Common Council, nor in the purchase of any real estate or other property belonging to the Corporation, or which shall be sold for taxes or assessments; but this section shall not be construed to deprive any Alderman or Assistant of any emoluments or fees which he is entitled to by virtue of his office.

SEC. 28. Every person who shall promise, offer or give, or cause, or aid or abet, in causing to be promised, offered or given, or furnish or agree to furnish, in whole or in part, to be promised, offered or given to any member of the Common Council or any officer of the Corporation after his election as such member, or before or after he shall have qualified and taken his seat, any money, goods, right in action or other property, or any thing of value, or any pecuniary advantage, present or prospective, with intent to influence his vote, opinion, judgment or action on any question, matter, cause or proceeding which may be then pending, or may, by law, be brought before him, in his official capacity, shall, upon conviction, be imprisoned in a State prison for a term not exceeding ten years, or shall be fined not exceeding five thousand dollars, or both,

in the discretion of the Court. Every officer in this section enumerated, who shall accept any such gift, or any promise or undertaking to make the same, under any agreement or undertaking that his vote, opinion, judgment or action shall be influenced thereby, or shall be given in any particular manner, or upon any particular side of any question, matter, cause or proceeding then pending, or which may by law be brought before him, in his official capacity, shall upon conviction, be disqualified from holding any public office, trust or appointment, under the charter of the city of New York, and shall forfeit his office, and shall be punished by imprisonment in the State prison, not exceeding ten years, or by a fine not exceeding five thousand dollars, or both, in the discretion of the Court. Every person offending against either of the provisions of this section, shall be a competent witness against any other person offending in the same transaction, and may be compelled to appear and give evidence before any Grand Jury, or in any Court, in the same manner as other persons; but the testimony so given shall not be used in any prosecution or proceeding, civil or criminal, against the person so testifying.

SEC. 29. Every act, ordinance or resolution, which shall have passed the two Boards of the Common Council, before it shall take effect, shall be presented, duly certified, to the Mayor of the city, for his approbation. If he approve, he shall sign it; if not, he shall return it with his objections to the board in which it originated, within ten days thereafter; or if such board be not then in session, at its next meeting. The board to which it shall be returned, shall enter the objections at large on their journal, and cause the same to be published in one or more of the public

newspapers of the city. The board to which such act, ordinance, or resolution shall have been so returned, shall, after the expiration of not less than ten days thereafter, proceed to reconsider the same. If, after such reconsideration, two-thirds of the members elected to the board, shall agree to pass the same, it shall be sent, together with the objections, to the other board, by which it shall be likewise reconsidered, and if approved by two-thirds of all the members elected to such board, it shall take effect as an act or law of the Corporation. In all such cases the votes of both boards shall be determined by yeas and nays, and the names of the persons voting for and against the passage of the measure reconsidered, shall be entered on the journal of each board respectively. If any ordinance or resolution passed by both boards shall not be returned by the Mayor within ten days (Sundays excepted) after it shall have been presented to him, the same shall become a law in like manner as if he had signed it, unless the close of the session of the board in which it originated shall prevent its return, in which case it shall not be a law until the expiration of the next meeting of said board, by whom the ordinance or resolution shall be reconsidered, if returned at such meeting, and be disposed of in the same manner and with like effect as if presented at the preceding session.

SEC. 30. No Alderman shall hereafter sit, or act as Judge in the Court of Oyer and Terminer, or in the Courts of General or Special Sessions, in the city and county of New York; but this section shall not prevent his exercising the power of a magistrate, in the arrest, commitment, or bailing of offenders, except that he cannot let to bail,

or discharge a person arrested or committed by another magistrate.

SEC. 31. All ferries, docks, piers and slips, shall be leased; and all leases and sales of public property and franchises, (other than grants of land under water, to which the owners of the upland shall have a pre-emption right,) shall be made by public auction, and to the highest bidder, who will give adequate security, (no lease hereafter given except as the same may be required by covenants of the Corporation already existing, shall be for a longer period than ten years, and all ferry leases shall be revocable, by the Common Council, for mismanagement, or neglect to provide adequate accommodations.) All persons requiring any ferry lease or other franchise, or grant under the provisions of this act, shall be required to purchase, at a fair appraised valuation, the boats, buildings, or other property of the former lessees or grantees, actually necessary for the purposes of such ferry, grant or franchise. Previous notice of all sales referred to in this section, shall be given under the direction of the Comptroller, for thirty days, in the newspapers employed by the Corporation.

SEC. 32. No bids shall be accepted from, or contract awarded to any person, who is in arrears to the Corporation, upon debt or contract, or who is a defaulter, as security or otherwise, upon any obligation to the Corporation.

SEC. 33. No money shall be expended by the Corporation for any celebration, procession, or entertainment of any kind; or on any occasion, except for the celebration of the anniversary of the National Independence, the

twenty-fifth of November, "Evacuation Day," and the anniversary of the birthday of Washington, unless by the vote of three-fourths of all the members elected in each Board of the Common Council.

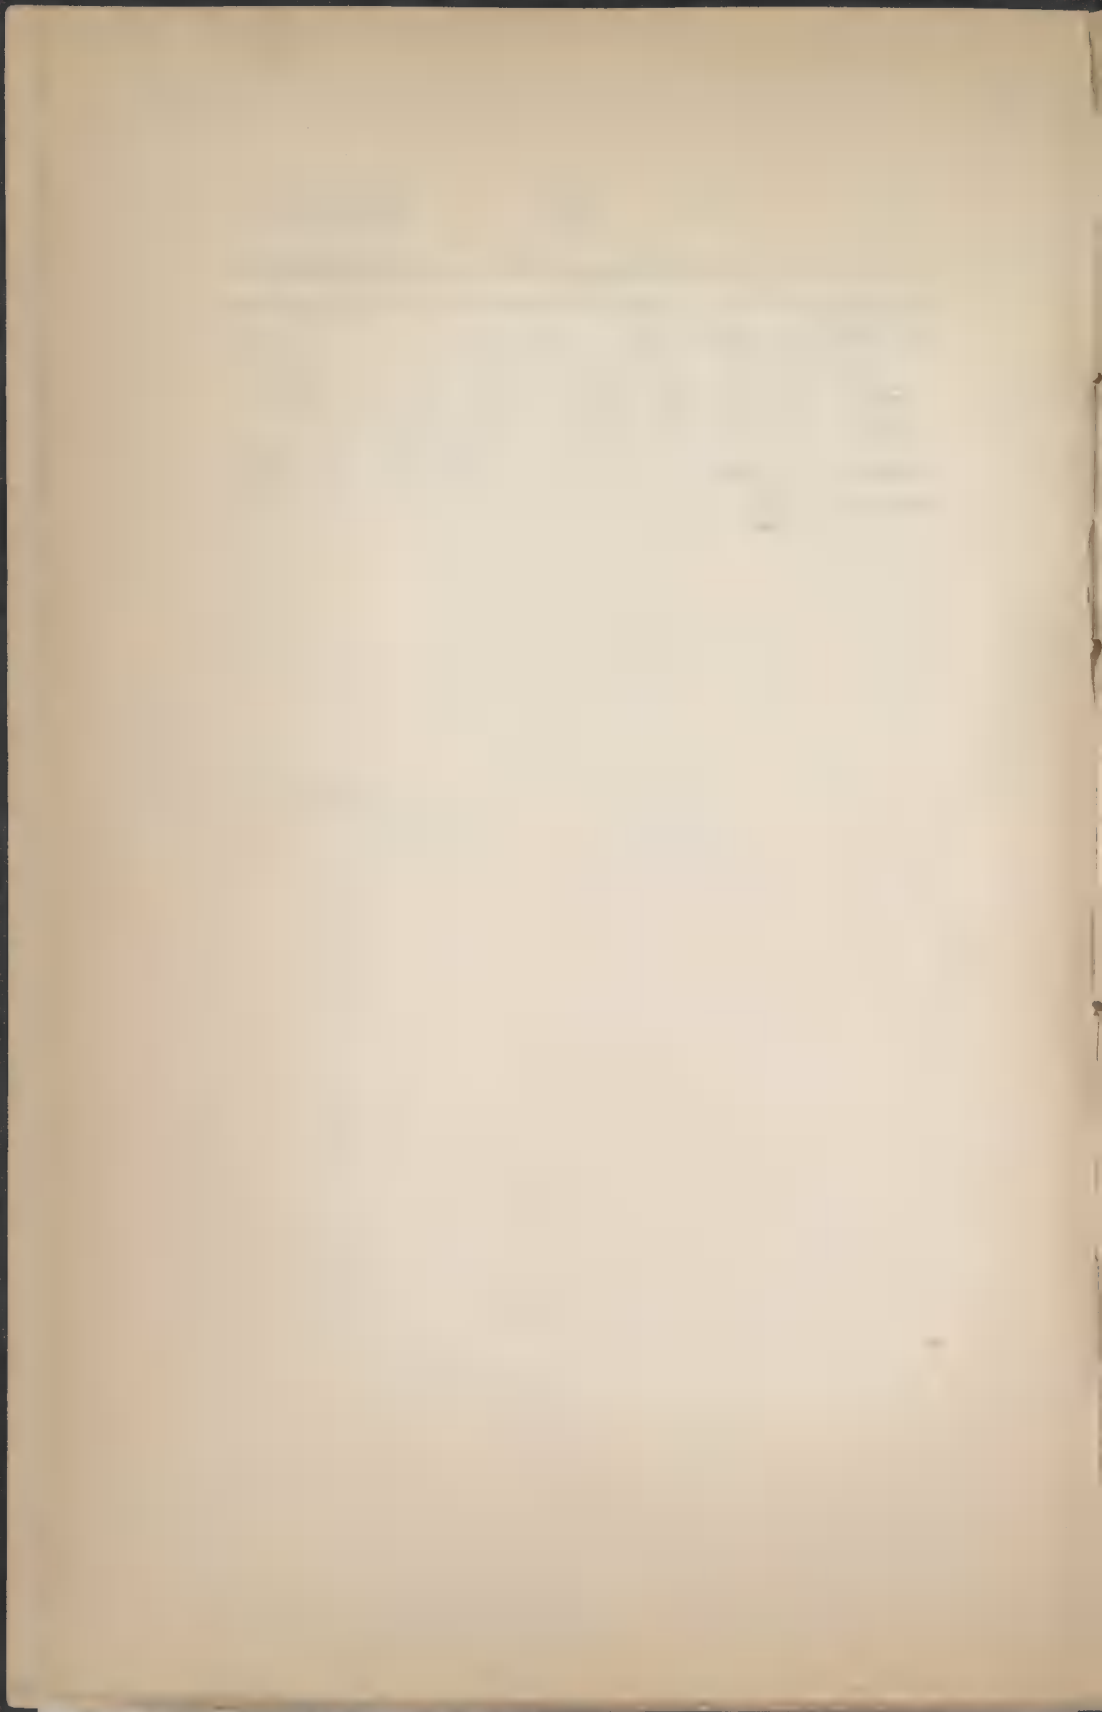

SEC. 34. No additional allowance, beyond the legal claim, under any contract with the Corporation, or for any service on its account, or in its employment, shall ever be allowed.

SEC. 35. Any officer of the city government, or person or persons employed in any department or office thereof, who shall wilfully violate any of the provisions of this charter, or commit any fraud, or convert any of the public property to his own use, or knowingly permit any other person to commit any fraud, or to convert any such property to his or her use, shall be deemed guilty of a misdemeanor, and in addition to the penalties imposed by law, shall forfeit his office, and be excluded forever after from holding or receiving any office under the city government.

SEC. 36. Chapter 122, of Laws of 1830, and an act to amend the charter of the city of New York, passed April 2d, 1849, and an act to amend an act, entitled an act to amend the charter of the city of New York, passed April 2d, 1849, passed July 11th, 1851; and an act further to amend the charter of the city of New York, passed April 12th, 1853; and an act supplementary to an act, entitled an act further to amend the charter of the city of New York, passed April 12th, 1853, passed June 14, 1853, are hereby repealed; and such parts of the charter of the city of New York as are not inconsistent with the provisions of this act, shall not be construed as repealed, modified, or

in any manner affected thereby, but shall continue and remain in full force; and all laws inconsistent with this act are also hereby repealed.

SEC. 37. This act shall go into effect on the first day of July, 1855; and the terms of office of all charter officers, except as otherwise herein provided, shall expire on the first Monday of May, 1856.

ANNUAL REPORT
OF THE
COMPTROLLER

OF THE
CITY OF NEW YORK,

OF THE
RECEIPTS AND EXPENDITURES OF THE CORPORATION

For the Year 1854.

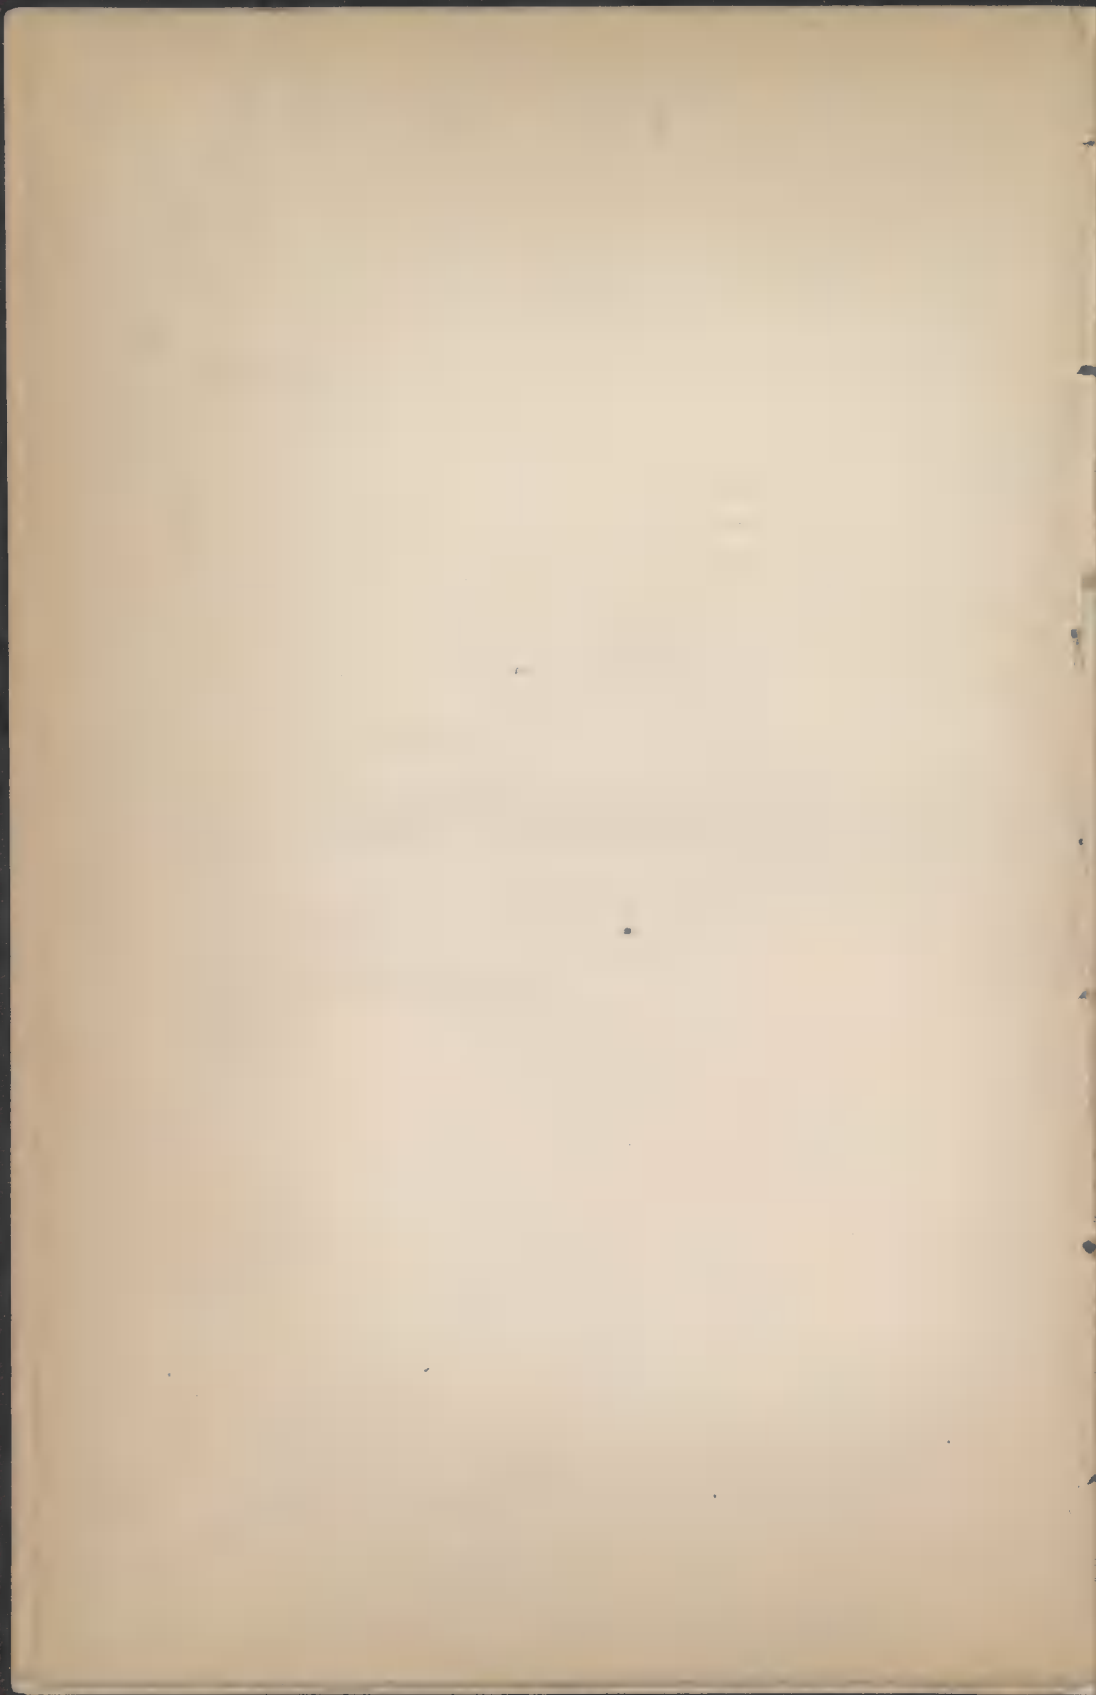

NEW YORK:
McSPEDON & BAKER, PRINTERS TO THE COMMON COUNCIL.
1855.

IN COMMON COUNCIL.

FEBRUARY 21, 1855.

THE ANNUAL REPORT OF THE COMPTROLLER, of the Receipts and Expenditures of the year ending December 31st, 1854, was received, laid on the table and ordered to be printed.

D. T. VALENTINE,
Clerk of the Common Council.

DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE, CITY OF NEW YORK,
February 15, 1855.

To the Common Council:

The Comptroller, in compliance with the requirements of the twenty-first section of the amended charter of 1849, and the one hundredth and second section of the ordinance of the same year, organizing the departments of the city government, respectfully submits the following

REPORT:

The receipts and expenditures of the Corporation, during the year ending on the 31st December, 1854, exclusive of the Sinking Fund, set apart for the payment of the debt, have been as follows:

Expenditures from January 1st, 1854, to December 31st	
of the same year.....	\$10,184,318 27
Received from all sources, except the Sinking Fund,	
during the same year.....	9,744,310 58
Expenditures more than the receipts	\$1,010,299 46
There was, however, a balance in the treasury, Jan-	
uary 1st, 1854, of.....	<u>\$1,170,590 90</u>

Statement No. 1, appended to this report, gives the general heads of expenditure; and, in a corresponding column, the amount received into the city treasury from taxes and all other sources, except from the revenues of the Sinking Fund.

Statement No. 2, shows the expenditures and receipts of the city government proper, and not including either Trust Funds or the Sinking Funds, for the year ending December 31st, 1854. The totals are as follows, viz:

Expenditures for the support of the city government..	\$3,936,075 65
Receipts, except from taxation.....	67,890 39
Balance payable from taxation.....	<u>\$3,868,185 26</u>

* Statement No. 3, shows the expenditures and receipts on trust and special accounts, from which the Sinking Fund is excluded. This table embraces the large sums received and paid on account of revenue bonds which are issued to anticipate the annual taxes for the support of the government: also the sums paid for opening, grading and paving streets, where the work is done by assessments on the property benefited; and the issue of assessment bonds to anticipate the collection of these assessments. It includes, also, the State Mill Tax, the amount raised for the free schools of the State, and the sum levied by tax for the support of the common schools of the city. The totals of this table are as follows:

Payments, (see No. 3).....	\$6,248,242 62
Receipts, ".....	5,059,728 30
Receipts less than payments.....	<u>\$1,188,514 32</u>

By referring to the items of "Streets Opening" and "Streets Paving," it will be seen that there has been paid the total sum of \$1,408,938 24; and that the payments into the treasury by the Collector of Assessments, and the Clerk of Arrears, amount only to the sum of \$589,317 94, showing a difference against the treasury, between payments and receipts, of \$819,620 30.

The sum of seventy-four thousand dollars has been paid for the Catharine and Union markets, and for Firemen's Hall. These sums are to be reimbursed from Public Building Stock No. 3. Also forty thousand dollars to the Governors of the Alms-house, to be reimbursed by a loan to be made under chapter 313, of the laws of 1854.

THE SINKING FUNDS.

The ordinances of the Common Council have established separate Sinking Funds; one for the payment of interest, and another for the

reimbursement of the principal of the city debt. All the real estate belonging to the city, and the revenues derived from nearly all sources, are pledged to one or the other of these funds. This leaves the current annual expenses of the city government to be supplied mainly by direct taxation.

The sums received and expended on account of the Sinking Funds, for the year ending on the 31st December, 1854, have been as follows:

Received on account of the fund for the redemption of	
the city debt, during the year.....	\$764,487 81
Balance in bank, January 1, 1854.....	419,576 00
	<hr/>
	\$1,184,063 81
Paid from the same fund.....	1,166,660 58
	<hr/>
Balance in bank, January 1, 1855.....	<u>\$17,403 23</u>

Received on account of the fund for the payment of in-	
terest on the debt.....	\$1,206,802 27
Balance in Treasury, January 1st, 1854.....	484,959 33
	<hr/>
	\$1,691,761 60
Paid for interest on the city debt, invested, &c.....	\$1,374,821 27
	<hr/>
Balance in Treasury, January 1, 1855.....	<u>\$316,940 33</u>

Statement No. 4, gives the several items of receipts and expenditures on account of the Sinking Fund for the payment of the principal of the city debt; and No. 5, the items of receipts and expenditures on account of the fund for the payment of interest on the debt.

The balance, subject to the draft of the Commissioners of the Sinking Funds on the first of January, 1855, was \$334,343 56.

Statement No. 6, shows the total amount of the permanent city debt, and also the means accumulated by the Sinking Fund for its payment.

The debt, on the 1st of January, 1855, amounted to	
the sum of.....	\$13,960,856 00
	<hr/>
Carried forward.....	<u>\$13,960,856 00</u>

Brought forward.....	\$13,960,856 00
There was, at the same date, in the hands of the Commissioners of the Sinking Fund, applicable to the redemption of the city debt.....	5,171,308 62
Balance unprovided for.....	<u>\$8,789,547 38</u>

No portion of the principal of this debt has been paid during the year, as none of the certificates became due. The fund for the redemption of the debt, however, has increased from \$4,631,167 18, in January, 1854, to \$5,171,308 62, in January, 1855, equal to an increase of \$540,141 44, for the last year.

Statement No. 7, shows the stocks and other securities held by the Commissioners of the Sinking Fund, for the reimbursement of the debt, the total of which is given above.

DEBT PAYABLE BY TAXATION.

Statement No. 8, shows the amount of debt redeemable from year to year by direct taxation. The total amount of this debt is \$1,154,000. This debt has been increased \$154,000 by stock issued under an act passed in 1853, (chap. 301,) which authorized that sum to be borrowed on stock reimbursable in 1873. The money was required to pay off the mortgages on the real estate surrendered to the city by "the Public School Society of the city of New York." The law under which this loan was made, required the establishment of a sinking fund by taxation, for the reimbursement of the loan in twenty years. The loan is at five per cent, requiring an annual tax to pay interest of \$7,700. The tax for a sinking fund to pay the principal in twenty years, requires to be raised annually \$4,657 36, equal to a total tax of \$12,357 36 each year.

There had been paid, February 1, 1854, on account of the loan for Building Stock No. 2, the sum of \$50,000, which was raised by tax.

TOTAL OPERATIONS OF THE TREASURY, IN 1854.

The following statement is a summary of the amounts paid out of the treasury and received into it, on account of the Sinking Funds, the

ordinary support of the city government, and the several trust funds, for opening, grading and paving streets, and covering the entire operations of the treasury.

Payments, as shown in Statement No. 1.....	\$10,184,318	27
On account of the Sinking Fund for the payment of the		
debt, as shown in Statement No. 4.....	1,166,660	58
On account of Sinking Fund for the payment of interest,		
Statement No. 5.....	1,374,821	27
Total amount of payments.....	\$12,725,800	12

Receipts:

As shown by Statement No. 1.....	\$9,744,310	58
On account of Sinking Fund for payment of debt,		
Statement No. 4.....	764,487	81
On account of Sinking Fund for payment of interest,		
Statement No. 5.....	1,206,802	27
	\$11,715,600	66

In the year 1853, the total payments, on all accounts,		
were	\$9,525,749	90
And the total receipts.....	10,849,168	04
Difference in favor of receipts in 1853.....	\$323,418	14

In the year 1854, as shown in the preceding summary,		
the total payments have been.....	\$12,725,800	12
And the total receipts.....	11,715,600	66
Difference against the treasury in 1854.....	\$1,010,199	46

This is the difference between the current receipts and payments from January 1, 1854, to Dec. 31, of the same year.

The Sinking Fund had a balance in the treasury on the first of January, 1854, of \$904,535 33. There was also a balance in the treasury account of \$1,170,590 90. Loans have been made from the

Sinking Fund, at six per cent. for the support of the government, at times when money could not be borrowed in the open market at that rate.

Statement No. 9, shows the amount of Revenue Bonds issued in the year 1854, to anticipate the taxes annually levied for the support of the municipal government; also the mill tax for the support of the state government, which exceeds \$400,000 on this city alone. The total sum borrowed is \$4,366,459; and more than three millions of this sum was borrowed at the rate of 7 per cent. These loans were made for six, nine, and twelve months, and must be repaid from taxes within one year.

The same statement shows, that the payments on account of Revenue Bonds for 1854, amount to \$2,743,011.

Statement No. 10, shows the amount of Assessment Bonds issued in 1854, at \$100,000. The payments on account of those previously issued, amount to \$284,925.

. The bond issued in 1854, was at the rate of seven per cent., when it should have been at six per cent.

Statement No. 11, shows the receipts and expenditures on account of Building Stock No. 3. There has been borrowed from the Sinking Fund during the year, \$100,000 on account of this stock. The proceeds of this loan have been applied to the reimbursement of the treasury for sundry advances, as detailed in No. 11; and also to the erection of Firemen's Hall, and the Catharine and Union markets. The sum of \$100,000 more can be borrowed, but \$95,000 of the \$100,000 has already been advanced from the treasury to the Governors of the Alms-house for the construction of buildings, as shown in Statement No. 1. This sum must be reimbursed to the treasury, now that money can be borrowed on the stock at six per cent.

Statement No. 12, shows the loan of \$40,000 made under the law of 1854, to enable the Governors of the Alms-house to complete the work-house on Blackwell's Island. This sum is hereafter to be paid

by taxation, as well as the \$100,000 already raised, and the other \$100,000 to be raised for Building Loan Stock No. 3.

Statement No. 13, shows the amount borrowed, and the amounts of the several mortgages paid off when the real estate of the Public School Society was surrendered to the city in 1853.

Statement No. 14, is a table presenting the receipts from the several markets on account of cellar rents, hucksters, fishermen, &c., and the butcher's stands. The total sum is \$91,296 68 for 1854. The following is a comparison for the last three years:

	1852.	1853.	1854.
Cellar Rents.....	\$12,594	\$12,352	\$15,127 05
Butchers' Stands.....	14,764	14,734	14,885 84
Market Fees.....	58,144	57,209	61,283 79
	<u>\$85,502</u>	<u>\$84,295</u>	<u>\$90,296 68</u>

Immediately following the general tables, showing the receipts and expenditures on account of the Sinking Funds, are detailed statements, numbered from No. 15 to 37, both inclusive.

TAXATION FOR THE SUPPORT OF THE STATE GOVERNMENT.

In 1846, after provision was made in the Constitution to pay the canal debt from the revenues of the public works, and to furnish annually a fixed sum for the support of the government of the state, it was confidently anticipated that the annual state tax of one-fourth of a mill would not be increased. This reasonable anticipation, however, has been disappointed. At the extra session of the legislature, in July, 1853, an act was passed, (Chapter 651,) which has the following title, viz: "An Act to provide means to pay state debts and to support the government for the fiscal year commencing October 1st, 1853, and for other purposes." Passed July 21, 1853.

The first section of this act provides, that in addition to the then existing annual state tax of one fourth of a mill, there should be imposed, for the fiscal year commencing October 1, 1853, three quarters of a mill; and for the fiscal year commencing October 1, 1854, one

half of a mill on each dollar of the valuation of the real and personal property taxable in the state. Of the sums to be raised under this law, six hundred thousand dollars was applied to the payment of canal debts, and the balance of the tax to be retained for the use of the general fund of the state.

A copy of this law did not reach this city until the Supervisors had confirmed the tax books of 1853, which embraced only the state tax of one fourth of a mill, equal to about \$100,000. As the three quarters of a mill, to be added by the act of 1853, could only be levied by the Supervisors, on the annual rolls of the assessors, the additional sum was borrowed, in anticipation of the tax levy in July, 1854, and paid into the state treasury several months before the tax rolls were confirmed in 1854. In this way, the mill tax, required for the fiscal year commencing October 1, 1853, was assessed on the tax payers, in the proportion of about one fourth in 1853, and three fourths in 1854.

A mill tax seems to be a very trifling burden; but with our expanded tax roll, a mill tax claims very serious consideration. It amounted, on the valuation of 1853, to the sum of \$413,631 43. The aggregate valuation of the property of the whole state, in 1853, was \$1,168,335,236, and the gross amount of tax on the whole state \$1,168,335 23. This city, therefore, pays a fraction more than one third of the entire mill tax of the state.

The law before referred to, contains the additional tax only for two years, and the second levy is one half of a mill to be added to one fourth of a mill which is continued under the act of 1842. The rate of state tax to be levied in 1855, will be three quarters of a mill on a valuation of \$462,237,500, equal to \$346,677.

The State Comptroller anticipates a deficiency in the means of supporting the government, of \$295,000 on the 1st of October, 1855, notwithstanding an available revenue of \$900,000 derived from taxation. How then is the state to get along without renewing the mill tax? This will require, on the present valuation, \$462,000 to be raised for the state treasury.

But whilst we must bear our proportion of an equal tax, what apology can be made for adding, to this severe burden, an unequal tax, under a law of the state establishing a rule which does not permit the Superintendent to make an equal and just apportionment. This is the case with the law passed in 1851, levying a tax of \$800,000 for the support of Free Schools in the state at large, in addition to our own separate Free School tax, amounting to about a million of dollars for the present year.

The injustice of the General Free School Act, in its operation on this city, is fully set forth in the reports from this Department in 1853 and 1854, and to these reports the Common Council is respectfully referred. A memorial from the Common Council, setting forth the inequality of this law might produce a modification of its onerous provisions. In 1854, the county of New York is called on, under the Act of 1851, to raise by tax, and pay into the treasury, the sum of \$257,616 11, as its portion of the state school tax of \$800,000; whilst the amount apportioned to the city out of the \$800,000 thus raised, is only \$95,648 06. The sum of \$37,063 62, is apportioned to the city in addition to the above, but this is only the share of the county from the annual revenues of the school fund proper, and the United States deposit fund.

TOTAL AMOUNT OF TAXES PAID IN 1854.

A statement has been furnished by the Bureau for the Collection of Taxes, which is appended and marked No. 38. This statement shows the several sums received in the year 1854.

Total amount of tax received to January 1, 1855.....	\$4,293,150 01
Total amount of tax returned to Bureau of Arrears...	344,553 84
Total received for Croton arrears.....	31,311 90
To discount on tax of 1854.....	20,138 29
Total amount of interest received.....	37,024 28
Total amount of remissions.....	20,884 26
Amount of tax remaining unpaid, January 1, 1855....	1,416,704 15

AGGREGATE VALUATION OF REAL AND PERSONAL ESTATE.

The table No. 39, shows the valuations of Real and Personal Estate in the several wards, for 1853 and 1854.

Total value of Real Estate in 1854.....	\$330,564,452	50
“ “ Personal Estate.....	131,721,338	22
Total of Real and Personal Estate.....	\$462,285,790	72

The amount of tax levied in 1854.....	\$4,845,386	07
---------------------------------------	-------------	----

TAXES ON INCORPORATED COMPANIES.

Statement No. 40, gives a list of the names of the several incorporated companies, in the city and county of New York, deriving an income from their capital; showing also the amount of real and personal property, and the amount of tax assessed on each company. The total results are as follows, viz :

Total amount of Personal Estate.....	\$75,267,494	41
“ “ Real Estate.....	5,623,087	00
Total valuation included in the general aggregate above	\$80,890,581	41

Total amount of tax levied in 1854.....	\$856,037	32
---	-----------	----

THE MARKETS AND THE MARKET PROPERTY.

In May last, in compliance with a resolution of the Board of Aldermen, a very full report was submitted in regard to the history, management, and productiveness, of the market property and franchise. It is confidently believed that the revenues of the city would be decidedly increased, and the condition and usefulness of the markets greatly improved, by leasing the whole of them at public auction, and placing the whole management of them in the hands of business men on the same footing with other business interests. This Document, No. 41, of the Board of Aldermen of 1854, is respectfully referred to the consideration of the present Common Council.

In New Orleans, the right to farm the city markets is annually sold by public competition. The result is that the city derives a large

annual revenue from this source. The Comptroller of that city has obligingly furnished a statement of the revenues and expenses for the last two years, which presents the following results:

Amount of revenue in 1853.....	\$213,164 10
“ Expenses for repairs, &c.....	9,642 17
Net revenue.....	<u>\$203,521 93</u>
Amount of revenue in 1854.....	\$228,173 00
“ Expended “	35,812 03
Net revenue.....	<u>\$192,360 97</u>

A very intelligent resident of New Orleans, who spent several of the summer months of 1854 in New York, in a letter communicating the above information, expresses astonishment that we do not obtain a large annual revenue from our market property and privileges; and, comparing the population of New Orleans with that of New York, estimates that we ought to have a revenue of at least a million of dollars, annually, if our markets were farmed out as theirs are. In these times of high taxes and increasing burdens, one half or even one fourth of this sum is an item worth looking after. Even the smallest sum named would improve the revenue a quarter of a million of dollars, compared with the present arrangements.

QUARTERLY RETURNS OF ASSESSORS IN THE STREET DEPARTMENT.

The Assessors in the Street Department are required, by chapter 508, of the laws of 1853, to make a quarterly return to the Comptroller, of all the assessments made by them and confirmed by the Common Council, during the three months for which the report is made. The returns for the year 1854, show the number of works for which the assessments were made, and the total amounts of assessments made and confirmed for each quarter of the year, viz:

For the 3 months ending	March 31, 1854, (50 works)....	\$108,292 05
" " "	July 30, " 24 "	132,911 72
" " "	Sept. 30, " 70 "	232,380 55
" " "	Dec. 31, " 60 "	580,715 97
No. of sts. regul'd, sewers constructed, &c., 204	" ..	\$1,054,300 29

The details of these assessments may be seen by referring to pages 15 to 27, of Document No. 11, Board of Aldermen.

In the last annual report of the Comptroller, pages 27, 28, a history is given of the operations of De Mott and his associates, in defeating the design of an act of the legislature of 1851, which authorized the Common Council to fix the fees of the assessors, not to exceed the rate of one per cent. on the whole amount of money collected on the assessment. The Common Council of 1851 and 1852 neglected to fix the rates, as contemplated by this act, and De Mott and his associates continued, for one year and seven months, to exact three per cent. on assessments, when the law, in the most positive terms, limited them to *one per cent.*

When the present assessors, Messrs. Gage, Dodge and McNeill, came into office, the litigation between their predecessors, in regard to a claim of six thousand dollars for fees, had not been closed. In the mean time, the Common Council of 1853, and soon after the present incumbents took the places of Mr. De Mott and his associates, concluded to execute the law of 1851, and fixed the rate of compensation for the assessors at one and one-fourth per cent. on the amount of each assessment. The assessors presented their bills to the Comptroller, at this rate, which he declined to pay, for the reason that the act, chapter 430 of the laws of 1851, fixed the maximum, which the Common Council could not exceed. The Comptroller, however, paid one per cent., with the understanding that the decision in the case of De Mott and his associates should control the amount of the ultimate payment. The decision of the court was, that the law limited the compensation of the assessors to one per cent. This was regarded by the present incumbents as a meagre compensation, and application was

made at once for a change of the law. The legislature, on their representation, amended the law, allowing them to put into each assessment, for their own benefit, two per cent. on the amount of the assessment. At this rate, on the assessments of 1854, the Assessors will receive the sum of \$21,086 00, which is equal to \$7,028 66 for each of the three assessors. The rate of one per cent., as fixed by the act of 1851, and the decision of the Court of Common Pleas, would have given them, on the assessments of 1854, \$10,543 00, equal to a salary of \$3,514 33 for each assessor. The sum already paid the three assessors in the year 1854 is \$19,009 56.

COLLECTOR AND DEPUTY COLLECTORS OF ASSESSMENTS.

Previous to 1853, the Collector of Assessments in the Street Department was paid by a salary of one thousand dollars, and the Deputy Collectors were paid a per centage, the amount of which is not very clearly defined. On the 12th of February, 1853, the Common Council passed an ordinance requiring the assessors to include in every assessment list an amount equal to one and one third per cent. on the total amount of such assessment, as a compensation to the Collector and Deputy Collectors of Assessments. This remained the rule for about five months, when another ordinance was passed, July 18, 1853, repealing the ordinance of February, 1853, which allowed one and one third per cent., and substituting an allowance of two and one half per cent. as a compensation to the collector and his deputies.

In the single assessment for regulating the Second avenue, from Twenty-eighth to One hundred and twenty-third street, the assessors charge on the property holders for their own compensation, the sum of.....	\$7,770 39
And add for Collector's fees.....	9,712 98
Total.....	<u>\$17,483 37</u>

To this very large sum is added, for the compensation of inspectors appointed by the Street Commissioner, (and on that work entirely useless to the interests of the city or the property holders,) the sum of \$3,634 50. The employment of surveyors, which was necessary, cost the additional sum of \$6,340 28. Here, then, is the enormous sum of

\$27,457 15, paid to some seven or eight employees in the Street Department, for their services in the single operation of regulating the Second avenue, from Twenty-eighth to One hundred and twenty-third street.

The amounts collected and paid over by the Collectors of Assessments and Clerk of Arrears, for the year 1854, have been as follows, viz:

Streets paving.....	\$450,891 73
Streets opening.....	138,426 21
Liens on lots.....	7,464 33
Wells and pumps.....	198 28
Fencing vacant lots.....	1,016 81
Interest on assessments.....	14,876 74
	<u>\$612,874 10</u>

Two and one half per cent. on the above sum is equal to \$15,314 14. The amount of assessment and per centage received by the Clerk of Arrears, was paid into the treasury. The total sum paid during the year to the present and former Collectors of Assessments, has been \$25,671 38.

In September last, Mr. Sanford, late Collector of Assessments, and Mr. Edwards, the present Collector, presented a joint account, in behalf of themselves and their deputies, in which they claimed a payment of \$11,237 08, on account of unpaid fees for collecting assessments.

This joint account gave an amount for collections on account of "Streets opening," \$407,239 14. On this sum they claimed at the rate of one and one fourth per cent., equal to \$5,090 48.

They gave a detailed statement of collections on assessments from 1834, to January 10, 1853, which footed up as follows, viz:

Principal.....	\$185,327 56
Interest.....	34,358 92
Advertising.....	4,146 46
	<u>\$223,842 94</u>

On this they charged two and a half per cent., equal on the whole to.....	\$5,596 57
Fees due.....	550 03
Fees on collections for "Streets Opening," as above....	5,090 48
Total sum claimed.....	<u>\$11,237 08</u>

There had been previously paid on the joint account of Messrs. Sanford & Edwards, on the 30th of May, 1854, the sum of \$5,901 46. This was paid on the requisition of the Street Commissioner, in favor of "Abner Sanford and Isaac Edwards, Collectors."

This claim must have been based principally on the parcels sold for assessments, at the sales which took place in 1853 and preceding. The account was made up in the Street Department as follows:

Amount of advertising.....	\$7,518 87	
" interest.....	55,365 59	\$62,884 46
" at $2\frac{1}{2}$ per cent.....		\$1,572 11
" of Collectors' fees due.....		4,329 35
		<u>\$5,901 46</u>

This sum was receipted on the 2d of June, 1854, by A. Sanford and I. Edwards, Collectors. Of this sum \$2,950 73 was paid to Mr. Sanford for himself and deputies; and the residue to Mr. Edwards and his deputies. The fees charged in the bill at two and one-half per cent., were on the assessments returned by the collectors and paid at the sale, and not on sums collected by them from the property holders. There is also an allowance of two and one half per cent. on \$62,884 46 accumulated for interest and advertising, and collected by the sale; and not content with these liberal and questionable allowances, the two collectors, after compromising the suit between themselves, became joint suitors in an application to obtain eleven thousand dollars on the amount of assessments returned as delinquent to the Clerk of Arrears.

In regard to the claim of \$11,237 08, presented in September, the Comptroller, on the 3d of October, 1854, addressed a letter to the two collectors, of which a copy is annexed and marked No. 41.

Mr. Edwards made a separate statement of his part of the claim, and the Comptroller decided to pay him \$248 13. The grounds of this decision are set forth in a letter dated October 13, 1854, a copy of which is annexed, and marked No. 42.

In making this decision, the intention of the Comptroller was to allow the per centage on all sums of principal actually collected from the property holders, and paid into the treasury. And he did not intend to include in this allowance the per centage on any sums uncollected and returned to the Clerk of Arrears as delinquent, to be collected by this officer, either by sale or otherwise. But the Street Department, as before shown, paid collectors' fees on the sums returned to the Street Commissioner, and two and one half per cent on the sums derived from interest and advertising.

The total amount paid from the treasury to the Collect-	
ors of Assessments in the year 1853, was.....	\$23,698 68
Do. in 1854.....	25,671 58
Total in two years.....	<u>\$49,370 26</u>

The fees of the assessors at two per cent. on the amount of assessments confirmed in 1854, as before stated, amounts to \$21,000; another year like this would give them for the two years over \$42,000; and to these two bureaux in two years about ninety thousand dollars in fees. This shows that justice to the property holders required an adherence to the one per cent. fixed by the act of 1851, and the decision of the Court of Common Pleas enforcing obedience to that act, after its provisions had been violated by the assessors of 1851-2.

The Collector of Assessments has furnished a detailed statement of the assessments confirmed in 1853 and 1854, which is annexed and marked No. 43.

The total amount of assessments, confirmed in 1853, is	
given at.....	\$1,032,944 52
Total amount in 1854.....	2,216,985 77
Total for two years.....	<u>\$3,249,930 29</u>

The sums collected are stated as follows:

In the year 1853.....	\$760,899 87
“ 1854.....	515,647 43
	<u>\$1,276,547 30</u>

The detailed statement of the collections in 1853 are given in No. 43, but the details for 1854 are omitted, for the reason that these particulars are given in Document No. 11, of the Board of Aldermen, pp. 28 to 42.

George G. Campbell, late Deputy Collector of Assessments in the Street Department, has furnished a list of items in which he admits that in forty-nine cases, he has received from the persons assessed, the amount of their assessments, and had not paid the same into the treasury. The total sum which Mr. Campbell admits has been paid him amounts to \$4,071 69.

The Clerk of Arrears has been instructed to credit the several persons named in the list, with the sums paid, and thus cancel the lien on the premises. The list is annexed and marked No. 44.

The Comptroller has also furnished the Corporation Counsel with a copy of this list for the purpose of prosecuting Mr. Campbell for the amount of his default. The list of arrearages on the assessments placed in his hands, as heretofore published, amounts to \$9,465 90.

BUREAU FOR THE COLLECTION OF TAXES.

The 9th Section of the Act for the collection of taxes in the city of New York, passed April 18, 1843, makes it the duty of the Deputy Receiver of Taxes, to report daily to the Comptroller, a detailed statement of the names of all persons who have paid taxes during the day; the sums paid by each; the ward for which received, &c. The whole section is as follows, viz :

“ It shall be the duty of the said deputy receiver, from time to time, to enter in a column, to be made for that purpose, upon the assessment rolls in his possession, opposite to the names of the parties mentioned

therein, and who shall pay their taxes as aforesaid to the said Receiver of Taxes, the fact of such payment, the amount thereof, and the day when paid ; and to enter in suitable books, to be kept by him for that purpose, on each day, such payments, with a statement of the ward for which the same was received, and of the names of the parties respectively on whose account the same were paid ; and at the expiration of the office hours for such day, and before 3 o'clock thereof, he shall furnish to the Comptroller of the said city, a detailed statement of such sums, and of the ward for which received, and of the names of the parties respectively on whose account the same have been paid, which shall be filed by said Comptroller in his office."

The record thus required to be furnished, the act says, "shall be filed by the Comptroller in his office." This act has been in operation about twelve years, and under it the taxable inhabitants of this county have paid thirty-three millions of dollars to the Receiver, and yet that portion of the section requiring a return to be made to the Comptroller, and a record of it kept in his office, has remained a dead letter on the Statute Book until the month of September, 1854. No such return has been made, and consequently none such could be filed by the Comptroller. Several cases occurred during the last year in relation to the payment of taxes twice on the same property, and frequent cases of payments which were not credited to the lots intended by the owner, either by being placed on the wrong line or omitted altogether. In all such cases a reference to the daily statement required to be filed with the Comptroller would be not only very useful and satisfactory to the officers in the Department, but would be a protection to the tax payer, in the event of losing his receipt. One case of this kind, was that of George Jones, Esq., who produced two receipts of the Receiver, each for \$326 34, describing the same property in both : one was dated August 1, 1853, and the other, paid by Mr. Jones himself, was dated August 5th, 1853.

Mr. Jones very properly asked the Corporation to refund to him the excess which had been paid in error. The question arose whether both sums had been paid into the city treasury by the Receiver. A reference to the daily returns made to the Comptroller and Chamber-

lain, would only show, that on the day referred to, the Receiver paid to the Chamberlain, for example, a hundred thousand dollars, but would not show whether on either day \$326 34 of this sum was paid by George Jones, or his brother. And although the details might or might not be obtained from the minutes kept by the Deputy Receiver, showing that both sums were paid to the city ; yet it would be a protection to both officers to be able to refer to the record in the Comptroller's office, deposited on the day of the transaction, and showing on both days that the sum paid on the property of Mr. Jones was included in the aggregate amount covered by the Chamberlain's receipt.

A daily diary ought to be kept in the office of the Receiver of Taxes which should contain an exact copy of every receipt given for taxes, showing the several lots included in it, the amount paid on each and all. This would protect the tax payer in case of losing his receipt by fire or otherwise, and would be a great protection to the widow and children where the head of the family dies, and leaves them without the information necessary to protect their property. Such a record has always been kept in the office of the State Comptroller in reference to the non-resident lands returned to his office to be sold for arrears of taxes. And books have been printed, and it is intended that a similar record shall be kept by the Clerk of Arrears, of all taxes and assessments paid to him.

If the account on the roll in the Tax Receiver's office had been carefully examined when the second payment was made, either to make out the bill or to credit Mr. Jones with the amount, it would seem as if the first payment would have been discovered. and the second sum returned to him.

In view of the numerous errors which have been brought out by the operation of the law establishing the Bureau of Arrears, and the hazards to which property holders are exposed, even where they have paid their money and done every thing which a prudent person could do to protect their property from sale, I have considered it my duty to insist on the execution of the 9th section, notwithstanding the earnest remonstrances of the late Deputy Receiver, and the long period that its important provisions have lain dormant. On the 1st

of September a letter was addressed to the Deputy Receiver, a copy of which is annexed, and marked No. 45. Whilst the important provision of the 9th section has been utterly disregarded and remained a dead letter, one of the provisions of the first section of the same act, which abrogated the "Collector of Arrears of Taxes" has been kept in lively operation, and has been as profitable to the operators, as it has been vexatious and unjust to great numbers of tax payers.

The first section of Chap. 230, of the Laws of 1843, before referred to, says :

"The office of collectors of taxes, as created and established by the Charter of the City of New York, and by the Statutes of this State, and the office of collectors of arrears of taxes in the said city, as created and established by the Common Council of the said city, shall cease from and after the day when this act shall take effect; and all provisions by charter, statute, ordinance, resolution or otherwise, creating such offices, and imposing or defining the duties thereof, are hereby abrogated."

Notwithstanding this positive, and unequivocal abrogation of the office of the collector of arrears, an office, under that assumed title, has been kept in active operation, at No. 16½ Duane street, to the present time.

BUREAU FOR THE COLLECTION OF ARREARS OF TAXES, ASSESSMENTS AND CROTON WATER RENTS.

The establishment of this bureau in the Department of Finance, is intended to concentrate, in one office, all the liens on real estate arising from the non-payment of taxes, assessments for opening, grading and regulating streets, constructing sewers, filling sunken lots, &c., and for arrears of Croton water rents. In a communication made to the Board of Aldermen, on the 9th of February last, (Document No. 16, p. 287 to 292,) the material provisions of the act are given.

The appointment of the Clerk of Arrears was confirmed by the Board of Aldermen on the 5th of January, 1854. But the ordinance

organizing the bureau did not pass until the 18th of September; and no provision has yet been made for the salary of Mr. Purdy, the Clerk of Arrears, or for the assistants authorized to be appointed by the ordinance.

This ordinance is annexed, and marked No. 46. On the 29th of September, the Comptroller called attention to this subject, (Document 72 of the Councilmen,) and recommended a salary of \$1,500 for the Clerk of Arrears, and stated that the Clerk had received no compensation from the time of his appointment, and that the salary ought to take effect from that time. The late Common Council, however, have omitted to make any provision for the payment of an officer who has discharged his duty with as much intelligence, industry and fidelity as any officer in the city government.

The law creating the Bureau of Arrears provided that the Receiver of Taxes should make a return of all unpaid taxes on real estate, remaining in his office on the 1st day of June, 1854, and that the Croton Water Department should, on the 1st day of May, 1854, return the Croton water rents unpaid. By the same law, the Clerk of Arrears is to have the arrears thus returned, entered on the tax rolls of the current year, in order that the owners of lands affected may be notified of such arrears. The returns from the Receiver of Taxes, and from the Croton Department, were not received by the Clerk of Arrears until the first week in August, 1854, thus allowing but about twenty-five days to make entries, which the law contemplated would require several months to do. The arrears entered in 1854 embraced all the parcels unpaid from 1833 to 1853, for taxes and assessments, and all the unpaid Croton water rents since the organization of the Croton Department. In addition to these items, all the unredeemed sales for taxes, assessments and water rents were added.

The report made to the Board of Councilmen, in September last, (Doc. No. 72,) before referred to, points out some of the important duties performed by the Clerk of Arrears. Others will now be noticed, and some facts stated which have come to light by the actual

operations of the bureau, which illustrate the great importance of this law, in saving the holders of real estate from ultimately losing their property, by having the fact of an arrearage or sale stated on the annual tax roll, and thus brought to the notice of the owner, by being included in his bill.

The following statements show, first the amount of arrearages on account of taxes, Croton water rents and assessments, returned to the Clerk of Arrears. The second statement shows the sums collected and the amounts canceled during the year 1854. The total is \$284,656 14. Of this, the item of \$57,887 76 was arrears of Croton water rents, added by the Clerk of Arrears to the tax rolls of 1854, in the column headed "Regular Rents." These additions are collected by the Receiver from each owner, with the annual tax. There is among the sums collected, an item of \$94,529 59, being for "Redemption of Lands Sold." These receipts are paid out from day to day, on the checks of the Comptroller, to the purchasers of lands sold for taxes and assessments. The balance to the credit of the Comptroller, on account of this item, on the 1st of January, was \$7,395 90. This would be lessened by checks not presented, to the amount of one or two thousand dollars. The other principal items were paid into the city treasury. Amounts equal to the three last items, were canceled.

Although the time allowed by law for redemption from four of the sales above-mentioned, expired in the last six months of 1854, but *thirty-seven* of the four hundred and forty leases were confirmed between the 1st day of September, 1854, (when the tax books of 1854 were opened,) and the 1st of January, 1855. This is probably owing to the notices given to the owners of lands affected by sales, &c., under the law organizing the Bureau of Arrears. Of the many cases which have come to the knowledge of the Comptroller, showing the benefit of the law requiring the annual entries of "sales" and "arrears" to be made on the Tax Rolls of each year—"before any taxes of the year are collected—" the following may be enumerated :

Mr. James McBride, an aged citizen, was the owner or agent of a valuable pier, which was sold early in 1852, for an apparently unpaid tax of 1850.

Mr. McBride paid, as was his custom, to the Receiver of Taxes, the tax for 1850, on the pier *assessed* to him, and took a receipt therefor. Late in 1854, Judge Vanderpool, acting for Mr. McBride, who was ill, called to pay the taxes of the year, and was much surprised to find the word "sold," opposite the No. of the pier alluded to. Upon inquiry it appeared that the pier belonging to Mr. Daniel Drew had been assessed to Mr. McBride, and paid upon by him. No notice of the sale had been given by the purchaser, and but for the fact of the notice on the tax bill, Mr. McBride probably would not have been aware that his pier was sold until the time for redemption had expired, and would thus have lost, for fifteen years, the rental of his property. Again, Mr. Isaac Underhill, who resides in Westchester

county, owns a lot on the Bowery. He had leased this lot with a proviso that the tenant should pay the taxes, water rent, &c. This the tenant neglected to do, and but for the notice given to Mr. Underhill by the entry of the word "sold" on his bill for 1854, the property would have passed to the purchaser, who is not required, under the law regulating sales, to notify the owner of the land sold, unless he resides in the county of New York. But about one month of the time allowed for redemption was left to Mr. Underhill.

REAL ESTATE OF THE CITY—BUILDINGS USED FOR THE FIRE AND POLICE DEPARTMENTS, AND OTHER PUBLIC BUILDINGS—PIERS AND SLIPS, WATER GRANTS, &c.

The clerk of the Comptroller, Mr. A. S. Cady, is collecting materials for showing the price of each lot and the cost of the building on it, occupied by the Board of Education, the Alms-house Department, the Police Department, the Fire Department, and the same in relation to all the buildings and lots occupied for markets, courts, and other public uses. A detailed statement has been prepared and is annexed, marked No. 47, which shows the several buildings referred to, and the cost or estimated value of the property of the city, including piers, slips, common lands unsold, and water grants. An estimate is also given of the cost of the Croton Aqueduct: the value of this great work to the owners of real estate and the inhabitants of the city generally, is beyond the reach of ordinary computation by dollars and cents.

The following statement shows the total value of the property devoted to the accommodation of the several departments before referred to, and also the interest which the city possesses in ferries, piers, and slips, and real estate generally.

Real estate under lease.....	\$900,500
Sundry lots and gores	628,300
Lots at Brooklyn.....	41,000
Croton Aqueduct Department.....	15,474,000
Police Department.....	136,200
Alms-house Department.....	1,700,000
Carried forward.....	<u>\$18,880,000</u>

Brought forward.....	\$18,880,000
Fire Department.....	295,600
Markets.....	1,176,000
Public Parks.....	9,000,000
Board of Education.....	1,371,500
Common Lands.....	912,400
Ferries	1,607,000
Bulkheads, wharves, and piers.....	4,201,000
Uncommuted quit rents and lands under water not granted	460,750
	<u>\$37,904,250</u>

In connexion with the real estate ledger, which is preparing, Mr. John J. Serrell is preparing index maps of the whole real estate and ungranted lands under water of the East and North rivers belonging to the Corporation, in atlas form, so as to show its location on the streets or avenues, and it is proposed to affix a number to each parcel which will designate it on the real estate ledger, where an account is to be kept of the cost and source of title of each parcel, also the ward and street numbers, for the purpose of ascertaining how it may be affected by taxes or assessments, and showing the manner in which the same is occupied.

The premises occupied and used by the various departments of the city government, are scattered through the several wards, and have become so numerous that it has become indispensable to have ready reference by an index map and a real estate ledger, which shall give the precise location of the premises, the uses to which they are applied, and the terms by which the city holds them. Although it will require some labor and considerable expense to complete the maps and books before alluded to, yet it is believed that the proper execution of the plan will afford facilities which will save the labor and cost in every year after its completion.

The Chief Engineer of the Fire Department has furnished a statement of the cost of the apparatus now in use by that department. See No. 48. The total value is \$69,219 50.

REVENUE FROM PIERS AND DEDUCTIONS FROM THE NOMINAL RENTS.

The deductions on account of pier rents are very large, and increase with the addition to this description of property. It was stated in the last annual report, page 30, that the net proceeds of rent on this perishable property, for 1853, was less than three per cent. on the estimated value of \$3,258,000.

The sum collected for pier rent during the present year is.. \$155,165

The sum received in 1853, (report of last year,)..... 127,000

Increase \$28,165

Expended for repairs by Superintendent..... \$27,775 00

Expended by lessees and allowed on rent..... 3,132 56

\$30,987 56

Deduct this sum from \$155,165, and it leaves as the net proceeds of revenue, after paying for repairs, \$124,177 44, which is \$34,177 44 more than the net proceeds of the preceding year. New piers have been added, but other piers have been converted to ferry purposes and otherwise occupied.

There is another view of this subject which is not encouraging to the tax payers. All the revenues collected from piers and slips are to be paid to the Sinking Funds, whilst the means for the construction of new docks, the extension and rebuilding of old ones, and the annual repairs of all of them, are provided by direct taxation. It is true, that in 1851, a loan of half a million of dollars was authorized, and this sum was borrowed in 1851 and 1852, but the sum thus borrowed, with interest on it, is payable from taxation at the rate of fifty thousand dollars annually, until the whole sum is paid.

The following table shows the amount paid by taxation for the construction and repairing of docks from 1850 to 1854, with the gross sum received in each of those years for rent of piers and slips, and the difference between the sums expended and the revenue received in each year.

	DOCKS CON- STRUCTION.	REPAIRS.	TOTAL.	GROSS RE- VENUE.	DIFFERENCE OR LOSS.
1850.....	104,990	44,000	149,990	108,484	41,506
1851.....	234,877	74,960	309,838	97,706	212,132
1852.....	249,986	45,000	284,986	128,137	156,849
1853.....	126,068	37,000	163,068	125,361	37,707
1854.....	106,411	31,866	138,277	155,165	gain..16,888

This table shows, that in four years preceding 1854, the expenditures for the construction and repairs exceeded the amount collected in revenue for those years, by the sum of \$365,094; and in 1854 the excess is only \$16,888.

The following summary of allowances made on pier rents from 1850 to the close of 1854, on account of interruptions in repairing, extending, and rebuilding piers, which were under lease, and also on account of the non-performance of stipulations in some of the leases in regard to dredging out the slips and repairing the piers, &c. Many of the leases which expired in May, 1853, 1854 and 1855, contained a stipulation as follows: The Corporation agree "to deepen the slips at the bulkheads on the North river, so that the water shall be *six feet deep at low water mark.*"

The wharfinger would, of course, carefully note the failure to give the required depth of water, and the loss per day to the lessee in consequence of the nonfulfillment of this stipulation, and the amount thus ascertained and proved, if not acceded to, would be withheld from the receiver of city revenue. When contracts were made to extend or repair a pier, in too many cases the contractor, if the proofs are not exaggerated, would bring his lumber and logs into the slip, and embarrass the business operations of the lessee for months, in some cases, and often collect the wharfage, which of right belonged to the lessee. Some facts in illustration of these abuses are presented in Document No. 48, of the Board of Aldermen, for 1854, to which the attention of the present Common Council is respectfully referred, since the proofs there presented were not heeded by their predecessors.

The rebate on account of pier rent, from 1850 to the close of 1854, has been as follows, viz:

1. On account of slips not being excavated to the required depth.....	\$7,853 44
2. On account of repairs.....	7,923 05
3. Manure dumping grounds.....	3,170 83
4. On account of being deprived of possession, while filling in bulkhead and rebuilding.....	26,065 55
5. For sundry other reasons, as detailed in claims for allowance.....	8,286 52
6. For reasons not particularly set forth in the journal..	24,626 45
	<u>\$77,925 84</u>

This is equal to an average allowance of more than fifteen thousand dollars a year; and for this allowance no repairs were made, no dredging done, and no equivalent rendered to the city for so serious a loss of revenue. Is it not better to lease the piers for a less sum, and require the lessees to expend the fifteen thousand dollars in keeping the piers in repair. The city will then have an expenditure for repairs, equal to its diminution of rent, instead of getting, as an equivalent for its fifteen thousand dollars, a bundle of well-arranged statements and affidavits, showing the non-performance of stipulations, as the ground for a rebate of rent.

In the preceding statement, is an allowance of \$9,767 10, made to the lessee of piers Nos. 20, 21 and 22, in consequence of interruptions occasioned by the construction and filling in behind the bulkhead, west of Washington market, and the extension and repair of the piers.

Statement No. 49, shows the balances of unsettled accounts on the Treasury ledger, December 30, 1854.

CLAIMS OF THE CORPORATION FOR UNPAID ASSESSMENTS AND TAXES.

In a special communication from this department to the Board of Aldermen, February 9, 1854, (Doc. No. 16, pages 292 to 298,) a brief history was given in relation to the unpaid assessments, prior to 1848,

and to arrears of taxes, not collected, or if collected, the sums were refunded to the purchasers, in consequence of decisions of the courts, that the notices in regard to the redemption of the sales were defective.

The amount due the city, on account of unpaid assessments and taxes, is, at this time, about *eight hundred thousand dollars*. In the case of the Mayor, &c., *vs.* William Colgate, decided at the December term of the Court of Appeals, all the points involved in these cases, which were not covered by previous decisions, have been decided in favor of the city, and there is no longer any excuse for the property holders to delay payment, or any reason for the city to defer the collection of these assessments, if the delinquents do not respond promptly to this decision. In the case of the Mayor, &c., *vs.* Colgate, Chief Justice Gardiner, and Judges Denio and Selden, gave written opinions. The judgment of the Supreme Court is affirmed, and the assessment on the property of Colgate is to be enforced.

The property holders will now be called on, by notices, to come forward and pay up these suspended claims, and those who do not comply will be proceeded against by suit, or by a general sale of the premises in all the cases which have been suspended in consequence of the notices which were decided to be defective.

All which is respectfully submitted,

A. C. FLAGG, *Comptroller*.

STATEMENT No. 41.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
No. 5, Hall of Records, New York, Oct. 3, 1854. }

To A. SANFORD and I. EDWARDS,

Collectors of Assessments:

GENTLEMEN :—You have presented a joint account to this Department for payment, in which a total balance is claimed on account of fees for collecting assessments, of eleven thousand two hundred and thirty-seven dollars and eight cents.

I find by reference to the revised ordinances of 1845, page 40, that the Collector of Assessments is to receive "in full compensation for his services, a yearly salary of one thousand dollars," and as late as the 2d of July, 1849, Mr. Sanford was paid eighty-three dollars and thirty-three cents for one month's salary. Section 197 of the ordinances of 1849, in relation to assessments, provides for paying the Deputy Collectors of Assessments, not exceeding five per cent. on amount of assessment, and which, "together with an equal proportion of the *salary* of the Collector of Assessments, shall be included in the assessment list." The salary here referred to must mean the one thousand dollars fixed by the ordinance of 1845.

So far as the examinations in this department enable us to determine, the salary of the Collector remained without change until February, 1853, when the Common Council passed an ordinance requiring the Assessors to include, in every assessment list, a sum equal to one and one third per cent. on the total amount of such assessment, as a compensation to the Collector and Deputy Collectors of Assessments. In July following, this ordinance was repealed, and an amount equal to two and a half per cent. was substituted as compensation to the Collector and Deputy Collectors.

The term of Mr. Sanford expired at the close of the year 1852; where, then, is the authority for paying him any per centage whatever, or any thing beyond the salary of one thousand dollars annually?

Soon after the accession of Mr. Edwards to the office of Collector, an ordinance was passed, fixing the per centage, to be included in the assessment list, at one and one third, for collection ; and this was to compensate the collector as well as the deputies. A little over five months after this another ordinance was passed, repealing this rate of compensation, and fixing the rate at two and a half per cent., instead of one and one third.

The accounts presented by Messrs. Sanford and Edwards do not present all the dates and other particulars necessary to decide the sums due to each of these persons, or to the deputies who made the collections on each assessment. Nor is it perceived, from the facts now presented, that there is any propriety in blending the accounts of the two collectors, except so far as the fees of the deputies are concerned. It is proposed, therefore, that the present collector should present a separate account, showing :

1. The title of each assessment.
2. The date of confirmation.
3. The amount assessed on the property of the city.
4. The amount assessed on individuals.
5. The total amount of each assessment.
6. The amount collected on each.
7. The rate per cent. of the charges.
8. The amount of fees claimed in each case.
9. The date when each sum was collected.

From the facts stated in the preceding part of this letter, I am forced to the conclusion that Mr. Sanford has been paid a larger sum than the ordinances gave him a claim to.

Respectfully, your obedient servant,

A. C. FLAGG.

Comptroller.

STATEMENT No. 42.

FINANCE DEPARTMENT,
Comptroller's Office, New York, October 13, 1854. }

ISAAC EDWARDS, Esq.:

Collector of Assessments:

SIR:—I have examined your account, made out separate from that of Mr. Sanford.

The sums collected in these bills apply to a period anterior to the adoption of the ordinance of July 18, 1853, fixing the compensation for collection at two and a half per cent. ; and if we had the rate per cent. which the assessors added for the compensation to the collectors, that sum probably should be taken as the allowance for collection. As it is hardly worth while to go into the history of all these old assessments for so small a sum, I adopt the rate of two and a half per cent. as fixed in the ordinance of 1853, and one and one fourth per cent. as charged in the bill. In applying this per centage, I reject the allowance of two and a half per cent. on one thousand seven hundred and fifty-one dollars and ten cents of interest collected, and the same rate of allowance on the sum for advertising.

The allowance of two and a half and one and one fourth per cent. are made on all the sums actually collected from individuals and paid into the treasury on account of the assessments on such individuals, as set forth by the assessors before any interest has accrued, or any expense for advertising has been made.

Although the assessment on the property of the Corporation is embraced in the total of the original assessment, I do not consider that the collectors are entitled to two and a half per cent. on these sums.

It is therefore decided to pay to the collector and his deputies the sum of two hundred and forty-eight dollars and thirteen cents, on his bill, rendered October 11, 1854.

Respectfully,

A. C. FLAGG, *Comptroller.*

STATEMENT No. 45.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, {
New York, September 1, 1854. }

W. A. DARLING, ESQ.,

Deputy Receiver of Taxes.

SIR:—I call your attention to the following provisions of the laws of the state, in reference to the duty required of you:

The 8th and 9th sections of article 1st, chapter 230, of the laws of 1843, require the Receiver of Taxes to make a detailed statement, daily, of the amounts received during each day for taxes, interest, &c., to the Chamberlain and Comptroller, respectively, to be filed in their respective offices.

Section 8, chap. 238, of the laws of 1844, relieves the Receiver from making a detailed statement to the Chamberlain, but reaffirms the duty required of the Deputy Receiver.

You will perceive, therefore, that the duty is imperative, and you will please carry the same into effect, from and after the 31st August, 1854.

The Comptroller, in pursuance of the provisions of section 11, of the amended charter of the city of New York, passed April 2d, 1849, prescribes the following form of rendering the detailed statement provided for in said act.

Detailed statement of taxes received by the Receiver of Taxes of the city of New York.

NEW YORK, 185 .

The first column contains the names of the owners of the property, or the persons paying the amounts of tax, interest, regular rent and charges.

The second column contains the street on which the property paid on is situated.

The third column contains the year in which the tax was levied.

The fourth column contains the numerical designation of the ward in which the property is situated.

The fifth column contains the ward map numbers of the lots on which the tax, &c., was levied.

The sixth column contains the amount of tax received.

The seventh column contains the amount received for interest, or the discount allowed on the tax paid.

The eighth column contains the amounts received (if any) for regular rents.

The ninth column contains the charges for commissions and levy received, (if any.)

In addition thereto a recapitulation, at the foot of the return, containing the aggregate amounts received for taxes, interest, regular rents and charges.

Where the property paid on is located in the Twelfth, Nineteenth and Twenty-second Wards, respectively, the block numbers may be given in the column No. 2, in lieu of the street.

Where the amount received is for personal tax, the names of the persons assessed will be given, together with the street and house number in lieu of ward numbers.

Respectfully, &c.,

A. C. FLAGG, *Comptroller.*

STATEMENT No. 46.

AN ORDINANCE

TO AMEND THE ORDINANCE ORGANIZING THE DEPARTMENTS OF THE MUNICIPAL GOVERNMENT OF THE CITY OF NEW YORK, ADOPTED MAY 30, 1849, IN CONFORMITY TO THE ACT OF THE LEGISLATURE, OF JULY 30, 1853, TO SIMPLIFY THE MANNER OF COLLECTING ARREARS OF TAXES, ASSESSMENTS AND REGULAR RENTS OF THE CROTON WATER, IN THE CITY OF NEW YORK.

The Mayor, Aldermen and Commonalty, of the city of New York, in Common Council convened, do ordain as follows:

CHAPTER I.

§ 1. This bureau, the chief officer of which shall be called the Clerk of Arrears, is charged with the duty of collecting all arrears due to

the city for taxes on real estate, and assessments on the same, and for "regular rents" of Croton water, which have been returned to him, and for redemption of property sold or leased for any arrears on the same.

§ 2. The Clerk of Arrears, before entering upon the duties of his office, shall execute a bond to the Corporation, with at least two sureties, to be approved by the Comptroller, and filed in his office, in the penal sum of twenty thousand dollars, conditioned for the faithful performance of the duties of his office.

§ 3. He shall enter, in a book to be provided for that purpose, and open at all convenient times to public inspection, the names of all persons from whom he may receive money for the Corporation; the amounts received, on what specific account, and when paid; and shall daily render an account thereof, under oath, to the Comptroller; and shall thereupon, daily, or before two o'clock on the day subsequent to the receipt of the same, pay over the amount so received to the Chamberlain. He shall also thereupon receive from the Chamberlain a voucher for the payment thereof, which he shall, on the same day, exhibit to the Comptroller, and shall at the same time leave with him a copy thereof.

§ 4. He shall keep in his office an exhibit of all taxes on real estate, and of regular rents of Croton water, which have been added thereto, remaining unpaid, which have been returned to him on the first day of June in each year. Also, of all arrears unpaid, of every assessment which has been due twelve months or over.

§ 5. He shall keep a record of the titles of assessments confirmed, with the date of confirmation and date of entry.

§ 6. He shall perform all the duties heretofore required by law to be performed by the Street Commissioner and Comptroller, in relation to advertising, selling and leasing for assessments, taxes and "regular rents" of Croton water, and the redemption of property sold therefor, under the direction of the Comptroller.

§ 7. There shall be four clerks in the Bureau of Arrears, who shall be appointed in the manner provided in the 20th section of the amended charter of 1849, and shall respectively be known as the first, second,

third and fourth Assistant Clerks; and shall perform such duties in the office as may be required by the Clerk of Arrears or the Comptroller. There shall also be a Messenger, who shall perform such duties as the Clerk of Arrears shall designate.

§ 8. Each of the Assistant Clerks shall give bond to the Corporation, in the penal sum of five thousand dollars, with two sufficient sureties, to be approved by the Comptroller, for the faithful performance of their duties.

Adopted by the Board of Councilmen, August 11, 1854.

Adopted by the Board of Aldermen, September 18, 1854.

Approved by the Mayor, September 26, 1854.

D. T. VALENTINE, *Clerk C. C.*

DOCUMENT No. 13.

BOARD OF COUNCILMEN.

MARCH 5, 1855.

The following communication from the Commissioner of Repairs and Supplies, in relation to receiving estimates for paving Chatham street, the Bowery, Fourth avenue, &c., with granite blocks, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

To the Honorable the Common Council:

GENTLEMEN:—In reply to a resolution passed by your Honorable Body, February 16th, 1855, inquiring of me why I have not made a communication to your Board, agreeable to a resolution passed by your Honorable Body, on the 19th day of January last, in reference to the receiving of estimates, &c., for the paving of Chatham street, Bowery, Fourth avenue, &c., with granite blocks; would respectfully state, that I responded to said resolution as soon as I received it, and gave all the information at that time I practicably could; I now, however, am enabled to

give you a more detailed statement ; I have corresponded with Mr. Dillon, the Corporation Counsel, on all the points involved in the specifications issued, under the last advertisement, a copy of his answer you will find attached; you will also find accompanied, a copy of the names of each bidder, with his price for each section, commencing at the lowest proposer, and continuing to the highest. I would further state, that the estimates of all the bidders are in the office of the Commissioner of Repairs and Supplies, and are accessible to any member of the Common Council at any time; the view the Counsel to the Corporation takes in relation to the advertisement, in my opinion, is an extreme one; I, in this case, as in all others, advertised in the papers under the government of the ordinances, and precedent that has heretofore been established, and there has not been, to my knowledge, a single person who offered a proposal, that did not make application and receive a copy of specification, as the advertisement directed; I sent to your Honorable Body, during your last session, the name of the lowest tangible bidder, which, I suppose, is in the hands of the appropriate Committee.

Respectfully submitted,

B. B. PURDY,

Commissioner of Repairs and Supplies.

LAW DEPARTMENT, }
January 15th 1855. }

DEAR SIR:—I have examined the specification you sent to me, in regard to the contract for paving the Bowery, and regret to have been compelled to come to the conclusion, that the advertisement for proposals is not in ac-

cordance with the charter and ordinance, and that, consequently, the proceedings are illegal.

The charter says, that all contracts, for work to be done, shall be founded on sealed bids, or on proposals made in compliance with public notice, in other words, it provides that public notice shall be given of the work to be done, and what that notice shall contain is declared by the ordinance which provides, sections 494, 495, that "the proposal for estimates shall be advertised."

By reference to your advertisement in this case, I find that the work for which estimates are solicited is described in the pavement of the Bowery, "with granite block pavement," better known as the "Belgium pavement," and nothing else is said in regard to it; and the question is whether under the charter or ordinance the notice was sufficient. In my judgment it is not; there is nothing in it by which bidders can gain any definite idea of the work to be done. It contains no proposals or any reference to proposals. It might have been sufficient if it had stated that proposals or specifications had been drawn, and could be obtained at your office, but it contained no such notice. It is true that it states, that all information in regard thereto, can be had at your office, but the statement does not come up to the requirements of the ordinance. As it stands, it might well have the effect of misleading the public as to the full extent, and details of the contract to be awarded; and the fact that bids were received, some for proposals not published, and some for the notice as published, is evidence that the notice has not conveyed to contractors the full meaning of the intentions of the department; in my judgment, a new ad-

vertisement should be made, containing the proposals in full, or a clear reference to the place where they may be had.

Very respectfully.

R. J. DILLON.

To B. B. PURDY,
Com'r of Repairs and Supplies.

A CORRECT COPY OF THE "ORIGINAL."

Copy of Advertisement.

CORPORATION NOTICE.

DEPARTMENT OF REPAIRS AND SUPPLIES. }
December 23d, 1854. }

TO CONTRACTORS.

Sealed proposals will be received at the Office of the Commissioner of Repairs and Supplies, "No 3 City Hall," basement, until Thursday, January 4th, 1855, at 12 o'clock, "M." at which time they will be opened in accordance with the amended charter of 1853, for the paving of Chatham street, Bowery, Fourth avenue, around Union square to connect with the Russ pavement, with granite block pavement, better known as the Belgium pavement. All information in regard thereto, can be had at the office of Commissioner of Repairs and Supplies, "No. 3 City Hall, Basement." Blank estimates can be had at the above office.

N.B.—The Commissioner reserves the right to reject all or any of the estimates if deemed for the interest of the Corporation.

DEPARTMENT OF REPAIRS AND SUPPLIES, }
No. 3 City Hall, Basement. }

TO CONTRACTORS.

Sealed proposals will be received at the office of the Commissioner of Repairs and Supplies, (as per advertisement in the public papers,) for paving with square blocks, similar to those now being used in Grand street, the entire carriage-way of Park row, Chatham street, the Bowery, and Fourth avenue, from the termination of the Russ pavement near the line of Spruce street, to the northerly line of Seventeenth street, including Chatham square, the square at the intersection of Third avenue and the Bowery, and the whole of the pavement around Union square, excepting such parts as are already paved with square blocks.

The granite or trap stone to be of a hard, durable and uniform quality and size, as those now being used in paving Grand street, the longitudinal joints to be broken by a lap of not less than two inches, and to be paved on a bed of good clean sharp gravel, at least one foot deep; the pavement to reach the entire width of the carriage-way, from curb stone to curb stone, with a well formed gutter; and after being properly rammed, to be covered with one inch of clean sharp sand and gravel.

No stone to measure less than six inches on the surface, nor more than seven inches on the surface, and not less than four inches on the lower end, nor less than eight inches in length. Such of the cross-walks as may be deemed necessary by this department to remain in, will be designated from time to time, as the work progresses, by the Com-

missioner of Repairs and Supplies, and to be raised or lowered, in order to conform to the grade of the street.

All the cobble stone, bridge stone, and gutter stone will be reserved for the city; but all the refuse must be removed by the contractor as fast as the work progresses.

The work has been divided into six sections, as follows, viz :

	SQ. YDS.
Section No. 1, from Spruce street to the northerly side of Bayard street, including Chatham square, containing about.....	18,984
Section No. 2, from the southerly side of Walker street to the northerly side of Rivington street, containing about.....	15,472
Section No. 3, from the northerly side of Rivington street to the northerly side of Second street, containing about.....	13,857
Section No. 4, from the northerly side of Second street to the northerly side of Eighth street, including the square at the intersection of Third avenue, containing about.....	15,463
Section No. 5, from the northerly side of Eighth street to the southerly curb stone of Fourteenth street, containing about.....	9,384
Section No. 6, from the southerly curb stone of Fourteenth street to the northerly curb stone of Seventeenth street, both sides of Union square park, containing about.....	26,238
Total, in all, about.....	<u>99,398</u>

The contractors will reset all the frames for man-holes belonging to sewers, and frames for stop-cocks belonging

to or connected with Croton water or gas, diagonal to the curb stone ; and where new ones are required, he will make application to the Croton Water Board for what may come under their departments, and to the Gas Companies for what may come under their institution, but all expense attending the placing of them must be borne by the contractor.

The payments to be made at the completion of every thousand yards, less ten per cent., until the completion of the contract, upon the certificate of the Engineer, countersigned by the Inspector, and approved of by the Superintendent of Pavements.

Estimates will be received for each section separately, or for the whole as one.

Estimators will state in their proposals, a sum per superficial square yard for furnishing all materials required, and all work to be done.

In case of any delinquency or needless delay, or negligent or improper execution in performing or doing any of the works herein specified, on the part of the said Contractor to be done and performed, of which the Commissioner of Repairs and Supplies shall be the sole judge, the said Commissioner shall have the right and is hereby authorized to employ and place such and so many persons, by contract or otherwise, as he shall deem requisite, to work at and attend to the required work or any part thereof, so unnecessarily delayed, and to use such materials as they shall find on the ground, or procure other materials to finish the same, or any part thereof, and shall charge the expense of said labor and materials to the said

contractor; and the expense so charged, shall be duly certified by the Superintendent of Pavements to the said Commissioner of Repairs and Supplies, who shall be and he is hereby authorized and empowered to deduct the same from any moneys that may be due to the said contractor at the time, or at any time thereafter, and if there is not sufficient funds retained to cover said expense, that then and in that case the said contractor and his securities shall be held responsible for the deficiency.

The amount of security received, shall be fifty per cent. of the bid; provided, however, that the amount on the entire work, if estimated for as a whole, shall not be less than fifty thousand dollars; and that any number of sureties, not exceeding ten, may sign any bond, provided, collectively, they shall justify in double the amount of security.

The time allowed to complete the work, shall be one year from the date of contract.

Estimators will state in their proposals the names of two responsible persons, as security for the faithful performance of the work, should the contract be awarded to him; also, his name and place of residence, the names of all persons interested with him therein, and if no other person be so interested, he must distinctly state that fact. Also, that it is made without any connection with any other person making an estimate for the same purpose, and is in all respects fair, and without collusion or fraud; and also, that no member of the Common Council, Head of Department, Chief of a Bureau, deputy thereof, or clerk therein, or other officer of the Corporation is directly or

indirectly interested therein, or in the supplies or work to which it relates, or in any portion of the profits thereof.

In case any excavation or piles of rubbish shall remain on the streets, whereby any injury might be sustained by man, beast, or vehicle, the said contractor shall keep a proper guard around the same, and place sufficient lights on or near the same, and keep them burning from twilight in the evening until sunrise; and the parties of the first part may retain a sufficient sum to meet any amount of damages to persons, animals or property, for which they may be rendered liable, through or by means of any neglect, oversight or carelessness, done or permitted by the the said contractor, the same to be deducted from the amount to be paid under this agreement.

A strict compliance with the provisions of "Title 3d of Contracts for Supplies and Work for the Corporation," of the amended ordinances, passed May 30th, 1849, will be observed and required in all cases. Blank forms for estimates may be had at the office of Commissioner of Repairs and Supplies, No. 3 City Hall, Basement.

Should the person or persons to whom the contract is awarded, fail to attend with the securities, and execute the same within two days after being notified that such contract is ready, he or they shall be considered as having abandoned it. All estimators residing out of the city, will be compelled to appoint some place in the city where they can be found, or their bids will be rejected, as stated in the aforesaid section.

The Commissioner of Repairs and Supplies reserves the right to decline any or all proposals, if deemed for the interest of the city.

All the said work to be done to the entire satisfaction of the Commissioner of Repairs and Supplies, and such other person or persons as he may appoint to superintend the same.

B. B. PURDY,

Commissioner of Repairs and Supplies.

DOCUMENT No. 14.

BOARD OF COUNCILMEN.

MARCH 5, 1855.

The following communication from the Comptroller, relative to an additional appropriation for Common Schools, was received, referred to the Committee on Finance, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, March 5, 1855. }

To the Common Council:

The sum assessed on the county of New York, for its quota of the eight hundred thousand dollars raised for the support of free schools in the state, amounts to the sum of two hundred and fifty-seven thousand six hundred and sixteen dollars and eleven cents. This is an excess beyond last year of thirty-one thousand nine hundred and forty-five dollars and thirty-one cents.

The sum apportioned to the county of New York, out of the eight hundred thousand dollars thus raised is ninety-five thousand six hundred and forty-eight dollars and six cents. This is fifty-one dollars and nine cents less than the apportionment of the preceding year.

The excess which this city must pay to the state school tax, beyond the sum apportioned to the county, is stated by the Superintendent of Common Schools at one hundred and sixty-one thousand nine hundred and sixty-eight dollars and five cents. A copy of his letter to the County Treasurer is annexed, marked A. There was an appropriation of seventy-five thousand dollars only, which sum has been paid into the state treasury. An additional appropriation is required, of eighty-six thousand nine hundred and sixty-eight dollars and five cents, for which an ordinance is annexed. The letter of the Superintendent sets forth the penalties on the county, in case the money is not promptly paid. As the county is taxed one hundred and sixty-one thousand dollars more than its just share for the free school tax, it is desirable that this burden should not be increased.

When we pay the eighty-six thousand nine hundred and sixty-eight dollars and five cents, we can draw our quota of the dividend from the School Fund proper and from the United States Deposit Fund, equal to thirty-seven thousand and sixty-three dollars and sixty-two cents. Heretofore this has been offset against the tax which the Superintendent was authorized to draw for. Now, the sum is paid directly to the state treasury, for reasons set forth in the letter of the Superintendent, and hence an appropriation for the whole sum is required, to enable this department to draw the warrant on the city treasury.

All of which is respectfully submitted.

A. C. FLAGG,
Comptroller.

A.

STATE OF NEW YORK, SUPERINTENDENT'S OFFICE,
DEPARTMENT OF PUBLIC INSTRUCTION.

Albany, February 7, 1855.

DEAR SIR:—Some days since the apportionment of school moneys was transmitted to you; and I now accompany the same with the necessary explanations and instructions. The whole amount of apportionment was \$132,711 08, of which \$37,063 62 is payable by the Comptroller from the income of the Common School Fund and United States Deposit Fund, *after the adjustment of the Free School Fund apportionment*. You are probably aware that the legislature at its last session required that all moneys formerly paid to the Superintendent of Common Schools, shall be paid into the treasury of the state. By an arrangement made by the treasurer, you can give him a receipt for so much of the school tax due from your county as shall equal your apportionment from the Free School Fund, which is \$95,648 06, remitting the balance of tax, to wit: \$161,968 05, and drawing at the same time on the Comptroller for the sum apportioned from the Common School Fund and the United States deposit fund, to wit: \$37,063 62.

In appropriating the eight hundred thousand dollars derived from the school tax, the present legislature have provided that in case any county shall fail to pay in its quota of tax in time to meet the drafts made, on the free school fund, the money may be borrowed and the interest added to the assessed tax of the delinquent county for the next year. You are aware that an expense was incurred for interest, partially on your account, last year, of nearly

\$100, which I hope to have introduced into the supply bill, and I feel assured that you will not make it necessary to enforce the provisions of the law above referred to, which have been provided for such cases.

Will you oblige this department by giving this matter immediate attention? Can the amount be depended on by the 26th inst? I think that I can get the county treasurer to wait till that time. The law requires the town superintendents to apportion the money the first of April, hence, if it cannot be paid by that time, it will be necessary to provide the means of meeting the drafts as above referred to. Please answer by return of mail.

Very respectfully,

Your obedient servant,

V. M. RICE,

Superintendent of Public Instructions.

F. W. EDMONDS, ESQ.,

Chamberlain, &c., at

Mechanics' Bank, New York.

AN ORDINANCE

MKIANG AN ADDITIONAL APPROPRIATION FOR THE YEAR 1855.

Be it ordained by the Mayor, Aldermen, and Commonalty of the City of New York, in Common Council convened:

That the following additional amount be, and the same hereby is appropriated, on account of "Common Schools for State," (\$86,968 05) eighty-six thousand nine hundred and sixty-eight dollars and five cents.

DOCUMENT No. 15.

BOARD OF COUNCILMEN,

MARCH 5, 1855.

The following communication from the Receiver of Taxes, in answer to resolution of inquiry relative to retaining Mr. Richard A. Chambers in office as Receiver of Arrears of Taxes, &c., was received, laid on the table and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

BUREAU OF TAXES, }
March 5, 1855. }

*To the Honorable the Board of Councilmen
of the City of New York:*

GENTLEMEN:—I have received the following resolution adopted by your Honorable Body on the 21st ultimo:

“ *Resolved*, That the Receiver of Taxes report, within ten days, by what authority he continues Richard A. Chambers in office as Receiver of Arrears of Taxes; the number of notices served upon tax payers in arrears; the names of those serving them, and attendant cost thereon; also the number of distress levies and the amount secured for interest, cost and commission during the year ending February 20th, 1855.”

In answer, I have the honor to report:

I do not continue Richard A. Chambers in office as Receiver of Arrears of Taxes, and, to the best of my knowledge, he never held such an office. For several years previous to the 1st of January, 1854, Mr. Chambers was a constable, duly elected for the Eighth Ward of the city of New York, and to him, as such constable, I issued my warrant for the collection by distress and levy, of taxes in arrears and the interest thereon, under the authority vested in me by the 9th section of the act of April 18th, 1843, (Laws of 1843, p. 319,) as amended by the 34th section of the act of March 30th, 1850, (Laws of 1850, p. 194:)

Since the 1st of January, 1854, Mr. Chambers, not being again elected constable, I have issued my warrant to William B. Jones, another constable. I do not know what arrangement exists between Mr. Jones and Mr. Chambers, but I believe Mr. Jones has secured Mr. Chambers' assistance on account of the experience acquired by him during the period I issued my warrants to him. It is a matter over which I have no control, as the constable has a right to employ any one he chooses.

I will mention, in this place, that the act creating a Bureau of Arrears in the Finance Department, only applies to arrears of real estate, and not to arrears upon personal estate, which remain with me for collection.

The number of items of taxes in arrears, of which notices were served upon tax payers for 1854, is twenty-three thousand one hundred and seventy-six.

The names of those to whom these notices were given by me to be served for 1854, are

W. H. Caniff,	W. Blakely,
V. H. Willerton,	M. White,
M. J. Wilcomb,	James Dewey,
W. L. Swarts,	Wm. H. Knapp,
H. Vyorian,	William Rowe,
T. F. Jackson,	T. F. Jackson,
Neil A. Shaw,	J. Cooper, Jr.

R. Newell.

The attendant cost thereon, for 1854, was three cents for the service of each item noticed.

The lists of the notices so served in the several wards, with the affidavits of service annexed, are on file in the office of the Clerk of the city and county of New York.

The bills for such service were presented to the Board of Supervisors in the month of January last, and were approved by them.

The service of these notices is made the duty of the Receiver of Taxes by the acts before-mentioned, and is the basis upon which action is subsequently taken for the sale of property for arrears of taxes, and without such service, no such sales could legally take place.

As to the number of distress levies, and the amount secured for costs and commissions for the year ending February 20th, 1854, I have no knowledge, as no return thereof is made to this office by the constable making such levies and collecting such costs and commissions.

The costs and commissions are the fees of the constable, for executing my warrant, and are authorized by the 2d section of the act of May 14, 1845, (Laws of 1845, p. 329,) and the amount is fixed by law, (2 R. S., p. 538.)

The only return made by the constable is of the amount of arrears of taxes and interest thereon, collected by him upon my warrant, and such amount is deposited by me, on the day of such return, with the City Chamberlain, according to law.

The interest is fixed by the acts mentioned in the beginning of this report, at twelve per cent. per annum, to be calculated from the day when the tax in arrear was first placed in my hands for collection.

To enable your Honorable Body to understand the necessity of the issuing of warrants for the collection of the arrears of personal tax, upon which only I have issued my warrant since the law creating the Bureau of Arrears went into effect, I will state that the amount of personal tax collected during the year ending February 20, 1854, by execution upon my warrant, was seventy-five thousand one hundred and ninety-four dollars and eighty-three cents, together with five thousand nine hundred and thirty-three dollars and thirty-two cents interest thereon, of which probably not one thousand dollars would have been collected except by such process.

If the foregoing report does not fully meet with the wishes of some members of your Honorable Body, I shall be most happy to have them call at my office, when I and my Deputy and Clerks, shall endeavor to give, if possible, fuller and more detailed information upon the subject.

I have the honor to be,

Very respectfully,

Your obedient servant,

HARVEY HART,

Receiver of Taxes.

DOCUMENT No. 16.

BOARD OF COUNCILMEN.

MARCH 7, 1855.

The following communication from the Comptroller, in relation to the award for property used for the removal of dead animals, offal, &c., &c., was received, referred to Committee of the Whole and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, March 5, 1855. }

To the Common Council:

The Comptroller respectfully reports to the Common Council, that in accordance with a resolution of the two Boards, passed December 29, 1854, he appointed Jas. Horner, Esq., to act as appraiser in ascertaining the fair cash value of the property of Wm. B. Reynolds, used in the execution of the contract for removing dead animals, offal, &c. Mr. Reynolds, on the 17th of January, selected Charles G. Waterbury, Esq., on his part, to act as appraiser; and these two appointed George Briggs, Esq., as the third appraiser.

The Comptroller, before making the appointment, called on Mr. Reynolds for a list of the articles which he designed to present to the appraisers. On examining this list the Comptroller was of opinion that it included many articles which were not fairly embraced by the terms of the resolution and the report of the Committee, and accordingly he made his objections to including these items in the appraisal. A copy of this letter and the appointment of Mr. Horner are annexed, and marked No. 1.

Among the items in the schedule to which objection was made were,

One hundred and fifty dead horses.

Four thousand barrels of bones.

Six thousand jaws.

Two thousand beef leg bones.

Four tons of horse shoes.

Five hundred bushels bone manure.

Five tons pieces of bones.

Five tons horse's hoofs.

Twelve barrels of feet.

Four hundred hogs, &c., &c.

The appraisers excluded from their estimate most of these articles, and in regard to all the property, except the lease under which Barren Island is occupied by Mr. Reynolds, they agreed as to the price.

After the appraisers had agreed on the value of the items enumerated in the appraisal, and not excluded as merchandise, they called at this department, and stated that they had agreed on all the items except the value to be put on the lease of Barren Island; and in regard to

that, Mr. Waterbury valued it at twenty thousand dollars, Mr. Briggs at ten thousand dollars, and Mr. Horner at one thousand dollars. As Mr. Horner was not willing to sign the appraisal without adding his dissent to the sum of ten thousand dollars for the lease, Mr. Waterbury did not seem inclined to close the matter and deliver the report. Subsequently, the counsel of Mr. Reynolds, (Judge Edmonds,) addressed a letter to Mr. Horner, in which it was stated, that all the items struck out of the list as merchandise, must be included and passed on by the appraisers, else the whole proceeding would be void. The Counsel to the Corporation was consulted in this stage of the case, and after considering the whole matter, and being informed that the award had been signed, although not delivered, his advice was against reinstating in the list and putting a value on the excluded items. The letter addressed to the appraisers by the counsel of Mr. Reynolds, and the explanation of the appraisers in regard to affixing a value to articles objected to by the Comptroller, and which they decided ought to be excluded, as not being embraced by the resolution, are appended and marked No. 2.

The amount at which the appraisers valued the several items of property which they considered fairly covered by the resolution, not including the lease of the island, was thirty-six thousand seven hundred and forty-five dollars and fifty-one cents.

If the sum included by Mr. Reynolds, as the consideration for the transfer of the lease, be added to the sum before given, it shows the total sum of forty-six thousand seven hundred and forty-five dollars and fifty-one cents.

This sum, by the resolution of the Common Council, is to be charged over to any new contractor, who may desire to enter into competition for the contract for removing dead animals, offal, &c.

On the 16th of October last, the contract with William B. Reynolds, was fully settled for and finally canceled, without any reservation or obligation on the part of the city, so far as the Finance Department is concerned, to take the property of Mr. Reynolds, or to give him a bonus of ten thousand dollars, for a lease, for which he paid the owner of the land one hundred dollars per year. On the 18th of the same month, in order that there might be no delay in making a new contract according to the requirements of the charter, the Comptroller made a communication to the Board of Aldermen, October 19, in which a copy of the cancelment of the contract was given, and it was recommended that measures be adopted to make a new contract. Instead, however, of making a new contract, on sealed bids, as required by the charter, the Board of Aldermen passed a resolution, instructing the City Inspector to make an arrangement with Mr. Reynolds to continue the business, and passed a resolution also to take the property which he had voluntarily withdrawn from the arrangement, in settling with the Finance Department, and in canceling the contract.

The City Inspector made an arrangement with Mr. Reynolds, which he states to be as follows:

" CITY INSPECTOR'S DEPARTMENT, }
" New York, January 25th, 1855. }

" The arrangement I made with Mr. Reynolds was fifty dollars a day, not fifteen hundred dollars per month, con-

sequently December had thirty-one days; if a month has thirty days, or twenty eight days, we only pay for that number. The soap-boiler's nuisance, garbage, and fish offals were stricken out, and for those I allowed two carts, at four dollars per day; the other items stood same as contract.

“THOMAS K. DOWNING.”

According to this arrangement Mr. Reynolds is paid, monthly, over four thousand dollars. The total sum paid for November, December and January, as shown in statement No. 3, annexed, is twelve thousand and ninety-seven dollars, averaging four thousand and thirty-two dollars and thirty-three cents per month. The months of February and March will add eight thousand dollars more to this sum; thus, in five months, exhausting the appropriation of twenty thousand dollars for this object.

It is thus seen, that Mr. Reynolds, although his contract was surrendered, canceled and paid in full on the 16th of October, has been allowed to continue, under a temporary arrangement with the City Inspector, long enough to exhaust the entire appropriation for the year; and under a resolution of the Common Council is enabled to hold a controlling influence over any new contract which may be proposed. If bidders for the contract were willing to take the property of Mr. Reynolds at over thirty-six thousand dollars, they might not be willing to pay him a bonus of ten thousand dollars for the lease.

On a lease of five years, such a bonus is a bar to all fair competition, and places the entire control of the matter in the power of Mr. Reynolds.

It is important, nevertheless, to have immediate measures taken in regard to a new contract. If, in consequence of the facilities in his hands, Mr. Reynolds takes the contract, then the possession of the property will settle the award. If not, it will be necessary that the successful bidder should provide means for settling with Mr. Reynolds.

It may be urged, that the city should pay the bonus to Mr. Reynolds, and hold the lease, giving the contractor the use of it. But as soon as such an arrangement should be consummated and Mr. Reynolds should get the bonus of ten thousand dollars in his pocket, and the thirty-six thousand dollars for the property, the notice for a new contract would be forthcoming, and some one of the associates of Reynolds would probably have the contract awarded to him, leaving the city in the lurch for at least the ten thousand dollars. As the matter now stands, the only security for the city is to require the new contractor to furnish the means for settling with Mr. Reynolds. Indeed, there is no other means of paying the award, as the entire appropriation for the year will be drawn by Mr. Reynolds, under the verbal contract with the City Inspector, during the months of February and March.

If the Common Council, after the cancelment of the contract, had proceeded, in December or January, to make a new contract, bidders could have made proposals on equal terms, and the interests of the city would have been advanced. The impression has been created, that Barren Island is exclusively controlled by Mr. Reynolds. If proposals had been issued, as the charter requires, even for

the temporary expenditure of the appropriation of twenty thousand dollars, Mr. William Dykes would have offered to carry all the dead animals and offal to Barren Island, and probably for half the sum which has been paid to Mr. Reynolds, on the temporary arrangement of the last four months.

Mr. Dykes has a lease for several acres on Barren Island, with as good water as at the dock of Mr. Reynolds, and he has boats, horses, and the necessary means for meeting his engagements. The best evidence that Mr. Dykes has an available place for the business on the island, is the fact, that during the session of the appraisers, Mr. Reynolds went to the owners of Barren Island, and obtained a deed of the identical property leased for five years to Mr. Dykes. For this he paid one hundred dollars per acre, which being a transaction during the session of the appraisers, ought to be considered as the best evidence in regard to the value of the few acres covered by the original lease of Mr. Reynolds. About the same time, if not on the same day, Mr. Reynolds obtained a lease of the middle portion of the island. Thus, showing that the Committee in assuming that Mr. Reynolds had the exclusive control of Barren Island, labored under a mistake. If they were induced to believe this by the representations of Mr. Reynolds, he certainly is not entitled to a bonus of ten thousand dollars for inducing them to believe, as indicated in their report, (Doc. No. 57,) that he had the whole island, when he only had a lease for a small part of it, and when that lease did not cover a point where the water is as good as at his dock. The lease of Mr. Dykes is good for five years, as he assures me, although the deed of Mr. Reynolds may control after the expiration of the lease.

I present herewith a copy of the award marked No. 4. It was drawn by Judge Edmonds, the Counsel of Mr. Reynolds, without having been submitted to the counsel of the Corporation. In it, the seventeen items rejected by the appraisers, and not deemed necessary, in the opinion of the Corporation Counsel, to make a valid award, are included, and prices furnished by Mr. Reynolds, from his book of sales, are affixed to these items. I protested against submitting these items to the appraisers, and I still protest against their introduction into the award.

In regard to the bonus of ten thousand dollars for the lease, I consider that the introduction of written arguments to the appraisers, by the counsel of Mr. Reynolds, ought to have been accompanied by notice to the Counsel to the Corporation, in order that his views might be given as to the construction of the resolution. The letter of Judge Edmonds, a copy of which is annexed and marked No. 5, is calculated to produce a strong bias on the minds of the appraisers, not only from his recent position as a Judge of the Supreme Court, but from the fact disclosed in it, that he drew up the resolution for the Committee, and his assertion that he introduced into it "a carefully guarded expression, not *cash value* merely, nor market value, &c., but *fair cash value* TO THE CITY." And he asserts, unhesitatingly, that the resolution was prepared in this manner to secure to Mr. Reynolds the sum at which he valued the island. And Mr. Reynolds, estimate was twenty-five thousand dollars, and the appraiser selected by him put it at twenty thousand dollars.

Now, in all fairness, should not the city have had notice

and the aid of its legal adviser, when evidence and arguments of such potency were to be presented to the appraisers, backed by the opinion of a recent Judge of the Supreme Court, in regard to the construction of a resolution drawn by himself, as the Counsel and adviser of Mr. Reynolds?

It should not be overlooked, that the property on the island is appraised at about fifteen thousand dollars; and if a bonus of ten thousand dollars is given to Mr. Reynolds for the privilege of occupying this spot for a limited period, five or ten years, the city may then be called on to repurchase the whole of this property, at such price as the owners may exact, and thus pay for this property a second time. Why, instead of placing the whole matter back into the hands of Mr. Reynolds, after he was paid and the contract canceled, did not the Committee make some provision to get a title from the real owners of Barren Island? If the island is now indispensable to the city, it must be equally so five or ten years hence.

The appraisers have given diligent attention to the unpleasant duties assigned them. They are all thorough business men; and they visited the island, examined all the property there, as well as that in the city, and made up their estimate on each article of property separately. The prices fixed on the property generally, are believed to be liberal.

The city was fortunate in the selection of Mr. Horner as its representative. He informed himself, not only in regard to the property to be appraised, but ascertained many facts respecting the island, and the manner in

which it is held, which seem not to have been in possession of the Committees of the Common Council. And whilst his intelligence, firmness, and mature judgment as a business man, have had their due weight in fixing a fair value to the property generally; he has not aimed to depress a single article below its fair cash value; and probably has as often yielded to the views of the umpire in fixing a liberal price, as the latter has to him.

In regard to the bonus of ten thousand dollars, there is a striking difference of opinion. This difference should not be regarded as an impeachment of the judgment or the motives of either of the appraisers. It merely shows that three intelligent and thorough business men, who had no difficulty in agreeing as to the fair cash value of a hundred items of different kinds of property, which were tangible, and respecting which they could be guided by facts, suddenly find themselves ten or twenty thousand dollars apart, when they ascend into the regions of fancy.

If Mr. Reynolds is to be compensated as the discoverer (for it seems he is not the owner or exclusive possessor) of the only spot to which dead animals can be removed from the city of New York, the bonus might be fixed at fifty thousand dollars, with as much reason as ten; unless barred by the moderation of his claim, which is only *twenty-five thousand dollars* for the lease.

All which is respectfully submitted.

A. C. FLAGG, *Comptroller*.

No. 1.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, {
New York, January 12, 1855. }

I desire that you will act as an appraiser, under the resolution sent herewith, to ascertain and report to this department, "*the fair cash value to the city*," as stated in the resolution, report, and the accompanying instructions from this department, of the property employed and necessary in executing the contract for the removal of dead animals, offal, &c.

Yours, &c.,

A. C. FLAGG, *Comptroller*.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE,
New York, January 12, 1855.

JAMES HORNER, ESQ.:

DEAR SIR:—In connection with your appointment as an appraiser of certain articles used by Mr. Reynolds, in executing his contract, I present, herewith, a copy of the resolution of the Common Council, and the report to which it refers; also, a schedule presented by Mr. Reynolds, of property which he alleges is on hand. This inventory embraces many articles which he did not give to the Committee, when called on, in my presence, to state what property he had connected with the business of removing dead animals, offal, &c. And you will see that the report of the Committee, to which the resolution alludes, refers only to the property used in the execution of his contract. It is such property, alone, that the report designed to require the new contractor to take and pay for. I conceive, therefore, that those articles only are to be valued which are

necessary and have been used in the execution of the contract.

In my arrangement with Mr. Reynolds, when he surrendered his contract, all obligation to take the property as a condition, was expressly excluded from the arrangement, and, without this exclusion, I had no power to accept the surrender.

In all my previous understandings with Mr. Reynolds, when the ratification of the matter was all to be submitted to the Common Council, my understanding was, that only such property as was used in the execution of the contract was to be taken by the city, or by the new contractor.

Yours truly,

A. C. FLAGG.

P. S.—I have marked thus + numerous articles which are in no respect necessary to execute the contract. Every article, therefore, must be necessary, and put at the fair cash value. I wish you to ascertain when the vessels were acquired, and whether they have been used, and necessarily, in executing the contract. Mr. Reynolds was furnished with twenty-one lots at Forty-fifth street, to accommodate his horses, and the city want no stables.

No. 2.

NEW YORK, February 20, 1855.

GENTLEMEN:—In drawing the award in the case of Reynolds, I inserted a valuation of the property which you rejected from the purchase by the city, because, according to law, it was necessary that you should award that.

The rule of law is imperative, that unless the arbitrators make their *award* of all matters submitted to them, the award is *entirely void*. Now, in this case, the value of the whole of the property owned by Reynolds, in connection with his contract, was submitted to you, and the whole value thereof must be ascertained, or the award will be entirely void, and all the labor be in vain.

Yours, &c.,

J. W. EDMONDS.

Messrs. HORNER, WATERBURY AND BRIGGS.

The items numbered in the margin of the annexed appraisal, from numbers one to seventeen, and which the appraisers enumerated, because they were on the list of articles handed us, and which we considered *merchandise*, and not belonging to the property necessary to the business of removing offal from the city, as instructed by the Comptroller, was, after our appraisal was completed, by request of Mr. Waterbury, who brought us the annexed letter from J. W. Edmonds, Esq., priced, not from any knowledge of the quantity or value of this merchandise that we had, but to make, as we are advised, our appraisal legal; with this understanding the prices were added, that Mr. Reynolds said he was selling such articles at. It was understood by all that these articles should form no part of the property to be paid for by the city.

JAMES HORNER,
GEORGE BRIGGS,
C. G. WATERBURY.

NEW YORK, February 27, 1855.

No. 4.

To all to whom these presents shall come: We, James Horner, Charles G. Waterbury and George Briggs, of the city of New York, send Greeting:

Whereas, by a resolution, approved on the 29th of December, 1854, it was resolved by the Common Council of the city of New York, among other things, that Wm. B. Reynolds be paid by the said city the amount of the valuation of his property to be conveyed to the city, agreeable to the report of the Committee, such valuation to be ascertained by three appraisers, who are to appraise and report to the Comptroller the fair cash value of such property: said appraisers to be appointed, one by the Comptroller, one by said Reynolds and the third one by those two.

And, whereas, we, the above named James Horner, Chas. G. Waterbury and George Briggs, having been duly ap-

pointed such appraisers, have entered upon the performance of the duties thereof; have made due examination and inspection in the premises; have heard the proofs and allegations of the parties, and have had due deliberation thereon.

Now, therefore, we do hereby award, order and determine, pursuant to the authority vested in us as aforesaid, as follows, that is to say:

First. That the following articles of property mentioned in the schedule presented by the said Reynolds, be considered as merchandise, and not as property to be conveyed by said Reynolds to the city of New York, because not necessary to the performance of any contract for the removal of offal, &c., from the said city, and the value thereof does not form part of the amount to be paid to said Reynolds; but he is to remain and continue the owner thereof, which said property, and the value thereof, as we have ascertained the same, is as follows; that is to say:

1. Five hundred bushels bone manure, valued at the sum of thirty cents per bushel.
2. Four thousand barrels of bone, valued at the sum of fifty cents per barrel.
3. Six thousand jaws, valued at the sum of thirteen dollars per thousand.
4. Two thousand beef leg bones, valued at the sum of nineteen dollars per thousand.
5. Four hundred and forty-seven live hogs, three dollars each.
6. Two hog gates; not found.

7. Two thousand horse leg bones, valued at the sum of ten dollars per thousand.

8. One ton of pieces of bone, valued at the sum of thirty dollars per ton of 2,000 lbs.

9. One ton of drift sege, valued at the sum of ten dollars per ton.

10. One cord of wood, valued at the sum of —; not found.

11. Five tons of horse hoofs, valued at the sum of eight dollars per ton.

12. Four tons of horse shoes, valued at the sum of thirty dollars per ton.

13. Twelve barrels of fat, valued at the sum of —; not found.

14. One hundred and fifty dead horses, valued at the sum of —; not found.

15. Two large heaps of hog manure, valued at the sum of fifty dollars for the lot.

16. One large heap of animal matter, valued at the sum of fifty dollars for the lot.

17. Six tons of coal, valued at the sum of —; not found.

Second. The property to be conveyed by said Reynolds to the said city, pursuant to the aforesaid resolution, we do hereby value and appraise as follows, viz:

The lower hog pen, or bone mill, at the sum of 50 dollars.

The bone sheds, platforms, bone shed, two hundred feet long, called on the schedule "bone shed attached to yard," called hog pens and stable, at the sum of seven hundred and fifty dollars.

Separate bone shed, now occupied as such, near the factory, at twenty-five dollars.

One iron kettle, set outside, at the end of railroad track, for boiling bones and offal; including kettle, mason work, &c., all complete, at one hundred and seventy-five dollars.

One spare kettle, not set, outside the factory, at fifty dollars.

Five wheel barrows, at ten dollars.

Ten manure forks, at seven dollars fifty cents.

Five shovels, at three dollars seventy-five cents.

Two steels, at fifty cents.

Seven knives, at one dollar seventy-five cents.

Two bone screens, large size, such as used for screening coal, at ten dollars.

One platform scale, weighing 2,000 lbs., at thirty-five dollars.

Two platforms, 16 feet long, 18 inches wide, used to slide horses into the large kettle, at twenty dollars.

Two nail hammers, at one dollar.

One poker and one scraper-iron, used at the furnaces, at five dollars.

Four houses, under one roof, 60 by 16 feet, two stacks of chimneys, one and a half stories each, filled in with sand and lime, shingle roof and clap-boarded, including four sheds in front, used by the tenants, at two thousand dollars.

One gray horse, used on the island for carting, at one hundred dollars.

Two bay horses, used for the same purpose, used on the island, at one hundred dollars.

Three sets of cart harness, thirty-six dollars.

Two carts, at sixty dollars.

Two chain cables, at five cents per pound, and one

anchor, at six cents per pound, together, at the sum of forty-one dollars and fifty-eight cents.

One yawl boat, at thirty dollars.

One gig, at twenty dollars.

One large scow for unloading steamboat, at ninety dollars.

Three sweeps, twenty feet long, at nine dollars.

Three hundred feet of railroad track, east of factory, at four hundred dollars.

Railroad car, four iron wheels, axles, &c., at seventy-five dollars.

Three shear poles, blocks, falls, &c., on the end of the dock, at one hundred dollars.

One wheeling or gang plank, at three dollars.

One float stage, at thirty dollars.

Two pickaxes, at two dollars.

Two chopping axes, at two dollars.

Three saws, at three dollars.

Three pumps, wells, &c., at two hundred dollars.

Seven cooling tubs, at twenty-five dollars.

Four iron-bound pails, at two dollars.

Three ladders, one long, two short, at seven and a half dollars.

• Twenty fat barrels, at twenty dollars.

One grindstone, 100 lbs., crank, frame, &c., at five dollars.

One windlass, at end of dock, roller, crank, frame, &c., at thirty-five dollars.

One keg of nails, at five cents per pound, not found.

Slabs on and about the factory sheds, &c., for gang planks, at twenty dollars.

Steamboat West End, anchors, chains, small boat, furniture, &c., at thirteen thousand dollars.

Schooner J. M. Clayton, sixty-five tons, Custom House measure, with spars, rigging, sails, anchors, chains and boats all complete, at three thousand three hundred and fifty dollars.

Schooner Cassius, with sails, rigging, anchor, chains, lines, boats, &c., all complete, at twelve hundred dollars.

Sloop W. D. Maples, seventy tons, Custom House measure, with sails, rigging, boats and furniture, all complete, at three thousand five hundred dollars.

One barge or canal boat, used at Forty-fifth street, for reception vessel for offal, at two hundred dollars.

One brick stable in Twenty-eighth street, twenty-five by fifty feet, two stories high; eight inch wall in gable end, front and rear twelve inch, with tin roof, front yard paved; Croton water, with renewal of lease at fifty dollars per year, for three years, or the fee at three thousand, at fifteen hundred dollars.

One wooden stable in Fortieth street, with stalls for eight horses, twelve by twenty-five feet, two stories, clap-boarded, shingle roof, at one hundred and fifty dollars.

Five box carts, at two hundred dollars.

Five horse carts, at two hundred dollars.

One truck nearly new, at one hundred dollars.

One truck nearly new, at ninety dollars.

One truck worn, at sixty dollars.

One truck much worn, at forty dollars.

One pair mules, at five hundred dollars.

One pair gray truck horses, at three hundred dollars.

One pair black truck horses, three hundred dollars.

One pair of bay horses, at three hundred and fifty dollars.

One single truck horse, at one hundred dollars.

One single truck horse, at one hundred and fifty-five dollars.

One truck horse, at one hundred and twenty dollars.

One truck horse, at one hundred and twenty-five dollars.

One truck horse, at one hundred and eight dollars.

One truck horse, at one hundred dollars.

One truck horse, at seventy-five dollars.

One hundred and fifty offal boxes, at three hundred dollars.

Twenty swill barrels, iron-bound, with handles and double bottoms, at sixty dollars.

Four sets double harness, at eighty-dollars.

Seven sets of single cart harness, at ninety-six dollars.

One set single wagon harness, at twelve dollars.

One business wagon, much worn, at fifty dollars.

One pleasure sleigh, (cutter) at seventeen dollars.

Two double sleds, at forty dollars.

One straw cutting machine, at nine dollars.

Fifteen halters, chains, &c., at twenty-two dollars and fifty cents.

Twelve large split baskets, at ten dollars and fifty cents.

Seven iron-bound pails, at three and a half dollars.

Eight manure forks, at six dollars.

Seven shovels, at five dollars and twenty-five cents.

One large feed box to mix in, water tight, at ten dollars.

One large screw wrench, at two dollars.

One cart wrench, at fifty cents.

Four axes at stable and boat, at four dollars.

One two-inch auger, at fifty cents.

One inch and a half auger, at fifty cents.

One hand-saw and four rivets, at one dollar.

One buck-saw, at fifty cents.

One wheel greaser, at four dollars.

Three lanterns, at two dollars.

Five small wrenches, ninety-four cents.

One two-foot iron square, at twenty-five cents.

One wire sieve, at twenty-five cents.

Four horse brushes, at three dollars.

Four curry combs, at one dollar.

All the horses blankets, at one dollar and fifty cents.

Three kettles in the factory, weighing ten thousand eight hundred and nineteen pounds, at one thousand and eighty dollars and ninety cents.

Setting the same, including common brick, fire brick, sand, clay, lime, fire grates, furnace doors, mason work and labor at five hundred and ninety dollars and fifty-nine cents.

For freight of boiler, &c., one hundred dollars.

The factory, including finding and driving spiles, the building forty-eight by forty feet, clap-boarded, with shingle roof, yellow pine floor, at two thousand and seventy dollars.

The dock, eighty-eight by thirty-four feet, with eighty-seven spiles, including finding and driving same, plank, string pieces, fenders, extra strings, head pieces and braces, spikes, nails and labor, at one thousand five hundred and sixty-three dollars.

Bone machinery, at two hundred dollars.

Five double and five single blocks, at thirteen dollars and seventy-five cents.

The right and title to Barren Island, including all the leases, contracts, and conveyances now held by W. B. Reynolds, for any part or portion of the island and its appurtenances, the sum of ten thousand dollars.

Third, We do order, award and determine the compen-

sation for our services as such appraisers at the sum of six hundred and sixty-four dollars and seventy cents for services and expenses, to be paid to George Briggs, as our treasurer, for and on our behalf; half to be paid by the Comptroller of the city of New York, and half by W. B. Reynolds.

In testimony whereof, we have hereto severally set our hands and seals this day of February, A. D., 1855.

Sealed and delivered in presence {
of JAMES D. FENNER, }

JAMES HORNER, [L. S.]

C. G. WATERBURY, [L. S.]

GEORGE BRIGGS, [L. S.]

In signing this appraisal of the property of William B. Reynolds, it is proper to state that I concur, with the other appraisers in the estimate of all the items of property except the allowance for the leases, deeds, &c. And in regard to these, I was in favor of taking the leases held by Mr. Reynolds, and assuming, on the part of the city, all payments required by them, and allow to Mr. Reynolds, in addition, one thousand dollars.

JAMES HORNER,

New York, Feb. 19, 1855.

(No. 5.)

85 CHAMBERS STREET, }
Feb. 19, 1855. }

DEAR SIR:—Having been counsel for Mr. Reynolds, during the whole of his settlement with the city, I hope you will pardon me for calling your attention to one consideration which had its influence on the whole arrangement.

By perusing the report to the Common Council, you will see that the difficulty always has been to procure a proper place for deposit of the offal, &c., and for manufacturing it. The Palisades, Long Island Sound, and differ-

ent parts of New York Bay, were tried in vain; and until Reynolds procured Barren Island, it was not possible for him to perform his contract. Nor is it now possible for this city to make a contract and have it performed without using Barren Island.

Mr. R. having conveyances of the only part of the island where landing is possible, his title in the island is of great value to him in performing any such contract, and of equal value to the city in making any such.

To Mr. R. and to the city, therefore, his right in the island is worth far more than the whole island can be for any thing else.

This was well understood by the Committee of the Aldermen and by Mr. R., and therefore, when he agreed to convey to the city; it was for the value of the island to him and to the city, and not the value in market or for agricultural or other purposes.

Therefore, the resolution, which I drew up, at the request of the Committee, used a carefully guarded expression, not "cash value," merely, nor market value, &c., but "*fair cash value TO THE CITY*," this was intended on all hands to reach the value which the peculiar circumstances gave to the property, and it was only on such an understanding that Mr. Reynolds agreed to convey it to the city.

What object could he have had to convey it at a mere market value, when out of any contractor he could get ten or twenty times as much, merely because no contractor could do without it? He had obtained an advantage by getting the title to the island, and it was the intention to pay him for it.

Yours, &c.,

J. W. EDMONDS.

JAS. HORNER, Esq.

DOCUMENT No. 17.

BOARD OF COUNCILMEN.

MARCH 7, 1855.

The following report of a Committee of the Representatives of the New York Fire Department, appointed to investigate certain charges preferred in that body against hook and ladder company No. 11, was received, referred to Committee on Fire Department, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

To the Officers of the Representatives of the New York Fire Department:

GENTLEMEN:—The Committee appointed under a preamble and resolution adopted by the Board of Representatives, at a meeting held on the evening of January 9th, 1855; and which preamble and resolution reads as follows:

Whereas, For the past two years serious charges have been made through the public press and otherwise, against some of the officers and members of hook and ladder

company No. 11, touching their want of honesty; and also collecting money under false pretences, and selling their ball tickets as tickets for the Fire Department Fund ball, and also being in a state of drunkenness while on duty as firemen.

And whereas, There is no hope of the company ever bettering their condition, and becoming an ornament to the department, therefore, be it

Resolved, That a committee of five be appointed from this body, with full power to investigate the matter fully, and to report to this Board, as soon as possible, whether there is or is not good and sufficient reasons for their disbandment, would beg leave to state that they have, to the best of their ability, performed the duties assigned them, and herewith present their

REPORT.

By way of preamble, your Committee would state, that notwithstanding the disagreeable nature of the duties imposed upon them (disagreeable, because it is always a painful matter to hear disgraceful charges preferred against any of those who hold a membership in the same organization as ourselves), they entered upon this investigation with an earnest desire to arrive at facts, and although the conclusions to which they have arrived, may seem harsh to those not aware of all the circumstances; yet, a patient attention to the evidence will, it is believed, satisfy all, that the case is one demanding immediate action from a body having charge, to some extent, of the interests and honor of the department at large. As to the time and labor necessarily bestowed in the work of eliciting the facts hereinafter set forth, the undersigned will feel them-

selves amply repaid, if they succeed in putting a stop hereafter to the practice of unauthorized or unworthy persons soliciting subscriptions from merchants and business men ostensibly for the benefit of fire companies, but really for their own private use. Without further prefatory remarks, therefore, your attention is directed to the following testimony:

At the first meeting of the Committee, Mr. Geo. D. Crary, foreman of hose company No. 54, made a statement, substantially, as follows: That the foreman of hook and ladder company No. 11 (Mr. John Ridabock), had come to his house, and wanted to fight with him; the said Ridabock being at the time in his uniform as a fireman. That a man who was arrested at the Jennings' fire for stealing a coat, and whose name is *Nodine*, has a key, and is harbored about the company's house; that some of the members of No. 11 went to Mr. Harris, at the sugar-house in Leonard street, and obtained money for a fire company in Franklin street; that the foreman of the company is in the habit of insulting respectable persons, and using disreputable and indecent language towards them. Among these persons so insulted being the witness' brother, Mr. Wm. E. Crary; and that since the company was organized it has been a disgrace to the Fire Department. Mr. Crary mentioned the names of other parties, whose statements will be found embodied below; and whom it is unnecessary to refer to here.

At the second meeting of the Committee, Mr. Hewett, of Hudson street, stated that Councilman Barney, of the Ninth district, had given money to the company; and that Mr. Lynch, of Greenwich street, had also given money for

the benefit of the Franklin street companies. A Mr. Byrne was called on for money to repair the *truck*; but he refused, telling the parties that such work was done by the city. Mr. Lynes mentioned that he had called upon ex-engineer Robert McGinnis, who stated, that according to his usual practice, he called upon Messrs. Stearns & Marvin, with a ticket for the annual ball in aid of the Fire Department fund; they informed him that they had purchased one three days previously, and paid five dollars for it; which ticket on being examined, proved to be for the ball of hook and ladder company No. 11. It was also stated to the Committee that one of the firm of Wm. Watson & Co. was compelled to buy a ticket to save himself from abuse. Mr. John J. Bloomfield, foreman of engine company No. 42, had seen a person in command of No. 11, at the fire in the City Assembly rooms, whom he took to be the foreman, in a state of intoxication. Mr. Bloomfield also stated that the proprietors of Howard's Hotel had explained to him that they bought tickets for No. 11's ball; but, on examination, the admission ticket was found to be abstracted. Mr. Lynes said, that Mr. Zophar Mills, ex-President of the Department knew various members of No. 11's had collected money for the sister of Michael O'Brien, one of their associates, who was killed at the fire in the Fowler's building; of the fund thus collected Mr. Mills and Mr. John Coger, Jr., acted as trustees, and handed to the lady all the money received by them for her. Mr. Armand Barbier, the then foreman of No. 11, had collected and retained ten dollars, besides having taken fifty tickets for Paul Jullien's concert in aid of the Charitable Fund, and thus far made no account of either the tickets, or the proceeds of their sale.

Mr. Barbier's resignation was accepted by the company, and he is now at liberty to join any other company in the department.

Captain Carpenter, of the Fifth Ward Police, stated, that with the exception of the past two months, he had had considerable trouble with the members of No. 11. He gave them generally a very bad character. In the Station-house was one of No. 11's fronts, with the initials of ———, which had been torn from the cap of a member arrested for stealing.

The next meeting of the Committee was held in the evening of February 15th. Mr. Lindsey had made it his business to call upon Mr. Skidmore, of Greenwich street, and others whose names had been handed to him. One of them stated that he had frequently been called upon for money, and within the past two months had given somewhat for the company. All the parties called upon by Mr. Lindsey gave No. 11 a very bad name.

Mr. Garvey had called upon Mr. McGee, of the firm of Watson & Co., and was by him told that he had to purchase tickets for No. 11's ball, to save himself from abuse. Mr. Garvey also called upon the officers of an insurance company, who made the following statement to him, although they were unwilling to have their company or themselves publicly mentioned. The gentlemen in question were waited upon by a person who gave his name as Ridabock, and who requested them to buy tickets for the ball of hook and ladder company No. 11. He was told to leave the tickets and call next day. Inquiry was made in the mean time, and they were recommended not to buy any. Rida-

bock and a companion called the succeeding day, when they were informed that the company declined buying the tickets. Upon hearing this, both of them became very abusive and insulting in their language.

Mr. Curtis, of the firm of Tucker & Co., corner of Dey and Greenwich streets, stated that in December last, two men came to his store to sell tickets for the Fire Department ball. Mr. Curtis being himself a fireman attached to hook and ladder No. 4, and knowing that the tickets for the ball mentioned had not yet been issued, requested to see them. On being shown, they proved to be tickets for No. 11's ball, upon which he declined buying. They then threatened that if a fire should ever happen in the neighborhood, the company would remember those who refused to buy tickets for the ball.

Mr. Robert McGinnis, ex-engineer, knew of the company collecting money for the purpose of furnishing their house. He also corroborated the statement made at the last meeting by Mr. Lyons, in reference to Stearns & Marvin.

The foreman of No. 11, Mr. John Ridabock, was then examined. He did not deny going to the house of hose company No. 54 in a state of intoxication, and there endeavoring to commence a difficulty. Mr. Nodine was still a member of the company. His associates having investigated the charges brought against him, and finding them not sustained, reinstated him as a member, by request of the Chief Engineer. Was positive that he had never received five dollars for a single ball ticket, but had taken that amount for two, though he has never sold them as

Fire Department Fund ball tickets. He was not drunk at the City Assembly Rooms fire, but a member was; could not deny that there had been considerable money collected for the company; part of the amount so collected having been received since he was foreman. Since his being elected foreman he had warned citizens against certain parties who were collecting money, and had offered a reward of fifty dollars for their detection, besides having in other ways endeavored to correct many of the abuses that had sprung up under his predecessors. Mr. Rida-bock further stated that he had never abused Mr. Wm. E. Crary, or any of the members of hose company No. 54; that he had been a member of the company nine months, six months of which he had been an officer; he had collected money before he was a member, and had also been appointed on committees by the company previous to his becoming a member. With the money collected by him he had paid off sundry debts, which the company had contracted. They once had a member named Enoch Godell, who collected some three hundred dollars, and applied it to his own use. It was proved against him, but he was allowed to resign, and was so returned to the Chief Engineer. Mr. Thomas Vanderweer, an ex-foreman, had collected some six hundred dollars, and used it for his own personal advantage, but the company returned him as expelled. None but members were engaged in selling tickets for the ball, although one person wears a cap who is not a member. He had never abused any one for not buying ball tickets for the company's ball, and denies calling upon Mr. C. V. Anderson to get him to certify to the character of the company, or that he was ever requested to do so by a Mr. Hall.

Mr. Wm. McGee, assistant foreman of No. 11, next appeared, and recapitulated the facts as to Mr. Nodine, substantiating the remarks made by Mr. Ridabock. Mr. McGee had been a member of the company since March, 1854, and during his membership there has been no committee appointed to collect money. He denied ever having sold the company's ball tickets for other than such as they were represented. Knew of the case of Enoch Godell. Ridabock and the witness both lost their time, by the secretary—one Thomas Carll—keeping their certificate money, and never returning them. The charge was proved before the company, but Mr. Carll was allowed to resign. Ridabock has been foreman but three months, and Nodine is the oldest member on the roll.

Mr. Sturges, treasurer and honorary member of No. 11, being examined, stated that he was on the ball committee, but denies ever selling any tickets by misrepresentation. He has collected money and knew it to be expended for the uses it was collected. Messrs. Barbier, Decker and Ridabock were appointed a committee to make collections; the latter now having been four months a member, and three months an officer of the company. Witness knows of Ridabock having been appointed on committees before he was a member. The number of ball tickets sold was over two hundred, and the receipts were between four hundred and five hundred dollars. Has been treasurer since February. The witness then stated Godell's case, and said that the company had heard of cases where more than two dollars was paid for tickets, but they could never find who they were that sold or bought them. Believes Ridabock is a butcher, though he has not followed his profession for some time—say over a year.

Mr. C. V. Anderson, ex-Chief Engineer, contradicted Mr. Ridabock's statement that he had never called on him to get him to certify to the character of No. 11. It appears that a Mr. Hall was applied to for money, when he stated that he would contribute if Mr. Anderson would vouch for their characters; Ridabock then called on him, (Mr. Anderson,) but he refused to give his signature in their favor. He had a very bad opinion of the company.

Mr. Cockroft testified, that an officer, wearing a white frontispiece, in command of No. 11, and the man on the tiller, were both drunk when returning from the fire in Pearl street, on the morning of February 15. This was the very morning previous to Mr. Ridabock's examination before the committee. Your committee ask indulgence while they make a few comments on the above testimony. What they have given in the report is but the outlines of the testimony. Much that was said and done, could not be noted without extending the report to an inordinate length; and therefore, the conclusions given are based as much on facts within the knowledge of the committee, as on those stated on the record. In reference to the case of Mr. Nodine, the member of No. 11, who was arrested at the Jennings' fire for stealing, it was ascertained, from the Chief Engineer, that the company had returned him in as resigned, but that Mr. Carson had transmitted a communication stating the facts to the Common Council. The case was heard before the Fire Department Committee, who, on account of the youth and respectable connections of the accused, added to the fact that he had heretofore borne a good character, decided not to carry the

punishment to the extent of an expulsion. His resignation from the department was therefore accepted, but the company re-elected him a member shortly afterwards. As to the other matters elicited during the examination and investigation, your Committee have placed them under several sub-divisions, and among these they name:

1st. The individuals implicated in transactions openly disgraceful to the department; of these, the principal is Mr. Enoch Godell, who, by the admission of the present officers of the company, swindled merchants and business men in the lower part of the city, out of over three hundred dollars, not one cent of which ever went into the treasury of the organization for whose reputed use it was collected. Mr. Godell stands on the Register as resigned, and is consequently at "liberty to pursue the same course in any other company of which he becomes a member," while the sense of moral rectitude on the part of those composing No. 11, may have led them to allow the accused this privilege; the undersigned cannot sanction it in any way. Mr. Armand Barbier, at the time he was foreman of No. 11, and subsequently collected money for the sacred object of relieving the presumed necessities of the sister of one who was a companion, and who lost his life in the services of the department. Part of this money he retained for his own use. He also stands as a defaulter to the charitable fund, besides being implicated in other transactions; the register shows him as "resigned," but your Committee cannot believe that it should be allowed to so remain. Mr. James Rozelle, ex-foreman, and a "resigned" member of the department, is also in the category with those just named, and should also be included in

the list of those who ought to be prevented from again uniting with the department. Mr. Thomas Vanderweer's appropriation of collections to the amount of six hundred dollars, places him in the same situation, and although the company have expelled him; yet, as there may be some circumstances which prevents it from being so registered, his name will be attended to in this connection. The present foreman, Mr. John Ridabock, your Committee look upon as justly answerable for much of the disgrace that has been heaped upon the department through the conduct of hook and ladder company No. 11. He is proved to have gone in a state of intoxication, to another company's house, for the purpose of creating a difficulty; to have been seen intoxicated at fires; to have used abusive language toward those who would not purchase ball tickets from him, and to have acted in a manner calculated to bring the Department into disrepute. Your Committee, will, therefore, recommend, and below submit a resolution in keeping with the terms of that recommendation, that the word "resigned," on the Register, opposite the names of Armand Barbier, James Rozelle, Enoch Godell and Thos. Vanderweer, Thomas Carll, be changed to "expelled," and that Fred. A. Nodine and John Ridabock be expelled from the Fire Department.

2d. As to the company, the attention of the representatives is asked to the testimony on this point. All three of the principle officers having been examined separately, it cannot but be observed what a vast discrepancy there is in their statements. The police captain of the district gives the company a bad name; their brother firemen testify that they have been a disgrace to the department. It is

satisfactorily ascertained, that men who are not members are permitted to wear caps, and that others than members are placed on committees, and allowed to take part in the most important transactions of the company. In fact it is and has been a perfect chaos, each succeeding administration making matters worse, and but little promise of hope in the future. Impressed with the feeling that no change toward a more desirable state of affairs can be had, short of a reorganization, your Committee recommend that the Common Council be memorialized to order the immediate disbandment of hook and ladder company No. 11.

3d. *The practice of collecting large sums of money for individual fire companies.*—From the evidence adduced, it will be seen that the amounts, altogether, collected for the use of this one company, amounts to some thousands of dollars, over one thousand dollars being embezzled by two individuals. There are cases in which a company, from circumstances that do not prevail in all, may be compelled to seek the aid of those whose property is more immediately under their protection, and to whom the members are personally known, and their characters as orderly and efficient firemen perfectly familiar. Such companies should not be debarred from receiving assistance at the hands of their friends, because one or two others chose to misuse the confidence reposed in them. Your Committee have, therefore, given this matter their serious consideration, in order that deserving members of the department may not be excluded from the confidence of our citizens, by the unworthy acts of a few. They, therefore, recommend that a notice be published over the signatures of the officers of

this body, requesting the officers of incorporated institutions, associations, &c., and our business men generally, not to donate any thing to fire companies through the medium of parties with whom they are unacquainted, unless the application contains the signature of the president, vice-president, secretary and treasurer of the department; and further, that the officers just mentioned, be constituted a standing committee, to decide upon all applications from companies who wish to obtain aid from any portion or class of our citizens.

This legislation will entirely cure the evil complained of. It will protect the really deserving, and prevent unauthorized or unworthy parties from obtaining money in the name, or for the benefit of fire companies, or for any purpose connected directly or indirectly with the department. Certain it is, that the business community have lately been taxed heavily, ostensibly to benefit fire companies, but, really, to enable swindlers to live at ease on the products of their rascality.

In conclusion, your Committee would state, that having given to the subject matter contained in the resolution under which they were appointed, a fair and dispassionate consideration, they now ask to be discharged from its further consideration. Such labors as those they have been engaged in are, generally, a thankless task; but your Committee, having in view only the best interests and honor of the department, have not shrunk from the responsibility of meeting the issue involved, and recommending such action, as in their opinion, is demanded at their hands.

The following resolutions are, therefore, offered for adoption, viz:

Resolved, That a copy of this report be transmitted to the Honorable the Common Council, with a request from this body, that the word "resigned," on the Firemen's Register, opposite the names of Armand Barbier, James Roselle, Enoch Godell, Thomas Vandeweer and Thomas Carll, be erased, and the word "expelled" substituted therefor; and further, that hook and ladder company No. 11, be at once disbanded, and John Ridabock and Frederick A. Nodine, whose names appear as members of that company, be expelled from the department.

Resolved, That the officers of this body be, and are hereby directed to publish in such papers as they may see fit, a card, notifying the public not to pay any money for any fire company, or for any purpose whatever, connected with the department, unless the parties making the application are personally known, or produce a certificate signed by the president, vice-president, secretary and treasurer of the department, certifying that the object of such application is worthy of a favorable consideration.

Resolved, That the officers of this body be, and they are hereby empowered to act as a standing committee, to whom all fire companies, desirous of calling upon their fellow-citizens for donations in aid of their organization, shall submit their reasons, and the papers upon which it is determined to make the application, and should the said committee approve of the reasons therefor, then they shall be, and are hereby authorized to affix their signa-

tures as members of the "standing committee, on application for assistance from the public."

All of which is respectfully submitted,

Signed,

H. LINDSLEY, *engine company No. 41,*

G. S. ROE, *engine company No. 42,*

A. J. GARVEY, *hook and ladder company No. 12,*

J. LYONS, *hose company No. 9,*

G. H. E. LYNCH, *hose company No. 52,*

Committee.

NEW YORK, February 21st, 1855.

DOCUMENT No. 18.

BOARD OF COUNCILMEN.

MARCH 12, 1855.

The following report of the Committee on Lamps and Gas, in relation to granting permission to the Harlem Gas-light Company to lay mains in the upper portion of the city, was received, laid on the table and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

To the Hon. the Mayor, Aldermen and Commonalty of the city of New York:

The petition of Burr Wakeman, Henry P. McGown, Walter Brady, Lemuel Arnold and John M. Reed, all of the city and county of New York, respectfully shows to your Honorable Body, that they, your above-named petitioners, have formed a company, under and in pursuance of an act of the legislature of the state of New York, entitled, "An act to authorize the formation of gaslight companies," passed February 16, 1848; and have filed the

necessary certificate, as required by said act, and are now an incorporated company; and that the name of said company is "the Harlem Gaslight company."

That said company has been incorporated, with the intention of manufacturing and supplying gas for lighting the streets and avenues, and the public and private buildings, and for other purposes, in all that part of the said city and county of New York, lying north of the centre line of Seventy-ninth street, in said city. That said portion of the said city embraces the villages of Harlem, Yorkville, Manhattanville, Carmansville and Bloomingdale; and that said portion of the city is now being thickly built up. That your petitioners are interested in the growth and prosperity of that portion of said city; and that there are at present no gas pipes laid, or grants for the same made to any company, or persons, by your Honorable Body, in any of the streets above Fiftieth street, in said city. That your petitioners believe, that by having the gas introduced in that part of the city, above Seventy-ninth street, it would add much to the value of the real estate therein located, thus producing an increased revenue to the city, by way of taxes, independent of the great convenience and benefit that would be derived thereby by the residents of that portion of the city.

Your petitioners further show, that they are prepared to erect the necessary apparatus and buildings, and to lay the necessary pipes, for the purpose hereinbefore mentioned, upon receiving from your Honorable Body an exclusive grant for that purpose.

Your petitioners therefore respectfully ask your Hon-

orable Body for such grant, to lay the necessary pipes in that portion of said city lying north of the centre line of Seventy-ninth street, and to supply the public lamps, and also the public and private buildings with gas to light the same.

And your petitioners, as in duty bound, will ever pray.

BURR WAKEMAN,
HENRY P. MCGOWN,
WALTER BRADY,
LEMUEL ARNOLD,
JOHN M. REED.

NEW YORK, Feb. 2, 1855.

The Committee on Lamps and Gas, to whom was referred the annexed petition of Burr Wakeman, Henry P. McGowan and others, for the exclusive right to lay gas mains, in all that portion of the city of New York, lying north of the centre line of Seventy-ninth street, would respectfully

REPORT:

That they have given the subject referred to them their careful attention and examination, and find that said petitioners have organized themselves into and formed for the purposes as stated in said petition, an incorporated body, under and in pursuance of the act of the legislature of the state of New York, entitled "an act to authorize the formation of Gaslight Companies," passed February 16th, 1848, and have filed the necessary certificate as required by the first section of the said act, a copy of which is hereto attached and marked A.

The petitioners, in their petition, ask that an exclusive grant be made to them, to lay gas mains, &c.

Your Committee being of opinion that an exclusive grant would be in direct conflict with the provisions of the amended charter of 1853. Assuming the view that such exclusive grant would be a "franchise," were undecided how far the Common Council had authority in the matter, until the annexed communication from the Counsel to the Corporation, marked B, was received by your Committee, to which the attention of the Board is respectfully solicited.

Your Committee also find that no such exclusive permission had ever been given, (save once.)

The Manhattan Gaslight Company have permission to lay mains, the Common Council, however, have reserved the right to grant the same permission to any company or companies in the district at present lighted by said company.

This grant at first extended only to Sixth street, but by resolution from time to time, and contract of the Common Council, it has been extended to Forty-second street.

Your Committee are of opinion that in granting the prayer of the petitioners, great good and benefit will accrue to the community, as also to the city, are induced favorably to report upon their petition, and submit for adoption the following resolution:

Resolved, That the consent of the Mayor, Aldermen and Commonalty of the city of New York, is hereby given to "the Harlem Gaslight Company," to lay conductors for

conducting gas through the streets, avenues, lanes, alleys, and squares, in all that portion of the city lying north of the centre line of Seventy-ninth street, for the purpose of supplying gas to public and private buildings, in consideration of the following articles being faithfully complied with:

1st. The said company shall not impede or interrupt public travel in the laying of such mains, more than cannot possibly be avoided, and shall, after opening any street, avenue, lane, alley or square, and depositing their mains, restore the same to as good condition as the same was before such opening, and be at all times subject to such restrictions, ordinances and resolutions as the Common Council of said city may from time to time adopt, and under the control of the Street Department of said city.

2d. They shall furnish a supply of gas to all persons who may desire the same, and shall deprive no consumer of gas, upon their refusal to pay, or for a dispute of the bill rendered, until they have served such disputant with the affidavit of their inspector as to the correctness of the register of their metre, and that all the gas for which said disputants are charged, has actually passed through said metre.

3d. The Mayor, Aldermen and Commonalty of the said city hereby reserve the right to purchase at any time from the said company, all the materials, pipes, fixtures, buildings, and all and singular all the personal and real property owned by said company, by paying to the said company the cost of the same, and ten per cent. over and above said cost.

4th. The permission herein granted is upon the express condition that said company shall proceed immediately or within two years from the passage of this resolution, to lay their mains in the district as embraced in this grant; and supply, at least within three years from its passage, gas to be used by the corporate authorities or private consumers.

5th. The said company shall be exempt from taxation on their personal property, for the period of three years from the organization of said corporation, pursuant to the power granted for this purpose by the eighteenth section of "an act to authorize the formation of Gaslight Companies," passed by the legislature of the state of New York, February 16, 1848.

6th. The Mayor, Aldermen and Commonalty also retain the right to revoke any and all permission which may be herein granted, upon satisfactory proof being afforded of a failure of the said "Harlem Gaslight Company," complying with these conditions as herein expressed, or of any neglect to comply with any resolution or ordinance which may be hereafter adopted, and nothing herein contained shall be construed as giving any exclusive permission whatever to the said Harlem Gaslight Company.

BENJ. F. PINCKNEY,	}	<i>Committee on Lamps and Gas.</i>
JACOB S. MOORE,		
JONA. PURDY,		
W. FLOYD,		

(A)

We, Burr Wakeman, Henry P. McGown, Walter Brady, Lemuel Arnold and John M. Reed, all of the city and county of New York, whose names are hereto subscribed, being desirous to form a company, for the purpose of manufacturing and supplying gas for lighting the streets, and the public and private buildings, and for other purposes, situated and being in all that part of the city and county of New York, lying north of the centre line of Seventy-ninth street, in said city—

Do for that purpose, make, sign and acknowledge this certificate, by which we certify, that the corporate name of said company shall be, and is, "the Harlem Gaslight Company;" and the objects for which said company is intended to be formed, are the manufacturing and supplying gas for lighting the streets, and the public and private buildings, and for other purposes, situated and being in all that part of the city and county of New York, lying north of the centre line of Seventy-ninth street, in said city.

That the amount of the capital stock of said company shall be, and is, one hundred and twenty thousand dollars, to be divided into two thousand four hundred shares, of fifty dollars each.

That the term of the existence of said corporation, shall be fifty years.

That the number of the directors of said company shall be five, and that Burr Wakeman, Henry P. McGown,

Walter Brady, Lemuel Arnold and John M. Reed, hereinbefore named, shall be directors of said corporation, for the first year, and that the operations of said company are intended to be, and shall be, carried on in the city and county of New York.

This certificate is made, signed and acknowledged in said city and county of New York, before Joseph O. Brown, a Commissioner of Deeds, in and for the city and county of New York, an officer competent to take the acknowledgment of deeds, to the intent that he shall duly certify to such making, signing and acknowledgment, and with intent that the same shall be filed in the office of the clerk of said city and county, and a duplicate thereof in the office of the Secretary of State, the whole to be done with intent thereby to form a corporation, under and pursuant to the provisions of the act entitled, "an act to authorize the formation of gaslight companies," passed February 16th, 1848, and any amendment thereof.

Made, signed and acknowledged in duplicate, in the city and county of New York, this first day of February, in the year one thousand eight hundred and fifty-five.

BURR WAKEMAN, [L. s.]
HENRY P. MCGOWN, [L. s.]
WALTER BRADY, [L. s.]
LEMUEL ARNOLD, [L. s.]
JOHN M. REED, [L. s.]

In the presence of }
JOS. O. BROWN, }

STATE OF NEW YORK, }
City and County of New York, } *ss:* On this first day of
February, A. D. 1855, before me personally came Burr

Wakeman, Henry P. McGowan, Walter Brady, Samuel Arnold and John M. Reed, all known to me to be the individuals described in, and who executed the foregoing certificate, and acknowledged to me that they executed the same.

JOS. O. BROWN,
Commissioner of Deeds.

STATE OF NEW YORK, }
City and County of New York, } ss: I, Richard B. Connolly, Clerk of the city and county of New York, do hereby certify that Jos. O. Brown, whose name is subscribed to the certificate of the proof or acknowledgment of the annexed instrument, and thereon written, was at the time of taking such proof or acknowledgment a Commissioner of Deeds for said city and county, dwelling in the said city, commissioned and sworn, and duly authorized to take the same. And, further, that I am well acquainted with the hand writing of such Commissioner, and verily believe that the signature to the said certificate of proof or acknowledgment, is genuine.

In testimony whereof I have hereunto set my hand, and affixed the seal of the county, the second day of February, 1855.

RICHARD B. CONNOLLY,
(L.S.) *Clerk.*

(B.)

OFFICE OF THE COUNSEL TO THE CORPORATION, {
March 7, 1855. }

DEAR SIR:—I have given patient reflection to the queries propounded in your note of 13th February last, and have come to these conclusions :

1. The Common Council may grant permission to the existing companies, and to those who may be formed under the general act, to lay their gas mains in the public streets. This power is expressly granted by the charter of those companies, and by the general act.

2. It is competent for the Common Council to give *exclusive* permission in such cases, to those companies, or any of them; but such exclusive permission will then be the disposal of a *franchise*, which, under the Amended Charter of 1853, must be sold at public auction.

I have examined the charters of the existing companies, and also the general act, together with the agreements now existing between them and the Corporation, and, in my judgment, neither possess, at this time, any exclusive privileges, so that all stand on an equal footing.

Very respectfully,

R. J. DILLON.

B. F. PINCKNEY, Esq., }
Chairman Com. on Gas. }

DOCUMENT No. 19.

BOARD OF COUNCILMEN.

MARCH 12, 1855.

The following communication from the Commissioner of Streets and Lamps, in answer to resolution of inquiry concerning the occupation of the side-walks around the public markets, by stalls, buildings, coffee-rooms, &c., was received, laid on the table and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

NEW YORK, March 12th, 1855.

To the Honorable the Board of Councilmen:

GENTLEMEN:—In compliance with the annexed resolution, which was passed by your Honorable Body: *Resolved*, "That the Commissioner of Streets and Lamps report to this Board by what authority the streets and side-walks around the public markets are allowed to be occupied by stalls, buildings, coffee-rooms, &c., to the great detriment of the public convenience; and also, by what tenure the occupants of these obstructions, hold their privileges."

I hereby transmit to your Honorable Body all the information that I have been able to obtain, in relation to

the occupancy of the streets and side-walks around the public markets. In coming into office, I found the markets in the same state that they are at present, with some few exceptions, where I deemed it expedient to the interest of the city to cause several of the stands and sheds that were great obstructions to the street and side-walks to be removed. The authority for so occupying the streets, I supposed, is in the old and time honored custom—a large number of those who now occupy the stands do so under permits granted by the former Superintendents of Markets, by and with the consent of the then Commissioner of Streets and Lamps. The applications for stands are constantly increasing, and some such facilities must be granted in order to benefit both the producer and the consumer. The stands outside of the markets at present, pay the largest portion of the market fees. I, myself, have not as yet given any permits to occupy any portion of the streets and side-walks.

All of which is respectfully submitted,

JOSEPH E. EBLING,

Commissioner of Streets and Lamps.

DOCUMENT No. 20.

BOARD OF COUNCILMEN,

MARCH 19, 1855.

The following communication from the Street Commissioner, in relation to Streets Opening, was received, ordered to be printed, and referred to Committee on Streets.

C. T. McCLENACHAN, *Clerk.*

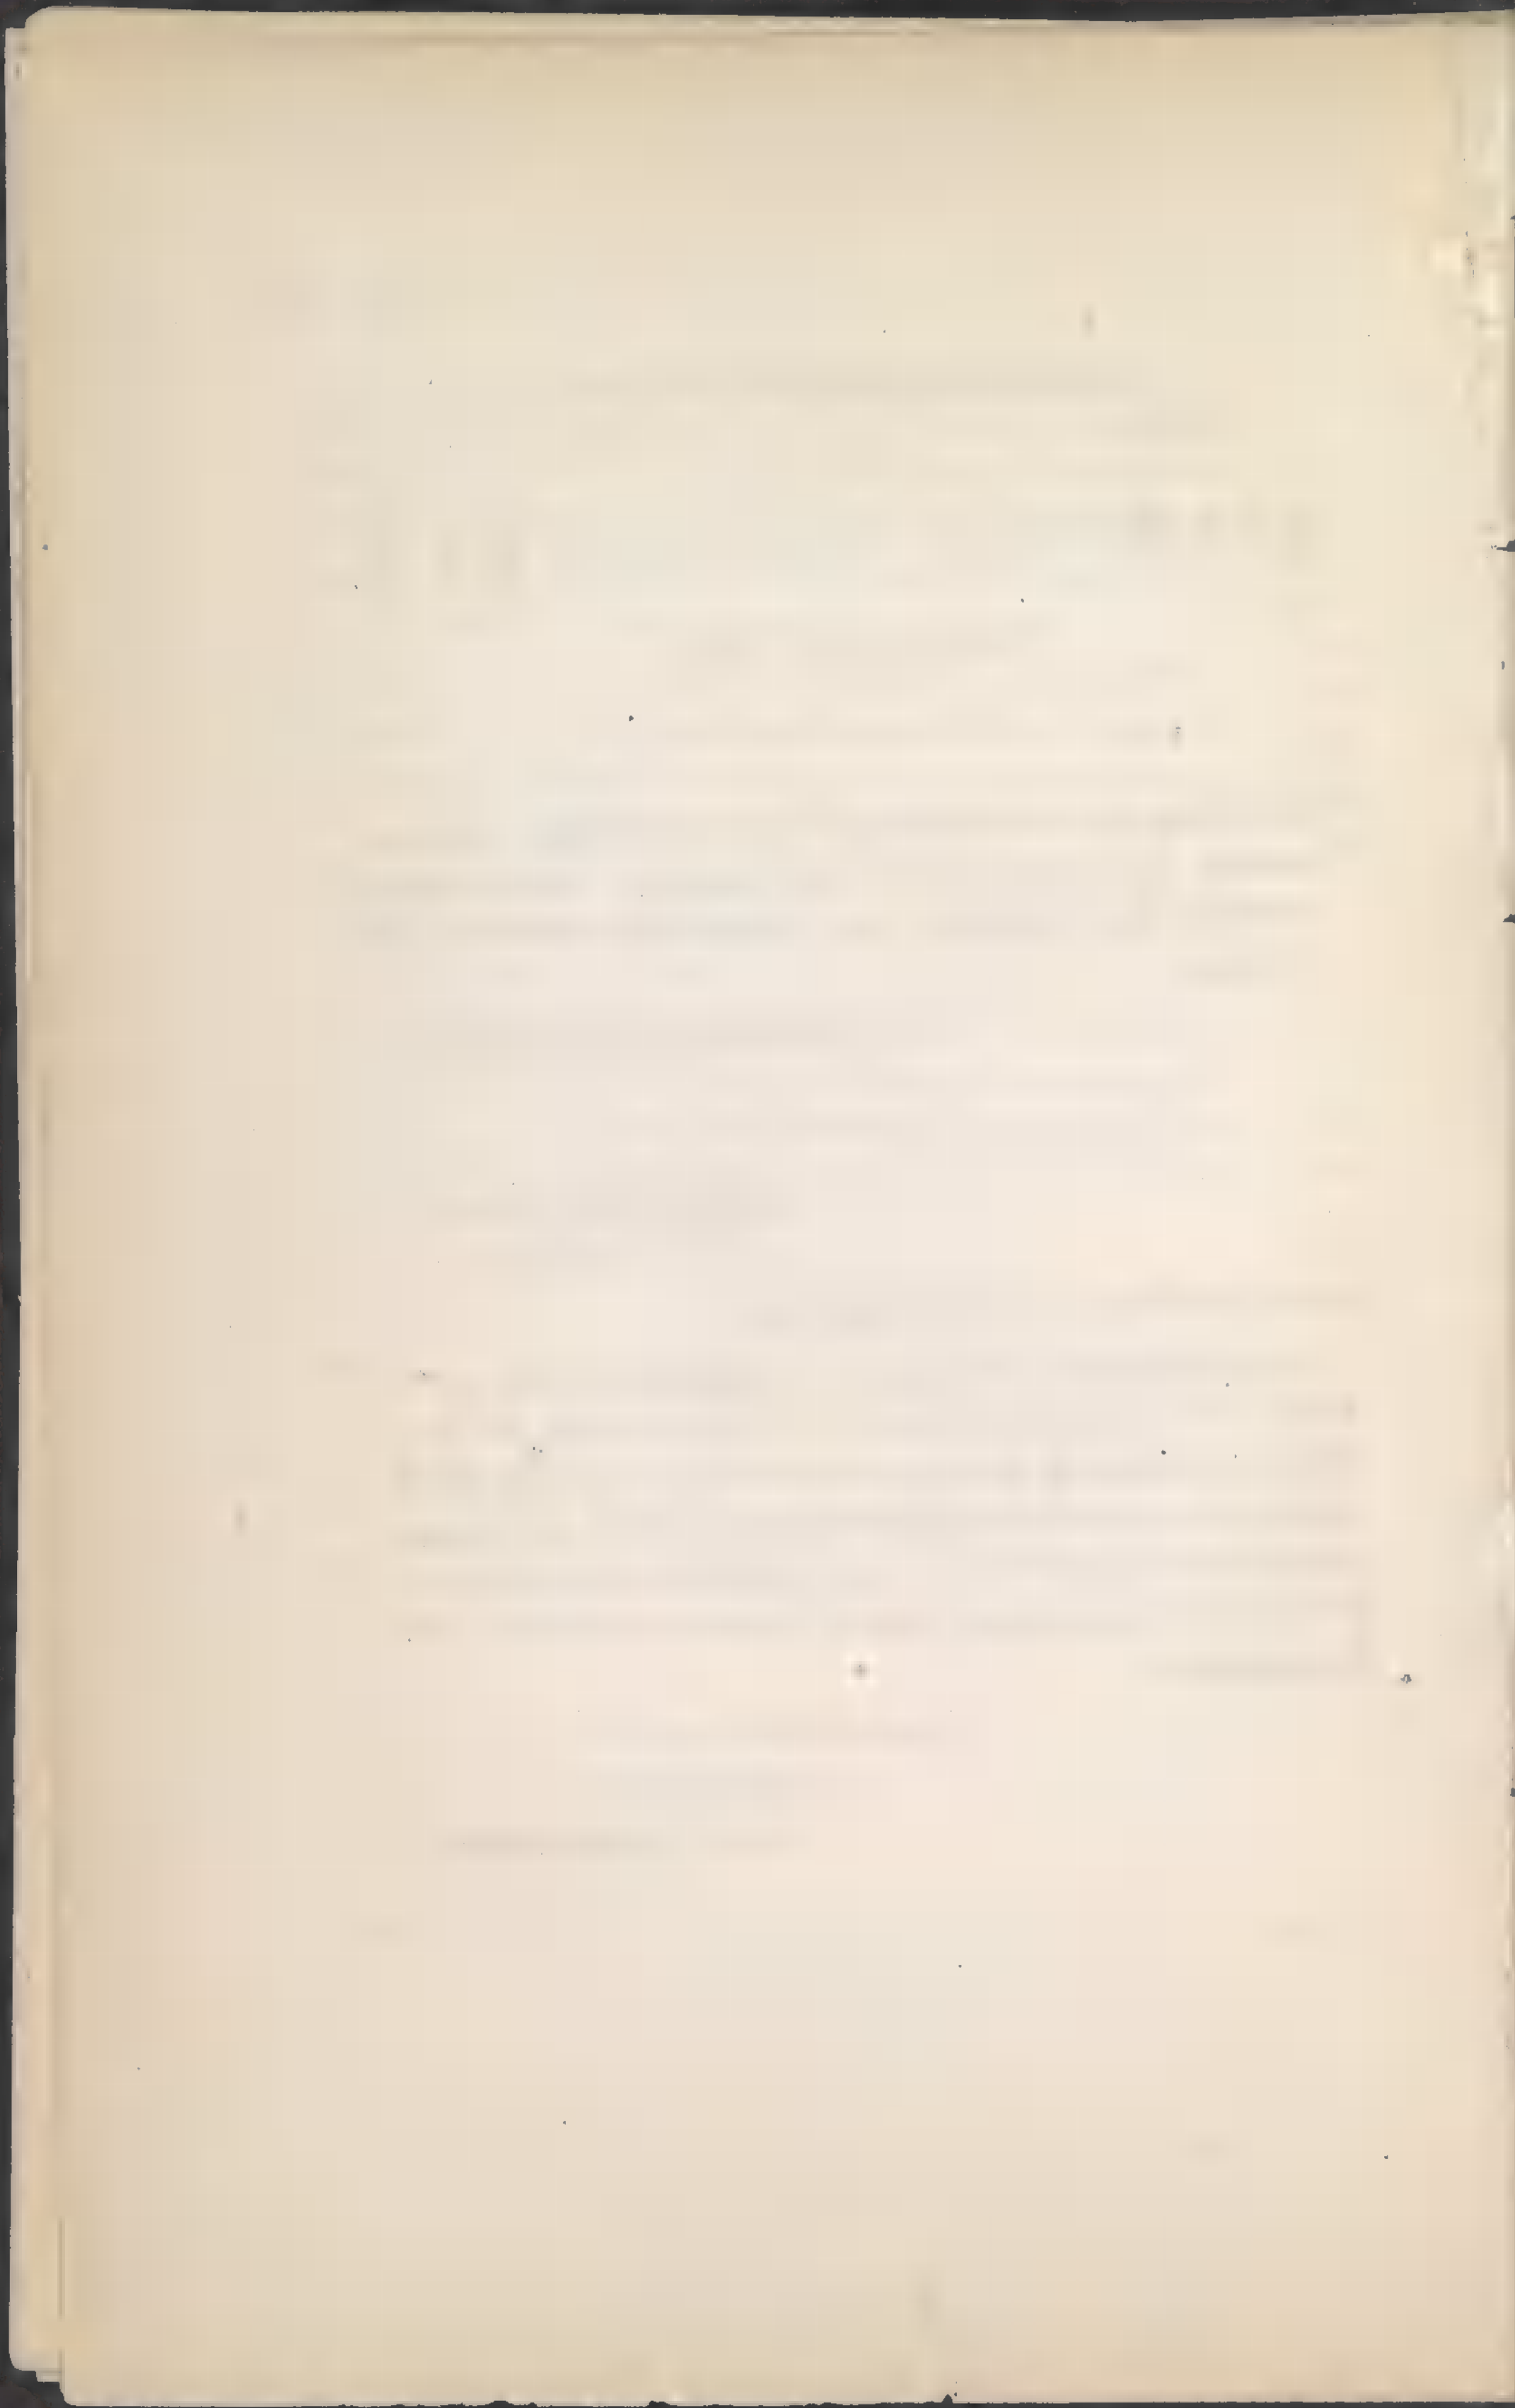

STREET DEPARTMENT, }
Feb. 10, 1855. }

To the Honorable Board of Councilmen:

GENTLEMEN:—In reply to a resolution adopted by the Board of Councilmen, January 10, 1855, asking for certain information in relation to opening of streets, &c., I respectfully submit the accompanying schedule, embracing all the items called for in said resolution, as far as I am enabled to furnish them from the documents on file in this Department.

Respectfully, &c.,

JAMES FUREY,
Street Commissioner.

DOCUMENT No. 21.

BOARD OF COUNCILMEN,

MARCH 19, 1855.

The following report of the Committee on Finance, relative to the mode of Advertising for the Corporation, and the various Heads of Departments of the City Government, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Finance, to whom was referred the annexed communication of the Comptroller, beg leave respectfully to

REPORT:

That on a careful examination of the estimates submitted, and of the tables prepared by the Comptroller, they ascertain that the cost of advertising, according to the rules laid down in the resolution previously adopted by this Board, will greatly exceed the cost of advertising upon the system heretofore pursued, the apparent excess of cost of the new system over the old one, is about twenty thousand dollars, but when we take into consideration the facilities granted to the officers of the Common Council, and the heads of departments and bureaux by the "line" system, to write out and insert their proceedings and

advertisements in extenso, it will easily be perceived that the cost would, in all probability, treble the above sum.

Under a contract to publish the proceedings of the Common Council alone, the newspapers by publishing in full, the reports of Committees, and which they could justly claim as being proceedings of that body, would more than quadruple the above sum for advertising alone, which your Committee are of opinion would not only be an enormous but a needless expense.

Your Committee in view of the whole matter, are of the opinion that a contract made with each newspaper, for a stipulated sum, is the only safe and economical mode, being less liable to abuse than any other that could be devised, the mode and manner of payment holding out an inducement to abridge, instead of to increase the matter published; in conclusion, your Committee offer the following resolutions for adoption:

Resolved, That the Comptroller be, and he is hereby directed to advertise for proposals for advertising for the departments; the Common Council, and the official reports of the proceedings of the same, for the term of one year, in five daily newspapers.

Resolved, That the following rules shall be observed:—

First, Bidders to offer the whole amount for one year.

Second, The award to be made to the lowest bidder, taking into consideration circulation in the city.

Third, The Comptroller to report the bids, and his award to the Common Council for confirmation.

J. C. WANDELL, } Committee
J. W. RANNEY, } on
P. M. SCHENCK, } Finance.

DOCUMENT No. 22.

BOARD OF COUNCILMEN,

MARCH 22, 1855.

The following report of the Committee on Law Department, in relation to paving Chatham street, &c., with block pavement, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on the Law Department, to whom was referred the communication from the Commissioner of Repairs and Supplies, relative to bids for paving Chatham street, &c., with blocks, respectfully

REPORT:

That as soon as practicable after such reference, a meeting was held, to which many of the bidders were invited, one of whom attended with counsel, to urge his right to the contract, in opposition to the report of the Commissioner.

Several of the bidders having expressed a desire to be heard as claimants of the contract, (if any should be awarded,) but being unable to proceed in the absence of

the bids and other papers submitted to the Commissioner, your Committee, on request, adjourned.

This Board adopted two resolutions, (see January 19, pp. 189, 190,) one calling on the Comptroller for information, the other calling on the Commissioner for papers and information. The former was answered, (see February 5, Doc. No. 7,) but the latter having received no attention, another resolution was adopted, (see February 16, p. 425,) which has drawn forth a communication from the Commissioner, (see March 5, Doc. No. 13.)

The opinion of the Counsel to the Corporation, (see Doc. No. 13,) has led your Committee to abandon the idea of hearing further the conflicting claims of the bidders.

In view of the peculiar predicament in which the Corporation is placed, there seems no escape from further embarrassments, and perhaps, litigations and injunctions, but by rescinding the resolutions heretofore passed on this subject.

Your Committee are of the opinion that the interests of the city require that the Common Council in this matter should specifically define all the material points, and requisites of the work they authorize to be done.

Having given this part of the subject much consideration, they submit, with resolutions, such specifications as they believe will, if adhered to, secure a good and economical pavement, and recommend the adoption thereof.

F. E. MATHER,
OTIS D. SWAN,
HENRY P. SEE,
BERNARD GAFNEY,
JOHN WEBBER,

} Committee
on the
Law Dep't.

Resolved, That the resolution passed by the Board of Councilmen, November 17, 1854, and by the Board of Aldermen, November 20, 1854, and approved by the Mayor, November 21, 1854, relative to paving Chatham street and square, the Bowery, a part of the Fourth avenue and around Union square, with granite or trap blocks; also, the resolutions on the same subject, passed by the Board of Councilmen, December 19, 1854, and by the Board of Aldermen, December 22, 1854, and approved by the Mayor, December 23, 1854, and all proceedings had under or by virtue thereof, be and the same hereby are repealed, rescinded and annulled.

Resolved, That the Commissioner of Repairs and Supplies be and he hereby is authorized and directed to advertise proposals for estimates for paving Chatham street, from the Russ pavement at or near Spruce street, Chatham square, the Bowery, (excluding the block pavement, from Bayard street to Walker street, also the intersection of Grand street, where already paved with blocks,) the Third avenue to the cross-walk at the northerly side of Sixth street, the Fourth avenue to the cross-walk at the northerly side of Seventeenth street, and the space around Union square, (excluding the part paved with the Russ pavement at the junction of Broadway and Fourteenth street,) with trap blocks, and setting curb stones according to the following specifications, that is to say:

SPECIFICATIONS.

Old Materials, &c.,

All cobble stones, surplus earth and other materials on the ground to be paved, and belonging to the Corporation, excepting curb and gutter stones, shall belong to the con-

tractor, and be by him taken up and removed as the work progresses. He shall also take up the curb and gutter stones and place the same on the outer edge of the sidewalks.

All stones and materials belonging to any railroad company, and necessary to be removed, shall be taken up and removed by such company, as and when it shall be necessary, and the contractor shall request; and in default thereof, said contractor shall take up and remove the same, without disturbing the rails, and at his or their cost and expense.

New Materials, &c.

The curb stones shall be of the best North river stone, smoothly cut on the front to the full depth; ends truly squared to form close and even joints, and throughout of not less than four feet in length, or five inches in thickness, or twenty inches in width, and shall be well and properly set, with the proper inclination, prior to any paving opposite thereto.

The paving shall be of trap blocks, of a durable and uniform quality, each measuring on the face or upper surface not less than six, nor more than twelve inches in length, nor less than three; nor more than seven inches in width, and in depth not less than seven, nor more than eight inches. Blocks measuring nine inches or less in length on the face, shall not be more than one inch shorter at the base than on the face, and no other block shall be more than one and a half inches shorter at the base than on the face.

Blocks measuring four inches or less in width on the

face, shall be of the same width at the base as on the face, and no other block shall be more than one inch narrower at the base than on the face, nor less than four inches in width at the base.

Preparations, &c.

The stones being removed, so much only of the sub-soil shall be removed as necessary to allow a bed of clean sharp sand or gravel, at least five inches deep, under the blocks to be laid, with the proper grade and crown, the surface to be leveled, but no holes or inequalities made or found shall be filled, in whole or in part, with any thing except such sand or gravel as aforesaid, and the whole to be rammed to a level and uniform surface.

A bed of such sand or gravel as aforesaid, then to be placed thereon, at least five inches deep, leveled and rammed in manner aforesaid.

Laying Blocks &c.

The above being done, the blocks shall be laid at right angles with the line of the street, from curb to curb, with well formed gutters, each course to be of blocks of a uniform width, and so that all longitudinal joints shall be broken by a lap of at least two inches. When thus laid, the blocks shall be thoroughly rammed to a firm, unyielding bedding, with a uniform surface, and to the proper grade and crown, but no rammer shall be applied within twenty-five feet from work progressing or not ready to be rammed. When so rammed, the blocks shall be immediately covered with clean fine sand, in proper quantities, and so from time to time, and raked until all

the joints become filled therewith, and the work is made solid and secure.

The contractor shall reset all the frames for man-holes belonging to the sewers, and frames for stop-cocks belonging to or connected with Croton water or gas, on a level with the new pavement, and diagonally with the curb stones and so cut the blocks as to form close and even joints with the frames and curb stones. When new frames are required, he will apply to the Croton Water Board for what may come under their department, and to the gas companies for what may come under their care, and set the same in manner aforesaid, but all expenses attending the obtaining and setting of such frames shall be borne by the contractor.

All materials and labor for the execution and completion of the work above specified shall be procured, furnished and done by the contractor at his cost and expense.

Resolved, That the security to be required from the contractor, shall be forty per cent. of the bid, and that any number of sureties, not less than two, nor more than ten, may sign the bond, provided, collectively, they shall justify in double the amount of such security.

Resolved, That the award of contract, if any, shall be made by the said Commissioner and the Comptroller jointly, and in case of any difference between them, in that respect, the Mayor shall be called in, and act as umpire; and the form of the contract, before being executed, shall be approved by the same persons.

DOCUMENT No. 23.

BOARD OF COUNCILMEN,

MARCH 21, 1855.

The following report of the Committee on Ordinances, in favor of concurring with the Board of Aldermen in the adoption of an ordinance to prevent the driving of swine, below Forty-fifth street, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Ordinances, to whom was referred the report of the Committee on Ordinances of the Board of Aldermen, in favor of preventing the driving of hogs through the streets of the city south of Forty-fifth street, respectfully

REPORT:

That your Committee have carefully considered the draft ordinance annexed to said report, and are of opinion that the same is correct in terms, and well adapted to abate a nuisance so intolerable as the driving of swine through the thickly settled portion of a populous city.

Your Committee do not deem it necessary to embody in their report any arguments in favor of the adoption of the proposed ordinance. The sense of smell, if exposed to the effluvia arising from a drove of swine, when driven through a public thoroughfare would convince the most skeptical of your body of the necessity of some such legislation.

Your Committee therefore recommend for adoption, the following resolution:

Resolved, That this Board do concur with the Board of Aldermen.

OTIS D. SWAN,	} Committee on Ordinances.
F. E. MATHER.	
WM. TRUSLOW,	

The Committee on Ordinances, to whom was referred the petition of Mrs. G. Clinton and others, to prevent the driving of hogs &c., in the city, respectfully recommend the adoption of the annexed ordinance.

New York, February 20th, 1855.

D. D. LORD,	} Committee on Ordinances.
J. W. BROWN,	

ORDINANCE.

The Mayor, Aldermen and Commonalty, of the city of New York, in Common Council convened, do ordain as follows:

1—No hogs, pigs or swine, shall be driven in any of the streets, lanes, alleys, piers, wharves or public places in the city of New York, south of Forty-fifth street.

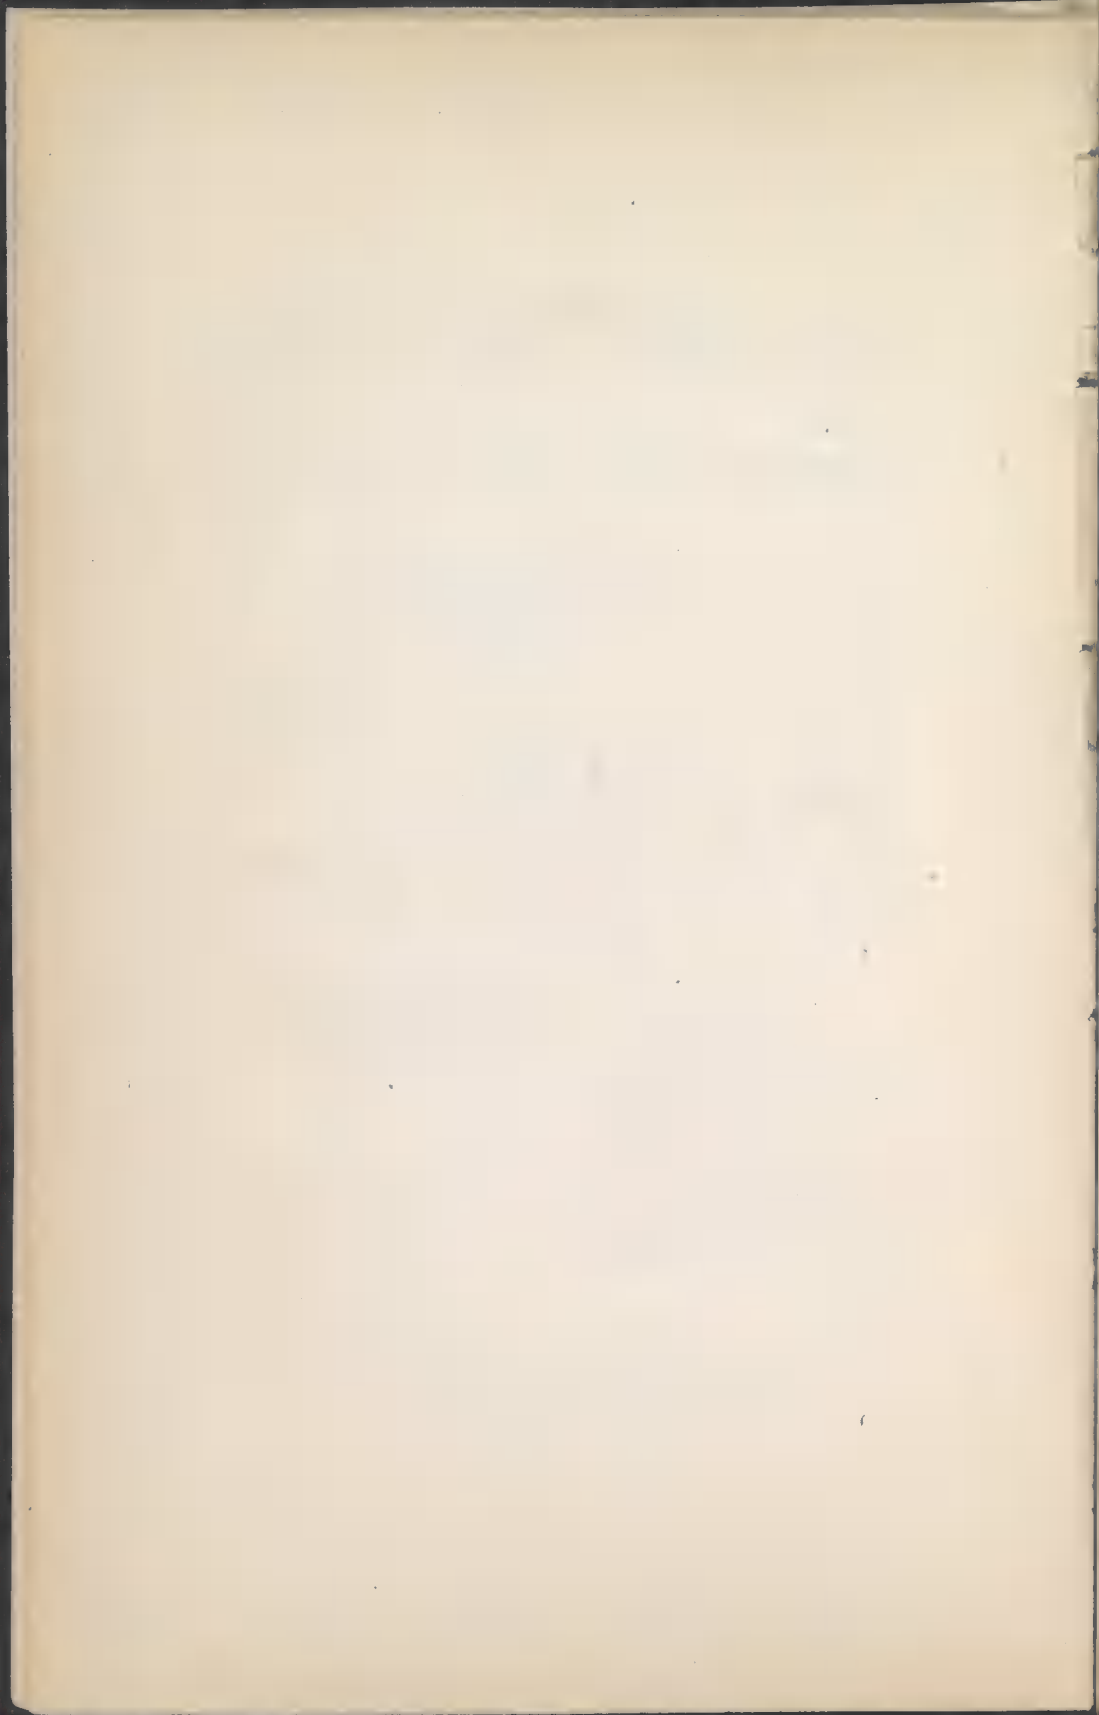

The owner of every such hog, pig or swine so driven, or person having the charge, care or keeping thereof, or

person driving the same, severally and respectively, shall pay the penalty of two dollars for each and every hog, pig or swine so driven, and shall also be deemed guilty of a misdemeanor and punishable therefor.

Your petitioners, owners and occupants of *houses in Fourth street, near Washington square*, respectfully request your Honorable Body to prohibit the driving of hogs through this street, as the *nuisance* is intolerable from the *stench* created by them while passing through, infecting the neighborhood to that degree, (*the hogs* being driven at all hours of the day and night,) that we cannot *leave open our doors* and windows for the purpose of *ventilation* and health. The *nuisance* is insufferable *now* and *much worse* in the *summer months*, when our houses are more *exposed*. The *Park*, intended as a healthy recreation, we are debarred from using, from the unwholesome noxious and unpleasant odor emitted by these animals, which infects the whole area.

DOCUMENT No. 24.

BOARD OF COUNCILMEN,

MARCH 19, 1855.

The following report of the Committee on Public Health, submitting an ordinance to prohibit the slaughter of swine and neat cattle, in the city of New York, below Fiftieth street, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Public Health, to whom was referred the subject of prohibiting the slaughter of animals below Fiftieth street, in this city, respectfully

REPORT:

That they have given the subject that careful consideration which its importance demands, and have come to the conclusion that the practice aforesaid should be limited to the up town districts, and thereby remove a serious nuisance from the citizens residing in the neighborhood of such establishments, as well as a business, by many considered detrimental to the public health.

Your Committee, in view of these facts, and from the circumstance of the proposed change in reality affecting but little the butchers, &c., and that only in compelling them to move their establishments higher up town, causing them but small inconvenience thereby.

Your Committee, therefore, submit the following ordinance for adoption:

J. W. RANNEY, HENRY SMITH, J. T. COUENHOVEN, C. S. COOPER,	{ Committee on Public Health.
---	----------------------------------

AN ORDINANCE

TO PROHIBIT THE SLAUGHTER OF NEAT CATTLE OR SWINE
BELOW FIFTIETH STREET, IN THE CITY OF NEW YORK.

*Be it ordained by the Mayor, Aldermen and Commonalty of
the city of New York, in Common Council convened:*

SECTION 1. No licensed butcher, or his agent, servant or other person, shall slaughter any swine or neat cattle in the city of New York, south of Fiftieth street, thereof.

§ 2. Every butcher or his agent, servant, or other person, violating section first of this ordinance shall be subject to a penalty of not less than fifty dollars for each and every offence, to be sued for and collected by the Corporation Attorney.

§ 3. This ordinance shall take effect on the first day of January, 1856.

DOCUMENT No. 25.

BOARD OF COUNCILMEN,

MARCH 23, 1855.

The following communication was received from His Honor the Mayor, vetoing the resolution in favor of reducing the size of the proposed Central Park; which was directed to be entered at length on the Minutes, published in the newspapers employed by the Corporation, and printed in document form.

C. T. McCLENACHAN, *Clerk.*

MAYOR'S OFFICE, NEW YORK, }
March 23, 1855. }

To the Honorable the Board of Councilmen:

GENTLEMEN:—The Board of Councilmen passed, April 3d, 1853, a resolution, memorializing the legislature to curtail the dimensions of the proposed Central Park. This resolution was introduced by a lengthy report, from the then Committee on Lands and Places, the statements and arguments of which, no doubt, influenced its passage. The subject remained without further action, during the whole

of the term of the late Common Council; and until the 15th March, instant, when the Board of Aldermen, without awaiting your decision on the same subject, now under deliberation, passed the proposition of the Councilmen of last year.

This resolution has been laid before me for my approval, which, after deliberation, and a careful examination of the facts and arguments set forth in the report, I find it impossible to give, consistent with my own convictions of duty.

Though it proposes, only to take from the Central Park a portion of the area agreed upon, still, it will be in effect, a blow at the whole.

Any proposition having for its aim an interference with the work as originally devised, and which will encourage delay, and retard the proceedings of the commission, already too long protracted, will, in my opinion, jeopard the success of the most intelligent, philanthropic, and patriotic public enterprise, which has been undertaken by the people of this city, since the introduction of the waters of the Croton river.

I had supposed, that the necessity for defending the Central Park had ceased; that the opposition, before raised, had subsided, and that time and reflection had enabled all to appreciate its advantages, not only to the present, but to all succeeding generations. In my second message to the Common Council, of January 11th last, in alluding to the subject, I say, "there can be no doubt as to the necessity of some such park, conveniently located on this island.

"In my opinion, future generations who are to pay the expense, will have good reasons for reflecting upon us, if we permitted the entire island to be taken possession of by population, without some spot like this devoted to rural beauty, healthful recreation and pure atmosphere."

These views have been confirmed by subsequent observation. The opportunities which the duties of my office give for a survey of this great city, its vast financial, commercial and manufacturing advantages, the inherent seeds it contains of a growth far beyond the comprehension of the most visionary enthusiast, all force upon me the necessity of some such reservation.

We will be derelict, if by any narrow or selfish feeling of present saving, we deprive the teeming millions yet to inhabit and toil upon this island, of one place not given up to mammon, where they can, even if but one day in the year, observe and worship nature, untarnished by conflict with art. To admit the necessity of a great park, and to assert that this will be too large, is, in my opinion, an exceedingly limited view of the question, and entirely unworthy of even the present position of this metropolis, to say nothing of a destiny now opening so brilliantly before us.

Let us not follow our Dutch ancestors in their views of municipal prudence, who considered cow-paths as proper sites for streets and avenues, inasmuch as they saved the necessary expenses of surveys, &c. To have suggested to the original Knickerbockers, the propriety of laying out and regulating wide and evenly graded streets, commensurate to the wants of the city, as it now is, would have been met by the wise fathers of that day, with arguments

derived from the same principles and views, as are now used with reference to this subject, by its opponents.

Let New York follow up the noble spirit asserted so boldly in the introduction of the Croton water. The aforethought, and comprehensive policy embodied in that masterly proposition, is now universally respected and admired, as will be, at no distant day, that to open Central Park. Being imbued with these sentiments, I can never give my consent to any measure, which will throw an obstacle in its way, much less to abolish or curtail it.

But, admitting the park too large, and that it should be diminished, this resolution proposes to do it in an improper manner, inasmuch as it asks, that the only portion of it that can be accessible to the foot passenger now, shall be lopped off, and, in fact, remove it nearly a mile further off from the present densely populated part of the city. This resolution asks, that instead of Fifty-ninth street, Seventy-second street shall be the lower boundary, or, in other words, that the park shall be removed thirteen blocks further into the interior, and, at present, almost uninhabited part of the island. If there is to be a curtailment, let it be rather from the other end. Instead of lopping off the lower and most accessible part, take it from the upper portion.

Besides these objections, there are others entitled to weight. Many lots, comprehended within the part to be cut off, were purchased of the Corporation, under its sales, at auction, anterior to the passage of the act for this park. These have been relinquished to the city, the purchase money repaid to the buyers, by order of the Common Council. And again, owners of lots within the area proposed to be taken, would, in my opinion, have just claim

against the city, for any damages that they may have suffered, in consequence of closing to them all opportunities for improvements, enjoyment, or favorable sales, by the existing act, to take possession of their lots for public purposes. The damages arising from the passage of this resolution, may amount to nearly as much as the expense to the city of the land to be taken by it.

Inasmuch as the action of the Board of Aldermen was based upon the report referred to, without any report of their own Committee, it may not be improper for me to correct some of its errors of facts, I am the more induced to this, as it is evident that the public have been misled by this report. It states that the area of the park, excluding the State Arsenal and the reservoir, will be 750 acres; that the number of building lots comprehended, will be 13,521, and that the total cost cannot be less than fifteen millions of dollars. These statements are erroneous, as will be shown by the following extracts from my message, before referred to, which contains reliable and authentic data and information upon these points.

“ It will be remembered that this park is to be bounded south by Fifty-ninth street; north, by One hundred and sixth street; east, by the Fifth avenue, and west, by the Eighth avenue, and will comprehend an area of seven hundred and seventy-six acres, say,..... 776

From which deduct State Arsenal, say..... 14

“ “ Croton Reservoir..... 38

“ “ Proposed “ 112

“ “ Streets and Avenues..... 190

“ “ belonging to the city..... 34 388

Leaving to be paid for—acres..... 388

Which, by estimating at sixteen lots per acre, makes six thousand two hundred and eight lots to be paid for by the city, and by assessments upon contiguous property. The important question of the valuation of these lots has not as yet been positively fixed by the Commissioners. The subject is now before them, and I advise all who are interested to appear at their office. Another question of much public interest, in connection with this matter, is the territorial limit to which the Commissioners shall extend their assessments upon property of individuals, and what proportion of the whole cost shall be made a tax upon the city.

“These questions are entirely under the control of the Commissioners. I am informed, unofficially, that the disposition of the Board is to extend the area of assessment three blocks east and west, and a greater distance north and south, and to make two-thirds of the whole cost payable by the city. If this be the determination, it can be easily ascertained about what sum the park will cost. Estimating the average value of the land at five hundred dollars per lot—a liberal estimate—the whole cost would be three millions one hundred and four thousand dollars; deduct one third to be paid by individuals whose property is supposed to be benefited, it will leave two millions sixty-nine thousand dollars to be paid for by the city.”

Much surprise is manifested at the apparent delay of the Commissioners. I am without any official information as to their proceedings. The whole scope of their duties appears to me to be very simple, and easily accomplished. I do not see any reason why they should consume so long a time. As far as my inquiry has extended, I have been

unable to discover, in any quarter, information of what has been done, or is being done by them, beyond what is contained in this extract from my message of January 11.

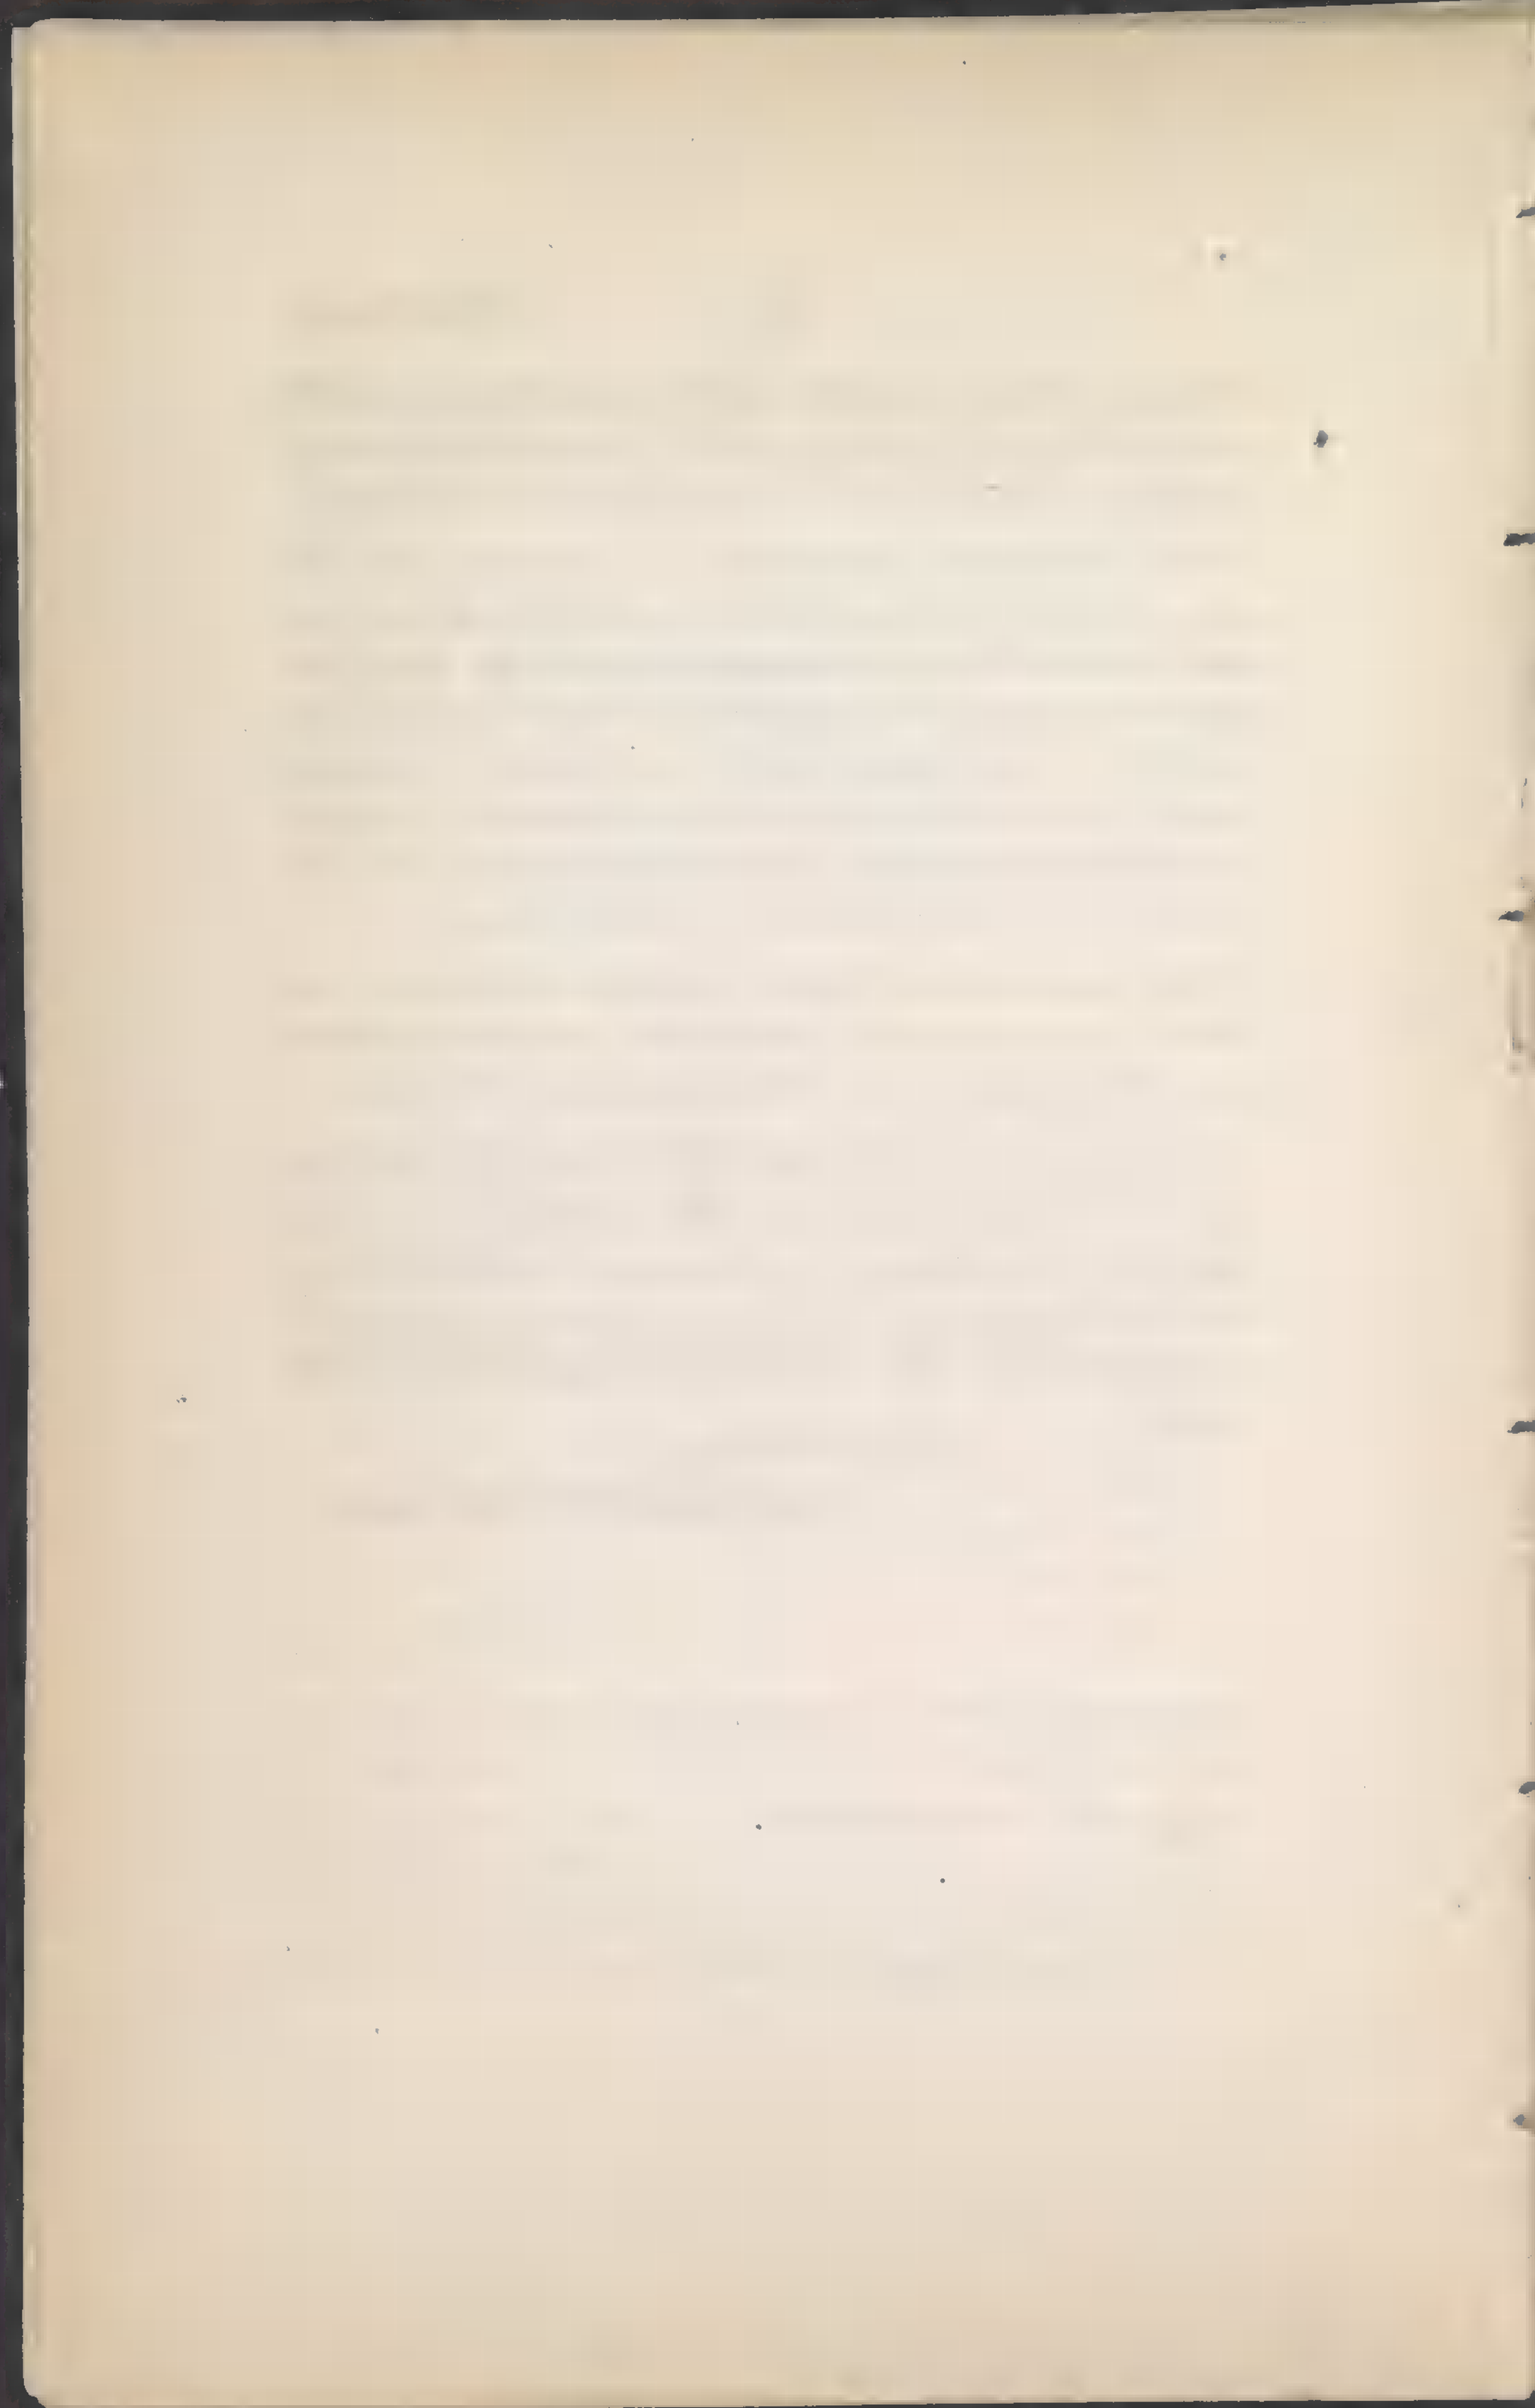

The Counsel to the Corporation has volunteered his services to the Board, without compensation, and has, with commendable liberality, furnished gratuitously, much valuable information, tending to facilitate the work, and give the people speedy possession of its promised advantages. Had all interested evinced as much enthusiasm in its favor, I am quite certain many hundred workmen and laborers would now be employed toward its completion.

For these reasons, herein briefly and imperfectly set forth, I cannot sign this resolution; it appears to me to have been passed under a misapprehension of the facts.

With respect for the opinion of others who differ from me, and with a repugnance to the position of apparent hostility to the action of the Common Council, which my duty forces upon me, I beg leave to return the resolution to decrease the size of Central Park, without my approval.

Very respectfully,

FERNANDO WOOD, *Mayor*.

DOCUMENT No. 26.

BOARD OF COUNCILMEN,

MARCH 23, 1855.

The following communication from the Comptroller, in relation to leasing the docks and slips, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, March 20, 1855. }

To the Common Council:

The Comptroller respectfully submits to the Common Council, for their sanction, a list of the several piers, bulkheads and slips, belonging to the city, and which were bid off, at public auction, on the 14th instant, showing the number of the pier, the name of the purchaser, and the amount of the bid in each case. This statement is annexed and marked No. 1.

There is also a statement, (No. 2,) which shows the rent paid for the same piers in 1853, and previous; and also

in 1854, and the sum bid for the year commencing May 1st, 1855.

There exists a difference of opinion, in regard to the time of leasing the piers, and the conditions as to repairs, &c. It may therefore not be inappropriate to present some of the considerations which have had influence with the Commissioners of the Sinking Fund, in fixing on a period of five years; and some of the facts which induce them to believe, that the pecuniary interests of the city will be benefited rather than injured, by the condition requiring the lessees to keep the piers in repair.

The ordinances of the Common Council make provision for leasing the piers for one, three or five years.

By the ninth section of the ordinance of 1844, the Comptroller, with the sanction of the Finance Committees, may let the piers, "for a term not exceeding *one* year, if, in his judgment, it will be beneficial to the public interests to do so."

By an ordinance passed in 1851, the Comptroller is authorized to lease the piers, at public auction, for a period not less than one, nor more than three years, with the usual covenants, and "such other stipulations as the Comptroller may deem expedient."

The tenth section of the ordinance of 1844 provides, that whenever, in the judgment of the Comptroller, it shall be more advisable to lease property, for a longer period, "it shall be his duty to communicate the same, with his reasons therefor, to the Commissioners of the Sinking Fund, and if they concur with him, they are authorized

and empowered to lease the same, in such manner, as they may deem most fit, for the interest of the city," but not for a longer term than five years.

In 1853, the Commissioners acted under the tenth section, and the piers, which were then to be leased, were bid off for five years, to be repaired by the city. In 1854, the Commissioners passed a resolution, to lease them for five years, and to have the lessees keep them in repair. They were sold, however, for one year, under a resolution of the Common Council.

On the 3d day of February last, the Comptroller made a report to the Commissioners of the Sinking Fund, recommending, that the piers should be leased for five years, and with a covenant, that the lessees should make all the repairs. A copy of this report is appended, and marked No. 3, in order that the Common Council may have before them all the reasons and facts on which the Commissioners acted.

In addition to this, it is proposed to give a few facts, in relation to the practical operation of leasing the piers, and repairing them by the city; and the effect of these operations on the revenues of the Sinking Fund, the tax payers, and those engaged in commercial pursuits.

The south half of pier No. 20, at the foot of Dey street, North river, with westerly end, was leased, in 1851, for three years, at one thousand eight hundred and seventy-six dollars; to this was added two hundred and forty-two dollars for an extension, making the rent two thousand one hundred and eighteen dollars. On this allowances were made in 1852 and 1853, to the amount of eight hundred

and eighty-five dollars, for want of six feet water, at low tide, in the slip, for pressing out the pier, by filling in behind the bulkhead, &c.

In 1853, an allowance of eight hundred and fifteen dollars was also made, for damage to the lessees, in consequence of tearing up the pier, in making bulkhead, the sliding out of the bulkhead some fifty feet, &c. These sums make a total allowance of one thousand seven hundred dollars; and, if this sum be taken from the rent of two years, four thousand two hundred and thirty-seven dollars and twenty cents, it leaves the sum of two thousand five hundred and thirty-seven dollars and twenty cents, as the net proceeds, equal to a rent of one thousand two hundred and sixty-eight dollars and sixty cents per annum. But, throwing out the eight hundred and fifteen dollars allowed for interruptions, in constructing, and damages, by sliding out of the bulkheads, it would leave the net proceeds of the annual rent at the sum of one thousand six hundred and seventy-six dollars and ten cents.

At the auction sale of piers, in March, 1854, the half of pier No. 20 sold for five thousand and fifty dollars, for one year, with a stipulation at the sale, that the pier was to be repaired by the city; or if the lessee made the necessary repairs, the cost should be deducted from the rent. There was allowed to Stevens, Condit & Co., for damage, before the repairs were made, the sum of three hundred and sixty dollars. The lessees then repaired the pier, at a cost of one thousand three hundred and eighty-nine dollars and sixty-four cents, which was deducted from their rent. Take this sum from the gross sum bid for the pier, five thousand and fifty dollars, and it leaves the sum of

three thousand three hundred dollars, as the net proceeds of the south half and end of pier No. 20, for the year ending April 30, 1855, which is one thousand six hundred and twenty-four dollars more than the net proceeds of either 1853 or 1852. But this is not the whole gain to the city; the allowance of one thousand three hundred and eighty-nine dollars and sixty-four cents was for a substantial repair of pier No. 20, covering a portion of the north half, not embraced in the lease of Stevens, Condit & Co.

If this sum be added to one thousand six hundred and twenty-four dollars, it makes a total of three thousand and thirteen dollars and sixty-four cents, as the fair net gain to the city in 1854 over 1853, by this mode of renting and repairing the pier.

The occupants of the south half of pier No. 20, at the auction on the 14th instant, bid off the portion occupied by them for five years, for the sum of five thousand dollars per annum, with a distinct understanding that they are to make all the repairs for the whole term, "damage by the elements alone excepted," as stated in all the leases.

On the 23rd of March, 1854, piers Nos. 45 and 46, North river, were rented for one year to Hugh Miller, for six thousand one hundred dollars. On the first of April following, the Street Commissioner gave out contracts to repair both of these piers; the two contracts amounting to the sum of six or seven thousand dollars. The fidelity with which one of these jobs (costing near four thousand dollars) was executed, is fully set forth in Doc. No. 48 of the Board of Aldermen for 1854. The manner in which repairs are done by jobbers under the auspices of the city government, has a very important bearing on the ques-

tion, whether it is best to have repairs made by the lessees or by the Street department; and every person who desires to act understandingly in this matter, will be aided by a perusal of the facts presented in the document referred to. And those who represent, and who are bound to watch over the interests of the city, may be assured that this is only one of a class of cases, which draws many thousands of dollars annually from the tax payers.

But to return to the lessee, who had given bail to pay the city six thousand one hundred dollars for the wharfage to be derived from these piers in one year:—when the first of May arrived, and he wished to make arrangements for the use of the piers, they were found to be in the possession of a contractor. The result was, that when the first quarter's rent became due, the following allowances were made to the lessee for loss of the use of the pier, while repairs were going on, viz:

On pier 45, loss of forty-nine days.....	\$496 19
On do. 46, " twenty-six days.....	211 90
	<hr/>
	\$708 09

He was also allowed on the above piers, and including 47, for slips not excavated, the additional sum of.....	766 91
Also, on 47, for interruptions in building a sewer.....	202 74
Incumbrances on 48.....	50 00
Repairs done by the lessee on 47 and 48	102 24
	<hr/>
	\$1,829 98

With the exception of two hundred and two dollars and twenty-four cents, expended for repairs, the whole of this

sum was a loss of revenue, without any corresponding equivalent to the city.

The contract for repairing pier 45, by Wm. H.

Adams, was	\$3,941 00
Expended by the lessee.....	202 24
	<hr/> \$4,143 24

Add allowance for loss of 49 days.....\$496 19

Do. one-third of sum paid for want of

dredging for three piers	\$255 63	751 82
	<hr/>	<hr/> \$4,895 06

Here is a pier, extended 350 feet in the winter of 1854, at a cost of nine thousand one hundred and ninety-eight dollars and eighty cents, rented in March of the same year for three thousand one hundred dollars, on which four thousand eight hundred and ninety-five dollars and six cents is expended in repairs and allowed for damages, thus exceeding the whole rent by the sum of one thousand seven hundred and ninety-five dollars and six cents. This pier was rented in 1853, before the extension, at one thousand and fifty-five dollars. Ten per cent. on the cost of the extension would be nine hundred and nineteen dollars and eighty cents, making a total of one thousand nine hundred and seventy-four dollars and eighty cents. It was rented at the recent auction for three thousand and fifty dollars per annum, for five years, and the lessees to make all the repairs.

Pier No. 31 East riyer and half of bulkhead, between Nos. 31 and 30, and west side of pier No. 32, and bulkhead between Nos. 31 and 32, were leased to H. A. Williams, in 1854, for three thousand nine hundred and fifty dollars. As

the occupation of half the bulkhead and half the slip on the west side of No. 31 interfered with the vessels engaged in carrying away manure and street dirt, an arrangement was made with the lessee to occupy the west side of the pier with a single line of vessels, and an abatement of one thousand two hundred dollars was made in the rent, leaving the total for the two piers at two thousand seven hundred dollars. The lessee proved his losses, for want of having the slips dredged out, at four hundred and fifty dollars per quarter. After allowing two quarters at this rate, the Comptroller told the lessee he would make no further abatement except to allow for dredging out the slip. This was done, and an allowance of two thousand one hundred dollars was made for dredging out the slip.

The rent of these piers, previous to 1854, was one thousand eight hundred dollars, and the city made the repairs. Mr. Williams, at the late sale, bid off the same piers, with the privilege of one tier of vessels on the west side of pier No. 31, for the sum of three thousand one hundred dollars; and he is to make all the repairs, having the advantage of the dredging, which cost the city the round sum of two thousand one hundred dollars.

The Virginia Steamship Company rented half of pier No. 13, North river, in May, 1854, for the sum of five thousand three hundred and fifty dollars. The company replanked their part of the pier, and made other repairs, amounting to a total of seven hundred and fifty-nine dollars, leaving the net proceeds of the rent at four thousand five hundred and ninety-one dollars. The annual rent of the whole of pier No. 13, for three years, previous to 1854,

was three thousand five hundred and sixty-four dollars, a portion having been used for dumping street rubbish. If one thousand and twenty-seven dollars be allowed for this, it still shows, that the net proceeds of one *half* the pier, in 1854, is equal to the sum derived from the *whole* pier in 1853, and previous.

With the other half of pier No. 13, rented by the Parker Vein Steamship Company, there may be a loss of a portion of the rent, by the failure of the original company. The amount received, to the present time, is one thousand eight hundred and seventy dollars and fifteen cents; and the sum to be paid by the present lessee, will make a total of three thousand one hundred and sixty-seven dollars and sixty-five cents. The present lessee has been allowed, for replanking half the pier, six hundred and twenty-eight dollars and thirty-seven cents, the net proceeds of the rent being two thousand five hundred and thirty-nine dollars and twenty-eight cents. If nothing should be recovered on the pending suit with the Parker Vein Company, the city will still realize seven thousand one hundred and thirty dollars and twenty-eight cents for the whole pier, for 1854, after allowing a rebate of one thousand four hundred and twenty-one dollars for repairs. At the sale on the 14th instant, this pier was bid off at six thousand dollars, and the lessees to do all the repairs.

Under the ordinance of 1851, before referred to, numerous piers were leased for three years, and a covenant was added, that the Corporation would dredge out the slips, so as to give *six feet water at low tide*. The allowances for non-compliance with this covenant, have been

very numerous; among these allowances are the following, in 1853 and 1854, viz:

Pier No. 44,	L. A. Edwards,	slip not excavated.	\$441 37
" 45,	"	" ..	518 01
" 46,	"	" ..	439 56
" 47,	"	" ..	568 47
" 50,	"	" ..	375 60
" 51,	"	" ..	510 76
" 52,	"	" ..	434 90
" 53,	"	" ..	511 96
" 55,	"	" ..	151 80
			<u>\$3,952 43</u>

This was an allowance, not for dredging done, but for that which was promised to be done by the city, and omitted to be done.

Cases of a character similar to the foregoing, are very numerous. It is hardly necessary to multiply them, to convince the members of the Common Council of the pecuniary losses growing out of the system, which has prevailed for many years, and that the city can hardly be exposed to hazard, by changing it for a new one.

It may be said, that the lessees will neglect the repairs, and that the public property will, consequently, deteriorate. To a certain extent this may be so. But the great body of men engaged in business, will find, that the security of their own property will require them to keep the piers in a sound condition. It is also covenanted in the lease, that the lessee "will keep the wharves in good condition, and safe and proper repair, including the string

pieces, and other superficial portions thereof, for safe usage, and, in default of their so doing, at any time, after notice from the Comptroller, or other proper officer of the city, that such repairs are necessary," and ten days thereafter, the city may repair the same, at the cost of the lessee.

In case the piers are in such a state of decay as to require rebuilding, this can be done, on a petition to the Common Council, and a stipulation to pay an increased rent of ten per cent. on the cost of the new structure. This is the rate prescribed by the lease, where piers are extended.

In addition to the allowances before noticed, there are others, where piers are extended, and where they are taken, and appropriated for ferry purposes, which have made heavy drains, in various forms, on the revenues of the treasury. Some of these are exhibited in the statements of Edwards and Darrow, appended to Document No. 48, before referred to.

In the year 1852, the ferry grants at Roosevelt and Catharine streets, and the consequent extension of piers, and the appropriation of others, for dumping manure, &c., gave one lessee claims, not only for a large rebate of rent, but for damages, to the amount of several thousand dollars, on account of prospective profits. And there was allowed to him, on account of piers at Catharine street, Jefferson street, James' slip district, pier No. 30, and slip to ferry, up to November, 1853, the sum of five thousand and thirty-seven dollars and sixty-three cents. These piers and slips having then been taken entire possession of by the city, for dumping and ferry purposes, the rent for the

Among the several plans submitted the Committee have made selection of one which was prepared, upon information received, after much patient thought and investigation, with direct reference to this view of the matter, and which is fully adapted to meet all the contingencies and conditions required. They are the plans of Messrs. Gilbert, Jackson and Stuart, which, in the opinion of the Committee, far excel all the others in beauty of design and adaptation to the wants of the city.

The letter of these gentlemen, containing a statement of their views, and a brief description of their plans, by which they were accompanied, is appended to this report, and is marked B.

The general features of these plans are as follows:

A building on Chambers street, with wings extending on Broadway and Centre street, which shall be harmonious in their architectural proportions, ornaments and elevations, and at the same time in architectural harmony with the present Hall.

The front on Chambers street will be 520 feet in length, and the wings on Broadway and Centre street will be 365 feet in length, and to extend within 40 feet of the front line of the present Hall; the inner wall of these wings will be about 35 feet from the ends of the same; and the new structure, with the present Hall, will thus form a quadrangle, with an open court in the centre, between the buildings. The dimensions of this court will be about 190 feet by 295, and will be approached by side-walks and carriage-ways between the wings and the present City Hall.

The wing on Broadway will stand about 55 feet from the railing; the front on Chambers street will be about 61 feet from the railing; and the front on Centre street will be about 76 feet from the railing.

The whole edifice will be three stories above the basement, the floor of which will be one step above the sidewalk, with a cellar under the whole building.

The architects state that before they matured these plans they made a most careful estimate of the wants of the city, after consultation with different departments, clerks of the several courts, and others having great experience in our public business, and that these plans were projected and drawn with direct and simple reference to the absolute necessities of the city in the matter of the number and size of the rooms required, and with no other purpose; their undertaking has been only to contribute the result of their experience and information to the settlement of the question, and to furnish the city with the design for a building which shall unite all the considerations of utility, convenience and economy with the requisite degree of architectural beauty and harmony.

It is intended to provide a sufficient number of large rooms on the inner range of the building, overlooking the court, for the accommodation not only of the law courts, but for all other kinds of business, where quietness and seclusion from the bustle of the streets is absolutely indispensable.

These are some of the desired advantages of these comprehensive and beautiful plans over all others which have been before the Committee, and the Committee believe

that a building erected in accordance with these plans will not only meet the requirements of the public, the heads of departments, the law courts and the United States courts, but will be an ornament to the city and an evidence of the judicious policy of those who now have the control of its civil affairs.

The specifications prepared by the architects contemplate a perfectly fire proof building, so that in all the requisites of safety, and corresponding arrangements and appointments, the structure shall completely answer the purposes of its erection, and be a safe depository for the immense mass of records which will be placed in the archives of the department.

In regard to the material of the building, the Committee entertain the opinion of the architects, that it should be marble, according to their specifications. Beyond doubt the best material should be used, and it is believed that marble, for many reasons, is preferable to any other.

There are, in the vicinity of our city, several quarries of fine marble, which have long been celebrated for building purposes, the most prominent of which are those of Westchester county, and Lee, Massachusetts; of these, that of the Lee quarry is superior to the others, being of a finer and more compact kind. The coarser lime-stone of Westchester, while it affords, undoubtedly, a very fine building material, is, however, inferior in quality to that of Lee, and does not admit of the same excellence of finish as the latter.

There is a trifling difference in the price of the rough blocks in favor of the Westchester marble, which is occa-

sioned, however, by the difference in the cost of transportation, the distance being somewhat further. This difference is, nevertheless, more than compensated for by the finer quality of the stone, and especially by the saving which will be made in the cost of cutting and finishing. It is well understood that the saving in cost of working up the Lee marble from the rough block is an item of some consequence, being about five per cent. This cost of labor being very much greater than that of the rough material, makes, in the aggregate, a difference, perhaps, of ten to fifteen per cent. in favor of the Lee marble.

In working and finishing the columns, mouldings, ornaments, &c., the difference, in regard to appearance, elegance and cost will be very considerable in its favor.

Should it be objected that on so large a building, the amount of five per cent. is an item that should not be disregarded, the Committee reply that this is the reason why they recommend the better material; for while it costs more to place it on the ground, it will cost much less to work and finish it. But admitting that there be a balance in every respect as regards mere cost, in favor of the Westchester marble, the superiority of the Lee material still prevails with the Committee in giving it their preference.

The amount required will be, in round numbers, only about one hundred and twenty-five thousand feet; and while the city is building a Hall which will stand for a very long period of years, it should be of the best material.

The probable number of feet which will be required to erect the building being known within a few hundreds,

and the price being given, it is ascertained to a certainty, that the difference in cost of the Lee marble cannot exceed about twenty thousand dollars, a sum which should not be allowed to influence a decision in favor of an inferior material.

The Committee, therefore, recommend that every consideration be given to this marble, with a spirit of independence uninfluenced by any minor and trifling considerations.

Your Committee submit the following resolution for consideration:

Resolved, If the Board of Aldermen concur, That the plans and specifications for a new City Hall, presented by Messrs. Albert Gilbert, Thomas R. Jackson and Henry L. Stuart, be and the same are hereby approved; and the Commissioner of Repairs and Supplies is instructed to advertise for proposals for the erection of the said building, according to law, and send the same to the Common Council for confirmation.

J. T. COUENHOVEN, GEO. A. BARNEY, JOS. A. JACKSON, HORATIO REED, G. M. RADLEY,	}	<i>Committee on Repairs and Supplies.</i>
--	---	---

SPECIFICATIONS

Of the materials and work required in the erection and completion of a new CITY HALL BUILDING, proposed to be erected in the Park, fronting on Broadway, Chambers and Centre streets, according to the design submitted by A. GILBERT, T. R. JACKSON and H. L. STUART.

THOS. R. JACKSON,
Architect,

New York, March, 1855.

DIMENSIONS.

The said building is to form a hollow square, with a front on Broadway and a front on Centre street, of the same dimensions, being 365 feet; the wings on said fronts are to be 100 feet, and to project 15 feet from the main building, and between the wings there is to be a colonnade, 20 feet wide, with double entrance, steps and balustrade. The front on Chambers street, is to be 520 feet, with a centre projection of 116 feet, with a portico, and to be surmounted by a dome. The wings on this front are to be 115 feet, and to project 30 feet from the main building. The wings on the Park front are to be the same as on the Chambers street front. The main building on Broadway, Chambers and Centre streets, is to be 100 feet in width, exclusive of projections. The entrance halls on Broadway and Centre street are to be 35 feet wide; the entrance hall on Chambers street is to be 50 feet wide; the corridors are to be 15 feet wide. The sizes of the various rooms are to be as marked on the plans. In the second story of the Broadway front, there is to be a grand recep-

tion hall, finished up to the roof, and to have a gallery all round on a level with the third story floor. For further particulars in regard to the dimensions of the building; the arrangements of the stories, and the carrying out of the design, reference must be made to the several plans, elevations and sections accompanying these specifications. All necessary detail and working drawings will be furnished for every part of the work throughout.

The building is to set back such distances from the Park railing, on the streets, as is shown on the map of the northerly end of the Park.

It is proposed in this design to remove the Court houses and Rotunda in the north-east corner of the Park, and also the Hall of Records building. The contractors will be required to take down the said buildings, and such of the materials as are accepted by the Superintendent may be used in the erection of the several departments of the new building.

HEIGHT OF STORIES.

The Cellar..... is to be 8 feet high.			
"	Basement.....	"	12 " "
"	First Story.....	"	20 " "
"	Second "	"	18 " "
"	Third "	"	16 " "

All the above heights are to be in the clear between the floors and ceilings, when finished; the breastwork and pediments are to be carried up, as shown on the sections. The top of the basement floor is to be two feet above the crown of the street curb on Chambers street, which point is to be taken for the grade line of the building all round.

MATERIALS AND WORK.

All the materials of every kind used in the several departments, required to erect the said building, are to be of the best quality of their respective kinds, and all the several works are to be executed in the best, most workmanlike and substantial manner, and the whole to be done under the direction of the Superintendent, who shall have power to reject any material and work that he may consider not to be in accordance with these specifications; and such rejected materials or work must be taken down and removed from the premises by the contractor within twenty-four hours after written notice thereof has been given by the Superintendent.

The different materials required for the several erections must be furnished and delivered on the ground, ready to go in their respective positions so fast as the progress of the building demands; but no rough or unwrought material will be allowed on the premises for the purpose of being worked, unless considered absolutely necessary by the Superintendent. No contractor will be allowed to obstruct the necessary cartways and passages around the building, nor to occupy any of the streets or side-walks outside the inclosure. The several contractors are to furnish all their own scaffolding and rigging, and materials for setting, and are to set all their own work complete, which is to be at their own risk of damage until accepted by the Superintendent. The contractors are also to furnish and employ a watchman to guard the premises at night, and also a man during the day to attend the gates of the inclosure.

EXCEPTIONS.

The following items are not included in these specifications, and are not to be estimated for; the ventilating and heating apparatus; the plumbing; the gas-pipes and fixtures; the flagging, grading and other work outside, and not connected with the building.

MASON'S WORK AND MATERIALS.

The contractor for the mason work will be required to clear the ground of all its present incumbrances. All old materials that are accepted by the Superintendent may be used in the new building. All rejected materials and rubbish are to be carted away.

OFFICE, &C.

On the premises, where directed, build a suitable brick office for the Superintendent, fifteen feet by thirty feet, one story, nine feet high, with two rooms, plastered and finished complete, so far as the mason work is concerned. Also build a suitable privy sink for the use of the workmen, and clean out and fill up the same at the completion of the work.

SHEET PILING.

Sheet pile all round to the depth of thirteen feet below the curb stone, in the best and most substantial manner, to prevent all caving in of embankments and protect the foundations while they are being put in. The earth is to be filled in and rammed down solid as the walls are built up, and no timbers are to be built around or in the walls. The foundations are to be put down in not less than fifty feet sections.

EXCAVATIONS.

Do all excavating of every kind necessary for the formation of the cellar, areas, &c., and for the reception and completion of all the foundations, which are to go down thirteen feet below the curb stone.

All superfluous earth and rubbish are to be carted away, and the premises and streets cleared up and regulated as the building is completed.

CONCRETE FOUNDATIONS.

Underneath all the external walls, put down a course of concrete foundation twelve feet wide, and underneath all the internal partition walls, piers and columns, put down a course ten feet wide, and all to be one foot thick. The concrete is to be made with the best Kip's bay or Spuyten-devil stone, broken up in irregular pieces, of from three to five inches diameter, mixed in suitable proportions with the best hydraulic cement; the trenches are to be leveled to receive the concrete, which is to be rammed down and puddled solid as it is thrown in. The concrete foundations are to be a continuous course underneath all walls, openings, piers and columns.

BASE COURSES.

There is to be a double base course underneath all the foundation walls. The bottom or first course underneath the external walls is to be ten feet wide, formed with two stones, five feet long and from two to three feet wide; the top course is to be one stone six feet long, and from two to three feet wide. The bottom or first course underneath the internal partition walls, and pier and column founda-

tions is to be eight feet wide, formed with two stones four feet long, and from two to three feet wide; the top course is to be one stone five feet long, and from two to three feet wide. All the above are to be the best quality of Kip's bay, or Hyde park base stone, from ten to twelve inches thick laid in cement, edge to edge, with close joints, and all bedded and filled in solid, with cement and blue stone spawls. All the stones are to be laid crossways of the walls, the top course to break joints with the bottom course, and all to be set in the best and most careful manner, with derricks, and great care to be taken in bedding the stone perfectly solid.

FOUNDATION WALLS.

All the external foundation walls and the internal partition walls and piers are to be the thickness figured on the plans. All the above are to start on the base courses; the foundation and internal walls of the building are to be built up to receive the basement floor beams; the area walls and foundations for steps are to be built up the necessary heights to suit the grade. All to be the best quality of Kip's bay or Spuyten-devil stone, of large size, flat bedded, with good beds and builds hammered square and laid in the best manner, in cement mortar; the work to be well bonded, and tied together with heading stones running through the walls, and all the walls are to be leveled up to receive the superstructure with a course of stone the full size of the walls. All the walls that show are to be faced, and the joints neatly pointed. No stone to be set edgeways, but all to have as much bed as build.

COUNTER ARCHES.

Underneath all openings throughout the building, build counter arches, sixteen inches deep, as wide as the walls are thick, to be the best quality of selected hard burnt North river brick, laid in cement with close joints thoroughly grouted and keyed up solid the walls are to be cut up to a centre, with a fair bed to receive the arch, and each course of brick work in the arch to be laid to a centre with alternate heading and stretching courses so as to make the most solid and perfect work.

BRICK WALLS AND BACKING UP.

The brick walls that start in the cellar are to be two feet thick in the cellar and basement; twenty inches thick through the first and second stories, and sixteen inches thick through the third story and attic up to the roof. The brick walls that start in the basement are to be two feet thick through the basement and first story, and twenty inches thick through the second and third stories and attic up to the roof.

All the external walls are to be backed up as shown on the sections, with a solid wall, then a four inch hollow space, and then an eight inch wall inside, to plaster on; the eight inch wall to be well tied to the solid wall, with eight inch withes at every jamb, and also, at about every two feet apart. All the above work is to be built with the best quality of hard burnt North river brick, laid in the best manner in cement mortar; the joints are to be well flushed in solid, and the walls thoroughly grouted at every fourth course in height.

FLUES AND ARCHES.

In all the internal partition walls build flues eight by twelve inches, two for each room, commencing in basement. Also build twenty flues twelve by twelve inches for smoke flues, commencing in the cellar, and to be built up to the apex of the roof. All the flues are to be built the same size all the way up, kept smooth and even, and the joints pointed up, or to be built round dummies, grouted with cement, as the Superintendent may direct. The hollow walls are to be built smooth, and the joints struck inside, and all the droppings to be cleaned out as soon as the roof is on the building.

All the flues must be thoroughly examined and cleared out before the plastering is commenced; over all the openings throughout build twelve inch discharging arches with two inch rise for every foot of opening, and to be well keyed up and grouted solid. All the brick work must be built straight plumb and true, and to be carried up to receive the blue stone copings for the floor beams to rest on, and the blue stone copings are to be bedded solid in cement, perfectly level on top to receive the beams. The marble work is to be backed up as soon as set, and build in all anchors and other work that may be required by the other contractors.

BLUE STONE.

Cope all the walls level with the floor beams on each story, with six inch coping; cut the same width as the thickness of the walls, and to be in lengths of from three to five feet, with holes cut in for the flues. Under all girders, rafters, and roof trusses, put blue stone blocks

five feet long, two feet wide and six inches thick; all the above to be the best quality of North river blue stone, cut true and out of wind.

PLASTERING.

All the walls and ceilings throughout the basement, first, second and third stories, are to be plastered the best three coat work; the scratch and brown coats are to be of the best Thomaston lime, clean, sharp grit sand and hair, well mixed together, in suitable proportions; the last coat to be stucco or hard finished, with best Thomaston lump finishing lime, and clean washed Rockaway sand, well worked and finished to a perfect surface. Clean out the building after the plastering is finished.

CORNICES, CEILINGS, &c.

In all the rooms, halls and corridors, run neat cornices of suitable proportions. The ceilings of the large rooms in the first and second stories are to be finished in panels, with moulded cornices, and sinkings and centre pieces; the large rooms in the basement and third stories are to be finished with plain sunk panels. The grand hall is to be finished with a dome ceiling, with moulded sunk panels, cornices, &c. Over the two stair-cases in the north-west and north-east corners, finish circular domes with moulded panels, cornices, neckings and enrichments in the panels. Over the other stair-cases finish paneled ceilings, the same as described for the first and second stories. The style and finish of the above to be as shown on the sections. Do all patching up and repairing after all the other mechanics are through.

GROUTING FOR FLOORS.

Fill in on the floors two inches above the top of the beams with cement grout, to be put in carefully around the wood strips, which the carpenter will put down to nail the floors to. All to be done in the most careful manner to make a solid job.

FLAGGING.

The cellars and areas are to be flagged with the best quality of North river blue flag, not less than two and one-half inches thick, cut smooth and out of wind, laid in courses in the best manner, on a sand foundation, with cement joints.

MARBLE WORK.

BASEMENT.

The basement of the external fronts, and also of the rear fronts on the inner quadrangle, is to have plain ashlar. All the doors and windows are to have plain jambs and arches with keystones; to have a moulded water-table on the top of the basement for the first story to start on.

FIRST STORY.

The first story of the external fronts, and also of the rear centre of the Chambers street front, is to have beveled rusticated ashlar, and the windows are to have moulded jambs, and carved keystones and moulded sills and panels underneath; windows, in centre of the wings on the Chambers street front, are to have paneled antes, with moulded caps and moulded arch. The first story of the rear fronting on the quadrangle is to have piers with caps

and bases, and moulded arches above, with keystones. The windows are to have plain sills with panels underneath. The first story is to be finished with a moulded cornice, and on the external fronts to have carved trusses.

PORTICOES.

On the Broadway and Centre street fronts, to have a colonnade portico, with balustrade, pedestals, columns, cornice and balustrade on top, and with wide entrance steps and balustrade. The piers in the front wall of the building to have antes and pedestals at the back of every column.

The portico on the Chambers street front is to have cluster columns, antes, imposts, arches and pedestals, and cornice and balustrade on top.

SECOND STORY.

The second story of the Broadway and Centre street fronts, and the wings on the Chambers street and Park fronts, are to have columns with pedestals, moulded bases and carved caps; the windows are to have moulded jambs and arches and carved keystones. The Chambers street front, except the wings, is to have antes with pedestals, moulded bases and carved caps; the windows are to have moulded sills and panels underneath.

The rears fronting on the quadrangle, are to have piers with moulded bases and caps, and to have a pedestal course running all through, and where shown to have columns with moulded bases, and carved caps. Balconies to the windows where shown, are to have platforms, balustrades and carved trusses.

The windows in the centre projection of the Chambers street front, and also in the rear of the same, are to run up two stories high, to have moulded architraves, carved keystones, and paneled transoms at the third story floor; the centre projection is to have antes, with moulded bases and carved caps. The centre windows in the wings on the Chambers street and Park fronts, are to have columns, pedestals and arched cornice caps.

The second story is to be finished with moulded cornice all round.

THIRD STORY.

The third story is to be finished similar in style to the second story. The windows are to have circular heads with moulded arches and keystones.

MAIN CORNICE.

The main cornice is to have moulded architrave, pannelled frieze, carved trusses and dental course; the centre on Chambers street is to have balustrade, with pedestals; form a gutter in the cornice, and cut a check for the copper to be worked into.

WORKMANSHIP.

All the above is to be cut in accordance with the several plans, elevations and sections, and to be either tooled or rubbed, as may be directed.

MATERIALS.

The material to be of the best quality of white marble, free from all defects, checks, stains or seams.

The basement ashlar is to be from eight to ten inches bed ; the ashlar above the basement is to be from six to eight inches bed. All cornices are to run through to the inside of the wall, or so as to balance; the sills, cornices, water tables, and other parts that show a top bed must be properly washed one-fourth inch to a foot.

SETTING.

All the work to be set in the best manner, in cement, with plaster joints, well slated, and made perfectly solid, and to be properly cleaned down and the joints pointed at the completion of the building.

TILING.

The halls, and porticoes, and corridors, throughout, are to be tiled with the best American marble tiles, not less than two inches thick, bedded in cement, and laid in the best manner, and well cleaned off at the completion of the work.

ANCHORS.

All the work is to be properly anchored, with suitable sized copper anchors, one to each column, ante, architrave and ashlar stone, not over four feet long, and two to every stone over four feet in length, on the bed.

FITTING, &c.

All the stones must be properly fitted and jointed, and all the jambs must be properly back-jointed for frames.

GRANITE WORK.**BASE COURSE.**

Furnish and set the base course all around the building, as shown on the plans ; to be from eighteen to twenty-four inches on the bed ; the top to be moulded, and all the stones to be well anchored with copper anchors.

BASE BLOCKS.

Underneath the columns in the cellar, put base blocks three feet square and eighteen inches high, with four holes in each, to bolt the columns to.

COPING.

All the light holes are to have coping ten by eighteen inches, checked out and rabbeted for the iron frames.

All the above work is to be of the best quality of light granite, finely patent hammered, and to be set in the best manner, in cement.

SEWERS.

Through the centre corridors in the cellars, build brick sewers twelve inches wide, eighteen inches deep, oval shape, covered over with thick flag stone. The sewers are to be built eight inches thick, with the best quality of hard burnt North River brick, laid in cement, with a proper descent, and to have seven connections with the street sewers. Build man-holes in the cellar every fifty feet, with flag covers and lifts, and also trap the sewers in a proper manner, where directed. Build drains connecting with the sewers to carry off the water from the roof leaders.

Build a cess-pool in each area, with perforated basin, flag over same.

CENTRES, &C.

All centres and patterns required by the mason, will be furnished by the carpenter.

MORTAR, &C.

The mortar for all the work is to be composed of the best Thomaston, or stone lime, the best hydraulic cement, and clean sharp grit sand, well mixed together in such proportions as the Superintendent may direct. The mortar is to be kept well tempered up, and the brick are to be wet with water just previous to laying. The contractor is to lay down water pipes for his own use. All the walls are to be kept well covered up.

FINALLY.

The above specification is intended to include all the materials and work necessary to finish and complete the building, so far as the masons' work, marble work, granite and plastering are concerned, but should there be any thing shewn on the plans, but omitted in the specification, or vice versa, the same is to be furnished and done without extra charge, so as to make a finished and perfect job.

The materials and work are to be strictly in accordance with the specifications and plans, and no deviation whatever in quality of materials, or style of work will be allowed therefrom.

IRON WORK.

Furnish and set in under cellar, iron columns ten inches in diameter. The columns will have base plates cast on the shaft, and be enlarged at the neck, and made to receive the iron girders, [See drawings of cellar columns.] The shaft of the columns will be plain and smooth, the ends planed or turned off perfectly true.

There will be required for cellar, forty columns, twelve inches diameter, the shaft will be plain and smooth, the cap and base plates to be cast on the shaft, and planed or turned perfectly true, each of the columns will be bolted to the granite base with four one and a half inch bolts.

In the basement story there will be forty Corinthian columns twelve inches diameter at the base. These columns will have full Corinthian caps, with moulded bases; the base plates cast on the bottom of columns; the neck of the columns to be cast to receive the iron girder, the base bolted to the cap plate of cellar columns with four one and a half inch bolts and nuts, the cap and bases planed as before described.

In the basement story there will be one hundred and forty Corinthian antes, twelve inch on face, and set to project six inches out beyond the line of the plastering, and be built in the wall; the antes to be made with caps and bases to correspond with the columns and cast in one piece.

In the principal story there will be forty Corinthian columns, fourteen inches diameter, with caps and pedestals, as shown by sectional drawings, each of the bases bolted to the cap plates of basement columns, with four of two

inch bolts and nuts; the neck of the column cast to receive the iron girders. There will be in the principal story one hundred and forty Corinthian antes, with caps, bases and pedestals to correspond with the columns, to project seven and a half inches out from the line of plastering and be built in the wall. In the second story there will be twenty Corinthian columns, ten inches in diameter, and all to have cap and base plates cast on the shaft, and bolted and finished as described for the basement and first story.

In the second story there will be one hundred and twenty antes, twelve inch face, six inches projection.

And in the third story one hundred and twenty antes, ten inch face, five inches projection, and in all other respects the same as antes for basement and first story, all the columns made of American pig iron, and made as perfect in all respects as chipping, filing, turning and planing can make them, and be perfectly free from defects of any kind.

To furnish and put up the wainscoating to all the walls of corridors, stairs, and halls throughout the building of iron and made as per drawings, and be well anchored to the walls and made as smooth and true as planing and filing can make it, and be free from defects of any kind.

Furnish and firmly anchor to the wall surbase to all the rooms throughout the building [for dimensions see drawings,] and be not less than three eighths of an inch thick in the thinnest parts after planing, and be cast in lengths not less than twelve feet, and be as perfect as planing and filing can make it.

All the windows throughout the building to have cast iron window frames, as shown by drawing, and be planed perfectly on the face side, and on the inside where the sash slides, these frames will be cast in sections, and bolted together in the neatest and strongest manner, and well anchored to the mason work.

Furnish cast iron frames with wrought iron sash bars to all the windows throughout the building; as per detail drawings with chains, pullies and weights; the frames cast in one piece, and planed to fit perfectly to the window frame and each connection.

* The sash bars put^d in in the neatest manner, all the window trimming and boxes for shutters will be of iron, [for dimensions see full sized drawings], all made in the most perfect manner, and be as smooth and true as would be required if done in wood.

Furnish iron shutters to all the basement and first story windows; the shutters will be made in eight sections to each window, two sections in height and four in width; the hinge to the iron window frame, with two butt hinges to each section, five inches wide and three eighths thick, the hinges sunk in the window frame and in the shutter, so as to make close joints; the shutter frames to be double, and the plate iron put between the frames so as to form panels on both sides of the shutter; and the shutter moulded on both sides [see full sized drawings.] The frames secured to the plate iron with rivets three-eighths of an inch in diameter, and not more than five inches apart, placed diagonally, and within three quarters of an inch to the edge of the frame. The frames made so

as to form laps for the shutters; each and every shutter to be planed perfectly true on both ends and edges, and the surface of the frames to be planed or ground off smooth; the mouldings of cast iron, and put in in the most perfect manner. The shutters furnished with all necessary fastenings and trimmings.

All the doors, exterior and interior, will be made of iron, and be in two parts to each opening; and be paneled and moulded on both sides, as shown by drawings, with all necessary bolts and fastenings; the locks for the doors to cost six dollars each. Furnish all the door casings, frames &c., of iron, as per drawings, all the doors and frames, and trimmings planed, and finished in the very best manner. Over the top of each door, there will be a semi-circle sash of iron, made in the same manner as the sash to the windows. (See drawings.)

Cover the light holes and areas to cellars with illuminating tile; the glass in said tile to be not more than three inches diameter, three-fourths of an inch thick, all put in with strong frame-work, and in the most substantial manner, and arranged to open and shut in a convenient way for ventilation; all as shall be directed.

IRON GIRDERS.

All the girders and beams must be made in every particular the same as represented by full size drawings. (For the lengths and the number, see details.) All the plates of a good quality of wrought iron; the rivets of the girders three-fourths inch in diameter, and put in and riveted when red hot, heads as per drawings; the uprights of the best refined iron, three inches in width and thickness

as shown, and not more than ten inches apart. The angle iron to be as shown by drawings ; the rivets to secure the angle iron to be four inches apart. The beams will be made with half inch rivets, and the uprights will be two inches wide, and ten inches apart from centres, thickness as shown by drawings, the quality of iron same as called for girders.

The beams will be secured to the girders with two angle pieces two and a half inches wide each way, and three-fourths inch thick, and be bolted to the beam with three of three-fourth inch bolts, and to the girder with six of three-fourth inch bolts, and where resting on the flange of beams, be secured with two of three-fourth inch bolts, all to be made of the best quality of iron. All the girders for basement floor, except rooms marked BB, will be made as per full size drawing marked AA ; and for rooms marked BB, all the girders will be made as per full size drawing marked BB. All the beams made as per full size drawing marked CC, except those for halls, which will be made as per full size drawing marked DD. All the girders for the floors above the basement will be made as per full size drawing, marked EE, except those for rooms marked FF, which will be made as per full size drawing, marked FF.

All the beams for the basement floor will be made as per drawing, EE, except those for the halls, which will be as per drawing marked FF. All the plates and bars of girders and beams that do not extend the entire length of girders and beams must be made equally strong at the joints as elsewhere, by batons well riveted.

All the girders to have anchors at each end, made of iron, three inches by five eighths of an inch, and three feet long, secured with three of three quarter inch bolts, and to have uprights in said bar of one and a half inch by one and a half inch iron thirty inches long. All the ends of beams entering on walls to have anchors made of iron two inch by half inch two feet long, and to be secured to beams with two of five eighth inch bolts, and have uprights of one inch by one inch iron twenty inches long.

FLOORS:

Each and every story will be covered over with corrugated plate iron, as shown by drawings; the iron connected to each beam where resting on the beam, and be riveted to the girders with rivets not more than eight inches apart; the iron riveted at the joints with rivets not more than two and a half inches apart.

All the ceilings of the rooms and halls must be lathed with iron lath, to receive the plaster; all the cornices to the rooms and halls to be formed of iron, to receive the plaster. [The cellar ceiling excepted.] The ceiling of all the large rooms to be paneled, which will be formed with furring bars, and iron lath to receive the panelings. There will be required one furring bar between each beam, four inches deep, and have flange one inch wide. [See drawing.] All the bars, of every form and shape that may be required for ceilings, panelings and cornices, to be furnished and put up by the contractor of iron work.

STAIRS.

Furnish and put up all the stairs on inside of building, as shown by drawings; the steps and risers of cast iron,

of ornamental pattern. The steps three-fourths of an inch thick in the thinnest part, and the riser one-half inch thick in the thinnest part; the string pieces made of wrought iron, four inches by three-fourths of an inch, placed on edge; the string pieces to be in no case more than thirty inches apart. The under side of all the stairs will be finished with cast iron panel work; the panel formed one inch and a half deep, and have cast mouldings; the size and shape of panels made to suit the size and shape of stairs. The outside string piece finished with cast plates, as per section. All the railings to the well and platform will be of cast iron banisters and wrought iron top rail, finished with a cast cap, as per drawings. All the facings of well holes and stairways of cast panel work, as per drawings. Furnish all the necessary bars, beams and braces for platforms and stairs.

All the stairs to be put up in the strongest and most workmanlike manner; the castings all must be of the very best quality.

SAFES.

To furnish and set in wall twenty-one burglar proof iron safes, made as follows: with folding doors, and one lock to each safe, to cost one hundred and fifty dollars; the safes to be made of two plates of one quarter of an inch boiler iron, with one-half of an inch of hardened cast steel placed between the plates, and well riveted together, or five-eighths of an inch of chilled iron; if iron be used, it must be put in in the melted state. For full particulars see drawings of safes.

ROOF.

The frame work constructed entirely of wrought iron; the main rafters placed not more than twelve feet apart,

and to span the entire width of the building, resting on the outer walls; there must be additional and extra strong rafters and trusses to support the dome; also for the support of the large skylight, which is about eighty-eight feet long, and will require header and trimmer beams of sufficient strength to carry the entire area of the roof connecting to the skylight. The pediments, hipps and valleys, as shown on drawings, must be properly formed, and framed with strong additional beams and rafters, bolted and riveted together in the best manner.

The purline rafters must not be over four feet apart, and strongly riveted and bolted to the main rafters, the roof to be covered with boiler iron, lapped not less than two inches at the joints, and strongly riveted together with half inch boiler rivets, put in and riveted while hot; all the joints to be trimmed and caulked, after being riveted, so as to be perfectly tight.

The rafters, trusses and purline rafters, together with the covering, all to be made according to the working drawings.

The dome, which is to be of iron, framed with strong truss work, and covered in the same manner as described for roof, excepting the joints, which, instead of lapping, must be battened underneath, so as to have the joints smooth. All the work shown on the elevation of dome to be of iron, and as represented by drawings. All the gutters for roof, dome and corridors to be formed of thirty ounce copper. There will be twenty-two six inch bore water pipes, half inch thick, leading from roof to sewer, to carry the water; these pipes to be built in the wall.

Scuttle to be inserted in the roof, with strong chains and fastenings; the roof will be well ventilated with trap ventilators, made of copper.

The porticoes on Broadway, Chambers and Centre streets, must be covered with cast iron plates, made perfectly tight, and to have strong beams for supports; also paneled ceilings on the under side, as per drawings.

Corridors, trusses, railings, floors and ceilings of corridors, inside, all to be of iron. (See drawings.)

All the iron work to be painted one coat before delivery to the building, and two coats after completed.

IRON WORK.

As the iron work forms an important part of the building, as it regards strength, durability, security and ornament, the contractor will be required to comply with the letter of the specification and detail drawings, from which there can be no deviation whatever.

All the material used must be of the best quality, and the work performed in the best manner; and subject to the approval of the Superintendent, as before stated.

CARPENTER'S WORK AND MATERIALS.**FENCE.**

Inclose the premises all round, with a strong and substantial board fence, eight feet high, and to have suitable entrance gates, secured with strong fastenings.

OFFICE.

- Do all the carpenter's work required to finish an office for the Superintendent, to be 15 feet by 30 feet, with two rooms, to have doors, windows, partition, floor, tin roof, &c., and to be finished and painted complete.

PRIVY.

Build a privy for the use of the workmen, of suitable size, and inclosed with a screen.

CENTRES.

Furnish and set all the centres required by the other contractors, one for every opening, and also all patterns, cradles, turning pieces, &c.

BOARDING UP.

Board up the marble work to protect the same from injury; cover all cornices, projections and carved work, and after the roof is on, board up the windows and put a 6 light 10 by 12 inch sash in each window, and board up the doors, and put in strong batten doors as directed. Also, take down and remove the same when directed.

FLOORS.

The basement, first, second and third story floors, and the gallery in the reception hall, to be the best quality of

clear narrow mill worked $1\frac{1}{2}$ inch Georgia pine plank strips, $2\frac{1}{2}$ inches wide, laid in courses and blind nailed. No pieces less than six feet long to be used. The floors are to be nailed to 8 by 4 inch yellow pine strips, placed 12 inches from centres, put in proper positions, perfectly level, and to be properly secured for the mason to grout up to. Smooth off all the floors after the other mechanics are through, and screw down traps and covers over all pipes as may be directed.

GROUND.

To all openings put up grounds for the plasterer to finish to, and after the plastering is done, take down the same.

GLASS.

All the windows and the fanlights over all the outside and inside doors, are to be glazed in the best manner with first quality polished British plate glass. The skylights are to be glazed with half-inch hammered glass, and all the glass to be left whole, complete and clean, at the finish of the building.

Finally, this specification includes all the carpenters' work required in the said building, and the same is to be furnished and done as directed by the superintendent.

APPENDIX.

(A.)

MAYOR'S OFFICE,
New York, April 4th, 1855. }

*To the Committee on Repairs and Supplies
of the Board of Councilmen:*

GENTLEMEN :—In reply to a resolution of your Committee requesting the Heads of Departments of the City Government to report the number and size of the rooms, which in their opinion are required for the proper transaction of the business of each respectively. I beg leave to submit the inclosed statement.

Very respectfully, yours,

FERNANDO WOOD, *Mayor.*

Number and size of rooms required for the Mayor's Office.

One large reception room for general business, to be much larger than the one now used.
One inner room connected with the above for Mayor's duties, to be about.....25x20
One private retiring room for Mayor, to be connected with above last referred to, to be about.....15x10
One room for Police Magistrate, about.....20x30
One room for Emigrant Department.....20x30

Number and size of rooms required for the Bureau of the Police Department.

Audience chamber for Chief and Cap-	feet.
tains..... One room.	25x25

Audience chamber for Chief and Citizens.....	Four rooms.	12x12
A main office for the transaction of the business of the Department.....	One room.	30x40
Small office for Chief's Clerk.....	" "	12x14
A chamber for stolen property, stationery, &c.....	" "	20x30
An office for the Inspectors of stages, hacks, carts, &c.....	" "	15x20
The operation of the telegraph.....	" "	15x20
A reserve corps and drill room for the Department.....	" "	50x25
Serjeants of the reserved corps' room..	" "	15x25

NEW YORK COMMON PLEAS, CLERK'S OFFICE, {
New York, April 2, 1855. }

C. T. McClenachan, Esq., Clerk of the

Board of Councilmen:

In answer to your note of this date, inclosing resolution of the Board of Councilmen, the following rooms and offices will be required for the use of the Court of Common Pleas, and its officers, viz :

Two rooms for the trial of causes.....40x40
 One room for Special Term.....40x30
 One " adjoining for consultation.....20x15
 Two rooms for Jurors.....
 One room for Clerk's Office.....40x30
 with private room attached.
 One room for the business of naturalization 20x30

Very respectfully,

B. H. JARVIS, *Clerk.*

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, }
New York, April 5th, 1855. }

In reply to the resolution of the Board of Councilmen of the 29th ultimo, in relation to the number and size of rooms required for the proper transaction of the business of the Departments of the City Government respectively, it may be proper to state, that the Comptroller's office requires to be kept in a fire proof building, for the preservation and safe keeping of the valuable records, books, documents, &c., kept and filed in said office.

The business of said office requires the following rooms, of large size, and fitted up for the purposes of the Finance Department, viz:

One room for the Comptroller and his clerk.

One room for the Stock Clerk, Commissioners of the Sinking Fund and Collector of City Revenue.

One room for the Auditor and his assistants, and for the Book-keeper.

One room for the Clerk of Arrears and his assistants.

One room for the meetings of the Financial and other Committees.

One room for the general clerks.

One room for the examination of maps, books, &c., by the public, and for the Porter.

By order of the Comptroller,

W. H. DIKEMAN,

Stock Clerk.

OFFICE OF THE GOVERNORS OF THE ALMS HOUSE, }
New York, April 6th, 1855. }

*To the Committee on Repairs and Supplies
of the Board of Councilmen:*

GENTLEMEN:—Your communication, under date of 2d April, inquiring as to the space the Board of Governors will require for this Department, was referred to the undersigned Committee on Out Door Poor, with power.

We therefore, in conformity with that reference and your request, respectfully state, that the room required will be for distribution as follows, as nearly as they can state it:

1st. For the convenience of the office and officers of the Out Door Poor, which shall be in the main room, large, airy and well ventilated, permitting free access and egress to at least five hundred persons, giving ample room for the Superintendent of Out Door Poor and his deputies to examine with facility all cases demanding relief, at the same time separating the office from the crowd as much as practicable, to prevent contact with disease.

2d. Provision should be made for the Superintendent of Out Door Poor and his family, that he may be always on the spot to answer the requirements of the poor.

3d. A room for the meetings of the Board for the regular business of the Department.

4th. A room for Governors' consultation.

5th. A room for examination of cases of abandonment, bastardy and other violations of law, coming under the duties of the Board.

6th. A Clerk's room, (fire proof,) for clerks, and for the deposit of the books and records.

7th. A stable sufficiently large to contain four horses and three wagons.

The size of these places may be accommodated to the best judgment of the City Government; a few feet not regarded as an important saving, and excepting the space for the business transactions and the stable room. Upon the presentation of any plan for the purposes referred to, the Committee on Out Door Poor would be glad to consult with the Honorable Committee on Repairs and Supplies.

Respectfully,

E. C. WEST.

S. DRAPER.

REGISTER'S OFFICE, }
New York, April 5th, 1855. }

C. T. McCLENACHAN, ESQ:

SIR:—In answer to a resolution of the Committee on Repairs and Supplies of the 2d of April, in relation to the number and the size of the rooms required for the proper transaction of the business of this Department, I will state that the following rooms, in my opinion, are necessary, and without which the business cannot be done with convenience and systematic accuracy and promptness:

One room for libers.....	100 x 45
“ “ searching.....	25 x 30
“ “ map room.....	25 x 30
“ “ recording clerks.....	100 x 50

One room for recording mortgages	75 x 50
“ “ Register	40 x 30
“ “ wardrobe, &c.	15 x 20
“ “ private office for Register,	18 x 25

Very respectfully,

Your obedient servant,

JOHN J. DOANE,

Register.

*To the Committee on Repairs and Supplies
of the Board of Councilmen.*

GENTLEMEN—The Justices of the Superior Court of the city of New York, in accordance with a requisition to them directed, submit the following statement of the number of rooms, and their dimensions, that will be required for the use of this department:

- (A) Trial term court room, part 1st. 50 by 40 clear.
- (B) Trial term court room, part 2d 37 by 30 clear.
- (C) General term court 30 by 30 clear.
- (D) Special term court 37 by 30 clear.
- (E) Extra room for trials, in connection with
 general term court room. 37 by 30 clear.
 Four jury rooms, each. 16 by 14 clear.
 Extra room for supplementary proceed-
 ings and examinations 25 by 20 clear.
- (F) Library room 18 by 16 clear.
- (G) Clerks' office. 40 by 35 clear.
- (H) Judges' chambers. 30 by 20 clear.

It is desirable that all the rooms should be as contiguous to each other as possible. Those marked (A) and (B)

should be closely contiguous. Those marked (C) (D) (E) (F) and (H) should communicate with each other. The resolution sent to us did not come to the knowledge of some members of the court until yesterday, and last evening was the earliest time at which the judges could confer with each other on the subject.

The Committee will please consider this apology for not answering their resolution of inquiry by the time named.

By order of the Court.

April 6, 1855.

J. F. BOSWORTH.

COUNTY CLERK'S OFFICE.

One room 30 feet square, two small rooms, off, 15 ft. sq.
 One " 20 " " two " " off, 12 "
 One " 20 " " one " " off, 10 "
 One " 30 " " for filing all the old papers, &c.,
 all the above rooms should be fitted up with racks, pigeon
 holes, &c., and fire proof.

CROTON AQUEDUCT DEPARTMENT, }
 New York, April 3, 1855. }

Charles T. McClenachan, Esq.

DEAR SIR:—Yours of yesterday, inquiring as to the number and size of rooms necessary for the transaction of the business of this department is before me, and I take pleasure in answering.

One main room, well lighted, with a floor room of not less than three thousand five hundred square feet.

Four side rooms, connecting with each other and with the above, well lighted, and with not less than four hundred and twenty square feet each.

Respectfully,

M. VAN SCHAICK,

President.

LAW DEPARTMENT, {
New York, April 2, 1855. }

GENTLEMEN:—In compliance with your resolution I have the honor to state that the rooms required by the Department, with Bureaux, will be seven in number, about eighteen feet in width by twenty-four feet in depth, each; to wit, three rooms for the Counsel to the Corporation, to be located on the highest floor, adjoining the Law Library; and two rooms each for the Corporation Attorney and Public Administrator, to be located on the lower floor, convenient of access.

Respectfully,

R. J. DILLON.

SHERIFF'S OFFICE, {
New York, April 5, 1855. }

To the Committee on the New City Hall:

GENTLEMEN:—In answer to your inquiry as to rooms required by the sheriff, I am of opinion that two rooms, twenty-five by fifty feet each, and two ante rooms twenty-five by twenty-five feet each will be sufficient; one of the large rooms to be used by the deputies, the other one as the general office, one of the ante rooms for equity busi-

ness and as a private office, and the other ante room for the sheriff's jury.

I am very much cramped for room in my present location, having to use one of the court rooms for the sheriff's jury.

Respectfully yours, &c.,

JOHN ORSER,

Sheriff.

STREET DEPARTMENT, }
April 3, 1855. }

*The Hon. Committee on Repairs and Supplies
of the Board of Councilmen:*

GENTLEMEN:--In accordance with a resolution adopted by your Committee, March 29, 1855, requesting the heads of departments to report the number of rooms and size which, in their opinion, are required for the proper transaction of the business of each respectively, including the bureaux thereof, the Street Commissioner respectfully

REPORTS:

That the following apartments are required for the use of the Street Department, with their size:

For Street Commissioner.....	25 by	25 feet
" Deputy Street Commissioner.....	25 by	25 "
" Contract Clerk.....	15 by	15 "
" Maps and Map Clerk.....	30 by	100 "
" Assessors.....	25 by	25 "
" Collector and Dep. Col'rs of Ass't	25 by	60 "

Respectfully submitted,

JAMES FUREY,

Street Commissioner.

SURROGATE'S OFFICE,
New York, April 3, 1855. }

*The Hon. the Committee on Repairs and Supplies
of the Board of Councilmen:*

GENTLEMEN:—I have received a copy of the resolution passed by you on the 29th ult., requesting my views in respect to the rooms requisite for the Surrogate's office. The Surrogate is constantly occupied in the trial and determination of litigated cases, and is attended daily by parties with their counsel and witnesses. It is therefore necessary, in my judgment, that he should have a commodious court room.

All formal matters relating to the granting of letters of administration and guardianship, the probate of wills and the statement of accounts are prepared by the Chief and Probate Clerks in another apartment, and the crowds attending them from day to day render it proper to have a large room for the transaction of that class of business.

The Recording, Copying and Engrossing Clerks should have a separate room, in order to be free from noise and to insure accuracy in making up the records.

There is also much chamber business which can be transacted without the immediate direction of the Surrogate, and which I am frequently compelled to adjourn and delay for want of proper accommodations. I therefore respectfully urge as necessary for the satisfactory transaction of the official business of Surrogate, and for public convenience, the allotment of four rooms, two 30 by 40 and two 20 by 28 feet.

Very respectfully,

Your ob't servant,

A. W. BRADFORD, *Surrogate.*

OFFICE, OF THE CLERK OF COMMON COUNCIL, {
April 3d, 1855. }

*To the Committee on Repairs and Supplies
of the Board of Councilmen:*

GENTLEMEN:—I am in the receipt of the communication from the Clerk of your Board, transmitting a copy of the resolution adopted by your Committee on the 29th ult., requesting a report as to the number and size of the rooms which, in my opinion, are required for the proper transaction of the business of my office; and reply, that the present office occupied by me consists of three rooms, which afford but a very limited accommodation for the proper transaction of the business of the office; and as the prospect is fair that the business will steadily and rapidly increase for some time to come, it will certainly be apparent that the requisite office accommodations will be greater.

In addition to the three rooms which are immediately used for the transaction of the business of the Common Council, there is occupied a room about 30 by 25 feet, for the purposes of a Corporation library, wherein are filed full records of the proceedings of the Common Council, proceedings and reports of Congress, the State Legislature, together with documents touching the system of municipal legislation, which are essentially requisite for reference at any and all times. This room is by far too small for the accumulating volumes which it is found necessary to place therein, and should be changed for one of much larger dimensions, say 60 by 40 feet.

The rooms occupied as the office of the Clerk of the Common Council are of the following dimensions:

General office, 31 by 17 feet 2 inches.

Room for engrossing proceedings (adjoining) 28 by 17 feet.

Committee room (adjoining) 29 by 26 feet.

Respectfully submitted,

D. T. VALENTINE,

Clerk, C. C.

OFFICE COMMISSIONER OF STREETS AND LAMPS, }
New York, April 3d, 1855. }

To the Committee on Repairs and Supplies :

GENTLEMEN :—In compliance with the resolution passed by your Committee, on the 29th inst., calling on the Heads of Departments to report the number and size of the rooms required for the proper transaction of their business, I have the honor to

REPORT:

That the following rooms will be required for the use of this department.

Office Commissioner of Streets and Lamps—2 rooms.

1—say 25 feet by 15.

1 20 “ 25.

Office Superintendent of Lamps and Gas—2 rooms.

1—say 25 feet by 15.

1 20 “ 25

Office Superintendent of Streets.

1—say 40 feet by 30.

1 20 “ 15.

Office Superintendent of Markets.

1—say 25 feet by 20.

Yours respectfully,

JOSEPH E. EBLING,

Commissioner of Streets and Lamps.

CITY INSPECTOR'S DEPARTMENT, }
New York, April 3d, 1855. }

To the Committee on Repairs and Supplies :

GENTLEMEN :—In compliance with a resolution adopted by your Committee, requesting the Heads of Departments of the City Government to report the number and size of rooms required for the use of such departments, for the transaction of the business of the same, the following reply is submitted as relating to this department.

The City Inspector's Department includes in its organization two bureaux, known as those of "Sanitary Inspection"—having cognizance of all nuisances and matters affecting the public health—and that of "Records and Statistics," in which are kept the valuable records of births, marriages and deaths occurring in the city—the last named record, at the present time, extending back a period of fifty years. It is a duty of this bureau to grant removal and burial permits for the removal and interment of all persons whose death may occur within the city limits, the number of these permits granted now amounting to about thirty thousand annually. The nature of the duties devolving upon these two bureaux, and their general importance to all classes of our citizens, and the

necessity for the visits of so great a number of persons as are compelled to call at the offices for the transaction of business, will, doubtless, be readily appreciated by the Committee, and receive consideration in the assignment of suitable location, &c.

The business of these bureaux is, of necessity, constantly increasing with the erection of new buildings up town, and with the increase of population of the city; rendering the services of the Bureau of Sanitary Inspection more extensive and arduous, to preserve the public health in the abatement of evils deleterious thereto, and adding to the labors of the "Bureau of Records and Statistics," by the increased mortality consequent on the increase of population.

It is probable that in no other department of the city government is the increase of its labors so regular and constant; and this will require an increase of accommodation for the transaction of its business, a necessity to be remembered in its future location, provision being necessary for additional room for offices when it may be required. At the present time, two rooms, occupying a space of about 40 feet by 32, will suffice, if divided into four separate rooms, thus—say two large offices, each about twenty feet square, but so connected by folding doors as to admit of being thrown into one large room; to these offices should be attached two smaller rooms, say of 12 by 20 feet, for private use. All these rooms should be well lighted, it being highly necessary for the comfortable transaction of business, and as (if destroyed) it would be impossible to replace the records of the department, (daily becoming of greater importance and value,) the offices in use by the department should be located in a fire

proof building, and so kept as not to be liable to accidental injury or destruction.

Respectfully,
 THOMAS K. DOWNING,
City Inspector.

To the Honorable the Committee on Repairs and Supplies :

GENTLEMEN:—In reply to your inquiry, as to how much room will be wanted for the use of the Commissioner of Repairs and Supplies, I would respectfully state, that there will be required two rooms, twenty-five feet by fifty feet each, for the general business of the office, and two rooms, fifteen feet by thirty feet each, for the Commissioner and the Heads of Bureaux. This is about as economical a supposition as I could make.

Respectfully yours,

B. B. PURDY,
Commissioner of Repairs and Supplies.

April 5th, 1855.

The following is a schedule of rooms required, as compiled from the foregoing statements:

Rooms for the County Clerk.

2	rooms,	each	30	by	35	feet.
2	"	"	20	by	20	"
5	"	"	15	by	18	"

Rooms for the Court of Common Pleas.

2 rooms, each 40 by 45 feet.

2 " " 40 by 30 "

2 " " 25 by 30 "

1 " 22 by 30 "

1 " 18 by 25 "

Rooms for the Croton Aqueduct Department.

1 room, 70 by 50 feet.

4 rooms, each 25 by 30 feet.

Rooms for the Clerk of the Common Council.

1 room, 60 by 40 feet.

1 " 45 by 30 "

2 rooms, each 30 by 30 feet.

5 " (Committees) 20 by 25 feet.

Rooms for the Clerk of the Board of Councilmen.

1 room, 40 by 30 feet.

2 rooms, each 25 by 30 feet.

Rooms for the Surrogate.

2 rooms, each 30 by 40 feet.

1 " 40 by 30 "

1 " 15 by 20 "

1 " 18 by 25 "

Sheriff's Rooms.

2 rooms, 25 by 50 feet.

2 " 25 by 25 "

Rooms for the Finance Department.

7 rooms, 25 by 30 feet.

Rooms for the Alms-house Department.

1 room, 45 by 75 feet.
2 " 25 by 25 "
1 " 30 by 40 "
2 " 25 by 25 "
1 " 20 by 25 "

Rooms for Superior Court.

2 rooms, 50 by 40 feet.
3 " 37 by 30 "
1 " 16 by 14 "
1 " 25 by 20 "
1 " 18 by 16 "
1 " 40 by 35 "
1 " 30 by 20 "

Rooms for the City Inspector.

2 rooms, 20 by 20 feet.
2 " 12 by 20 "

(B.)

*To the Honorable the Board of Councilmen
of the city of New York:*

The undersigned beg leave to submit herewith their plans and specifications for the proposed new City Hall, the immediate necessity for which presses so urgently upon the consideration of your Honorable Body. In submitting these plans, the undersigned would respectfully state the considerations and views which have governed them in their projection.

The first question, reduced to its simplest form is—
What does the city need?

There may be a multitude of beautiful and valuable plans for public buildings, suitable for a variety of purposes, and yet these plans may be altogether inadequate to meet the wants of a metropolis so vast and so rapidly increasing in population and business as the city of New York. The consideration of primary importance which therefore presented itself was to *provide ample accommodations* for all the business of the city in regard to its courts, chambers, departments, bureaux and offices. On a careful consideration of this point, and on consultation with several gentlemen whose long professional experience and intimate acquaintance with public affairs fully qualified them to judge, the insufficiency of any of the plans heretofore submitted became apparent, and the necessity for a new one was obvious. An approximate estimate was accordingly made of the number and kind of rooms now actually required, or which will be demanded by the future wants of the city.

Having ascertained these conditions, it has been our endeavor to secure the greatest amount of room with the best possible facilities of light and ventilation, and the greatest practicable degree of retirement from the noise and confusion of the streets, and at the same time to have the business so centralized and grouped in one building as to afford every requisite facility to the professional men and citizens having business with the various departments.

On taking a survey of the Park and of the buildings which now stand there, and glancing prospectively at the changes which must in a few years be made to provide for the public need, it became evident that no narrow or doubtful policy could be pursued, except at the ultimate expense of the city, and occasion also a great and constant inconvenience. The difficulty now existing is that there are several buildings erected at different times of different styles of architecture designed for the accommodation of particular departments, without the least regard to uniformity or fitness of location on the ground. The present therefore is the time to act intelligently in the right direction, to anticipate such evils, and to erect a building of such proportions and with such harmony of design as to present to the future inhabitants of the city an evidence of the prudence and foresight of our present rulers, and to secure the greatest ultimate economy of *room*, of *means* and of *time*.

The Park is surrounded on all sides by wide and open streets, and must eventually become the business centre of our great metropolis. The large area of the Park and its extended street lines, afford an opportunity for improve-

ment on a large scale, and the best improvement must eventually be the most valuable as well as most economical.

With these considerations, the plans of the undersigned, by which the lands shall be improved, the pressing wants of the city satisfied, and a harmonious and beautiful structure provided, are herewith submitted.

The building, as proposed, will present a front on Chambers street, which will be thirty feet from the street, the receding portion of the building on Chambers street being sixty feet from the street line. The view on all the streets will thus be most grand and imposing, and this arrangement will afford a wide avenue on all sides.

While these objects are accomplished, there is no encroachment or obstruction of the present City Hall, but the arrangement proposed will add to the value and convenience of a number of the offices and chambers of that building.

In our design, the fronts on Broadway and Centre street will be similar and consistent throughout, as there can be no doubt that the rebuilding of the houses in Chatham street, will be on a greatly improved scale, and corresponding with the buildings surrounding in the adjoining streets, the whole assemblage of lines and front thereby presenting an architectural as well as business grouping not excelled even in the old world.

The ground included within the building and between the City Hall and the new structure will form a court of considerable dimensions, which will afford every facility

for communication between the several departments. The inner ranges of rooms and chambers being thus altogether secluded from the streets, will afford the indispensable requisite of retirement for the important transactions of the courts and other bodies, where quietness is of so much importance.

In the plans no attempt has been made to set apart or indicate specific chambers or rooms for the use of the several courts or departments, as this will become a matter of future election, on the completion of the buildings.

Provision has been made however, for a grand reception room for public purposes, which shall open on Broadway, to be ninety by one hundred and forty feet, which is much needed, and may be used also as a gallery for the works of art, which are now, or may become the property of the city. We have also provided for a sufficient number of rooms to be set apart for libraries, reading-rooms, archives, records, &c., with such conveniences as will afford every facility for citizens and strangers who may resort thither for business purposes. Our plans also provide some rooms of large size, so constructed and designed as to admit of subsequent partition and sub-division, should such an arrangement at any time become necessary.

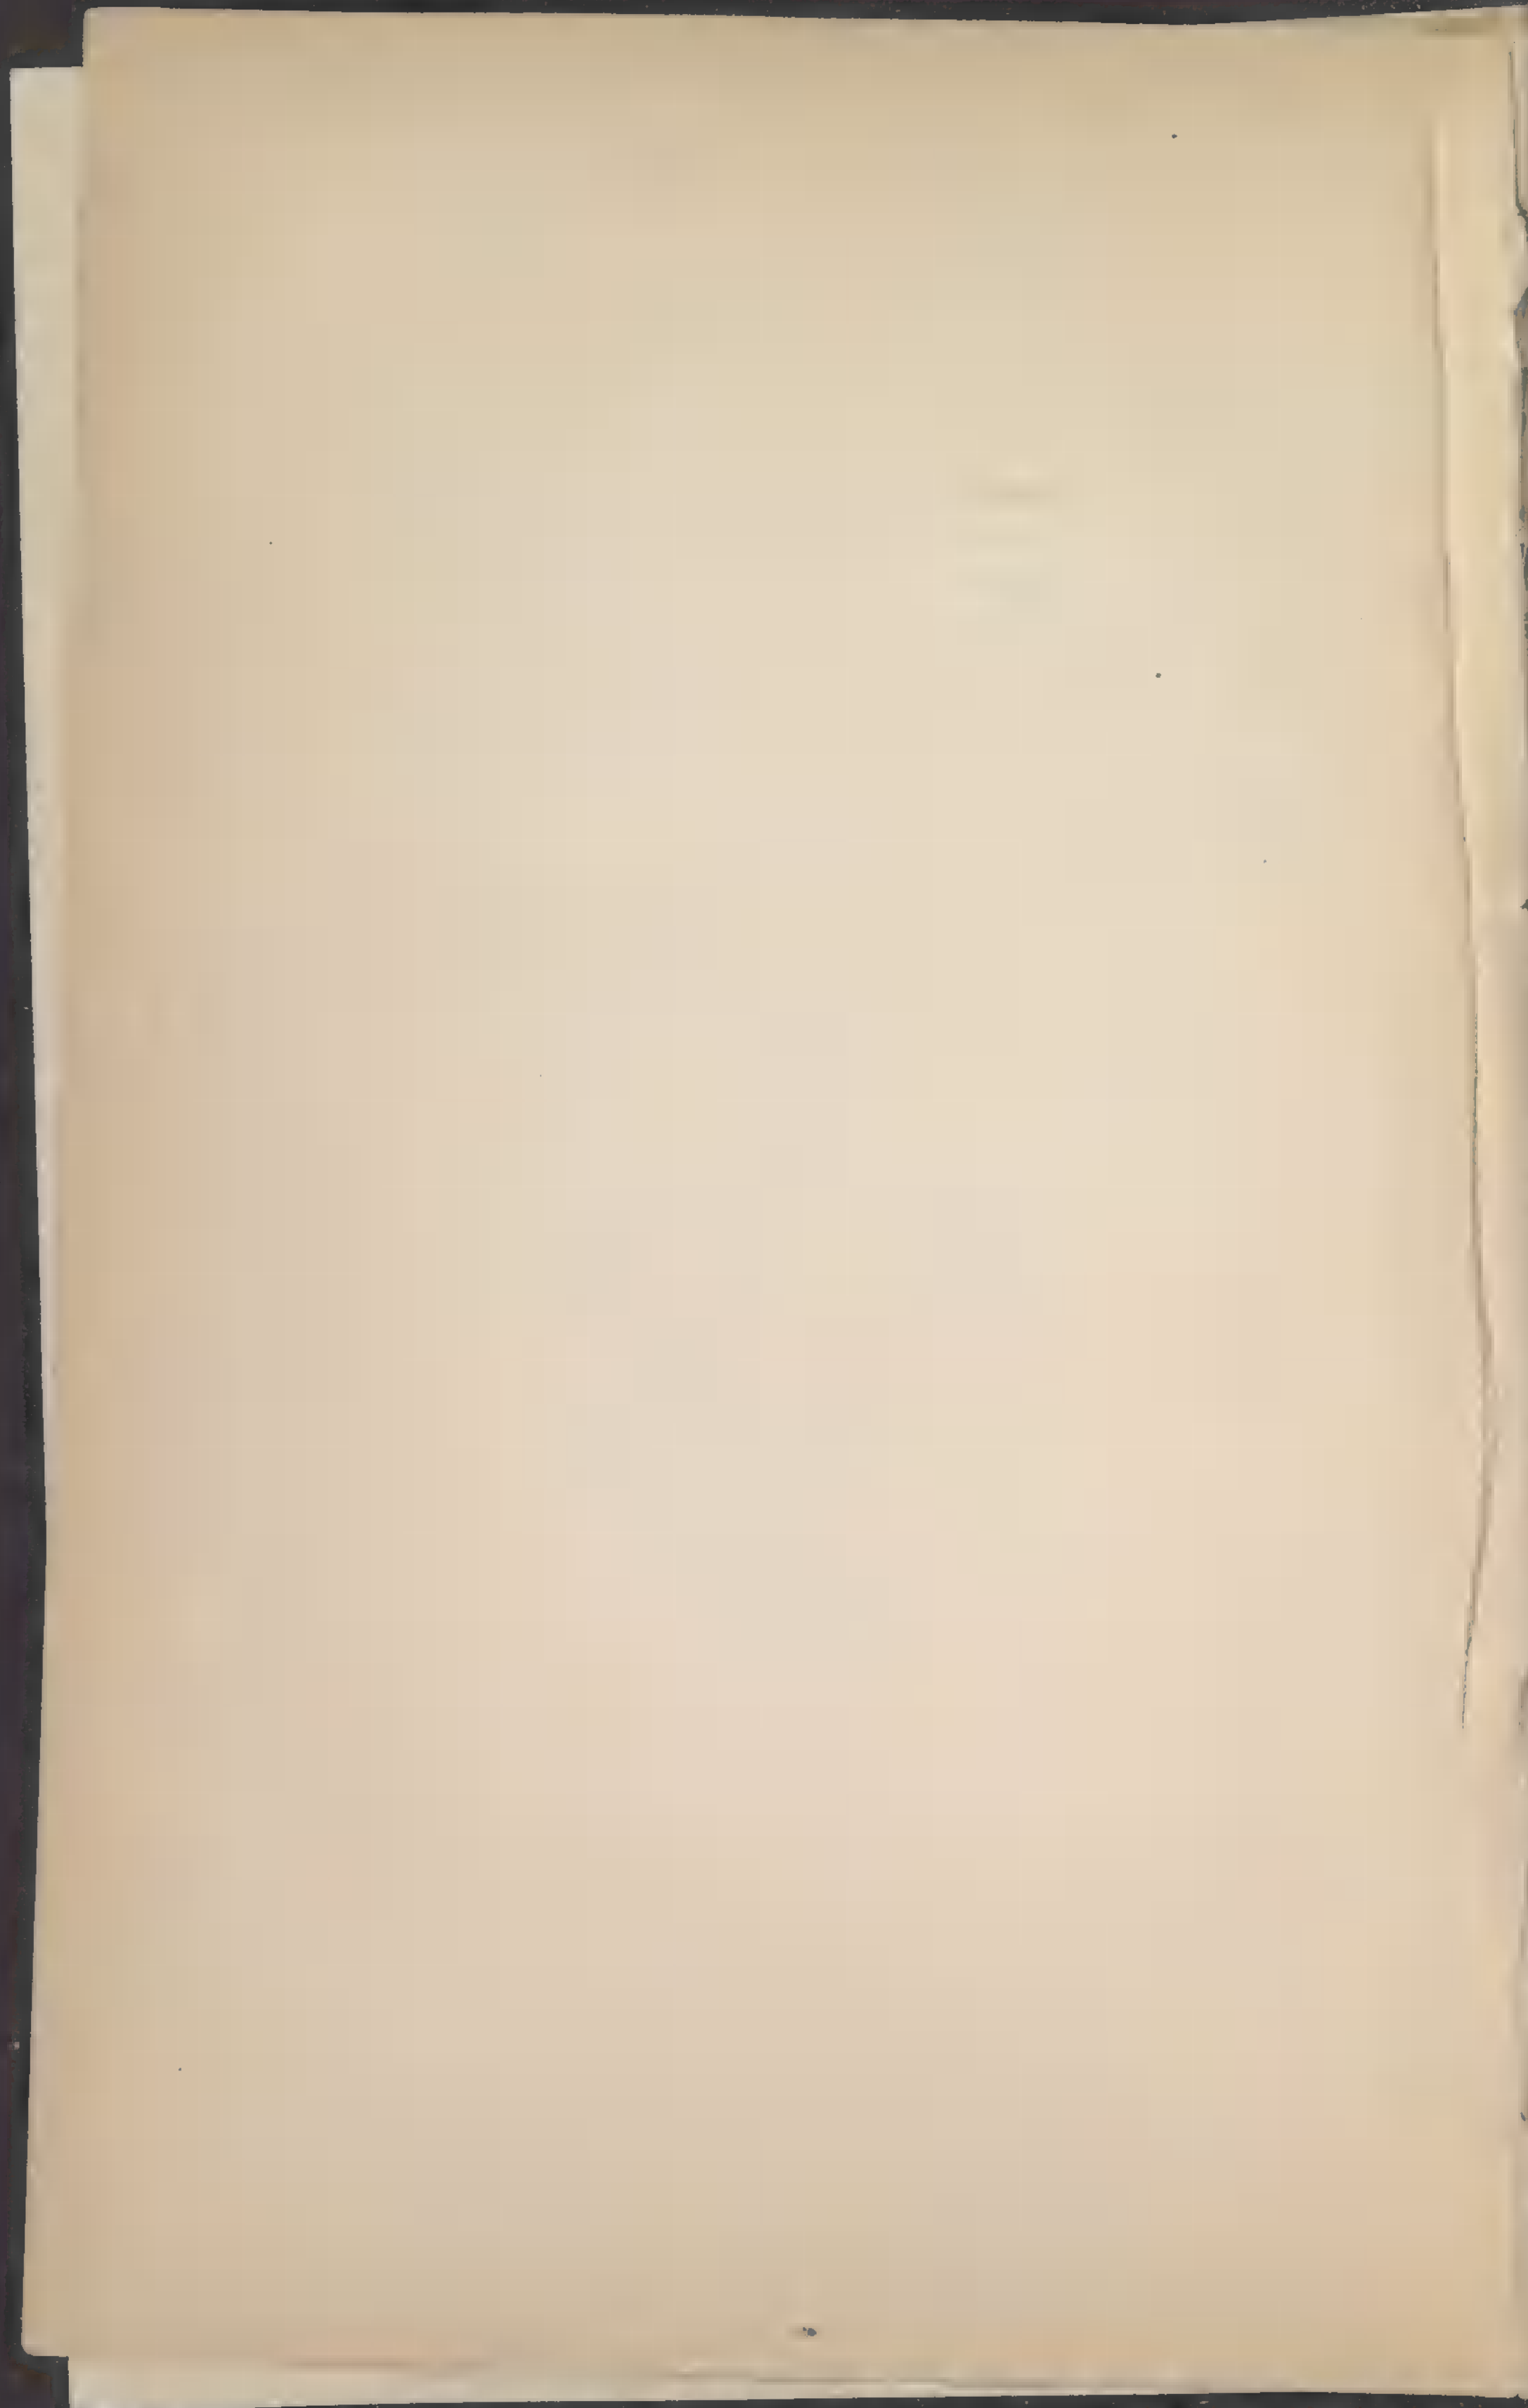

Ample stairways and corridors, and full facilities for access and egress, are provided at the least expense of room; the plan giving light and ventilation for every apartment in the edifice.

It has been the constant purpose of the undersigned to develop a plan which shall comprehend every thing the city may require for years to come, and so to design it

that there may be harmony and unity throughout, which will, when completed, make it an ornament to the city, and combine all the advantages of permanent value, adaptedness, and ultimate economy. The undersigned urge that to encumber the Park property with detached and dissimilar structures will be in a few years condemned, as an ill-advised and wasteful policy, while the erection of a noble and properly conceived structure, will be rewarded with the acclamations of the people, and the approbation of the future.

Very respectfully, &c.,

ALBERT GILBERT,
THOMAS R. JACKSON,
HENRI L. STUART.

DOCUMENT No. 31.

BOARD OF COUNCILMEN,

APRIL 9, 1855.

The following report of the Committee on Finance, in favor of appropriating twenty thousand dollars to the New York Juvenile Asylum, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Finance, to whom was referred the annexed communication from the Comptroller, submitting an ordinance for adoption, respectfully

REPORT:

That they have examined the statements contained therein, and find that in the year 1851 the legislature incorporated a certain number of the good and substantial citizens of our city into a corporation, denominated the "New York Juvenile Asylum," and notwithstanding there was at the time another corporation in active operation and for many years previous, styled "The Association for the Reformation of Juvenile Delinquents," having nearly, if not quite the same objects; had the legislature stopped here, your

Committee nor the tax payers of the city would have had any occasion to find fault with the establishment of such an institution, by and with the funds of private charity, but that ever meddling body with the corporate rights of this great city, without any proper memorial from the Mayor, Aldermen and Commonalty, asking or praying for the *great and inestimable boon* of being taxed a *leetle* more, added some fifty thousand dollars to the tax list, to aid this corporation in erecting a suitable building, and then also compelling the Common Council to raise, yearly, by tax, forty dollars for every pupil in such Asylum, which last year amounted to the sum of seventeen thousand one hundred and fifty-five dollars and seventy-two cents, and to over eighteen thousand dollars for the year 1855. That the objects of the corporation are noble, grand, your Committee will not attempt to deny, neither can they object to the gentlemen who have the management of the institution; but your Committee do, and will continue earnestly to protest against this continued and oft repeated, uncalled for interference of the legislature of the state with the proper powers and duties of the municipal government. It is subversive of all right; it defeats the ends and objects of all right and legitimate legislation; it brings into oft and repeated contempt the municipal legislature; it imposes heavy and unnecessary burdens upon the people, in the shape of uncalled for taxes to support and maintain several irresponsible *Boards of Officers* in our city, which have the power and authority to expend the people's money without the responsibility of raising it from the overtaxed citizens; indeed, all of the important legislation for this much abused city is done at Albany, by men who know about as much of its wants, its requirements, its ca-

pacities, its means, as they know of the man in the moon; and yet the municipal government will not move in the matter. It has become a mere automaton, a puppet, which moves as the wire-pullers at Albany moves the wires; it raises and apportions taxes for other irresponsible bodies to spend, squander, throw away, for aught they know; for they have not even the poor and unsatisfactory power to compel those several *Boards of Officers* to render them an account of what they do with the immense sums the Common Council appropriates to their use, not by their own free action, but by *compulsion of the Legislature of the State of New York, at Albany assembled.*

Your Committee are of the opinion that the legislature could have passed a law compelling the parents and guardians of children in the city of New York to send them to our public schools until they had attained a certain age, and enforced the law by sufficient penalties, the evils complained of, in regard to children growing up in ignorance and vice, would have been much more effectually reached in such manner than by the present mode. Parents of offspring have a duty to perform to society, and where misfortune does not intervene, they should be compelled to perform that duty; and when government or corporations intervenes, and relieves them from that responsible duty, society at large is a sufferer, and a large portion of the community becomes demoralized.

Compelled, as your Committee are, to report in favor of the appropriation asked for in the communication annexed, by a state law, which is all controlling, they feel the disgrace deeply; they feel that they, as well as the honorable and respectable Body to which they belong,

are, in this matter, mere automatons, and that our discretion or our judgment has naught to do with it; but they do urge upon this Board the necessity of asserting the almost dormant rights of this, our proud metropolis, and make them more respected by our rulers at Albany than they have heretofore been for some years past.

In conclusion, your Committee reluctantly recommend the adoption of the accompanying ordinance, appropriating *twenty thousand dollars* to the Juvenile Asylum.

JOHN C. WANDELL,	}	<i>Committee on Finance.</i>
BENJ. F. PINCKNEY,		
W. M. VERMILYE,		
J. W. RANNEY,		
P. M. SCHENCK,		

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, {
City of New York, April 2d, 1855. }

To the Common Council:

The officers of the Juvenile Asylum, organized under an act of the Legislature, passed in 1851, are desirous of receiving the amount which the city contributes toward the support of the establishment, in quarter yearly payments. The request is a reasonable one, and a compliance with it can subject the treasury to no inconvenience.

The twenty-eighth section of the act of incorporation provides that there shall annually be raised, by tax, and paid to the said Asylum an amount equal to *forty dollars* per annum, for each pupil supported and instructed, and at that rate for a fractional part of a year. The number of boys received during the first year, according to a return made to this department, was six hundred and twenty-six; and the second year the number reported exceeded eight hundred. The last appropriation was fifteen thousand five hundred dollars, which was one thousand six hundred and fifty-five dollars and seventy-two cents less than the Asylum was entitled to receive on the returns made to this department.

To provide for this deficiency, and for the increase of the present year, it is respectfully recommended that the sum of twenty thousand dollars be appropriated for the use of the New York Juvenile Asylum.

The act of incorporation contains the necessary authority for levying the tax; the twenty-eighth section declaring that the Board of Supervisors shall, in each year, levy and collect, by tax, an amount equal to forty dollars for each boy supported at the Asylum.

The draft of an ordinance for the appropriation is herewith submitted.

A. C. FLAGG, *Comptroller.*

AN ORDINANCE

MAKING AN APPROPRIATION TO "THE NEW YORK JUVENILE ASYLUM," FOR THE YEAR 1855.

Be it ordained by the Mayor, Aldermen and Commonalty of the city of New York, in Common Council convened:

That the sum of twenty thousand dollars be, and the same is hereby appropriated for and on account of "The New York Juvenile Asylum," for the year 1855.

DOCUMENT No. 32.

BOARD OF COUNCILMEN.

APRIL 9, 1855.

The following report of the Committee on Finance, in favor of paying claim of Messrs. De Mott, Nicholson and Smith, late Assessors, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN. *Clerk.*

The Committee on Finance, to whom was referred the annexed communication from the Comptroller, relative to the claims of the Assessors of the Street Department, respectfully

REPORT:

That on an examination of the statements contained therein, they are satisfied that the arrangement entered into by that officer with Messrs. De Mott, Nicholson and Smith, for the settlement of their claims against the city, is equitable and right; your Committee in this connection cannot withhold from the Comptroller the expression of their approbation of the course he has pursued relative to the claims of those officers, and the success that has attended his endeavors to protect the interests of the tax and assessment payers, in this instance, must be highly gratifying to himself.

For many years past great abuses have crept into the Street Department of our city, by which property-holding citizens have been compelled to pay enormously for improvements, such as opening and grading streets, &c., and although many strenuous efforts have been made to introduce reforms in its management, yet they all appear to have resulted in a similar manner to the present reform charter, which was initiated with such joyous exultation by almost the unanimous voice of the citizens,—that is by making bad worse.

Previous to the amended chapter of 1849, the whole expense to the city and property holders, incurred for making up and apportioning the assessments in the Street Department, was eight hundred and fifty dollars per annum; under the present law, according to the Comptroller's Report, page 17, the three Assessors received from the property-holders, for the year 1854, the large sum of ten thousand five hundred and forty-three dollars, making in that one bureau an increased expenditure of nine thousand six hundred and ninety-three dollars per annum, which, in the opinion of your Committee was entirely uncalled for, and not at all needed by the requirements of the public service.

In the management of the trust accounts with its citizens, the municipal government should at all times be guided by the principles of strict economy and justice; the property of our citizens is placed under the control of its officers, in whose integrity and honesty they should be able to place the most implicit reliance; when that reliance proves to have been misplaced, as in a case recently before the public, suspicion is engendered in the public mind, and a feeling of insecurity takes the place of a feeling of con-

fidence, and the citizens imagine that every measure brought forward by the city government, is fraught with corruption, and intended to filch from them their hard earned gains.

Too much legislation has been the bane and curse of this great city; law after law has been enacted to suit or meet this or that particular case or emergency, until we have such a mass of laws that "confusion has become worse confounded," and it would be extremely difficult for the most talented lawyer to inform us what the laws governing this city are; for this state of things a remedy should be devised; our whole system should be revised and reformed; the charter of the city should be entirely remodeled, and the legislature of the state prevented from interfering with the vested and chartered rights and privileges of the city and its government; then, and not until then, will the city of New York become as celebrated for its good and popular government, as it has now become notorious for its bad and corrupt acts. In conclusion, your Committee recommend the adoption of the following resolution:

Resolved, That the Comptroller be, and he is hereby directed to draw his warrant in favor of Messrs. De Mott, Nicholson and Smith, the late Assessors in the Street Department, for the sum of two thousand one hundred and seventy-nine dollars and eighty cents, and take their receipts in full for the same, and charge to the proper account.

J. C. WANDELL,	} Committee

W. M. VERMILYE,	
J. W. RANNEY,	
P. M. SCHENCK,	
	on
	Finance.

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE. {
New York, March 10, 1855. }

To the Common Council:

The Comptroller respectfully submits to the Common Council the following statement in regard to the final adjustment of the claim of Messrs. De Mott, Nicholson and Smith, late Assessors in the Street Department.

In the Comptroller's annual report for 1853 (dated January 30, 1854), pages 27, 28, it is stated, that in February, 1853, the Assessors presented a claim of six thousand and one dollars and fifty cents for fees, which the Comptroller refused to pay, on the ground that the account was made out at the rate of three per cent. on the total amount of the assessments, when the act, chapter 430 of the laws of 1851, limited the fees to one per cent. The Assessors prosecuted the city on one of the items to test the question, and the Court of Common Pleas decided that they could legally charge for fees, since the passage of the act referred to, only one per cent. The sum paid to the Assessors, on the sum referred to, at the rate of one per cent. was two hundred and thirteen dollars. This sum being deducted from six thousand and one hundred dollars and fifty cents, leaves five thousand seven hundred and eighty-eight dollars and fifty cents, one-third of the latter sum, estimating the fees of the three assessors at one per cent., is one thousand nine hundred and twenty-nine dollars and fifty cents. This sum divided among the three assessors gives to each six hundred and forty-three dollars and sixteen cents. Mr. De Mott, in

1854, received the amount of six hundred and forty-three dollars and sixteen cents, and gave a receipt in full for his share of the original account for six thousand and one hundred dollars and fifty cents.

Since the adoption of the resolution by the Common Council, on the 17th of February, 1855, to pay back to the property-holders the sum of four thousand dollars (or so much of it as has been paid into the treasury) thus wrongfully taken from them, the other two Assessors have concluded to settle their claim for the six thousand and one hundred dollars and fifty cents, on the same terms as those acceded to by De Mott; and accordingly they were paid at that rate, on the 9th instant, and gave a receipt to the Corporation in full for the original claim of six thousand and one hundred dollars and fifty cents.

In the report of the Comptroller, before referred to, page 28, it is stated that these Assessors "also claimed, in twenty-two other cases, the total sum of nine thousand seven hundred and eighty-four dollars and fifty-cents, which includes seven thousand two hundred and sixty-six dollars for the assessment on section C of the Second avenue, which embraced a sum of two hundred and twenty-one thousand eight hundred and seven dollars and sixty-six cents, assessed on the city. They have proposed to settle, on receiving the two thousand dollars and fifty cents on the claim of six thousand and one hundred dollars and fifty cents, and one per cent. on the subsequent claim of nine thousand seven hundred and eighty-four dollars; the total payment being equal to five thousand two hundred and sixty-two dollars. Although this is ten thousand five hundred and twenty-four dollars less than the original

claim, the Comptroller has declined to recommend to the Common Council any allowance for the assessment of two hundred and twenty-one thousand dollars on the city, and has offered to pay to the Assessors two thousand dollars and fifty cents on the original claim, *and to recommend to the Common Council to authorize a further payment of one per cent. on all the assessments subsequently made by them, equal to two thousand one hundred and seventy-nine dollars and eighty cents.*"

The three Assessors, having adjusted the first claim according to the views of the Comptroller and the decision of the court, have made a written communication to this department, which is annexed, marked A, in which they express their willingness to settle the whole matter on the terms stated by the Comptroller in the preceding extract from his report; and this communication is made in accordance with the assurance there given.

The claim for an allowance of one per cent. on the twenty-two works referred to, is based on the fact, that the Assessors, Messrs. De Mott, Nicholson & Smith, made out the assessments, as I am informed, and presented them to the Common Council for confirmation. The Assessors were superseded in January, 1853, and during that month an ordinance was passed by the Common Council to strike the names of Messrs. De Mott, Nicholson & Smith, from the twenty-two assessments, and to insert in lieu thereof the names of their successors, Messrs. Gage, McNeill and Dodge.

It appeared to me at the time this transaction took place, and nothing has since occurred to change my views, that the Assessors who made out the estimate, and report-

ed the same to the Common Council for confirmation are justly entitled to the legal fees established as compensation to the Assessors.

It is on this principal that the Comptroller recommends the payment of one per cent. to Messrs. De Mott, Nicholson & Smith, on all the assessments, where the work was done by them, amounting, as was computed in the annual report, to the sum of two thousand one hundred and seventy-nine dollars and eighty cents.

This sum does not include any thing for the amount of two hundred and twenty-one thousand eight hundred and seven dollars and sixty-six cents, left for the city to pay on grading section C, of the Second avenue.

All which is respectfully submitted.

A. C. FLAGG,
Comptroller.

(A.)

To A. C. FLAGG, ESQ., *Comptroller*.

SIR:—With a view to a compromise and settlement of our claims against the Corporation, in the twenty-two cases referred to in your report for 1853, page 28, we are willing to accept our proportion of the sum of two thousand one hundred and seventy-nine dollars and fifty cents, being seven hundred and sixty-two dollars and fifty cents each, in full of our demand on account of those cases. We would therefore request you to use your influence to procure the allowance of the above named sum, as proposed in your report. But we would have it understood, that if a settlement is not effected on the above named basis, within a reasonable time, this note is not to prejudice our claim against the city.

Very respectfully,

Your obedient servants,

SAMUEL H. DE MOTT,
FRANCIS NICHOLSON,
ISAAC WM. SMITH,

Ex-Assessors in Bureau of Assessments.

NEW YORK, March 9th, 1855.

DOCUMENT No. 33.

BOARD OF COUNCILMEN,

APRIL 16, 1855.

The following report of the Committee of Lands and Places, in favor of allowing W. Latting to erect a monument in Washington square, in commemoration of Gen. George Washington, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Lands and Places, to whom was referred the petition of Waring Latting and associates, for the use of public ground on which to erect a building as ■ Washington Monument, &c., &c., respectfully

REPORT:

That they have carefully examined the subject and believe that the plan and objects of said petitioners, if successfully carried out, would result greatly to the benefit of the city, not only in the adornment thereof, but in the more direct and substantial advantage of its general usefulness.

Your Committee consider that in the construction of this building employment will be given to hundreds of mechanics and laborers, and that the expending a million of dollars in this way cannot fail to materially benefit a great number of that worthy class of citizens. That after its completion it would, through its great attractiveness, be the means of drawing many persons to the city, to the general benefit of trade, in a greater or less degree, throughout every department of business. That the setting apart certain portions of the building for the purpose of exhibiting and preserving models, drawings, &c., of all the practical and useful inventions and improvements made in the country, would be a striking and very appropriate feature, and would constitute in itself a great school of instruction in the mechanic arts, as well as an exhibition of the skill and inventive genius of the nation. That an extensive gallery of statuary is also contemplated, where we may walk among and gaze upon the marble representations of our departed, but illustrious heroes and statesmen, the founders and defenders of our national institutions, is an object every way worthy of the highest commendation. Finally, that all the various objects contemplated are so appropriate and harmonize so well as not to detract from the one great object, viz., the erecting a monument to the father of his country, our great and glorious Washington; an object so desirable, so worthy and so great, we cannot withhold our entire and unqualified approbation; we therefore submit the following for adoption:

Resolved, That a circular plot of ground measuring two hundred feet in diameter, and laying in the centre of Washington square, together with the right of way, fifty feet in width, from the same to the south-easterly gate

fronting East Washington place, be, and is hereby appropriated to the object contemplated in the above petition, and the use thereof granted to said petitioners, for the term of thirty-five years, on the following conditions, to wit:

1st. That the said petitioners shall not take possession of, or occupy, or in any way disturb said ground until there shall have been funds collected for the purposes of building, to the amount of one hundred thousand dollars.

2. That, if at the expiration of five years from the date of said grant, and the one hundred thousand dollars shall not have been raised, and the work of building shall not have been commenced, then said grant shall be null and void.

3d. That at the expiration of the thirty-five years from the date of said grant, the said petitioners or their assigns, shall relinquish all claims to said building and all its appurtenances, and the same to be, and thereafter to remain the property of the city of New York.

Resolved, That the Counsel to the Corporation is hereby directed to draft the necessary grant, in accordance with the resolution and conditions hereinbefore set forth.

D. COLEMAN, THOS. PRENTIS, ALFRED BRUSH, WM. FLOYD,	} <i>Committee on Lands and Places.</i>
--	---

The Committee to whom the communication from Waring Latting was referred, and to whom the original petition of the same was recommitted, respectfully

REPORT:

That in said communication they find additional reasons and evidence, serving only to strengthen their convictions of the correctness of their former report. That they have reconsidered the subject thoroughly, and that from all the information they have been able to collect from every source, they believe that under the conditions and restrictions mentioned in their former report, the grant therein proposed will ultimately be of great benefit to the city, and find, therefore, no reason to alter their report on said petition.

Your Committee also believing that the subject matter contained in the communication referred to, is calculated, properly, to influence the members of the Board, generally, in their determination upon the subject, would therefore respectfully recommend the same to their attention and careful consideration, by adopting it in, and as a part of this, their report; and your Committee, in view of the above, recommend the adoption of the resolutions attached to their said former report.

D. COLEMAN,	} <i>Committee</i>
ALFRED BRUSH,	
WM. FLOYD,	
THOS. PRENTIS,	
	<i>on Lands</i>
	<i>and Places.</i>

To the Mayor and Common Council

of the city of New York:

The petition of Waring Latting and associates, shows that they have projected a plan for the erection of a building designed to answer the purposes of a Washington monument, a grand national monument, and a museum of arts and sciences, and many other purposes of a more strictly utilitarian character.

A perspective representation and partial description of the building is herewith presented.

Your petitioners believe that the same would not only be a great ornament to the city, but that it would directly and indirectly benefit the citizens of New York generally, in many ways, so apparent to your Honorable Body as to make an enumeration of them here entirely unnecessary.

Your petitioners also believe that Madison square, in this city, would be the most suitable location for said building.

And your petitioners propose, therefore, that your Honorable Body should grant to them the use of so much of the public ground in said square, (or some other of the public squares,) as would be necessary for that purpose, on the condition that the said building, together with all its appurtenances shall become city property at the expiration of thirty years after its completion.

Your petitioners would also propose and suggest to your Honorable Body the propriety of making the city treasury the place of deposit for all the funds raised for this purpose, to be paid by the Comptroller, to the order of your petitioners, as the progress of the work may require.

All of which is most respectfully submitted,

WARING LATTING,
67 West Thirty-seventh street, N. Y.

*To the Honorable Board of Councilmen
of the city of New York:*

GENTLEMEN:—I would most respectfully beg the privilege of calling your attention to a subject already before your Honorable Board, for the purpose of offering some additional explanations of the plans and objects contemplated by me in the undertaking to which the subject now under your consideration relates. I refer to my petition for public ground on which to erect a Washington monument, &c.

That petition was received by you and referred to the Committee on Lands and Places, which Committee after due consideration and examination of the subject, and after having received from me such further and particular explanations as could not consistently be given at length in connection with the petition, finally reported favorably upon the subject, offering at the same time for your adoption a resolution, granting for said purpose a certain portion of Washington square, under the reservation of the fulfilment on my part of certain very wise and proper conditions.

This report was received by you, and referred to the Committee of the Whole, and by a resolution adopted in said Committee, it has been laid on the table.

Thus far I have watched the progress of the subject with great interest, and now that it has been laid on the table I am uncertain as to the real intention of your Honorable Board, with reference to the same; whether I am to consider that it is your intention to take no further action on it and that you consider it as finally disposed of, or whether, considering the great importance of the subject you

are only delaying action upon it in order to fully possess yourselves of all the facts that may have a practical connection with the subject, so that your final action upon it may be such as to meet your own future approbation, not only, but likewise, that of the great majority of your fellow citizens. But when I consider the manifest injustice, the evident want of, not to say contempt for, all the higher and more noble aspirations of patriotism which must be involved in the hypothesis, based upon the former supposition, I cannot for a moment entertain it; I therefore unhesitatingly abandon it, as alike unworthy of your adoption and my conception and cling with unyielding tenacity to the latter.

With full confidence then that the position I have assumed, this subject as occupying in relation to yourselves, is the true one; I cannot imagine you will deem me obtrusive in offering, by way of farther explanation, a few additional reasons in support of the desirableness, practicability and feasibility of the work contemplated.

First, then, as to the *desirableness* of having in our great city, the empire city, the great commercial metropolis of this great republic, a monument to him who has been with so much propriety called the "Father of his Country." Those of you who remember the procession formed by the thousands of the citizens of New York and vicinity, who, some few years since marched up to Hamilton square, and with all due and appropriate solemnities, proceeded to lay the corner stone of the Washington monument, will scarcely doubt, that this object was at that time, at least, considered a desirable one. But believing that it must strike you as supremely ridiculous, that any

one should undertake to prove that which is as self-evident as the simplest mathematical axiom. I shall trouble you no farther on this point.

But the *practicability* of this work is a matter of greater importance, and one upon which, in the minds of those not thoroughly conversant with the subject, questions may very naturally and very properly arise calling for explanation. I have not heretofore gone into a detailed explanation of the plans and principles of the contemplated work, for two reasons:—First, because I thought they would prove rather tedious than interesting to most, if not all of you, as indeed they would be most likely to be to any but a practical mechanic or engineer. Secondly, because I thought so far as your action in the matter was concerned, it was of no consequence; inasmuch as such a structure could not be erected in the city, without being subject to the strictest surveillance of the public authorities, and must, therefore, of necessity be constructed upon correct scientific principles. For the same reasons I shall still forbear inflicting upon you any thing beyond a very general description, and answering a few questions or objections that have suggested themselves to the minds of some of the members of your Board.

In relation to the foundation, the most important part of so tall a structure, I propose to commence by making an excavation some fifteen or twenty feet in depth, and of a diameter considerably exceeding that of the building itself, to be filled with a superior quality of concrete or artificial rock up to within seven feet of the surface. On this solid bed the foundation walls will be built of heavy blocks of granite, to the height of fifteen feet or eight feet

above the surface. This foundation wall will consist, however, rather of a circular series of piers, connected by arches, both proper and inverted and on a line considerably within the extreme circumference of the concrete platform or base on which it is built. That portion of the concrete bed extending outward beyond the wall, to be covered with earth to the depth of seven feet, or even with the surrounding surface. Down through the centre of each of these granite piers will pass a substantial wrought iron shaft or shroud, branching off at the base, in various directions, like the roots of a tree and taking firm hold of the solid mass of concrete forming the base. The upper ends of these iron shrouds, where they project above the foundation wall, to be furnished with suitable contrivances for firmly and securely attaching them to the cast iron columns resting upon the wall, and which form portions of the upright part of the structure.

You perceive, gentlemen, how tedious a particular description throughout would become. I shall, therefore, let it suffice to say, that in the construction of all the upper portion of the building, I shall aim to make it, by the various means I have adopted, as nearly as possible like a solid cone of cast iron. In respect to its strength and capacity of resisting the force of the elements, how successfully may hereafter be shown by the completion of the work itself.

It has, however, been urged as an objection, by some of the members of your Board, "that it would fail in durability in consequence of the rust or corrosion of the iron," which objection I will now proceed to answer.

In the first place the building is to be entirely inclosed,

so that the outer surface only will be exposed to the constant action of the elements. All the joints are to be planed and fitted with the nicest perfection, then covered with a thick coating of paint, previous to being drawn together tightly by strong screw-bolts, so as effectually to exclude any water from entering; the entire surface to be well and thoroughly covered paint several times during the first few years, would form such a thick, hard and heavy coating, that thereafter it would only require re-touching with paint, occasionally, at distant periods, in order to keep it in a perfect state of preservation for at least *one thousand years*, and that this assertion is not mere theoretical conjecture, I will cite a few instances of evidence to prove.

First, if you examine the buildings or towers of iron, that have been erected in this city, you will find, in all cases where they have been well covered with paint, there is not the slightest indication of corrosion apparent; true, the instances I here cite are of very recent date, yet if they are to *rust away so as to tumble down in fifty years*, I think it only reasonable that they should even now *begin* to exhibit *some*, however *slight*, symptoms of decay. Examine the iron fences and railings, of the most ancient date in our city, and in all cases, where they have been kept well painted, you will find them perfect and entire, except in some instances, where, through the cutting away of the lead by mischievous boys, some points may have been left exposed and which, in consequence thereof, becoming corroded, proves nothing of course against my position. But these instances of recent date are trifling and unimportant in comparison with those I will adduce.

To pass over numerous instances where iron implements

of war, husbandry and domestic use, have been found in a serviceable state of preservation, after having been exposed, even without paint or other protection, for several hundred years, I will call your attention to the ruins of ancient Rome, where are to be seen numerous specimens of iron that formed parts of those ancient buildings, and temples, doing good service, while those buildings stood not only, but are still to be found in a very substantial state of preservation, notwithstanding their entire and continued exposure to the corrosive influence of the elements, ever since the destruction of that city by the Vandals. Again, at the cathedral of St. Peter's, there is a cast iron statue or image of that ancient and worthy personage, seated on a chair, and holding in his hand the keys of Heaven, as it is said, the whole having been exposed in the open air ever since it was placed there, at the time of the erection of the cathedral, not only, but it is also a fact, no less true than singular that this same figure was not constructed at the time of its elevation to its present position, but was in fact made by the Pagans long prior to the introduction of Christianity into Rome, as a representation of their god Jupiter, and in more modern times taken by the christians, and by them dubbed St. Peter, and placed in its present position. Again the Leaning Tower of Pisa, as is well known, is composed in part of iron on the outer surface, used as straps or bands, and without much apparent care in its preservation, is still sufficiently substantial for the very necessary and practical purpose for which it is used.

I might cite numerous other instances of an equally remarkable character in proof of the durability of iron as a building material, if it were necessary, but it seems to me

that the few I have referred to, and the many others that must present themselves to the minds of every one at all conversant with the history of the past, must be sufficient to settle this point.

The feasibility, by which I mean the practicability, of obtaining the funds necessary to complete the work, is of course, a matter of some uncertainty. Granting this, however, offers no impediment to your action on the subject, as conditions requiring fulfillment on my part, so carefully provided for by your Committee, are such, that a failure on my part, cannot possibly work any injury to the interests of the city. That is to say, your favorable action in this matter, can never become practically effective without material benefit to the city. With this view of the case, then, (and it certainly is the correct one,) it would seem strange that any question could arise as to the propriety of favorable action in the case.

The question that you have to decide, then, gentlemen, is simply and plainly this:—Whether you will do that which, on the one hand, can do no harm, in any case, but, on the other hand, may do much good, by the acquisition to the city of property to the amount of *one hundred thousand dollars*, at least, and perhaps, to *one million*, or whether you will refuse so to act.

But again, notwithstanding the general admission I make, with regard to the uncertainty of raising the necessary funds, still I could give many reasons for supposing it quite possible that it may be done, and only hope that you, gentlemen, will give me an opportunity of proving the correctness of that opinion.

Respectfully submitted, by

WARING LATTING.

DOCUMENT No. 34.

BOARD OF COUNCILMEN,

APRIL 23, 1855.

The following communication from the Counsel to the Corporation, in answer to resolutions of inquiry, with his opinion on many questions arising under the late act of the legislature, entitled "An act for the prevention of Intemperance, Pauperism and Crime," was received, laid on the table, and ordered to be printed, in connection with the opinion of the District Attorney on the subject of excise penalties.

J. A. TOWLE, *Clerk.*

OFFICE OF COUNSEL TO THE CORPORATION, {
April 19th, 1855. }

To the Honorable the Mayor and the Common Council:

I have had the honor to receive several communications from the Common Council, the Mayor, and other departments, requesting the opinion of the Counsel to the Corporation upon many questions arising under the late act of the legislature, entitled "An act for the prevention of Intemperance, Pauperism and Crime," and, as many of these

relate to the same points, I beg leave to make a general reply in one

REPORT.

First.—By the charter of Montgomerie, in 1730, it was ordained and granted that “The Mayor of the city of New York, for the time being, and no other whatsoever, shall have power to give and grant licenses, annually, under the public seal of the said city, to all such persons as he shall think fit to license, to keep a tavern, inn, ordinary or victualing house, and to sell wine, brandy, rum, strong waters, cider, beer, ale, or any other sort of excisable or strong liquors within the city of New York, by retail or the small measure, and to ask, demand and receive for every such license, such sum or sums of money as may be agreed upon, not exceeding the sum of thirty shillings for each license, all which moneys, so received, shall be used and supplied to the public use” of the Corporation.

The 25th section of the late act of the legislature having provided that no license to sell liquor, except as therein provided, shall hereafter be granted, the question arises, whether the act in that particular, unlawfully violates one of the rights of the city granted by the charter?

The power to regulate the sale of liquors has been constantly exercised by the legislature, in disregard of the charter, from the earliest period of the history of the state, after the adoption of the constitution. By the act of 1801, a Commissioner of Excise was appointed by the state, without whose license no sale could be made. By the acts of 1824 and 1825, the Mayor was deprived of his exclusive privilege, and the Alderman and Assistant of each ward was associated with him in granting licenses, and no li-

cense could be granted without the consent of a majority of them; and by the act of 1853 the Councilmen were substituted in the place of the Assistant Aldermen.

In the case of *Furman vs. Knapp*, 19 Johnson, 248, an objection was taken to the validity of the act of 1801, as superseding the power of the Mayor, and in violation of the charter. The court, however, from the evidence in the case, presumed that the Corporation had given their assent to the act, and did not deem it therefore, necessary to discuss or consider how far the legislature, without the consent of the Corporation, might modify or change the charter.

In the case of the *People vs. Morris*, 13 Wen., 325, it appeared that the trustees of the village of Ogdensburg were, by their charter, empowered to grant licenses for the sale of liquors, and that by a subsequent act of the legislature, the power was taken away, and it was contended that the act was illegal. The court, however, decided that it was a valid exercise of power on the part of the legislature, that the power conferred by the charter was wholly political, and that it was an unsound and even absurd proposition, that political power conferred by the legislature, can become a vested right *as against the government* in any individual or body of men. If the charter had granted *rights of property*, they could not be infringed; but *political power*, (and the right of licensing the sale of liquors is purely such,) were public trusts, to be executed, not for the benefit or at the will of the trustee, but for the common weal. How long it shall exist, or in what manner it shall be modified, are questions independent of the chartered corporations, and belong exclusively to the people to de-

termine, through the legislature, in the mode prescribed by the constitution.

In the case of *Satterlee vs. Sutton*, in the Superior Court, (Kent's Charter, p. 243,) it was contended that the act of the legislature, appointing measurers of grain for the city, and declaring that no other person should measure grain therein, was illegal, because it violated the charter of Montgomerie, which gave the appointment of such officer to the Corporation and their successors forever, with the right to take and to receive all fees, profits and perquisites arising therefrom. The court, however, decided that the grant to the Corporation to appoint measurers was a grant of political power, coupled with no interest, save the fees, as a compensation for measuring; that the grant was not to be considered in the light of property, or intended as a source of revenue, and that, therefore, the legislative act was valid, and the charter so far controlled.

Numerous cases might be cited to the same effect, and it may now be considered well established law that all grants of political power to municipal corporations are held at the will of the legislature, who may abolish, abridge or modify them at their pleasure.

The constitution of the state contains no provision taking away this power; it simply declares that "Nothing in the constitution shall affect any grants of land within this state, made by authority of the king or his predecessors, or shall annul any charters to bodies politic or corporate, by him or them made."

This, it will be seen, imposes no prohibition upon the legislature, and was probably inserted, from abundant

caution, that the charter of the cities should not be considered as swept away by the Revolution, which had abolished the crown and substituted a new government. (19 John. R. 249.)

But *political powers* must not be confounded with *rights of property*, such as the grants of land, the rights of ferry, the franchise of the streets, and other valuable rights, granted to the city by the charters from the crown. Such rights are protected by the Constitution of the United States, which regards them as contracts, and prohibits the legislatures of the states from passing any law impairing their obligation. (Dartmouth College *vs.* Woodward, 4 Wheaton, 518.) Over such right, the legislature has no more control than over the private rights of property held by individuals.

The right to license the sale of liquors being a *political* right, I am, therefore, of opinion, that the late act of the legislature is not an unlawful invasion of the charter.

Second. Under the existing laws, the Mayor and the Alderman and the Councilmen of a ward, or a majority of them, have the sole right to grant and revoke licenses for the sale of liquors. The 25th and 26th sections of the late act, declare that "no licenses to sell liquor, except as therein provided, shall hereafter be granted," and that this prohibition shall take effect immediately. The 2d section to go into effect on the 1st of May next, provides that citizens and electors may keep for sale, and sell liquors for certain specified purposes, upon the performance of certain conditions, approved by the Judges of the Common Pleas.

I am of opinion, that no licenses can hereafter be grant-

ed by the Mayor, Aldermen or Councilmen—and that no existing licenses can be extended—the prohibition against granting is equally effectual against the extending of licenses, all of which, by their terms, expire on the 1st May next.

Third. The 3d section of the act provides that “every justice of the peace, police justice, county judge, city judge, and in addition, in the city of New York, each justice of the Marine Court and the justices of the District Courts, and the Recorder, shall have power to hear and determine charges and punish offences under the act,” and the question is, whether the Mayor and Aldermen are embraced within these designations. They are, by virtue of their offices, justices of the peace (charter sec. 26,) and this power has not been restricted by subsequent legislation, except in regard to the Aldermen, who, by the amended charter of 1853, are not allowed to sit as judges in the Courts of Oyer and Terminer, or in the Courts of General and Special Sessions, but may exercise the power of magistrates, in the arrest, bailing or commitment of offenders. (Laws of 1853, p. 411.) But similar powers, as justices of the peace, also belong to justices of the Supreme Court and the judges of the Superior Court, who are, like the mayor and aldermen, justices of the peace, *ex officio*, (2 R. S. 704, 706,) and if the duty of executing this act is devolved on the mayor and aldermen, it must be shared in like manner by the justices of the Supreme and Superior Courts. The act, however, specifies the particular officers, to whom the power is confided, and by a well established rule of construction, the mention of one is the exclusion of others.

I am, therefore, of opinion that neither the Mayor nor the Aldermen are empowered by this act, to hear and determine the charges and punish the offences arising under any of its provisions. (People *vs.* Mayor, &c., 25 Wend. 9; Morrison *vs.* McDonald, 21; Maine 551.)

Fourth. By the 12th section of the act, certain duties are imposed upon "every sheriff, under sheriff, deputy sheriff, constable, marshal and policeman," and by the amended charters of 1830 and 1849, the Mayor is declared to be "the head of the police department" of the city, and is required "to exercise a constant supervision and control over the conduct and acts of all subordinate officers."

I am of opinion, that the Mayor is not authorized to perform any other duty under the act, than to require all policemen in his department to perform the duties enjoined upon them by the act.

Fifth. It is important that the Mayor, in his directions to the police force in his department, should guard against any infraction of that portion of the law which declares that the first section of the act "shall not apply to liquors, the right to sell which, in this state, is given by any law or treaty of the United States." None of the penalties of the act apply to such liquors, and policemen will not be authorized to seize any such liquors, or the vessels in which they shall be contained. It becomes important, therefore, to inquire what liquors are allowed to be sold by any law or treaty of the United States.

The Supreme Court of the United States, in the case of *Brown vs. The State of Maryland*, 12 Wheaton 419, have decided that an article, authorized by a law of Congress

to be imported, continued to be a part of the foreign commerce of the country, while it remained in the hands of the importer for sale in the original bale, package or vessel in which it was imported. That the authority given to import, necessarily carried with it the right to sell the imported article in the form and shape in which it was imported, and that no state, either by direct assessment or by requiring a license from the importer before he was permitted to sell, could impose any burden upon him or upon the property imported, beyond what the law of Congress had itself imposed; but that when original packages were broken up for use or for retail, by the importer, and also when the commodity had passed from his hands into the hands of a purchaser, it ceased to be an import, and become subject to the law of the state, and might be taxed for state purposes, and the sale regulated by the state, like any other property.

It is very clear, therefore, that the act does not apply to liquors in the original packages, or to importers who sell them. It will be observed, however, that the act contains a general exemption of "*all liquors*," the right to sell which is given by any law of the United States.

Now, the laws of the United States allow all imported articles of foreign commerce to be sold, but the several states may, if they think proper, forbid or regulate their sale, after the articles have been broken up from their original packages, and have entered into domestic commerce. If this law had simply declared that it should not apply to imported liquors, before they had been broken in bulk, and sold by the importers, it would simply have been a provision in accordance with the Constitution of

the United States, as expounded by the Supreme Court of the United States; it would have been merely a lawful exercise of the sovereignty of the state, to its entire extent; but it goes beyond such a declaration, and provides that it shall not apply to the sale of *any liquors*, allowed by the laws of the United States to be sold, and makes no exception, whether such liquors be in the original packages of importation, or in the hands of the importer, or subsequent purchasers. If it had been intended to limit the exception to the original packages, or to the importer, it would have so declared. The exception applies neither to the form in which, or the persons by whom, or the time, at which the liquors shall be sold, but is *general* in its terms, and applies to *all liquors* which may, *at any time*, be sold by the laws of the United States.

I am, therefore, of opinion that the Police will not be justified in attempting to enforce the penalties of this act against imported liquors, or their sale, by whomsoever made.

But upon the exemptions arising under the treaties of the United States, I beg leave to defer any opinion until I have had more time to examine them than I have been able yet to bestow.

As the penalties cannot be enforced until after the Fourth of July next, no injury can result from the delay.

Sixth.—As no parts of the act go into effect until the fourth of July next, except the second, twenty-fifth and twenty-sixth sections before referred to, it is important to inquire whether any penalties are attached to the sale of liquors prior to the 4th of July next; on that day, and for

offences subsequently committed, the penalties provided by the act apply, and not before. And if the penalties enforced by existing laws, be inapplicable, then the sales of liquors between the 1st of May and the 4th of July next, are wholly unrestricted; a delicate and important question arises whether this be so, the solution of which must depend upon a close examination of the statutes on the subject.

The sales of liquors by retail were never free within the city of New York; by the charters of 1686 and 1730, no such sales could be made without license; the acts of 1801, 1824, 1825 and 1827, after providing for the mode in which licenses may be obtained, declare, in effect, that if any person shall sell liquors, with certain exceptions, without being licensed, he shall be subject to certain penalties. The present act has abolished the licenses mentioned in these sections of the existing laws; such licenses cannot now be granted or obtained, and the question is, whether, by abolishing the license, the act has also abolished the prohibition, or whether the prohibition remains in full force. The present act has nowhere expressly repealed the existing laws; it simply declares that "all acts or parts of acts, and all charters and parts of charters, *inconsistent with this act*, are hereby repealed. The existing laws prohibit sales without a license, the present law abolishes the license, or rather, substitutes a modified and restricted license, and imposes penalties for its violation. Does the act thereby repeal the existing prohibition? Is the continuance of the prohibition necessarily inconsistent with the act? Inasmuch as the violations of the existing laws are declared to be *misdemeanors*, their prosecution belongs to the criminal department of the govern-

ment, and the consideration of this question belongs, appropriately to the District Attorney, who has delivered to his Honor the Mayor, an opinion on the subject.

Seventh—The Common Council, by the authority of the Legislature, has passed an ordinance establishing extra rents for the use of the Croton water, and has therein provided that hotels, porter-houses, taverns and groceries, shall be charged the extra rates.

It is a general principle, that no person can recover at law for any work done, or services rendered, or supplies furnished, which he shall have done or rendered *knowingly*, in aid of a business or undertaking illegal by statute.

It does not follow, however, that the occupations specified in the ordinance will be necessarily engaged in any business in contravention of the statute. Indeed, it must be presumed that such portions of their business, as are declared to be illegal by the act, will be abandoned. Water is a necessity of life, and is not used in such establishments exclusively in aid of the sale of liquors. No contract for the use of it could be avoided, unless it were clearly proved that it was made by *both parties*, with the criminal intent to aid in an unlawful traffic. No such intent would ever be entertained by, or could be proved against the Corporation, and I consider the idea quite chimerical that any such defence to an action for the use of water could be sustained.

Respectfully submitted,

ROBERT J. DILLON.

OPINION OF THE DISTRICT ATTORNEY

ON

EXCISE PENALTIES.

MAYOR'S OFFICE, }
New York, April 16, 1855. }

MY DEAR SIR:—Please inform me what will be the criminal regulations affecting the sale of liquor in this city, after the first of May ensuing, and until the operation of the prohibitory law—and what evidence is required to enforce them.

At the same time, please reply what will be the law governing the Sunday liquor traffic, until July 4, 1855.

Very respectfully, yours,

FERNANDO WOOD.

A. OAKLEY HALL, Esq.,

District Attorney.

DISTRICT ATTORNEY'S OFFICE, }
New York, April 18, 1855. }

MY DEAR SIR:—In answer to your inquiries, in note of yesterday, I have the honor to state:

The excise provisions of the Revised Statutes never applied to New York city. (See section 29 of title 9, ch. 20,

part 1.) Chartered privileges substantially regulated our excise to the year 1824. Until the recent act, the statutes of 1824, 1825 and 1833, provided excise regulations and penalties. (Hoffman's Treatise on Powers of Corp. pp. 54 and 62.) By acts of 1824 and 1825, a peculiar Board of Excise was established to give license for sale of liquor. They who were not "*licensed as aforesaid,*" or "*according to the provisions of the act hereby amended,*" and they who sold in defiance of that act, were liable to penalty and indictment. The act of 1833, page 14, gave to Corporation ordinances, which regulated licenses, etc., the effect of statutes, and raised their infraction to the grade of misdemeanors.

In the absence of prohibition, or of a license system, with penalties attached, the sale of liquor is free. It is the necessity for the license, coupled with the ability, if one chooses to obtain license, which creates the excise offences. Selling liquor—an act lawful in itself—becomes unlawful when it is transacted contrary to prescribed forms and regulations, and in the face of declared penalties of the local Board of Excise.

Section 25 of the recent act, (which section is now in force,) provides that "no license to sell liquor, except as herein provided, shall hereafter be granted." There is prescribed no mode of license under this exception, until May 1st, (even if it be admitted that the permit of section 2 is a license,) when the section 2d comes into effect.

These two sections will constitute our excise law until July 4, when the entire prohibitory law becomes opera-

tive. The penalties attached to selling without the permit of section 2, are embraced by sections 1 and 4, not to be in force until July. The penalties of our late excise laws attach to the neglect to take out the old specific license, (see section 2 of 1824, and section 2 of 1825,) and they cannot be applied in place of the suspended penalties of the new act. It was, perhaps, an omission in the legislature, when founding a new license, to give no immediate penalty. I suppose the confusion and defect to have arisen through the change from the original reading of section 25th, (which gave the act effect May 1, and placed license and penalties in concurrent operation,) to the present reading, which throws the prohibition and penalty sections, necessary to give vitality to section 2, into July, and this change was not material in respect to the penalty under the state law, but only as it affected the local excises of New York city.

You may well conceive that a naked abrogation of pilot licenses, ferry licenses, peddler licenses, etc., etc., without a substitution of new ones, or if substituting new ones, in nowise aiding them by penalty, would have the effect to make those privileges as free as by the common law they were before license regulated them.

I am of opinion, that as the law will stand from May 1 to July 4, with the old licenses expiring May 1, and no new ones permitted upon the old system, to which the late pains and penalties attached, these latter are defunct. Until July 4th shall come, there exists by law no prohibition against selling, and not until this date are the new and suitable penalties to be in force. The new permit of section 2 is yet bald, and bestows no privileges.

DOCUMENT No. 38.

BOARD OF COUNCILMEN,

MAY 9, 1855.

The following report from the Committee on Finance, in favor of concurring with the Board of Aldermen, directing the Comptroller to pay the claim of Messrs. McSpedon & Baker, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Finance, to whom was referred the annexed communication from the Comptroller, in relation to a claim of McSpedon & Baker for printing City Charters, with Kent's Notes, &c., respectfully

REPORT:

That they have carefully considered the subject matter of the communication, and also the report thereon made by the Committee on Finance, Board of Aldermen, and fully agree with the conclusions therein drawn, as to the powers of the Common Council and the duties of the Clerk there-

of, and therefore your Committee offer the following resolution for adoption:

Resolved, That this Board do concur with the Board of Aldermen, in the adoption of the annexed resolution.

JOHN C. WANDELL,	} Committee on Finance.
B. F. PINCKNEY,	
J. W. RANNEY,	
P. M. SCHENCK,	

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, March 26, 1855. }

To the Common Council:

The printers to the Corporation, McSpedon & Baker, have presented a bill of three thousand dollars for printing and binding one thousand five hundred copies of the several charters of the city. The resolution approved December 16, 1853, is as follows:

“Resolved, That the Clerk of the Common Council be, and he is hereby authorized and directed to cause to be printed and bound fifteen hundred copies of the City Charters and Kent's Notes, at an expense not to exceed the amount heretofore paid therefor, the same to include all the amendments to the present date.”

The twelfth section of the charter, however, declares, that “All work to be done, and all supplies to be furnished for the Corporation, involving an expenditure of more than two hundred and fifty dollars, shall be by contract, founded on sealed bids or proposals, made in compliance

with public notice, for the full period of ten days; and all such contracts, when given, shall be given to the lowest bidder, with adequate security. All such bids or proposals shall be opened by the heads of departments advertising for them, in the presence of the Comptroller, and such of the parties making them as may desire to be present."

If it is contended that this is printing for the legislative department, and to be done under a resolution of the two Boards, then why was a special clause added to the resolution fixing the rate of compensation? The contract for printing for the legislative department also expired in 1850, and has not been renewed, notwithstanding the requirements of the act of 1853.

As the books have been printed, and delivered, some inquiries have been made to ascertain what the probable cost to the city would have been if the work had been offered to the competition of publishers. For this purpose the copy furnished to the Finance Department was placed in the hands of a publisher of established reputation, with a request for his terms for furnishing one thousand copies, and also one thousand five hundred copies of the Charters, in all respects corresponding with the printed Charters.

The answer is as follows:

"One thousand copies of the Charters of the city of New York, delivered complete, for six hundred and thirteen dollars, as per sample shown."

"Fifteen hundred copies of the Charters of the city of New York, delivered complete, for eight hundred and seventeen dollars, as per sample shown."

On this state of facts, and in the absence of any contract, the Finance Department will not be justified in auditing and settling this account at a higher rate than the estimate put on the work by publishers of unquestionable character, who are not compelled to do work at less than remunerative prices, unless the Corporation Counsel should decide that the printer has a legal claim to three hundred and sixty-six per cent. more than other printers would charge for the same work.

A. C. FLAGG,
Comptroller.

The Finance Committee, to whom was referred the annexed communication from the Comptroller, relative to the bill of McSpedon & Baker, for printing and binding one thousand five hundred copies of the various charters of the city, with Kent's Notes, respectfully

REPORT:

That they have given the subject their attention, and that the only question at issue appears to be whether the Clerk of the Common Council shall be sustained in a faithful execution of a duty imposed upon him by a resolution adopted by both Boards, and approved by the Mayor.

It appears that by resolution, approved December 16th, 1853, the Clerk was directed to cause to be printed one thousand five hundred copies of the City Charters, with Kent's Notes, at an expense not to exceed the amount heretofore paid for the same, and to include all the amendments. In pursuance of this positive command of the Common Council, Mr. Valentine, very properly, as your Committee think, required the printers to the Corporation, McSpedon & Baker, to perform the work, which they did, with an understanding, that the price should not exceed the amount that had been allowed them for the two previous editions, which they had furnished. The books were duly delivered, and are now in the possession and use of the Common Council; but the Comptroller refuses to pay for them, without a further order from the Common Council, although the bill is duly certified by Mr. Valentine, on the ground that the work cost more than two hundred and fifty dollars, and should have been advertised for com-

petition, according to the twelfth section of the amended charter of 1853.

Your Committee do not consider the printing of this work, under the resolution which authorized it, as "work to be done," within the meaning of the twelfth section, cited by the Comptroller, as an objection of the payment of this claim. That section was evidently designed to apply to work in the ordinary acceptation of the term, which belongs exclusively to the executive departments, and cannot fairly be connected with any other. The service under consideration was performed by command, and in behalf of the legislative branch of the municipal government, as incident to the duty which it performs, and could not have been let by contract, according to the twelfth section of the charter of 1853. The printing of the Common Council does not belong to any of the executive departments, and is very properly left by the charter within its own control; and whenever its Clerk is directed to have a document printed, it is not his duty to advertise for proposals, and award it to the lowest bidder, as is the case with the heads of executive departments, unless he is especially directed to do so by a vote of the two Boards, approved by the Mayor.

Your Committee, therefore, do not think the twelfth section of the charter of 1853 any bar to the claim of McSpedon & Baker in the matter under consideration; and they cannot resist the conclusion, that the course of Mr. Valentine was entirely correct, in making his requisition upon the regular printers to the Corporation, for the work required by the resolution of December 16, 1853.

Indeed we do not see that he had any authority to do otherwise.

It is quite probable that if the work had been advertised for competition it would have been done for a less amount than is charged by the Corporation Printers, who, in consideration of the very low prices at which they perform the regular work of the Common Council, expect to be paid liberally for what is not specified in their contract; but there was no contract in this case, and the Common Council named its own terms in the resolution, ordering the services, viz:—"An expense not to exceed the amount heretofore paid for the same."

The printers executed the work under that stipulation as to price, and no other; they have made out their bill in accordance with that limitation, the Clerk has certified to its correctness, and it is plainly the duty of the Comptroller to pay it. Your Committee think the Common Council should sustain the action of the Clerk in this matter; for it will be perceived, that if the position of the Comptroller is correct, not one dollar of this claim can be paid by the city, and the necessary consequence will be, that either the printers will get nothing for their work, or Mr. Valentine will be compelled to pay, from his own pocket, the whole amount of expense thus incurred in obeying a mandate of the Common Council.

In view of the circumstances above stated, your Committee recommend the adoption of the following resolution:

Resolved, That the Comptroller be, and he is hereby directed to pay the bill of McSpedon & Baker, for fifteen hundred copies of the City Charters and Kent's Notes, fur-

nished by them pursuant to a resolution of the Common Council, approved December 16, 1853, according to the bill certified by the Clerk of the Common Council to be correct.

ANSON HERRICK, } Committee
THOS. CHRISTY, } on
SAM'L H. MOSER, } Finance.

DOCUMENT No. 39.

BOARD OF COUNCILMEN,

MAY 21, 1855.

The following communication from the Comptroller, transmitting a list of all bills paid by the Auditor, from January 1st to March 31st, 1855, was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE, }
New York, May 21st, 1855. }

A. C. FLAGG, ESQ., *Comptroller:*

DEAR SIR:—In accordance with the amended charter of April 12th, 1853, and ordinance of the Common Council of March 27th, 1854, creating a bureau, which makes it the duty of the Auditor, to state to the Comptroller, all moneys that have been paid from the treasury, once in ninety days; annexed you will find an account of every warrant drawn under their proper heads of appropriations.

JAMES TIMPSON,
Auditor Finance Department.

DEPARTMENT OF FINANCE, COMPTROLLER'S OFFICE, {
New York, May 21st, 1855. }

To the Common Council:

The thirteenth section of the amended charter of 1853, provides that the Comptroller shall report to the Common Council, once in ninety days, an account of each claim for or against the Corporation, and of the sums allowed upon each, as certified to him by the Auditor, together with the final action of the Comptroller thereon.

Herewith is presented a detailed statement of the names of the claimants and the allowances made in each case.

Respectfully submitted,

A. C. FLAGG,
Comptroller.

DOCUMENT No. 40.

BOARD OF COUNCILMEN.

MAY 25, 1855.

The following report of the Committee on Cleaning Streets, in favor of contracting the cleaning of the streets, in two contract districts, for the term of five years, was received, referred to Committee of the Whole, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

Resolved, That the Commissioner of Streets and Lamps, be directed to advertise for proposals for cleaning the streets, in all the Wards or Districts, where the Contractors have refused, or ceased to perform their duty, or where the contracts have been surrendered to the city; that said streets be cleaned according to the amended charter of the city of New York, and report to this board the lowest bids for confirmation.

J. W. RANNEY, *Councilman 42nd District.*

The Committee on Cleaning Streets, to whom was referred the subject of cleaning the streets by contract, according to the amended charter of the city, respectfully

REPORT:

That they have given the subject a careful consideration, and recommend that the city be contracted in two contract districts, and divided as follows: from Whitehall street at the ferry, running to Broadway, Broadway to Chatham street, thence to the Bowery, thence to Fourth avenue and Union square, then again taking Broadway, and running to the Twelfth Ward; they also recommend that the contract be given for the term of five years, for the following reasons, viz: That small contracts have been tested, and failed in almost every instance; irresponsible parties putting in their bids, never intending to perform their contracts, and before many months have elapsed, the city is again compelled to resume the work of street cleaning, and removing all dirt the contractors leave when throwing up their contracts. The provisions of the charter of 1853, are imperative, rendering it necessary for the Common Council to direct a contract for all labor and material exceeding in cost the sum of two hundred and fifty dollars.

The matter of cleaning the streets is a large item in the expense of the city government, which may be reduced by making the term of the contract for five years.

Contractors may then be warranted in procuring vessels suitable for carrying the manure, garbage, &c., from the city as soon as collected, to depots beyond the limits of the city, thereby removing the intolerable nuisance of depositing manure upon the bulkheads and piers.

The expense of procuring horses and carts, boats, &c., for the performance of the work, will not be enhanced by a lease of five years, above the contract for a single year, thereby causing a great saving to the city in estimating the cost of an outfit for the performance of the work. In view of these facts; your Committee offer the following resolution for adoption:

Resolved, That the Commissioners of Streets and Lamps, be, and he is hereby directed to advertise for contracts for cleaning the streets, removing the ashes and garbage according to specifications hereunto annexed, and the time for receiving proposals for such contracts, shall be immediately after the approval of this resolution by his Honor the Mayor, and duly advertised according to law, for ten days in the daily papers, and the said Commissioner of Streets and Lamps, shall submit the estimates to the Common Council for confirmation.

SPECIFICATIONS.

SECTION I.

The city shall, with the exception of the Twelfth Ward, be divided into two contract districts, known as sections one and two, or first and second districts, and run in conformity with the following boundaries, viz: commencing at the foot of Whitehall street, taking in the whole of that street to Broadway, thence running along Broadway, taking in the whole of said street, to Park row and Chatham street, including all said street to the Bowery, thence running to the westerly side of Bowery, to Fourth avenue, taking Fourth avenue to Union Square, thence taking the most southerly side of Union square to the westerly side of

Broadway, keeping said westerly line to the Twelfth Ward, this shall be known as the first district.

The second district shall comprise all that portion of the city, laying on the easterly side of Whitehall street, Broadway, Park row and Chatham street to the Bowery; the whole of the Bowery and Fourth avenue to Union square; thence running to the southerly side of Union square, to the westerly side of Broadway, taking the whole of said square and street to the Twelfth Ward, and no portion of the work in either contract shall be done by sub-contract.

SECTION II.

Each contractor, shall at his own expense, cause all streets, lanes, and avenues, and all gutters, wharves, piers, heads of slips, public lands and places, and the limits of the public markets within each respective district, to be thoroughly and properly cleaned and swept, and all the dirt, manure, ashes, garbage, rubbish, and sweepings of every kind, which may be in the same, collected in heaps, and removed at least once in each week.

And the said contractors shall employ a sufficient number of carts and cartmen, to remove, and shall remove, all ashes, garbage, offal, manure, dirt, rubbish and sweepings of every kind, nature or description, from all streets, lanes, avenues, and all gutters, wharves, piers, heads of slips, public lands and places, within their respective districts, forthwith, immediately after being collected.

SECTION III.

The said Contractors shall at their own expense, cause all dirt, filth and rubbish, of all and every kind, to be re-

moved from each of the public markets, and such other public markets as may hereafter be erected, and the limits thereof, within their respective districts every Sunday before the hour of nine o'clock in the morning, and every other day excepting Saturday, before four o'clock in the afternoon.

SECTION IV.

The said Contractors shall provide a sufficient number of horses and carts, and men to act as cartmen, to collect and remove, and shall remove forthwith, from the several streets of said city, all ashes, garbage, rubbish, sweepings of every kind and nature which may be delivered to them, or may be placed in vessels upon the side-walks, or in the area of or upon the upper area step of any dwelling house, store, or public building within the limits, of each respective contract district; and the said carts and men, shall each be subject to the approval of the Commissioner of Streets and Lamps, and shall be assigned separate districts, and shall be compelled to go entirely through each district between the hours of seven A.M. and six P.M. of each and every day, Sundays excepted.

SECTION V.

The drivers of all carts employed as ash carts, shall give notice of their approach, by ringing a hand-bell, and shall receive and take all ashes, garbage, sweepings and rubbish of every nature and description, which shall be delivered to such carts, or be placed upon the side-walks, in vessels in the area, or upon the upper cellar step of every dwelling house, public building or store, and every ash cart shall be attended by a man to help the driver.

SECTION VI.

Broadway to Fourteenth street, shall be swept and the gutters thereof be thoroughly cleaned, and all the dirt, manure, and garbage, removed three times in each week, once before Tuesday morning, and again before Thursday morning, and again before Saturday morning throughout the year, with the cross-walks of the streets intersecting the same.

Hudson street, Canal street, Bowery, Third avenue as far north as Fourteenth street, Chatham street and Grand street, from Broadway to the East river, together with the cross-walks of the streets intersecting the same, to be thoroughly swept and cleaned, and all the dirt, manure, and garbage, ashes rubbish and sweepings of every kind, or nature to be removed at least twice in each week, once before Wednesday morning, and once again before Saturday morning, in each week throughout the year, such work to be completed before seven o'clock in the morning, between the first day of May and the first day of October, and before eight o'clock in the morning between the first of October and the first of May.

Provided, however, that when such performance is impracticable from the state of the weather, the Commissioner of Streets and Lamps may, from time to time, in writing, designate a later hour for the performance of such work, or dispense with the same temporarily, but said officer should not grant any one dispensation for a period longer than one week from the granting thereof.

SECTION VII.

The said contractors shall also remove snow, ice, and other obstructions from the cross-walks and gutters, in

compliance with the ordinances of the Common Council, and shall also remove snow, hail and ice, from in front of all public buildings and places, engine houses, Station-houses, court rooms, &c., within twenty-four hours after such snow or hail has ceased falling.

And the contractors in the respective districts shall also keep the streets in their districts passable for vehicles during the winter, and clean all gutters intersecting streets; the Street Inspector must see all work properly done, according to specification.

SECTION VIII.

The said contractors shall, at their own expense, carry off, in a sufficient number of boats or vessels, all dirt, manure, garbage, ashes, filth, rubbish and sweepings of every kind or nature, as fast as the same can be collected; and no deposit of any such dirt, manure, garbage, ashes, filth, rubbish or sweepings of any kind or nature, shall be made by any contractor, or person in his employ except such as is suitable and proper to fill up low ground or sunken lots, may be used for such purpose, with the consent of the owner of such low ground or sunken lots, and of the City Inspector.

The department will furnish the right to use the following berths to the contractors respectively, for the loading of their vessels, but the contractors must take upon themselves to secure their rights from unlawful infringement:

- 1st Bulkhead between piers 22 and 23.
- 2d Pier foot of Roosevelt street.
- 3d do. " Watts "

4th	do.	foot of Jefferson street.
5th	do.	" Jane "
6th	do.	" Stanton "
7th	do.	" Eighteenth street, North river.
8th	do.	" Sixteenth " East river.
9th	do.	" Forty-seventh street, East river.

SECTION IX.

Every cart employed by a contractor shall be submitted to the Superintendent of Streets, for his approval, before the same is used on a district, and shall again be submitted every six months thereafter; and he shall cause to be painted thereon his approval, and the date of such approval; and no cart, not having such approval, shall be used or employed in a district.

SECTION X.

If any contractor shall fail or neglect to perform any duty which he is required to perform by this contract, for the space of twenty-four hours after he shall be notified so to do, by notice in writing left at his residence, or usual place of business, by the Superintendent of Streets, then such Superintendent of Streets shall cause such duty to be performed, and in case the Superintendent of Streets should fail to notify the contractor of such failure or neglect, or having notified such contractor in the manner prescribed, has failed, or neglected to have such duty performed, it shall be the duty of the Mayor to cause him to be notified of his failure or neglect, in writing at his office, and should the Superintendent of Streets continue for twenty-four hours thereafter, to neglect or fail in the performance of his duty, then the Mayor shall cause the same to be done.

When the Superintendent of Streets shall have performed the duty, as hereinbefore directed, the reasonable expense thereof shall be certified in writing, under oath, to this department, by that officer. And when the Mayor shall have caused the duty to be performed as hereinbefore directed, the reasonable expense thereof shall be certified under oath, by that officer to whom the Mayor has intrusted the performance of the duty, in writing, to the Department of Finance; whereupon the Department of Finance shall cause such expense to be paid, and to be deducted from the next succeeding payment, otherwise due to the contractor, and should the next payment be insufficient to reimburse the expense so incurred, then such deficiency shall be deducted from any succeeding payment, and such contractor shall lose the amount of such expense, and should the payments to become due to such contractor be insufficient to reimburse the city for the expense so incurred, the Comptroller shall direct such action to be taken in law, as may be necessary to recover such deficiency from the sureties of such contractor.

If any contractor shall fail or neglect to clean any part of his district, within the time above specified, any citizen may, at his own expense, and without notice to the contractor, cause the same to be cleaned at his own expense, and may have and dispose for his own account, of the manure or other substance thereby collected.

SECTION XI.

If any contractor shall refuse, or fail, or neglect to comply with the requirements of these specifications or any part thereof, for forty-eight hours after being notified in

writing, to perform the same, or any part thereof as aforesaid, by the Commissioner of Streets and Lamps, or the Superintendent of Streets, or the captain of police of the ward in which such neglect or failure occurs, such notice to be served by leaving the same at his house or office; then the said Commissioner of Streets and Lamps shall, in writing, declare the contract forfeited, and said contractor shall not be entitled to claim any moneys upon the said contract after the time when the said notice was served upon him as aforesaid, nor shall he be thereafter entitled to any profits, benefits, or advantages to be had or derived from such contract. And it shall thereafter be lawful for the Commissioner of Streets and Lamps to procure such work, contracted for, to be done by other persons, pursuant to law and the ordinances of the Common Council; and the contractor refusing or failing to perform his said contract shall be liable to pay to the Corporation of the city of New York, all such loss or damage as they may have sustained by reason of such refusal, neglect, or failure.

The said contractors shall carry away in their boats, and shall receive from the Croton Aqueduct Department, all dirt, rubbish and filth taken from the receiving basins and sewers within their respective districts, free from any charge or expense to the city or said Croton Aqueduct Department.

SECTION XII.

It is expressly understood that violations of the city ordinances shall not excuse the non-performance of any of the work hereinbefore specified.

SECTION XIII.

Contractors will be allowed to use the Croton water from hydrants within their respective districts, for sprinkling the streets in advance of the sweepers employed therein, but not more than one hydrant to be opened at a time, and this only so far as to enable him conveniently to fill his watering pots, and to be carefully closed when left. The said hydrants not to be used to wash the filth of gutters into the receiving basins of public sewers, nor shall hose be used on the said hydrants for washing or sprinkling the streets, the said contractors to pay for repairs by the Croton Aqueduct Department of hydrants damaged by the said contractors or the men in their employ.

The violation of the above rules or provisions shall subject the contractor offending to a revocation or suspension of this permission, in the discretion of the Croton Aqueduct Department.

SECTION XIV.

Each contractor shall give good and sufficient security, in an amount or amounts from not more than five sureties of fifty thousand dollars, for the faithful performance of his contract, such security to be approved by the Comptroller and Commissioner of Streets and Lamps; and the Comptroller shall draw his warrant semi-monthly for the proportionate amount of the contracts, after having deducted ten per cent. from each payment, until the expiration of each year from the time of the award of his contract, upon a certificate of the Commissioner of Streets and Lamps, of the faithful performance of the work. If at the expiration of each year as aforesaid, the contracts have been faithfully performed on the part of the contractors respec-

tively, to the satisfaction of the Commissioner of Streets and Lamps, and he shall certify thereto, then the Comptroller shall issue his warrant for the additional ten per cent. deducted from the aforementioned payment.

DOCUMENT No. 41.

BOARD OF COUNCILMEN,

MAY 25, 1855.

The following communication from the Street Commissioner, transmitting all the estimates, formal and informal, received by him for removing "Diamond Reef," was referred to the Committee on Wharves, Piers and Slips, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

STREET DEPARTMENT, }
New York, May 25, 1855. }

To the Honorable the Common Council:

GENTLEMEN:—In accordance with a resolution adopted by the Common Council, May 25, 1855, requesting me to report to the Common Council, all the proposals, formal or informal, for the blasting and removing "Diamond Reef," which were received and advertised to be opened on the 16th day of April last, together with such amendments to, and withdrawal of bids, as may have been made,

I herewith submit the same, being copies thereof, the originals being on file in this department.

Respectfully, &c.,

JAMES FUREY,

Street Commissioner.

STREET DEPARTMENT, }
New York, April 28, 1855. }

ABSTRACT OF ESTIMATES

Offered for Blasting and Removing "Diamond Reef."

Names of Bidders.

Cornelius Smith, (lowest bidder,).....	\$10,000 00
J. M. Cary.....	54,000 00
W. Raasloff.....	68,400 00
C. P. Johnson, informal.....	\$4 88 cubic yard
O. Sackersdorff, "	13 40 "
Husted & Kroehl, "	8 90 "
G. W. Warner, "	5 98 "
Robert Rosa, "	7 80 "
E. Ripke, "	3 80 "
Peter Shaw, "	15 60 "
James A. Craig, "	25 00 "
John B. Morrell, "	\$95,000 00 total am't
Louis T. Lehmeier, "	6 95 cubic yard

I refer to the estimate and specification, as forming part of this estimate, issued by the Street Commissioner, for estimates in relation to this contract, dated April 6th,

1855, and signed by him, for removing the reef, in accordance with the requirements of the specification, for forty thousand dollars.

CORNELIUS ^{his} × SMITH.
mark.

We hereby offer and agree to blast and remove the reef of rocks known as Diamond Reef, lying between Governor's Island and the Battery, to the depth of twenty-two feet below mean low water, and pay all damage, if any, that may occur to persons or property, resulting from the blasting or removing said reef of rocks, for the sum of eight dollars and ninety cents, per cubic yard. We also agree to comply with every requisition named in the specification of the Street Commissioner, dated April 6, 1855; and to complete the work within seven months from the date of the specification; and to forfeit and pay to the Street Commissioner, ten dollars per day, for every day we exceed the time specified in the contract for the said work, and consent that the same may be deducted from the amount to be received for said contract.

HUSTED & KROEHL,

Doing business at No. 4 Broad street.

Witness,

N. HOUSMAN,

No. 4 Broad street.

Copy of amendment of Husted & Kroehl to their bid to remove "Diamond Reef," for eight dollars and ninety cents per cubic yard, made within twenty-four hours after opening the bids, as provided for by section 501, amended charter.

NEW YORK, April 28, 1855.

JAMES FUREY,

Street Commissioner:

SIR:—It is possible that a construction may be put upon our bid that would call it "informal." The advertisement and specifications, call for the naming of the "lowest terms" of each bidder. Our lowest terms were named in the bid at eight dollars and ninety cents per cubic yard for the work, more or less of it. The work has been surveyed, and there is less than four thousand cubic yards, which would amount to thirty-five thousand six hundred dollars, nearly five thousand dollars less than the lowest gross amount specified.

We correct our bid in accordance with the ordinance, if any error of form exists, (which we contend does not,) and agree to do the work, viz: to remove Diamond Reef, in accordance with the directions of the Street Commissioner's advertisement, dated April 6th, 1855, for the sum of thirty-five thousand six hundred dollars.

HUSTED & KROEHL.

Witness,

ISAAC T. LUDLAM.

JAMES FUREY, Esq.,

Street Commissioner:

SIR:—The undersigned hereby propose to blast and remove Diamond Reef, between Governor's Island and the Battery, as per specification, signed James Furey, Street Commissioner, dated April 6, 1855, for the sum of ninety-five thousand dollars, and give such sureties as may be required.

Respectfully submitted,

JOHN B. MORRELL.

I hereby agree to blast and remove Diamond Reef, lying between Governor's Island and the Battery, to the depth of twenty-two feet below mean low water, for four dollars and eighty-eight cents per cubic yard, in accordance with the directions and specifications issued by the Street Commissioner, dated April 6, 1855.

CHARLES P. JOHNSON.

New York, April 16, 1855.

My terms for blasting and removing the reef of rocks usually called Diamond Reef, lying between Governor's Island and the Battery, as specified by the Street Commissioner, under date of April 6, 1855, are thirteen dollars and forty cents for every cubic yard, for which sum I will faithfully perform the work.

(Signed,)

OTTO SACKERSDORFF,

Civil Engineer.

New York, April 6, 1855.

I hereby agree to blast and remove Diamond Reef, lying between Governor's Island and the Battery, to the depth of twenty-two feet below mean low water, for the sum of five dollars and ninety-eight cents, per cubic yard, and to perform the work strictly in accordance with the estimate and specification of the Street Commissioner, dated April 6th, 1855.

GEORGE W. WARNER,
133 Madison street.

Estimate for blasting and removing the reef, between Governor's Island and the Battery, known as Diamond Reef Rock, per cubic yard, twenty-five dollars.

JAMES A. CRAIG.

Referring to the specification signed by James Furey, Street Commissioner, and dated April 6, 1855, I propose to blast and remove Diamond Reef, lying between Governor's Island and the Battery, to a depth of twenty-two feet, mean low water, for the sum of three dollars and eighty cents, per cubic yard, and comply with all the stipulations and directions of the Street Commissioner, as contained in the above-mentioned specification.

EDWARD RIPKE.
New York, 14th April, 1855.

Estimate for blasting and removing the reef, between Governor's Island and the Battery, known as Diamond Reef Rock, fifteen dollars and sixty cents per cubic yard.

PETER SHAW.

I hereby agree to blast and remove the reef of rocks, lying between the Battery and Governor's Island, and known as Diamond Reef, according to the specification issued by the Street Commissioner, and dated April 6th, 1855, for the sum of six dollars and ninety-five cents, for each and every cubic yard.

LOUIS T. LEHMEYER.

New York, April 13, 1855.

I agree to perform the above work, for the sum of fifty-four thousand dollars (\$54,000,) according to the specification.

JOHN M. CARY.

I offer to blast and remove Diamond Reef, lying between Governor's Island and the Battery, in accordance with the specifications issued by the Street Commissioner, and dated April 6, 1855, and execute it, following its direction, for the sum of seven dollars and eighty cents per cubic yard.

ROBERT ROSA.

I agree to perform the above-mentioned work, according to the specification, for the sum of (\$68,400,) sixty-eight thousand four hundred dollars.

W. RAASLOFF.

DOCUMENT No. 42.

BOARD OF COUNCILMEN.

JUNE 6, 1855.

The following report of the Committee on Fire Department, with an ordinance for the better regulation of the Fire Department of the city of New York was received, laid on the table, and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Fire Department, to whom was referred the communication from the Board of Representatives, in relation to providing an ordinance for the better regulation of the Fire Department, in accordance with the law passed by the late legislature, most respectfully

REPORT:

That for many years the necessity for some law of this character has been apparent, the firemen have heretofore been, in many instances, prevented from the performance of their duties by the immense crowds who usually congregate at fires, many of whom are systematic thieves, who avail themselves of the opportunity of a midnight alarm to depredate on the property of the unfortunate. Your Com-

mittee entertain a hope that the adoption of a badge, with a suitable penalty for counterfeiting the same, will effectually remedy many evils, of which the firemen and community justly complain; they therefore offer for adoption the annexed ordinance.

CHAS. J. HOLDER, } Committee
T. G. VAN COTT, } on
B. F. PINCKNEY, } Fire Department.

AN ORDINANCE

FOR THE BETTER REGULATION OF THE FIREMEN OF THE CITY
OF NEW YORK.

The Mayor, Aldermen and Commonalty of the city of New York, in Common Council convened, do ordain as follows:

SECTION 1. All members of the New York Fire Department shall hereafter, when on duty as firemen, wear the leathern cap as heretofore used, or a badge as hereinafter provided.

§ 2. The badge mentioned in the preceding section shall be made of Princes' metal, bearing the words "New York Fire Department," and each badge shall bear a distinct number in raised figures thereon, of white metal; and the badge to be worn by exempt firemen, as provided for in section third of this ordinance, shall be composed of white metal, with the figures thereon of Princes' metal, but in all other respects to conform to the badge herein described for use by the active members of the department; said badges shall be struck from separate dies, which shall be exclusively the property of the Corporation of the city of New York, and shall be placed in the custody of the Clerk of the Common Council; and all of such badges shall be

numbered as the Commissioners of the New York Fire Department may direct.

§ 3. The said badges shall be deposited with the Commissioners of the New York Fire Department, who shall have sole charge of the distribution of the same; and it shall be the duty of the said commissioners to keep a register of the names of all persons who now are, or who may hereafter become members of the New York Fire Department, and of the number of the company to which said persons are attached; and also of the names of such exempt firemen as may, in writing, be permitted by the said commissioners to wear the badges aforesaid, and of the number of the badge delivered to each of said firemen, and to each of such other persons respectively.

§ 4. It shall be the duty of the Clerk of the Common Council to certify, in writing, to the Commissioners of the New York Fire Department, the names of all persons who may be appointed firemen; whereupon it shall become the duty of the said commissioners to deliver to each of them one of the badges aforesaid; and the said commissioners shall also deliver one of the aforesaid badges to each of such exempt firemen, as may by virtue of section 16, of an act of the legislature of the State of New York, entitled "An act for the better regulation of the Firemen in the city of New York," passed March 29th, 1855, be permitted by said commissioners to wear the same.

§ 5. The badges herein mentioned shall be the exclusive property of the city of New York; and when any member of the Fire Department shall resign or be removed therefrom, it shall be the duty of the foreman and secretary

of the company to which such member was attached to make a return of such removal or resignation forthwith, to the Chief Engineer together with the badge formerly worn by such member, and the Chief Engineer shall, on the first of every month, report to the commissioners aforesaid, the names of such members of the Fire Department as shall have resigned or been removed therefrom since his last report, and shall, with said report, return to the said commissioners the badges worn by such members.

§ 6. If the foreman and secretary of any company, or either of them shall fail to comply with the provisions of of the preceding section, in relation to the return of badges, no return of members elected by such company shall be received therefrom, unless good and satisfactory cause shall be shown to the commissioners why said badges are not returned; and should any member of the Fire Department lose his badge it shall be the duty of the commissioners to inquire into the circumstances of the case, and unless they are satisfied that such loss was without fault on the part of the said member, they shall have power to suspend or remove him from the department in their discretion, but should the loss be satisfactorily accounted for to the said commissioners, then they shall have the power to grant a new badge with a different number.

§ 7. Every exempt fireman to whom permission shall be given by the said Commissioners of the New York Fire Department to wear the aforesaid badge, shall have the said permission renewed some time during the month of May in each year, otherwise such permission shall be deemed revoked, and the said commissioners may, at any time, revoke any

permission so granted by them, but in case such permission is not renewed, or is revoked, it shall be the duty of of such exempt fireman to restore the badge, previously worn by him, to the said commissioners.

§ 8. Any member of the New York Fire Department, or exempt fireman, who shall violate any of the foregoing sections of this ordinance, shall be subject to a fine of not less than twenty-five, or over two hundred and fifty dollars, and to imprisonment for the term of ten days; and all fines so collected, shall be paid over to the Trustees of the New York Fire Department Fund.

§ 9. It shall be the duty of the police, when a fire occurs, to form a line, at least two hundred feet distant from the said fire, on either side thereof; and they shall not, under any circumstances, permit any person to pass said line, unless said person shall wear the uniform or badge of the Fire Department, the uniform of the Insurance patrol, or be a member of the Common Council, a member of the Police Department, or an owner or resident of property within the prescribed lines.

§ 10. It shall be the duty of the police to promptly remove, from within the said lines, all persons not designated in the last preceding section, and all persons refusing to retire, at the request of a policeman, from within the said lines, shall be deemed guilty of a misdemeanor, and forthwith arrested.

§ 11. All ordinances, and parts of ordinances, now existing, so far as the same are inconsistent with any or all of the provisions of this ordinance, are hereby repealed.

§ 12. This ordinance shall take effect immediately.

DOCUMENT No. 43.

BOARD OF COUNCILMEN.

JUNE 8, 1855.

The following report of the Committee on Salaries and Offices, in relation to the appointment of Commissioners of Deeds, was received, laid on the table and ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

The Committee on Salaries and Offices, to whom was referred various petitions, in relation to Commissioners of Deeds, would most respectfully

REPORT:

That they have given the subject their careful consideration, and have especially taken into consideration the fitness and ability of the applicants for said office.

And your Committee would further state that they are of the opinion that persons of the highest ability and integrity should only be appointed to said office, and they have, according to the best of their ability, appointed gentlemen noted for their ability, integrity and honesty.

And your Committee, in view of these facts, would most respectfully offer for adoption the following resolution:

Resolved, That the following named persons be, and they are hereby appointed Commissioners of Deeds, in and for the city and county of New York, in place of the persons whose names are set opposite herein, whose terms of office have expired.

Appointed	Whose term of office has expired.
John W. Latson, in place of	William B. Aitkins,

DOCUMENT No. 44.

BOARD OF COUNCILMEN,

JUNE 12, 1855.

The following communication from his Honor the Mayor, in relation to Detailed Policemen, &c., was received, laid on the table, and one thousand copies ordered to be printed.

C. T. McCLENACHAN, *Clerk.*

Resolved, That the Commissioners of Police be, and they are hereby respectfully requested to report to this Board, as soon as practicable, the number of detailed policemen in the city, together with the name of each policeman so detailed, the place or places, at which he is detailed, the nature of the service to be performed by him at such place or places, and the length of time per day, and what part of the day, such policeman is engaged in his duties.

MAYOR'S OFFICE, }
NEW YORK, June 12, 1855. }

To the Honorable the Board of Councilmen:

GENTLEMEN:—I inclose herewith a statement of “the number of detailed policemen in the city, together with

the name of each policeman so detailed; the place or places at which he is detailed; the nature of the service to be performed by him at such place or places, and the length of time per day, and what part of the day such policeman is engaged in his duties," as called for from the Board of Police Commissioners, by a resolution of the Common Council, emanating in your Board.

This information is furnished by myself, as Mayor, without admitting the right of the Common Council to require it. It is the exclusive privilege of the Mayor, as head of the Police Department, to detail policemen without responsibility to any body; not even to the Board of Police Commissioners itself.

By special laws of the state, and by the charter, the organization and regulating of the police force is placed under the management and control of a Board of Commissioners, consisting of the Mayor, Recorder and City Judge.

The Common Council of this city is given, by no act of the legislature, nor by the charter, or any amendment to it, any jurisdiction whatever, over the management, direction, or *personel* of this Department.

Beyond the necessary legislation required in voting supplies, such as Station-house, &c., it has nothing whatever to do with it. It cannot appoint the Commissioners, nor take any part in the appointment, trial or removal of policemen, nor interfere with the rules and regulations adopted by them for its government. It has no power over this Department whatever, so far as the direction and exercise of its official duties are concerned.

But admitting the right of the Common Council to call for the information asked in the resolution referred to, it has applied to the wrong officers; the detailing of policemen being a prerogative resting exclusively in the Mayor, by state law, the Board of Commissioners, as such, having nothing to do with it whatever. The Mayor makes all the detailments, except officers detailed by the captains, in a few of the wards, who act as dock masters, &c.

The present Mayor, recognizes no authority in the Common Council, or in any other quarter, to supervise his conduct in the discharge of this duty. He will perform it for the public benefit, as he understands it, without being influenced by any action taken elsewhere, having for its object an interference with the course he may adopt with reference to it. The proper efficiency of this corps, is dependent upon discipline, which can be obtained and maintained only by the firm hand of unrestricted power, entirely exempt from outside influences.

The Mayor desires to be left unmolested in his exertions to improve this important branch of the public service, which has been wisely placed entirely under him. He is fully conscious of the responsibilities of the trust; and whilst ever ready to impart information to the Common Council, which may be required to enlighten it in the discharge of its legislative duties, he will also protect the department of which he is the head, and over which by law he has (with his associates,) sole control, from any efforts to subvert this authority, and thus impair the subordination, so essential to the well being of the police force. Information concerning it, cannot be required by the Common

Council for the purpose of legislation, because it has no power to legislate at all in the premises.

I have deemed it proper to state frankly, my position on this subject, that it may not be misunderstood or misconstrued in giving the information now called for.

It is not my wish to refuse any inquiry into the mode of conducting this department. The whole policy of my administration has been to throw all the executive offices open to public scrutiny. Investigation can never prove injurious to a properly conducted public office; though there are many reasons why a large police force, governed by stringent rules effecting its discipline, and under the control of one head, should not be subjected to outside agitating influences, foreign to its command, and unacquainted with the domestic *regime* and the consolidation so necessary to the preservation of proper submission to the recognized authority.

With this brief statement of my views, as to how far the Common Council can interfere in the administration of the Police Department of this city, without any intention of treating your authority with disrespect, I herewith submit the information called for.

Very respectfully,

FERNANDO WOOD,
Mayor.
